THE

ECONOMIST,

WEEKLY COMMERCIAL TIMES,

Bankers' Gazette, and Railway Monitor:

A POLITICAL, LITERARY, AND GENERAL NEWSPAPER.

"If we make ourselves too little for the sphere of our duty—if, on the contrary, we do not stretch and expand our minds to the compass of their object—be well assured that everything about us will dwindle by degrees, until at length our concerns are shrunk to the dimensions of our minds. It is not a predilection to mean, sordid, home-bred cares that will avert the consequences of a false estimation of our interest, or prevent the shameful dilapidation into which a great empire must fall by mean reparation upon mighty ruins."—BURKE.

118403 ac

VOLUME XIX.

BEING FROM JANUARY 5TH, 1861, TO DECEMBER 28TH, 1861, INCLUSIVE.

LONDON:

PUBLISHED AT THE ECONOMIST OFFICE, 340 STRAND

FIRE and LIFE INSURANCE COMPANY.

Offices, No. 1 Dale street, Liverpool; 20 and 21 Poultry, London; Sheffield, Manchester, Glasgow; Sydney, Melbourne, and New York.

Fire Policy Holders are respectfully reminded that all Christmas renewal Premiums should be paid by the 9th instant.

SWINTON BOULT, Secretary to the Company.
JOHN ATKINS, Resident Secretary, London.
1st January, 1861.

THE STANDARD LIFE

ASSURANCE COMPANY.—Established 1825.

The first Division of Profits took place in 1835, and subsequent Divisions have been made in 1840, 1845, 1850, and 1855.

The next Division will be declared in 1861, when the amount can be added to each Policy, its value taken in Cash, or applied to the reduction of future Premiums at the option of the Assured.

Accumulated Fund ..... £1,800,000.
Annual Revenue ..... £300,000.

The Company purchases its Policies on equitable terms, and grants Loans to the extent of their value at a moderate Rate of Interest.

Forfeited Policies can be revived within Thirteen Months of lapsing, on certain conditions.

Policies of Five Years' duration are eligible for admission to Select class of Assurance, which includes Free Residence in any part of the world.

One of the Medical Officers attends at the London Office daily at half-past One o'Clock.

WILL. THOS. THOMSON, Manager,
H. JONES WILLIAMS, Resident Secretary.

LONDON: 82 King William street, City.

IMPERIAL LIFE ASSURANCE

COMPANY, 1 Old Broad street, London. Instituted 1820.

DIRECTORS.

Frederick Pattison, Esq, Chairman.
Thomas Newman Hunt, Esq., Deputy-Chairman.

Thomas G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Edward H. Chapman, Esq.	James G. Murdoch, Esq.
George W. Cottam, Esq.	William R. Robinson, Esq.
George H. Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Security.—The assured are protected from the liabilities attaching to mutual assurance by a fund of a million and a half sterling, of which nearly a million is actually invested, one-third in Government Securities, and the remainder in first-class debentures and mortgages in Great Britain.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Claims.—The Company has disbursed in payment of claims and additions upwards of £1,500,000.

Proposals for insurances may be made at the chief office, as above; at the branch office, 16 Pall Mall, London; or to any of the agents throughout the kingdom.

SAMUEL INGALL, Actuary.

*** Service allowed in Local Militia and Volunteer Rifle Corps within the United Kingdom.

A. D. 1720.

Wm. Tetlow Hibbert, Esq.	William Wallace, Esq.
Jas. Stewart Hodgson, Esq.	Charles Baring Young, Esq.

MEDICAL REFEREE—Samuel Solly, Esq F.R.S.

NOTICE.—The usual fifteen days allowed for payment of Fire Premiums falling due at Christmas will expire on 9th January.

Fire and Life Assurances may be effected with this Corporation on advantageous terms.

In the Life Department, assurances are granted with participation in Profits, or, at lower Premiums, without such participation.

The Reversionary Bonus on British Policies has averaged nearly 2 per cent. per annum on the sum assured, or 48 per cent. upon the Premium paid.

Equivalent reductions have been made in the Premiums payable by persons who preferred that form of Bonus.

The future divisions of Profit will take place every Five Years.

Any sum not exceeding £15,000 may be insured on one *Life*.

This Corporation affords to the Assured—

Liberal participation in Profits,—with exemption from the Liabilities of partnership.

A rate of Bonus equal to the average returns of Mutual Societies,—with the guarantee of a large invested Capital-Stock.

The advantages of modern practice,—with the security of an Office whose resources have been tested by the experience of nearly a Century and a half.

The Corporation have always allowed the Assured to serve in the Militia, Yeomanry, or *Volunteer Corps*, within the United Kingdom, free of charge.

Royal Exchange, London.
JOHN H. HIGHAM, Secretary.

ACCIDENTS OF ALL KINDS,

and from Any Cause, may be provided against by an Annual payment of £3 to the RAILWAY PASSENGERS ASSURANCE COMPANY, which secures £1,000 at death by Accident, or £6 weekly for Injury.

No Extra Premium for Volunteers.

One Person in every Twelve insured is injured yearly by Accident.

£75,000 has been already paid as Compensation.

For further information apply to the Provincial Agents, the Railway Stations, or at the Head office, 64 Cornhill (late 3 Old Broad street).

Annual Income, £40,000.
Capital, One Million.
W. J. VIAN, Secretary.

64 Cornhill, E.C., January, 1860.

THE ROYAL INSURANCE

COMPANY, for FIRE and LIFE ANNUITIES, No. 29 Lombard street, London; E.C., and Royal Insurance buildings, Liverpool.

Capital, Two Millions.

FIRE BRANCH.

Insurances against fire are received by the Royal Insurance Company upon property, not only throughout the United Kingdom, but very largely in the Continents of Europe, Asia, America, and Australia; and numerous agents of the highest mercantile position, in all parts of the globe, place in the hands of the Directors an efficient machinery for the transaction, with peculiar advantages, of Foreign business, and for affording every benefit and facility to insurers generally.

Notwithstanding the large accessions of business made annually through a long series of years, which obviously increase the difficulty of further advances, yet the Fire Premiums of the year 1859 rise above those of the preceding year, by a larger sum than has been obtained by the increase of any single year since the formation of the Company, excepting the year 1853; disclosing an advance of 50 per cent. in three years.

The following figures exhibit the progress of the whole Fire Branch, running over the last ten years:—

	Total Premium received.	Increase of the Year above each preceding one.
	£ s d	£ s d
1850	44,027 10 0	... 9,557 19 8
1852	76,925 4 2	... 24,251 18 3
1854	128,459 11 4	... 15,895 7 0
1856	151,733 9 6	... 21,672 17 7
1858	196,148 2 6	... 21,098 17 10
1859	228,914 7 3	... 32,166 4 9

Placing the Company among the very largest offices in the Kingdom. Indeed, it is believed that there now only three offices in existence which equal it in Fire revenue.

LIFE BUSINESS.

The Directors desire to call the especial attention of the Proprietors of the Life Branch of the establishment.

The Actuary's Report on this subject is accompanied by an appendix, illustrated by two coloured diagrams, which make plain to the unprofessional eye the mortality experienced by the "Royal," as indicated by curved lines, which contrast most favourably with the former averages of mortality, also displayed on the diagrams.

The Bonus apportioned to the assured, with participation, amounts to £2 per cent. per annum, to be added to the original sum assured of every participating Policy effected previously to the 1st of January, 1858, for each entire year that it had been in existence since the last appropriation of Bonus thereon, and is one of the largest Bonuses ever declared.

The Paid-up and invested capital, including Life Funds, amounts to upwards of £700,000 sterling.

PERCY M. DOVE, Manager and Actuary.
JOHN B. JOHNSTON, Secretary.

DUBLIN STATISTICAL SOCIETY.

BARRINGTON LECTURERS ON POLITICAL ECONOMY.—The Council of the Society will, after the 1st of May next, proceed to elect a Barrington Lecturer on Political Economy for three years, at a yearly salary of £120, less income tax, payable half yearly. Candidates must forward their names to the Honorary Secretaries of the Dublin Statistical Society before the 1st of May next. Each candidate will be required to read a lecture of his own composition before the Council and Trustees of the Fund; and also, upon one day's notice, to give an unwritten lecture on a subject to be chosen by the Council. In each year the lecturer shall give four courses of public lectures, three in provincial towns, to be selected by the Council, and one in Dublin—each course of the former to be not less than four in number, and the course to be delivered in Dublin to be not less than eight in number. The lectures to be on Political Economy in its extended and most useful sense, but particularly as relative to the conduct and duty of people to one and other. An abstract of each course of lectures to be submitted to the Council, and the lecturer to be liable to removal at any time, should the Vice-President of the Society be of opinion that he has been guilty of any misconduct as a lecturer. Other particulars may be learned on application to

W. NEILSON HANCOCK, LL.D., 44 Upper Gardiner street,
JOHN E. CAIRNES, Trinity College,
MARK S. O'SHAUGHNESSEY, 34 Summer Hill,
Honorary Secretaries.

Dublin, Dec. 31st, 1860.

Charles Donaldson, Esq.	Mr Sheriff Smith Collingwood.
W. P. Howland, Esq., M.P.P.	E. W. Thomson, Esq.

BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, and £1,000 sterling, for periods of five, seven, or ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West, of ample value.

The Company by its charter is always first mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower, or the value of the land mortgaged.

The Company assumes all responsibilities and guarantees the payment of interest to the day, viz., 1st January and 1st July.

Investors incur no risk as in a railway or similar undertaking; the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done, made to the Government of Canada, prospectuses, and further information, may be had at Messrs Brunton and Son's, Stock Brokers, Auction Mart chambers, Bartholomew lane, London.

CANADA LANDED CREDIT

COMPANY.

Notice is hereby given, that the Half-yearly Interest on the Company's Debentures will be paid on and after the 1st January, on presentation of the coupons at the banking house of Messrs Smith, Payne, and Smiths.

BRUNTON and SON.

Auction Mart chambers, December 15, 1860.

KING'S COLLEGE, LONDON.—

POLITICAL ECONOMY.—The Rev. J. THOROLD ROGERS, Professor of Economic Science and Statistics, will deliver, during the ensuing Session, a Course of Twenty Lectures on some of the Leading Principles and Phenomena of Political Economy. The first lecture will be given on Thursday, January 10, at 7 p.m.

For further information apply to J. W. Cunningham, Secretary. R. W. JELF, D.D., Principal.

EAU-DE-VIE.—THIS PURE PALE

BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or secure packed in a case for the country, 39s.

HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

KINAHAN'S LL WHISKY

v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d each, at most of the respectable retail houses in London; by the appointed agents in the principal towns in England; or wholesale at 8 Great Windmill street, Haymarket.—Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons. Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON

and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of those have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

THORLEY'S ILLUSTRATED

FARMERS' ALMANACK, 77 NEWGATE STREET, CITY. This Sixpennyworth contains more valuable information to the Farmer than any other almanack even double the price, and ought to be on every Agriculturist's Book Shelf throughout the Kingdom. Post free for 8 Stamps.

AN IMPORTANT FACT FOR

ADVERTISERS.—The circulation of THORLEY'S AGRICULTURAL GLEANER is more than all the other agricultural papers put together. Advertisements, 6d per line for one insertion; 10 per cent. allowed off for a series of 13; 25 per cent. off 26, and 50 per cent. off 52 insertions. All advertisements must reach 77 Newgate street, City, on Wednesday, to be in time for that week's issue, and must be paid for in advance.

THE BANKING ALMANAC, Diary, and Directory for 1861.

Edited by D. MORIER EVANS, Author of the "History of the Commercial Crisis," "Facts, Failures, and Frauds," &c.

The Almanac is attractive and useful, as illustrating the changes and special events of the year; the Diary, carefully arranged for the use of bankers, merchants, and traders, being particularly adapted for private entries and important memoranda; and the Directory contains the whole of the information in connection with the various Banks (joint and private, foreign and colonial) necessary for the guidance of all interested in financial and mercantile operations. The miscellaneous matter includes the substantial details of the Crisis in the Leather Trade, with the Balance Sheets of the Failed Firms, the French Tariff under the Treaty, the Annual Chronology, Banking and Mercantile Retrospect, Lists of Failures for the Year, and the Fluctuations in the Funds.

London: Groombridge and Sons, 5, Paternoster row.

Now ready, price 2s 6d, scarlet cloth, gilt edges, or by post 2s 8d,

CELESTIAL PHENOMENA FOR JANUARY.

With Diagrams of the Constellations, Planets, &c., &c.

See the LONDON REVIEW.

THE PROPRIETORS OF THE LONDON REVIEW are happy to announce that arrangements have been made with some of the most Eminent and Popular Authors, by which the domestic interest of the LONDON REVIEW will be greatly increased: and while its pages will afford a complete record of the events and opinions of the day, and its articles on public affairs will appeal to the highest order of minds in Politics and Literature, they will strive to make it an indispensable companion in every household where intelligence and good taste are cultivated, and are resolved that this Journal shall stand second to none in originality and usefulness, and will spare no effort or expense to render it one of the most interesting literary publications of the day.

Orders received by all Booksellers and News Agents.

A single specimen copy sent free by post on receipt of five postage stamps.

W. LITTLE, Manager, 11 Southampton street, Strand.

MR BENTLEY'S NEW PUBLICATIONS.
January, 1861.

I.

DISCOVERY OF CARTHAGE.

CARTHAGE AND ITS REMAINS: Being an Account of Excavations and Researches on the Site of the Phœnician Metropolis and in other adjacent Places. Conducted under the auspices of Her Majesty's Government. By DR N. DAVIS, F.R.G.S. 8vo, with 33 fine Illustrations, Steel Engravings, Chromo-Lithographs, Aquatints, and Woodcuts, 21s.

II.

THE AUTOBIOGRAPHY AND CORRESPONDENCE of MARY GRANVILLE (MRS DELANY), including Letters from some of the most Distinguished Persons of her Time, being a Picture of the Court of England, and of Literary and Fashionable Society, from a very Early Part of the Eighteenth Century nearly to its Close. Edited by the Right Hon. LADY LLANOVER. 3 Vols. 8vo, 600 pages (in each), with numerous fine Engravings from Original Oil Paintings, Miniatures and Enamels, by Zincke, and some of the exquisite Portland Enamels, 42s.

III.

JOURNAL & CORRESPONDENCE of WILLIAM, LORD AUCKLAND. With a Preface and Introduction by the Right Hon. and Right Rev. the BISHOP of BATH and WELLS. 2 Vols. 8vo, with portraits, 30s.

"It is difficult to convey a clear idea of the mass of interesting matter contained in these volumes, and which is as varied as it is interesting. For general readers who love to be amused and who delight in anecdotes, sketches of character, and traits of social life, this work will have great attractions."—ATHENÆUM.

IV.

LIVES OF THE ARCHBISHOPS OF CANTERBURY, from the Mission of Augustine to the Death of Howley. By WALTER FARQUHAR HOOK, D.D., Dean of Chichester. Vol. I., in 8vo, 15s.

"If the grandeur of a drama may be conjectured from the quality of the opening symphony, we should feel inclined to anticipate from this introductory volume that English literature is about to receive an imperishable contribution, and that the Church will in after times rank among the fairest and the ablest of her historians the author of these 'Lives of the Archbishops of Canterbury.'"—ATHENÆUM.

V.

THE FIRST KING OF ENGLAND.

THE GREATEST OF THE PLANTAGENETS: An Historical Memoir. 8vo, 12s.

"We have read this historical sketch with great interest and some admiration. Our author writes vigorously and pointedly."—SPECTATOR.

"This is an excellent work, ably written, and well worth the attention of all impartial students of history and biography."—GLOBE.

VI.

GEMS AND JEWELS; Their History, Geography, Chemistry, and Ana, from the Earliest Ages to the Present Time. By MADAME DE BARRERA, Author of "Memoirs of Rachel." 1 Vol., 10s 6d.

"A really charming volume which is as amusing as it instructive, and is, in its graceful "getting up," worthy of a place in every locality, where useful books are as highly valued as carcanet or ruby. We are thankful for what the authoress has showered before us in sparkling heaps, and cheerfully recommend her pretty volume to the general public."—ATHENÆUM.

"An interesting, useful, and amusing work, the contents of which will fully repay the curiosity it excites."—MESSENGER.

VII.

NEW WORK by the Rev. DR CUMMING, D.D., F.R.S.E.

REDEMPTION DRAWETH NIGH; or, The Great Preparation. By the Rev. DR CUMMING, D.D., F.R.S.E. Fifth Thousand, crown 8vo, 7s 6d.

"There can be no doubt of the distinguished excellence of these lectures. They abound with solid instruction, wise counsel, and strong exhortation."—BRITISH STANDARD.

By the same Author, Twelfth Thousand,

THE GREAT TRIBULATION; or, The Things Coming on the Earth. Crown 8vo 7s 6d.

VIII.

THE POPULAR NEW NOVELS.

I. THE SEMI-ATTACHED COUPLE. By the Author of "The Semi-Detached House." 2 Vols., 21s.

II. GLADYS THE REAPER. By the Author of "Simplicity and Fascination." 3 Vols.

III. THE GORDIAN KNOT. By SHIRLEY BROOKS, Author of "Miss Violet and her Offers." 8vo, with numerous Illustrations by John Tenniel, 10s 6d.

IV. THE SEASON TICKET. Post 8vo, 10s 6d.

Also, just ready in 3 Vols.

CAPTAIN MAYNE REID'S NEW STORY.

THE WILD HUNTRESS. 3 Vols.

IX.

HANS CHRISTIAN ANDERSEN'S "Stories of the Sandhills of Jutland." Second Edition, in post 8vo, 7s 6d.

"Andersen's tales are welcome to every household and to every age. They stand unrivalled for delicate humour and gentle wisdom."—SATURDAY REVIEW.

X.

CURIOSITIES OF NATURAL HISTORY. By FRANCIS T. BUCKLAND, M.A., Student of Christ Church, Assistant-Surgeon 2nd Life Guards.

First Series, small 8vo, with Illustrations, 6s.

Second Series, small 8vo, with an Illustration, 6s.

"This is one of those books that quicken the powers of observation, open the eyes to discern new wonders and new beauties in the works of nature around us, and increase our stores of knowledge and sources of rational enjoyment."—LEADER.

XI.

THE FIFTEEN DECISIVE BATTLES of the WORLD, from MARATHON to WATERLOO. By SIR EDWARD S. CREASY, Chief Justice of Ceylon. Tenth Edition, with Plans, 8vo; 10s 6d.

"A happy idea. The decisive features of the battles are well and clearly brought out: the reader's mind is attracted to the world-wide importance of the events he is considering, while their succession carries him over the whole stream of European history."—SPECTATOR.

XII.

THE AUTOBIOGRAPHY OF A SEAMAN.

LORD DUNDONALD'S AUTOBIOGRAPHY. Vols I. and II., 8vo, with Plans, 28s.

"It is worthy of one of the very best places on any shelf of military and naval memoirs, and is full of brilliant adventures which are described with a dash that well befits the deeds."—TIMES.

XIII.

MEMOIRS OF MY OWN TIME. By M. GUIZOT, Author of the "History of Civilisation," &c., &c. Vols. I., II., and III., 8vo, 42s.

"This is one of the few books that will mark the generation that gives it birth. It will be devoured as a history of our own time by one of the most conspicuous men now alive."—ATHENÆUM,

XIV.

MEMOIRS OF THE LIFE AND WRITINGS of the RIGHT REV. RICHARD HURD, D.D., Bishop of Worcester. By the Rev. F. KILVERT, M.A., 8vo, with Portrait, 12s.

"This is an admirably arranged memoir. Mr Kilvert has done good service to literature by the publication of this volume."—PRESS.

XV.

THE BEST MODERN COOKERY BOOK FOR ALL CLASSES.

FRANCATELLI'S MODERN COOK, A Practical Guide to the Culinary Art in all its Branches. Adapted as well for the largest establishments as for the use of private families. Eleventh Edition, 8vo, with upwards of 60 Illustrations. 12s.

XVI.

ANECDOTE BIOGRAPHY OF ENGLISH WORTHIES. By JOHN TIMBS, F.S.A. First and Second Series, 2 Vols., with numerous Illustrations, 12s.

"A very valuable and interesting collection of books. The anecdotes are chronogically arranged, and so skilfully put together that it is not possible to open a page of it without being interested and amused. It is a very charming volume."—LONDON REVIEW.

XVII.

NEW WORK, EDITED by the AUTHOR of "MARY POWELL."

THE AUTOBIOGRAPHY OF VALENTINE DUVAL. Edited by the Author of "Mary Powell." Post 8vo, 7s 6d.

"A more charming book has not appeared for some time past. It is a very excellent addition to biographical literature. It does the authoress infinite credit, not only to her head but to her heart, as her labours have made an English public better acquainted with a man who is a bright example for all ages."—MORNING POST.

By the same Author,

TOWN AND FOREST. Post 8vo, with an Illustration, 7s 6d.

"Pleasantly written and full of kindly feeling."—GUARDIAN.

XVIII.

THE MOTHERS OF GREAT MEN. By MRS ELLIS, Author of "The Mothers of England." Second Edition, small 8vo, 5s.

"It ought to be in the hands of every mother in the land."—ILLUSTRATED NEWS OF THE WORLD.

By the same Author,

CHAPTER ON WIVES; being Sketches of Married Life. Small 8vo, 5s.

XIX.

THE INGOLDSBY LEGENDS; or, Mirth and Marvels. Twenty-Eighth Thousand. New Illustrated Edition, in Two Vols, with all the Illustrations of Cruikshank and Leech, 15s; or in One Vol., with Illustrated Frontispiece, 5s.

XXI.

JAMES'S NAVAL HISTORY OF GREAT BRITAIN. New Edition, in 6 handsome Vols., 30s, with a Portrait to each.

"A well timed reprint of a work to which every Englishman may turn with pride and satisfaction."—NOTES AND QUERIES.

"No library, public or private, can be said to be complete without this work."—LEADER.

XXII.

THE USE AND ABUSE OF THE TONGUE.

HINTS TO CHRISTIANS ON THE USE of the TONGUE; or, The Rhetoric of Conversation. By G. W. HERVEY. Edited with Introduction, by the Rev. STEPHEN JENNER, M.A. Small 8vo, 6s.

"At once amusing, interesting, and useful in its character."—OBSERVER.

XXIII.

DICTIONARY OF CHRISTIAN CHURCHES and SECTS, from the Earliest Ages of Christianity. By the Rev. J. B. MARSDEN, Author of the "Early and Later Puritans." Third Edition, 8vo, handsomely bound, 12s.

"Marsden's information is well digested, his judgment sound and impartial, his manner of statement not only clear but with a sustained vividness."—SPECTATOR.

"A production of great interest and utility."—DAILY NEWS.

"It has now a well-established reputation."—STAR.

"It supplies a want long felt."—POST.

XXIV.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

No. 8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.

CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December 1861, should, in order to enjoy the same, make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without imparting to the recipients the risk of copartnership, as is the case in mutual societies.

To show more clearly what these bonuses amount to, the three following cases are put forth as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security for the payment of the policy when death arises; in addition to which advantages, one-half of the annual premium may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit the policy.

The Assets of the Company at the 31st December, 1859, amounted to £690,140 19s, all of which has been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

Immediate application should be made to the Resident Director, 8 Waterloo place, Pall Mall.

By order, P. MACINTYRE, Secretary.

THE STANDARD LIFE

ASSURANCE COMPANY.—Established 1825.

The first Division of Profits took place in 1835, and subsequent Divisions have been made in 1840, 1845, 1850, and 1855.

The next Division will be declared in 1861, when the amount can be added to each Policy, its value taken in Cash, or applied to the reduction of future Premiums at the option of the Assured.

Accumulated Fund..... £1,800,000.
Annual Revenue ..... £300,000.

The Company purchases its Policies on equitable terms, and grants Loans to the extent of their value at a moderate Rate of Interest.

Forfeited Policies can be revived within Thirteen Months of lapsing, on certain conditions.

Policies of Five Years' duration are eligible for admission to Select class of Assurance, which includes Free Residence in any part of the world.

One of the Medical Officers attends at the London Office daily at half-past One o'Clock.

WILL. THOS. THOMSON, Manager,
H. JONES WILLIAMS, Resident Secretary.

LONDON: 82 King William street, City.
EDINBURGH: 3 George street—(Head Office.)
DUBLIN: 66 Upper Sackville street.

NATIONAL PROVIDENT

INSTITUTION, 48 Gracechurch street, London, for Mutual Assurance on Lives, Annuities, &c.

Established December, 1835.

DIRECTORS.

Samuel Hayhurst Lucas, Esq., Chairman.
Charles Lushington, Esq., Deputy-Chairman.

John Bradbury, Esq.	Robert Ingham, Esq., M.P.
Thomas Castle, Esq.	Charles Read, Esq., F.S.A.
Richard Fall, Esq.	Robert Sheppard, Esq.
John Feltham, Esq.	Jonathan Thorp, Esq.
Charles Gilpin, Esq., M.P.	Charles Whetham, Esq.
Charles Good, Esq.	

PHYSICIANS.

J. T. Conquest, M.D., F.L.S. | Thomas Hodgkin, M.D.

BANKERS.

Messrs Brown, Janson, and Co., and Bank of England.

SOLICITOR—Septimus Davidson, Esq.

CONSULTING ACTUARY—Charles Ansell, Esq., F.R.S.

MUTUAL ASSURANCE WITHOUT INDIVIDUAL LIABILITY.

Extracts from the Report of the Directors for the year 1860:—

Number of new policies issued during the year, 988.

	£ s d
Assuring the sum of.....	481,231 1 10
Producing an annual income of.....	16,053 15 7
Making the total annual income, after deducting £50,112, annual abatement in premium.....	298,251 10 4
Total number of policies issued, 23,573.	
Amount paid in claims by the decease of members, from the commencement of the institution in December, 1835...	1,034,368 5 4
Amount of accumulated fund.....	1,898,895 14 11

The effect of the successful operations of the Society during the whole period of its existence may be best exhibited by recapitulating the declared surpluses at the four investigations made up to this time.

	£ s d
For the 7 years ending 1842 the surplus was	32,074 11 5
— 5 — 1847 —	86,122 8 3
— 5 — 1852 —	232,061 18 4
— 5 — 1857 —	345,034 3 11

The Directors accept surrenders of policies at any time after payment of one year's premium, and they believe that their scale for purchase is large and equitable.

The Prospectus, with the last Report of the Directors, and with illustrations of the profits for the five years ending the 20th November, 1857, may be had on application, by which it will be seen that the reductions on the premiums range from 11 per cent. to 98½ per cent., and that in one instance the premium is extinct. Instances of the bonuses are also shown.

Members whose premiums fall due on the 1st of January, are reminded that the same must be paid within 30 days from that date.

January, 1861. JOSEPH MARSH, Secretary.

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

CANADA LANDED CREDIT COMPANY.

Incorporated by Act of the Parliament of Canada.

Capital, £200,000.

PRESIDENT—Lewis Moffatt, Esq.

VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.

DIRECTORS.

The Hon. G. W. Allan, M.L.C.	Thomas D. Harris, Esq.
R. D. Chatterton, Esq.	Lewis Moffatt, Esq.
The Hon. Malcolm Cameron, M.L.C.	William M'Master, Esq.
	Samuel Spreull, Esq.
Richard L. Denison, Esq.	Mr Sheriff Smith Collingwood.
Charles Donaldson, Esq.	
W. P. Howland, Esq., M.P.P.	E. W. Thomson, Esq.

BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, and £1,000 sterling, for periods of five, seven, or ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West, of ample value.

The Company by its charter is always first mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower, or the value of the land mortgaged.

The Company assumes all responsibilities and guarantees the payment of interest to the day, viz., 1st January and 1st July.

Investors incur no risk as in a railway or similar undertaking; the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done, made to the Government of Canada, prospectuses, and further information, may be had at Messrs Brunton and Son's, Stock Brokers, Auction Mart chambers, Bartholomew lane, London.

CANADA LANDED CREDIT COMPANY.

Notice is hereby given, that the Half-yearly Interest on the Company's Debentures will be paid on and after the 1st January, on presentation of the coupons at the banking house of Messrs Smith, Payne, and Smiths.

BRUNTON and SON.

Auction Mart chambers, December 15, 1860.

KINAHAN'S LL WHISKY

v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d each, at most of the respectable retail houses in London; by the appointed agents in the principal towns in England; or wholesale at 8 Great Windmill street, Haymarket.—Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

---

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON

and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

S. W. SILVER AND CO.,

OUTFITTING WAREHOUSES, 66 and 67 CORNHILL, E.C.

Special Outfits for Australia, India, and China, for Naval and Military Officers, Cadets, Midshipmen, and Civilians. Clothing for Gentlemen's Home Use,—viz., Naval and Military Uniforms and Civilian Dress of the best Materials and Workmanship. Shirts, Hosiery, Gloves, &c. Ladies' Outfits. Furniture for Camp, Barrack, Cabin and Colonial use, embracing every variety of Cabinet Work, Canteens, Trunks, Portmanteaus, &c., portable and suited to all climates.

Manufactory, Silvertown, opposite H.M. Dockyards Woolwich.

THE LONDON REVIEW.

EVERY SATURDAY, FOURPENCE.

MODERN ENGLISHWOMEN.—The following Series of Articles on the Characters of Women, their Duties, relation to and influence in Social Life, will appear WEEKLY in the LONDON REVIEW.

ERRATUM.—In p. 1 of our last No. column 2, line 10, for 9,333,000*l* read 19,333,000*l*.

THE JUDICIOUS AND INJUDICIOUS CONDUCT OF THE BANK OF FRANCE.

THE Bank of France has taken one of the steps which we last week urged upon it—it has raised its rate of interest from 5½ to 7 per cent. at a single change. On the propriety and expediency of this change we hope our readers can have no misgiving. We have so often laid before them the reasons which render it necessary that *all* banks should adjust their rates to the market value of capital, that it is unnecessary for us to say anything upon that subject now. We need only observe, as we proved but last week, how much it is to be regretted that the Bank of France did not at an earlier period adopt the course of which it has now tardily acknowledged the wisdom. A much smaller and much less startling change in the value of money might then have been sufficient.

We wish we could say that this step is the only one that, under the peculiar circumstances of the Bank of France, is necessary for its protection. Unfortunately past errors have made its position more than usually difficult. Its reserve has, by the telegraphic advices which are just received, fallen 3,200,000*l* in the course of a month; and it must, therefore, have considerably less than one-third of its liabilities in specie. But this is not the worst. It has still more than 13,000,000*l* of bullion of some sort against liabilities of about 46,000,000*l*, which is not very alarmingly disproportionate. But though the whole of these 13,000,000*l* are called reserve, but a small part of them are really effectual in the discharge of the liabilities of the Bank. The greater part of this reserve consists of silver, and if the Bank should be understood to be ready to meet its obligations in silver, it would soon *have* to meet them. Silver is at a premium; and any one who cashed a 1,000-franc note in silver at the Bank, might easily sell that silver in the market at a substantial premium. We do not precisely know the amount of gold in the vaults of the Bank of France, but it is quite certain that it must be a very small proportion of the whole bullion which they hold, and that it must be very trifling when compared with the demands that may possibly be made upon it.

Under these circumstances the true policy of the managers of the Bank of France is plain. They should sell their silver in the open market, and obtain the proper premium. They would gain a mercantile profit by the transaction, and would obtain gold sufficient to meet their requirements.

Instead of this, however, the Bank of France is unfortunately commencing its peculiar and anomalous operations in the money market. Its managers are understood to be, directly or indirectly, buying up bills and sending them here for discount. As we showed last week, this expedient is only a disguised loan: it is essentially temporary in its nature, and must some time be repaid to us again. Nevertheless, it may cost the Bank of France much money. An elaborate table in Mr Tooke's "History of Prices" gives an accurate account of what was done at a former period:—

TABLE A.

Period.	Dates.	Premiums. £	Gold purchased at the rate of 1½ per cent. premium. £
6 months of 1855...	1 July to 31 Dec.	160,000	10,660,000
6 — 1856...	1 Jan. to 30 June	120,000	8,000,000
3½ — — ...	1 July to 11 Sept.	60,000	4,000,000
1 — — ...	11 Sept. to 9 Oct.	25,000	1,700,000
2 — — ...	9 Oct. to 11 Dec.	45,000	3,000,000
18½ months		410,000	27,360,000

In the present state of the Bank of France, it seems scarcely possible that its managers should continue to pursue this policy without danger. *Their motive is now known;* their exact position has been ascertained. It is the interest of the great exchange dealers to persecute them continually. If by sending in notes to be exchanged for gold they can necessitate a new transaction of this anomalous description, they will secure to themselves a new source of profit, and, as they are the keenest men of business in the world, the sharpest in discerning new opportunities of minute profit, depend on it they will do so.

Why the Bank of France pursues this recondite course instead of the obvious and the simple one, it is impossible to say. Probably higher powers than any in the banking world intervene and influence the decision. It has been erroneously rumoured that they have commenced new negotiations with the Bank of England for a repetition of the previous convention. But we believe that this is not so. They have as yet made no overtures to that effect; and if they did, it would require grave consideration how far they should be favourably received, though very strong arguments might be urged in favour of acceding to them. Before any large operations could be carried out, however, the existing stock of silver in the vaults of the Bank of England must be sold.

The duty of the Bank of England in the face of the peculiar policy of the Bank of France is clear and simple. They must oppose all the obstacles which they can to the withdrawal of bullion from this market. They must raise the value of capital to whatever height may be necessary for that purpose,—and then, having done what they can, they must, like the rest of the public, wait the event.

THE BEARINGS OF AMERICAN DISUNION.

THE tidings from what we can no longer call the United States bid fair, for some time to come, to surpass all others in interest and importance. The relations of this country with America, commercial and political, are so intimate, that every transaction on the other side of the Atlantic has its echo and vibration here. Nothing that passes beyond our own shores can affect us so powerfully or concern us so

much as the proceedings and condition of the great Federal Republic; with its prosperity our own is inextricably interwoven in bonds that are painfully close and tight; and what is passing there now demands the most vigilant observation, and the calmest and most thorough appreciation. Commercial panics and trade perplexities we have encountered often from the same quarter, but so formidable a *political* crisis as the present has not hitherto been seen;—and it is not the less serious or startling because it has been long preparing, and has for some years been clearly unavoidable. The passions of the native Americans on both sides are so fearfully excited that we cannot gain much assistance in our comprehension of the conjuncture from their writings or their speeches, and those who are resident in this country seem as bewildered as ourselves;—so, in our estimate of what is occurring and what is likely to occur, we must trust pretty much to our own judgment, and will be as judicial as we can.

We shall not pretend to discuss those questions as to which the best qualified and most deeply interested parties seem themselves unable to decide. It is not for us to pronounce whether South Carolina has or has not a right to secede from the Union; whether, if she has not, the Congress has the right to prevent her secession by force; whether the Congress could do so if it tried; and whether it is likely to venture on the trial. These are points for the Americans to settle; and our opinions on the subject would be simply impertinent. Thus much, however, seems certain:—that South Carolina cannot practically and permanently secede *alone*. Either she will find herself isolated, and will resume her place in the Union on such terms as she can obtain; or she will be joined by all or most of the other Slaveholding States, in which case a Southern Federation will be formed, as extensive and not much less populous than the Northern one. A new State will be added to the commonwealth of nations, with which we shall have to enter into formal political relations. Let us consider, therefore, more calmly and impartially than the Americans themselves seem at this moment capable of doing, what are the real grounds for desiring and for deprecating a severance of the Union; what would be its probable consequences, if consummated; and in what manner it could affect Great Britain.

The first thing that strikes an Englishman is that this tremendous excitement and this formal disruption appear to be caused chiefly by the issue of a contested election, such as occurs and has always occurred every four years. For a long period the Southern States, though somewhat inferior in population and enormously inferior in wealth, have succeeded in electing a President of their own way of thinking;—and now, having been beaten for the first time in a fair constitutional struggle, they are unable to accept their defeat as a national decision; and without waiting to see whether any, and what, practical consequences may follow from this decision, they at once break up a Union which has lasted for three quarters of a century, though they still retain, and would have retained for many months longer, an equality in one House of Congress and a decided majority in the other—in fact, the virtual command of all legislative action. Besides all this, they hold—not only in their newpapers and platform harangues, but in State documents and Parliamentary speeches—language towards the North breathing the fiercest animosity and an almost insane degree of virulent excitement. The Carolinians speak of the politicians and people of New York and Massachusetts as even Frenchmen scarcely ever spoke of Englishmen except in the very crisis of war-like irritation—much in fact as Meagher and Mitchell used to speak of Great Britain in the wildest days of the Repeal fever. To such an extent has this gone—so completely has passion superseded both decency and prudence in the minds of many Southern citizens—that many voices have been heard clamouring for secession as an excuse for repudiating the debts, private and commercial as well as public, which they owe to the wealthier classes of the North.

The second point we remark is that the cry for secession is the loudest in those quarters which to all appearances would suffer most from it and have the greatest reason to dread it; while, on the other hand, those who most deprecate disunion and appear most desirous to make questionable compromises in order to avert it, are the States to which of late years it has brought only embarrassment, discredit, and enforced subordination. The Northern States, especially the Atlantic ones, which are comparatively wealthy, populous, and powerful, and which for a quarter of a century have been dragged through every species of moral and political mire by their slaveholding associates,—to whom at first sight it would seem as if severance would be liberation from a galling and dishonouring servitude,—are temperate, conciliating, and rational, and would fain dissipate the danger, if they could see their way to doing so. The Southern States—impoverished as far as money matters go, with no monetary centre, with a slave, and therefore a hostile, population in the midst of them (amounting to more than one-third of the whites, and in many districts far outnumbering them), and with three-fourths of their white citizens sunk into a state of social and moral degradation such as probably no civilised nation ever yet beheld—insist upon separation from a nation their connection with which has long supplied their principal security and their chief resource. Of these States, too, whose most ostensible grievance is the alleged non-execution of the Fugitive Slave Law, the frontier States who suffer most from the escape of slaves are the most moderate and tranquil; while South Carolina, with two States at least and five degrees of latitude between her and freedom, is the soul and leader of the severance scheme, which will throw her on her own unaided strength.

The third point to notice, which affords perhaps some explanation of the two previous facts, is that this secession movement is not a perfectly simple and honest one. South Carolina's passionate determination to secede does not proceed solely from a sense of injustice or from indignation at the alleged interference of the North with her "domestic "institution," or from fear of further interferences in the same direction. It is complicated with other aims and motives. She is not merely furious because the Free States do not surrender fugitive slaves as promptly and as easily as she desires, and because she believes, now Mr Lincoln is elected, that slavery will be prohibited in the "Territories";—she resents, and with some reason, the protective tariff adopted by Congress with a view of assisting the manufactures of the Union, which are carried on principally in the North. She knows that, if the Federal Customs duties were abolished, she would be able to import British manufactures more cheaply than at present; and she fancies also that Charleston would then become a sort of New York for the South, the future capital and the centre of its commercial operations. She desires, moreover, and has openly avowed it on more than one occasion, to reopen the African slave trade; she believes that her own future prosperity and that of the Planting States generally depends on this step; and she is well aware that it will be impossible to carry her designs into effect as long as the Union continues. The Northern States will bear much, but they will not bear *that*.

On this side of the Atlantic we feel considerable difficulty in understanding the views and proceedings of different sections of the Federated States, except on the supposition that violent passions and unavowed motives are in operation to complicate the case and to cloud the usually shrewd sagacity of the Americans. There may be said to be four district divisions of the nation in reference to this subject. We can understand that the North-Western States, Ohio, Illinois, Michigan, Indiana, and Wisconsin, should be averse to a severance of the Union; because, in the first place, they grow a considerable amount of the provisions which are consumed in the Slave States, and fear a disturbance of their market;—and in the second place, as a glance at the map will show, the formation of a Southern Federation would place the command of their great outlet, the Mississippi, in the hands of a foreign State. All the great rivers which drain the North and West, without exception, join in one and flow by New Orleans into the Gulf of Mexico. If this outlet were closed to them, either by hostilities or heavy transit dues, their only water access to the rest of the world would be the costly and precarious one of the Lakes and the St Lawrence.—We can understand also that the frontier Slave States, Virginia more especially, should be perplexed and divided on the question. As a Slave State, the passions of the Virginians naturally lead them to sympathise with South Carolina and her fellow secessionists; as a Slave-breeding State, drawing nearly all her wealth from the negroes which she yearly sells to the South, her interests are closely bound up with its prosperity;—though every year

free labour is advancing further and further into the Northern portion of the State, and the sentiments of many of the citizens are undergoing gradual change. On the other hand, the more sagacious and far-seeing of her politicians may well doubt whether the safety and prosperity of the South, and by consequence her power of purchasing and paying high for Virginian negroes, will not be imperilled by separation; whether, in short, a depreciation in the value of slave property from black insurrection and a servile war is not more probable than an enhancement of it by the unlimited extension of slavery in a Southern direction. She may well also have another misgiving (which is fast becoming a well-defined and imminent danger),—viz., whether a severance of the Union would not be almost certainly followed by such a reopening of the African slave trade as would reduce the price of home-bred negroes one-half or two-thirds, and thus bring Virginia slave-breeders to beggary. A revival of the slave trade by the Southern Federation would almost compel Virginia to become a Free State, when her remaining in a Slave Union would of course be impossible. Her position, therefore, in the present crisis is peculiarly embarrassing and anomalous.

But though we can understand the sentiments of Ohio on the one side, and of Virginia on the other, in reference to a disruption of the Union, we confess it is difficult on a sober estimate of consequences (and putting irritated passions and ambitious pride apart) to understand why the North should deprecate it so earnestly, or why the South should urge it so eagerly. For a long period, the Northern States have been compelled to submit to a species of subordination and chronic discomfiture mortifying in the highest degree to a proud and a moral people. They felt that they were vastly superior to the Southern States in intelligence, in wealth, in enterprise, in population; that their energies were greater, that their reputation was higher, that their cause was nobler; —and yet in every political contest they were compelled to succumb, or to avoid obvious defeat by some compromise galling alike to their sense of dignity and their sense of right. They must have felt that the semi-barbarism of the South was infecting and degrading their manners, that the terrible social blot of the South was their ceaseless opprobrium in the eyes of the civilised world, and that the violence and cupidity of the South was for ever marring their policy and disturbing their peace. We should naturally have fancied that they would, in consideration of these things, have been anxious to shake off such an incubus and to purify themselves from such a stain; and have looked forward with sanguine enthusiasm to the noble and splendid career of progress which lay before them when relieved from such a moral weight and social fetter. There is, however, little of this feeling—so little that the chief danger appears to be lest the Republicans should compromise too readily and yield too much in the hope of preventing separation—yield even to the extent of impolicy, injustice, and discredit. The explanation is probably threefold. The Northern States, besides dreading the near neighbourhood of an independent and exasperated nation, are perhaps right in anticipating that one of the first ways in which hostile sentiment will show itself may be in imposing an export duty on cotton, and a discriminating import duty on Northern manufactures,—or at all events such an abolition or reduction of all import duties on manufactured goods as would practically operate in favour of England and against the Free States. If so, their uneasiness is probably exaggerated; for an export duty on cotton would not tell against them more than against Europe, and their manufactures — their cotton manufactures at least—are not very far inferior to English fabrics either in quality or cost. — In the second place, the industry of the Slave States is, to a very great extent, carried on by the aid of Northern capital, and their commercial transactions with Europe are mainly conducted through the monetary centre of New York: — the result is that the Southern States are largely indebted to the Northern for funds advanced on mortgage or on bill security, or on no security at all. This enormous amount of "indebtedness" there has been much loose talk of repudiating in case of a hostile severance;—and though such repudiation would be too infamous and suicidal a measure even to be contemplated except in the wildest moments of fury, there can be no doubt that an angry rupture, either with or without repudiation, would cause such a commercial and monetary derangement as may well alarm a community so sensitive as the mercantile one must always be. The Northern merchants and monied men, too, see another analogous danger in the distance—and it may be in the not remote distance. There is always the possibility—some consider it an immediate probability—of a general negro insurrection, and a consequent interruption of production, more or less complete, more or less prolonged;—and, as the wealth of the South consists exclusively in its slaves and in the articles they raise,—the security possessed by the North for the debts owing to them would be, in that case, enormously endangered, without anticipating any dishonesty on the side of the planters.

But the cause which is, we believe, more powerful and more general than either of the above considerations in rendering the disruption of the Union supremely unwelcome to the Northerners, is to be found in a nearly universal but not very well-defined conviction that the greatness of the American Republic is bound up with the continuance of the Federation. They have long been accustomed to boast to the world and to themselves of the mighty strength, the unexampled prosperity, the marvellous progress, and the surpassing grandeur of their vigorous young nation. They have flung themselves and their institutions insultingly and bombastically in the face of Europe, requiring every one to avow that no nation of the old world could match their power, or rival their constitution, or hold a candle to them as regarded the well-being, the capability for self-government, and the political wisdom of their people. They have dreamed of omnipotence and immortality; and they feel, with angry disappointment and bitter humiliation, that such a disruption as now seems almost consummated is a deplorable end to all these ambitious hopes and all this measureless self-glorification. We can well imagine that the prospect must be mortifying in the extreme both to their patriotism and their pride;—but here, as in the two former considerations, we think they exaggerate the truth. We incline to believe that, morally, socially, and politically, they will be gainers by the change. It is true there will be two Americas on the continent in place of one; but we believe they will be stronger, because more homogeneous for the compression. It is true their Republic will be less vast, but it will be their own fault if it be less great. Their national life will be purer, more consistent, less incessantly lowered and stained by disreputable compromises. They may be less feared by Europe, but assuredly they will be more respected. They will still be owners of a nearly illimitable territory, not a fourth of which is yet peopled, reaching from the Atlantic to the Pacific, and abounding in every species of mineral and agricultural wealth. They will still ere long be—or may be if they please—the most wealthy, powerful, and populous nation on the globe; and the recent catastrophe may have revealed the weak place in their institutions, and have taught them how to mend it.

The anxiety of the South for secession from a connection which has so long brought it safety, wealth, power, and reputation, appears to us explicable only on the supposition that excited passion has obscured for a time in the minds of its citizens all perception of their real interests, and all sober estimates of probable results. They will gain cheaper manufactures; they may gain possibly more unfettered political action—though in this respect it is not easy to see what they have ever had to complain of. But what else they can hope to gain, we are at a loss to discover, while the sacrifice and the danger are obvious at a glance. They will lose power—for, after all, power must always lie where there is a preponderance of money, population, harmony, and homogeneousness;—and all these the North has and the South has not. They cannot hope to seize on Cuba by their own strength, since it was an achievement scarcely within their reach when backed by all the might of the unbroken Federation. They can scarcely hope to be permitted in their severed condition to renew the African slave trade, in defiance of the general outcry of the civilised world, and the active, persistent, because morally-based and almost fanatic opposition both of England and of the Northern Federation. They can scarcely expect that Great Britain will acknowledge their separate sovereignty or enter into any close alli-

ance with them, except on condition of their acceptance and renewal of those anti-slave-trade treaties to which they, as well as the North, have hitherto been parties. They may hope indeed to keep down their slaves, as Austria keeps down Venice, by incessant vigilance, by increased severity, by organising a large and permanent armed force of whites,—for they are nearly three-times as numerous as the blacks, and are armed and ready. But they can no longer hope, in the event of a servile war, to be backed by either the moral or physical strength of the Free States;—and for at least partial and frequent insurrections they must assuredly lay their account. Nor can they fancy that by severance they can protect themselves more effectually than at present from the spread of abolitionist doctrines and stimulants among their coloured population; for no law and no practice can shut these out, if the existing Lynch law and Lynch practice have not succeeded in doing so. On the other hand, they cannot flatter themselves that so strong and so public a step as separation, with its alleged reasons and all the ferocious and alarmist language which has been held by Southerners upon the subject, can be unnoticed by the blacks, or can fail to excite in their minds the most disturbing sentiments, the most exaggerated hopes, and probably, on disappointment, the wildest schemes and the most desperate attempts. It will be impossible to conceal from them the fact that the North and the South have separated, and that the slave question in some form or other has been the ground of separation. That the negro insurrections will be put down we do not affect to doubt;—for the whites are in many districts preponderant in numbers and in most superior in strength; but human nature actually shudders to contemplate the horrors that may first ensue,—the barbarous vengeance of those who have been long so cruelly oppressed—the still more barbarous retaliation which the terrified and infuriated victors will be certain to inflict. Whichever way we view it, the prospect is literally appalling.

In conclusion,—and this is perhaps the most fearful feature of the whole,—what will be the moral and social condition of the Southern States, when liberated from even that faint control over their barbarising and deteriorating tendencies which their connection with Northern freedom and Northern humanity has hitherto held over them;—when the violent and tyrannical passions which the long habit of unchecked brutality towards negroes has generated among the Southern whites (of which we have seen of late such signal proofs and listened to such sickening descriptions) shall have been still further whetted by augmented danger, exasperated fear, and further deadly conflicts in which life and property have been every hour at stake?

We will not pursue this line of speculation: it is needless, and would be too painful. Our intended remarks on the possible reaction of the existing state of affairs and that which is immediately in prospect on England and on English interests, we must postpone till another week.

THE EXTRADITION CASE IN CANADA.

The request of the American Government that we would surrender a fugitive slave accused of having committed murder during his escape raises a very remarkable question of international law, and might raise, though we hope it will not, a serious question of international morality. The circumstances of the case are exceedingly simple, though the legal consequences are difficult and complicated.

Anderson, a slave in the State of Missouri, ran away from his master, and while still in that State was attacked by a man named Seneca Digges, who, with great violence, and assisted by a gang of negroes, attempted to capture him, for the avowed purpose of returning him back to his master, and of reducing him once more to the condition of slavery. Of course Anderson resisted, and a scuffle ensued, in the course of which Digges was killed. The negroes by whom he was accompanied were disheartened, Anderson continued his flight, and reached Canada, where he has now resided several years. By the law of Missouri, the State within which Digges was killed, a fugitive slave who kills a person attempting to apprehend him is guilty of aggravated murder, and is liable to be punished by a slow and lingering death. We are now called upon to give up Anderson under the extradition clause of the Ashburton Treaty, in order that he may be punished according to the law of Missouri.

Our first observation is an obvious one, and must be that of everybody. We never can have *meant* to bind ourselves to give up a fellow-creature in such circumstances as these. According to our morality and according to our law, Anderson did nothing but what was right; would have been wanting in the spirit of a man if he had done otherwise; has acted just as we should have acted ourselves if we had equal courage and equal promptitude. By our jurisprudence a man has a right to his freedom; if another attempts to deprive him of that freedom, it is his right, it is his duty to resist, by all means and with all weapons, be the consequences what they may. If the person who attempts to enslave be unfortunately killed, his death by the law of England is not a punishable act; it is not an offence of any description: it is *justifiable* homicide. Whatever the wording of the treaty may be, before we even look at it to see what the words are, we *know* it was never meant or intended for a case like this. We never intended to promise to give up a person to torture and death for only doing what is innocent by our law, and what was incumbent on him by our morality.

Still, this observation is by no means conclusive. It is always a presumption that we did at a former time that which we know we then intended to do: we must always believe that our words expressed our meaning until the contrary is strictly proved. Nevertheless, we *may* in this case have made a mistake: let us see what our words were:—

They have been accurately recited in 6 and 7 Victoria, cap. 76, which is now the operative law on the subject in England, and an exactly equivalent statute appears to be in force in Canada. "It was," says the statute, "agreed that "Her Majesty and the United States should, upon mutual "requisitions by their respective Ministers, deliver up all "persons who, being charged with murder, or piracy, or "arson, or robbery, or forgery, or the utterance of forged "paper, within the jurisdiction of either of the contracting "parties, should seek an asylum within the territories of the "other: provided that this should only be done upon such "evidence of criminality as, according to the laws of the "place where such fugitive should be found, would justify his "apprehension and committal for trial if the offence had "been there committed."

At the first reading we may fail to see into what difficulty these words can have led us. Anderson has not been guilty o any act which *we* should call murder, or arson, or robbery or any other of the specified offences; he is in the eye of our law an *innocent* person. He is not a person whom an Englishman would even think of with reference to the offences enumerated. It is, however, contended that, though the degree of evidence which is to justify the extradition of the criminal is to be determined, as is expressly stated, by the law of England, the offence of which he is guilty is to be determined by the law of America. The judge, it is contended, is to weigh the evidence of the testimony by the law of Canada, and then apply it to an offence to be settled by the code of Missouri. Even those who contend for this construction, must admit that this construction involves an anomaly in jurisprudence; but we know that there are anomalies in jurisprudence. Is this one of them?

We believe that as the question has never been before distinctly raised, it has not as yet been ever expressly decided. So far as previous practice goes, however, we learn from the best legal authorities we can consult, that there is no precedent for the construction contended for, but, on the contrary, that the usage of the courts in this country is opposed to it. We believe that in every instance in which a criminal has been delivered up by this country under an extradition treaty, both the crime alleged and the evidence adduced have been determined exclusively by the law here. If the offence were to have been determined by the law of the foreign country, the evidence of lawyers trained in the jurisprudence of that country must have been adduced to show what was the nature of the alleged offence according to that jurisprudence. No such testimony has, however, been in any case proffered. The criminal has been delivered up so soon as it was shown that there was English evidence of one of the enumerated English crimes.

A lawyer, moreover, professionally trained to logical consistency, would see very great objection to the needless combination of two systems of jurisprudence which are surely not

identical, and which may be quite heterogeneous. There are two maxims or doctrines on which a consistent extradition treaty may be coherently framed. One of these is the maxim of entire confidence in the foreign country with whom we are negotiating. We may say to it, and many continental countries in their intercourse with one another do so say, 'We will 'assume your code to be a good code. We will give up any 'one who ought in the judgment of your courts to be accused 'to suffer for whatever offence your courts shall adjudge he has 'committed. If we receive the proper diplomatic requisition 'from you, we will trust you. We will inquire no further. We 'will presume that you will not accuse any one either on 'improper evidence or of an innocent act.' Such is the consistent course which some nations who have entire confidence in each other have been prepared to take. The second maxim is one of caution. One country may say to another—'We 'do not like to bind ourselves by the provisions of your code; 'we do not know its details; we would rather not interfere 'in the enforcement of its provisions; we are anxious only to 'act on grounds which we think conclusive, and only to aid 'in the punishment of crime which we believe is really such. 'We cannot, therefore, take your law, but we offer you ours. 'As soon as there is sufficient evidence according to our 'jurisprudence of an act which is a crime by our penal code, 'we will at once surrender the person accused.' This doctrine, likewise, is an intelligible and coherent one. But the construction of the Ashburton Treaty, which is necessary to justify the American request, is founded neither on the principle of vigilance nor on that of confidence, but upon an inconsistent mixture of the two. We are asked to be cautious about the evidence adduced, and expected to be careless about the offence alleged. The maxim of confidence may be good, and the maxim of caution may be good; but, whichever we choose, we should be consistent. It is absurd to be critical in investigating *why* a criminal is accused, and blindly tolerant as to what he is charged with. The law of evidence is a part of the code of a foreign State, and is neither more nor less likely to be bad than the other part of that code.

This is the view which a dry lawyer who looks to logical consistency may be expected to take. But there is also a broader aspect of the subject which will be much more interesting to the mass of men—what is the justification of an extradition treaty? It is this: there is among civilised States a certain common universal morality: certain crimes are everywhere repugnant to civilised men, are everywhere regarded with horror or indignation, are everywhere the subject of penal legislation. If, then, it should happen that a person who is accused of any one of these detestable actions takes shelter and endeavours to obtain impunity in a foreign country, it is proper and right that the latter should say,—'We have no duty of hospitality in such a case as this; we 'cannot and must not protect awful cruelties and infernal 'villanies. We will surrender those who have been guilty 'of such things to the justice of the country in which they 'have perpetrated them.'

That this is the real justification of an extradition treaty will be easily seen by considering the exceptions which common feeling has induced men to make in them. The greatest and most striking of these is the exception of political offences. It has been universally felt that it would be monstrously cruel to give up persons who have been led, perhaps by ill-regulated enthusiasm, perhaps by well-founded zeal, to attempt by violence to alter the Government under which they have been born. Such an act may be very criminal; in most cases it will be somewhat criminal;—but we cannot measure the degree of the criminality; we cannot regard it in all cases with horror and detestation; we cannot, therefore, engage to give up every one who may hereafter be accused of it. Sir James Mackintosh puts this principle in a striking light:—"I believe that I may venture to lay it "down, if not as a part of the consuetudinary law of nations, "at least as agreeable to the usage of good times, that "though nations may often agree mutually to give up "persons charged with the common offences against all "human society, civilised States afford an inviolable asylum "to political emigrants."

The letter of the Ashburton Treaty, too, shows that these maxims were present to the mind of those who framed it. Express words limit its provisions to offences of marked criminality—to offences against the common, universal morality of civilised nations. It enumerates murder, piracy, arson, robbery, and others,—some of the most grave offences likely to be committed by civilised men. The minor offences this treaty, like others of a similar nature, does not include. It is universally felt to be repugnant to all hospitable feeling to give up a fellow-creature to punishment because he has committed some petty offence against the minor provisions of a code which perhaps we do not understand, and perhaps we do not sympathise with.

With this guiding principle in our minds, we shall easily see what interpretation both the philosophical jurist and the man of common sense would put upon the extradition clause of the Ashburton Treaty in the case of Anderson. What is the best test, the nearest and most practical test which the case admits, both of the universal criminality of the act alleged, and of the degree of reprobation attached to it in the surrendering country? *Clearly the law of that country.* So far from its being unreasonable that a State should give up, and should stipulate only to give up offenders against some act which is heinous *by our own laws*, such a stipulation is of the essence of the true basis of the principle of extradition. If the act complained of be not a grave offence in the surrendering country, indisputably it is not a grave offence against the laws of *all* countries,—indisputably it is not such an act as the moral sense of the country would consider to justify a breach of the obligations of hospitality.

The conclusion, therefore, at which we arrive is simply this. If under this treaty the offence is to be determined by the law of Missouri, we have contracted to give up the fugitive slave before us; if, on the other hand, the offence is to be determined by the law of England, we are not to give him up. The framers of this treaty did not imagine such a case; they thought there might be differences in the laws of evidence recognised by the contracting parties, and for these differences they expressly provided: they did not provide for any discrepancies as to the offences themselves, because they believed they were dealing with offences universally condemned by the laws of all nations, and with no others. The critical question at issue being left undetermined by the express words of the treaty, we refer to the obvious intention of the parties, to the most consistent interpretation of the treaty as a whole, and the general principles which regulate extradition treaties in general and make them justifiable. From each of these supplementary resources we learn to interpret the treaty in the same way; from each of them we learn that Anderson's case is not within its provisions: and we are very glad to find that such is the result of strict legal logic. If the result had been otherwise, we should have had to argue and determine a very difficult question of international morality.

SUMMARY OF MR WILSON'S SCHEME FOR EQUALISING THE INCOME TAX.

The following outline of a scheme for the removal of inequalities in the Income Tax, suggested by the late Right Hon. James Wilson, an elaborate memorandum of which is about to be published in a brief collection of his miscellaneous writings, will be interesting to our readers:—

The broad principles, then, upon which I have proceeded throughout this discrimination of income, may be thus plainly and shortly stated.

I. I have attempted to regard income, not at its nominal amount, but in proportion as it is, from its character, actually available for immediate expenditure: because it is exactly in that relation that it would have contributed to revenue under the system of Customs and Excise duties which the Income Tax has replaced to a certain extent.

II. With respect to all incomes, I have considered that the incidence of the tax should be regarded in relation to the essence of the property from which the *income* is derived, and not by the accident of the tenure under which it is held at any particular moment; so that all incomes are treated in relation to their source only, without regard to the particular tenure of the owner;—excepting terminable annuities, which stand on special and distinctive grounds.

III. To carry out these principles in a manner which shall disturb the existing practice as little as possible, and which shall inflict a higher tax on no one, I have divided all incomes into three classes: having in view that it is intended

to reduce the revenue derived from the tax as little as possible:—

1. Those derived from the rents and interest of realised property;

2nd. Those derived from a combination of the interest of capital and the reward of skill and labour;

3rd. Those which consist of skill and labour only.

IV. Thus assuming that 12½ per cent. must be deducted from the gross incomes of the first class, to find the net amount applicable for immediate enjoyment or expenditure; 25 per cent. from the second class; and 50 per cent from the third class, I propose to charge the

First class at the rate of 8d, subject to a reduction of 12½ per cent., or 7d net; leaving those incomes exactly as they now are.

Second class at the rate of 8d, subject to a reduction of 25 per cent., or 6d net.

Third class at the rate of 8d, subject to a reduction of 50 per cent., or 4d net. It will make 108,000*l* difference if this rate be 5d or 4d. But I believe the case will be best met at 4d; 5d would represent a reduction of 37 per cent. from 8d.

I will now proceed to consider the Schedules in detail, and the effect which the modifications I have proposed will have upon them.

SCHEDULE A.

This schedule will contain all that it does at present, except some items which are clearly more correctly classified as trade, such as quarries, iron works, &c.; but I do not propose to remove *gas works*, because they will remain as joint stock companies, the dividends of which represent the profit of capital only: it will include lands, messuages, tithes, manors, fines, mines in some cases, fisheries, canals, railways, &c., as at present. And into it will be imported the following new items from the other Schedules, viz.:

From (D). Foreign railways, and other real property abroad.
Interest of money not deducted by the borrower.
Particular dividends in the funds.
Securities in Ireland.
Possessions in Ireland.
Securities in the colonies and other British dominions abroad.
Foreign securities.
Foreign possessions.
Joint Stock Companies of all descriptions.

From (E). Pensions on the Consolidated Fund.

The financial effect of these modifications will be as follows:—

	£	£
The annual value of capital under Schedule A, on which tax was paid on the average of the last three years, was		90,827,690
From this is to be deducted, say:—	£	
Quarries	332,000	
Iron works	999,000	
Other profits	127,000	
		1,458,000
Leaves		89,369,690
To this is to be added from Schedule D:—		
Profits buying and selling foreign railway shares	28,271	
Interest of money and annual payments from foreign railways	145,140	
Interest of money, the duty of which is not deducted by the borrower	583,861	
Pensions assessed to public funds under 50s., not retained by the Bank	700	
Securities in Ireland	183,107	
Possessions in Ireland	516,569	
Securities in British possessions abroad	56,173	
Possessions — —	137,040	
Foreign securities	413,713	
Foreign possessions	129,782	
Profits of joint stock companies, amount not known, but estimated at	1,000,000	
From Schedule E:—		
Pensions on the Consolidated Fund	430,000	
		3,624,306
Net amount at 7d in the pound		92,993,996

SCHEDULE B.

I propose to remain as it is, but subject to 6d in the pound in the place of 7d as a trade:—

	£
Average rental of three years	21,412,870
Profit as half, at 6d	10,706,435

SCHEDULE C.

Average dividends of three years	25,578,377
Deduct terminable and life annuities now charged, removed into Schedule E	2,989,964
Net amount at 7d	22,588,413

SCHEDULE D.

	£	
Average of three years		53,143,748
Deduct—		
Professions carried into Schedule E	10,524,364	
Items carried into Schedule A	3,194,306	
Salaries of clerks into Schedule E, say	500,000	
		14,218,670
		38,925,078
Add items out of Schedule A, per list		1,458,000
Net amount at 6d		40,383,078

SCHEDULE E.

	£
Average of three years	11,373,805
To which add:—	
Professions from Schedule D	10,524,364
Salaries of clerks, &c., estimated	500,000
Terminable and life annuities from Schedule C	2,989,964
	25,388,133
To deduct—Pensions into Schedule A	430,000
Net	24,958,133

at 4d in the pound.

The tax so arranged will yield as follows:—

Schedules.	Capitals on which charged.	Rate.	Produce.
	£		£
A.	92,993,996	at 7d	2,712,324
B.	10,706,435	6d	267,661
C.	22,588,413	7d	658,828
D.	40,383,078	6d	1,009,576
E.	24,958,133	4d	415,968
The net average of the last three years	191,630,055		5,064,357

	£
If Schedule E be taken at 5d in place of 4d it will give a total of	5,168,349
The average amount of the tax in the last three years has been	5,589,211

Agriculture.

RESPONSIBILITY OF LANDOWNING.

THE proposition that "property has its duties as well as its rights," applies with tenfold force to property in land. The owner of a bale of cotton or tobacco, of a horse, a carriage, or an article of ornament or vertu, may use, abuse, or destroy it without producing much effect upon the fortunes or happiness of others. Not so the owner of landed property. He holds it in a certain sense as a trust property, having at the same time a highly beneficial interest in it. The soil of the country is the nation's treasury from whence the food of the people is mainly to be supplied. The land of a nation is originally the property of the State, and the mode in which individuals are permitted to appropriate any portion of that land is regulated by laws founded, less or more, on principles of public policy. Thus, the landowner is allowed to appropriate to himself a portion of the country's soil under the implied condition that it shall be rendered productive. It is assumed that by giving an individual exclusive right to occupy, *i. e.* own, a definite portion of land, that portion will, through the operation of the owner's sense of self-interest, be made more useful than it could be if dealt with in any other manner. Such is the origin of landowning, with its numerous and relative rights and duties.

Property in land having been thus established, and being held on the implied condition that it will be employed usefully, as, in fact, it is for the most part employed, considerable latitude is necessarily allowed to individual landowners as to the manner in which they fulfil that condition. And great are the diversities in the way in which that primary condition is performed. One landowner lets his land upon terms which ensure the prosperity of the occupiers by affording them freedom of action and security, and benefits the community by a large production of food. Another lets his land on terms which so cramp, cabin, and confine his tenants, that their utmost efforts produce little benefit to themselves or to the community. Another professes to let his land to farmers, but reserves the right to consume, and does largely consume, the produce of their capital and labour with game and wild creatures kept for his own selfish gratification. Another again depopulates many square miles of territory, and excludes sheep and all useful culture to make a deer forest. But so numerous and often so minute are the gradations which intervene between the beneficent agricultural improver and the maleficent depth of the game-preserver and the deer forest maker, that the law cannot usefully interfere, but permits each owner of land to "do what he likes with his own." Each landowner, however, is amenable for his acts to public opinion. The manner in which he performs, or neglects to perform, the condition on which he is a landowner, are, however, proper subjects of inquiry and criticism, of praise or blame. To claim exemption for a landowner from criticism "in what manner he lets his farms" upon the ground that such criticism is an interference with "the arrangements of private life and private property," is manifestly absurd.

We have been drawn into these remarks by the comments of the Edinburgh *Courant* upon our recent observations on the retrograde system Mr Nisbet Hamilton has recently introduced into the management of his fine estate of Dirleton in East Lothian. The *Courant* commentator's defence of Mr Hamilton's innovations, his retrograde, restrictive, and arbitrary conditions of letting, his game-preserving mandates, and the like, are apologetical only, and not worth any special notice, but his main objection to our notice that such acts and dealings of a landowner with his tenants are not legitimate topics for comment by a public writer on agriculture, could not be passed over without a decisive protest and contradiction. At this moment, amongst the chief obtacles to large investments of capital in the permanent improvement as well as in the cultivation of the soil of Great Britain, are the capricious and unwise restrictions under which the occupying tenants hold their farms. And these obstacles can only be removed by such discussions and examinations as will eventually satisfy landowners of the impolicy of their mismanagement, and will render farmers unwilling to become entangled in contracts so hazardous and unsatisfactory as for the most part are the stipulations under which they rent their farms.

WILTS AND HANTS HILL FARMING.

We lately availed ourselves of the information afforded by an able paper on the Chalk Soils of Dorset in the Journal of the Bath and West of England Agricultural Society to show the great strides agriculture has recently made in those districts; and from a paper in the same Journal by Mr Squarey, of Odstock farm, near Salisbury, we learn that as much progress, though by somewhat different means, has been made on the chalk districts of Hampshire and Wiltshire. The farms in these chalk districts have generally the peculiarity of being long and narrow; the house and chief buildings lying in the valley and the lands running in a long parallelogram over the hills, where they meet other farms which extend to the next valley. There is thus the disadvantage of having the homestead at one end of a long and narrow farm, which requires especial management for its correction. These farms usually range from 600 to 1,200 acres each.

This arrangement, however, fairly distributes the various qualities of land amongst the different farms. "The lower portions of the farm usually form irrigated meadows or pastures, and those lying immediately next to them (frequently in Wiltshire termed the "hook-land," from some supposed connection with their corn-growing capabilities) comprise arable lands of a very superior character, producing at frequent intervals wheat, barley, and turnips of good quality. The next division includes what is called the "field arable land," which is weaker in staple than that already mentioned, and is frequently farmed on a longer rotation; it is especially adapted for wheat, barley, and stock, and answers promptly and gratefully to a liberal application of manure. The next and last portion of arable land is that lying at the extreme end of the farm, and which may have been only recently converted from the original down; it is called the "down arable or bake-land," the latter designation arising from the process of paring and burning by which its conversion to arable land is effected. On most farms there will yet remain a portion of down pasture, and the proportion which it ought to bear to the arable land is one of the vexed questions of Wiltshire agriculture."

The lower and best soils are farmed on the four-course system. On the field arable a five-course rotation, including a portion of sainfoin prevails, the clover and rye-grass coming only once in eight years, and two turnip crops often succeeding each other. This provides a good supply of provender for sheep in the early spring. Sometimes barley is sown after wheat, and then the land is laid down in sainfoin for three years. The down arable is also farmed on a five-course shift. The peculiarity of management on this land is, that after the grass of the fourth year, "during the early winter of the fifth year, so much of the straw and long unfermented manure as can be spared is drawn out on the land, and upon it the ewe stock of the farm is folded in regular succession. The land is then ploughed up, and after one cross-ploughing in March or April, it is in excellent condition for turnips or rape, and where the turnips are consumed on the spot by sheep, on bake-lands of average quality, a remunerative crop of wheat may be reasonably expected." By the combination of systems thus used the proportion of green crops is usually three-fifths of the arable land, and where much sainfoin is grown the proportion is even much larger; and truly does Mr Squarey say: "In such cases the smaller portion of land which is sown with wheat will more cheaply realise quantity. In other words, the farmer by appropriating a larger area to the production of green food—such as turnips, sainfoin, rye-grass, clover, and vetches—is enabled to keep such a stock of sheep, that combining an increased quantity of fold manure with the common produce of the yard, he is enabled to concentrate his energies on the thus limited breadth of his wheat and barley field. The yield under a five-field course is not only larger, but more safely to be relied on than in the case of a shorter rotation, and the saving in the items of seed and labour is a matter of some consideration." This passage is a forcible and practical illustration of the course by which modern husbandry increases at once both the corn and stock produced on a given area. The form of these farms has led to the transfer of the greater fertility of one part of the farm to the inferior and distant lands on the hills. This is done by keeping the flock on the hills during the summer and often in the winter, being fed in part with the produce of the lower and better lands.

It is obvious that the fertility of much of these chalk lands is altogether dependent on sheep. The sheep stock any farm will carry depends very much on the extent and quality of its water meadows, and the down land which may be attached to it. The average is 1½ ewe to the acre. The old white-faced Wiltshire sheep which fifty years ago were kept have given way to South Downs, now in their turn nearly displaced by the stronger Hampshire Downs. Mr Squarey enters into a calculation of the cost and produce of the flock on a Wiltshire farm of 800 acres, which would consist of 750 ewes with the lambs till August or September, and about 280 tegs, and shows that the cost will be yearly 1,236*l*, and the produce only 1,125*l*, showing a loss, not counting the value of the manure of 111*l*. The manure, however, far more than compensates for that deficiency. He considers that by increasing the green crops and thereby enlarging the flock, a direct profit may be gained from the sheep. He also thinks less turnips and more sainfoin would enable the Wiltshire Hill farmer to keep more sheep, and that by crossing his sheep with Cotswolds a better return for the food consumed by the flock would be obtained. We have touched only upon the salient points of this very suggestive paper, and it is highly satisfactory to find so much sound theory and practical intelligence amongst the farmers of the chalk districts of the West of England. They have now got in the right tack, and we anticipate a large increase in their production of both corn and stock in the course of the next few years.

Literature.

COMMERCIAL LITERATURE.

The Levant Quarterly Review. Saunders, Otley, and Co.

It is always gratifying to peruse any work written in our own language and published in a foreign land, since it of course proves that we have sufficient status and influence in that land to support a work of that nature.

The present number of the "Levant Review" opens with a discourse on Henry, Lord Brougham, delivered at Constantinople, at the British Literary and Scientific Institution in Pera, and at the Mechanics Institution in Has-Keni. There is another article on "Social Economy, Conditions of Industrial Success in Cotton-growing in Turkey and Syria," to which we turned with great interest; but it merely refers to a former article on the subject, from which we gave at the time considerable extracts in these columns, and quotes an important paper from Mr Moore, our Consul, in which he says:—

> The localities in Syria now waste, where water is abundant and the soil most fertile, are numerous, and they could easily be converted into a most valuable field for the supply of cotton to the English market, while at the same time the Sultan's revenue would be increased, and the general condition of the inhabitants greatly benefited.
>
> What is alone required is a grant of the crown lands, now neglected both in the south and north, to a company for a period of years. Such a speculation, besides possessing the advantages already adduced, would, I have every reason to believe, be highly remunerative to the parties engaged in it.

Now we do not hesitate to say, that if such localities exist, and the Sultan, in lieu of letting the lands lie unproductive, were to make a grant of them at the present time to a company directed by men of known business habits, we have no doubt that the capital would be found in this country to cultivate them. In the whole range of enterprise, we know of nothing so vitally important to England as finding new fields for the production of cotton; and if these lines are read, as we have no doubt they will be read, by the conductors of the "Levant Quarterly Review," let them seriously turn their attention to this subject, so fraught with good to both England and Turkey,—let them give a description of these lands, explain where they are situated, what it would cost if cotton were cultivated there to bring it to the next port for shipment, whether labour is abundant, and the climate healthy, and life secure. This will be a worthy task, and much more important than the discovery of whether the Ngas-Ngas, or Negroes with tails, really possess them, to which subject they have devoted a greater space in their magazine than to this vital subject of cotton-growing. Whether the Negroes have tails or not is unimportant to the great mass of mankind, who can and do exist without them, but who would perish if the supply of cotton were suddenly cut off by an internecine war in the United States, and we had no other sources of supply to look to.

Jackson's Book-keeping. Tenth Edition. Effingham Wilson, Royal Exchange.

Book-keeping is a science professed by many but understood by few, and we do not know that we can give a better illustration of this than by calling to mind how very few eminent public accountants there are, and how often they are called in to elucidate accounts (we allude not to those great mysteries, railway accounts, but merchants' accounts, and especially bankrupts' accounts), and

how often they show that by an imperfect system of book-keeping, merchants and traders are often deceived and ruined by a want of knowledge of their own affairs. Therefore, in a mercantile country like this, a proper system of book-keeping is all important.

Whether Mr Jackson's plan is the simplest possible, we are not ourselves competent to pronounce an opinion; but this we can say, that his book seems to elucidate the subject more than any other of the kind we ever read, and does credit to his talent and industry.

GENERAL LITERATURE.

THE PROGRESS OF NATIONS; or, the Principles of National Development in their Relation to Statesmanship. A Study in Analytical History. London: Longmans. 1861.

[FIRST NOTICE.]

THE anonymous author of this remarkable and interesting treatise does not claim for his theory any dogmatic certainty, but presents it

With a feeling of unfeigned diffidence to the candour, the indulgence and the thoughtful attention of the reader; to his candour, because in scarcely any subject is an author so exposed to ready misapprehension; to his indulgence, because this effort is always crude, and sometimes perhaps ambitious, to solve what is insoluble; to his thoughtful attention, because in the impossibility of establishing infallible conclusions by the unaided efforts of one solitary inquirer, the only useful function is to propose theses for the thought and the discussion of others. For this is indeed a subject in whose attack Vico, Bossuet, and Herder failed with a fame for boldness and ill-success which at once attracts and appals those who are ambitious to follow in their steps.

Having thus disclaimed all pretensions to the character of an infallible system-builder, the author proceeds to open his inquiry:—

What are we to consider history—a string of striking episodes, with no other connection but that of time, or the manifestation of a unity of purpose, worked out by a necessary and defined progression? Can we draw out a tree of history, and trace the connection of its parts?

.....If certain general principles present themselves as explanatory of well-observed phenomena, are they to be refused consideration? or is it vain to hope that a few luminous traits and settled axioms may give a key to the acts of God by man, which are too often obscured by the acervation of detail, and distorted by the licence of unsystematic conjecture? In all physical nature it is granted that the Deity works by established and fixed principles: in the direction of human events alone this mode of governing has been denied.....It must, however, be always remembered that in applying to social affairs the methods of observation by which natural science has been discovered, we labour under disadvantages which have been fatal to many previous efforts.....In the first place, we are dealing with man and man's actions, and so long as the exercise of free will, in however limited a degree, is allowed to us, there must necessarily be that diversity which does not exist in things inanimate, put in motion by the undisturbed agency of external laws. Secondly, the matter with which we are concerned has flashed before the world and passed for ever, and all that is left us is its memory.....Thirdly, there is denied to us the right arm of all discoveries, Experiment.—(Pp. 1-4.)

Passing on to the second chapter, we come to the main proposition of the work, which is as follows:—

There are two sorts of political progress; that of nations, which Vico showed to be cyclical, from insignificance passing through a period of greatness to insignificance again,—and that of humanity, a steady progress, the march of one that advances and never recedes. The difference may be illustrated in this way: The human species engages in a race of intellectual progress after the fashion of the Greek torch-race, where the bearers of the torch handed it from one to another as they became exhausted; but no one is allowed to take up the torch till he is in the flower of youth, and must hand it over to his next neighbour as soon as age or accident has weakened his frame or retarded his pace. He falls back and dies; his neighbour carries along the torch till he too hands it to another. The torch, then, which is Humanity, the onward progress of mankind's improvement, whatever may be the goal to which it must ultimately come, has advanced without any perceptible tendency to retrograde, while the bearers of the torch—the nations of the world—have fallen away and died when their part in the great race of human advancement has been played.

.....Whither tends it? the impatient spectator has frequently asked.....When we have established the laws which have regulated with invariable action past events, we are then, and not till then, in a position to consider whether there is anything to prevent a similar action hereafter.

Now, it is obvious that every national progress has, during a certain period, been connected with the great progress of human knowledge—the bearers of the torch moving as fast as the torch moves so long as they hold it—the nation advancing itself while it advances humanity. We shall have to note hereafter how the history of every nation which has made a stir in the world, informs us that at some one period that nation impressed its character on the century, that among its citizens were nearly all the inventors, the successful diplomatists, the great thinkers of the age, all, in short, who were then advancing knowledge, and controlling the movements of the world: but history equally teaches us that when a more fresh and vigorous nation has arisen, its predecessor, enfeebled by the glorious but enervating race, may turn piteously and ask,—

Qui prior es, cur me in decursu lampada poscas?

But it will ask in vain. Ruthless wars are the result, and the inevitable end is that the younger and stronger and more honourable nation seizes the torch.....

So the spirit of humanity passes from hand to hand among the nations, a mighty heritage, which each transfers richer than it received it. Do we wonder that it is struggled for?.....Is there a nobler destiny for nations than to spend their life and strength in increasing the stock of human knowledge and human power?.....

But with this endeavour to distinguish between the progress of humanity and the progress of nations, we must dismiss the former from our inquiry. The statesmen has nothing to do with the progress of humanity, except to help his nation to take part in the race as soon, and to remain in it as long, as he can. He is concerned, not with the torch, but with the bearers of the torch. It would have been well if those who, denominating themselves philosophers of history, have essayed to write manuals for statesmen, had borne that fact in mind. Not one of them except Vico has escaped the most lamentable confusion; and because Vico thought fit to confine his researches to national progress, he has been the subject of constant attacks by superficial pamphleteers, who attempt to refute his cyclical theory of national existence by pointing to the steady, intellectual advance of mankind.....

Nations, then, however remote in time, bear a resemblance in their common nature, which in the gross effaces the difference caused by the relation of succession. No one denies that every nation has been marked by strong individual features which distinguish it from all its fellows, but we contend that all nations have developed themselves according to a more or less modified action of the same laws, and have—the most prominent of them—each proceeded to join in the great development of humanity after the same method.—Chap. II. "Human Progress."

It will thus be seen that the argument of this treatise is divisible into two portions, the first being a skeleton theory of the progress of humanity, which is represented as confided to a purely linear succession of "monarch nations,"—and the second being a theory of the method according to which the separate life of each nation is supposed to be developed from insignificance to greatness, and thence to insignificance again. Both of these themes are powerfully worked out. The second of them occupies a series of essays on different stages of society, which, although in many respects open to criticism, contain much practical wisdom, and are mainly based on careful study and shrewd observation. The author's primary theory, on the other hand, is purely a speculative inference from past history, and is, in our judgment, a very erroneous one. It pervades the whole volume, but it is chiefly set forth in the 8th chapter, which is entitled "The Primacy of the World." Here "pass before us in review the successive Primates of the world, each in its acme." The author begins with the Egyptians, but does not dwell on them, saying that "we know little of that early age, and can never know more.....The first burst of intelligible and well-recorded civilisation was in the Isles of Greece." He then names the successive "torch-bearers" as follows:—The Ionic and Italic Greeks in the 6th century B.C.; the Sicilian Greeks from 465 to 439; the Athenians from 439 to 410; the Romans from 155 B.C. to A.D. 14.

Then came the dark ages. Why were they dark? Because there was no nation in its acme.....Every nation has had its dark age, but whether from accident or from design, it has so happened that, except at the period immediately succeeding the fall of the Roman Empire, the dark age of any one nation has always been contemporaneous with the acme of some other. Never before and never since, have the dark ages of all existing nations synchronised.....But no one who looks at those ages from the present will regard them as ages of hopeless darkness. They were occupied with the formation of new nations possessing all the characteristics and essentials of progressive communities in the stages of national progress, anterior to the stage in which national progress is identified with the progress of humanity.

The recommencement of that progress is attributed by our author to "the Italians, with Florence at their head," in the 14th and 15th centuries. To them succeeded "the free towns of Germany and Flanders, during the 15th and 16th centuries." Next came the Dutch Republic. "During the 17th century Holland may justly be said to have been the centre of the world's improvement." Lastly, "when Holland declined, France and England rose to the first eminence"; and the sketch closes with the uncomfortable theory that these countries are virtually engaged in

The war of emulation between two nations, each strong and vigorous, and rapid in the race, each with one hand clasped round the torch, while with the other it seeks to thrust away its rival.....As the dark ages were dark because there was no nation in its acme, so the 18th and 19th centuries have been the most magnificent and brilliant because there have been two nations in their acme. The bitter conflicts of these nations are the price that humanity has paid for its more rapid and solid advance, and these conflicts will never permanently cease till France—already showing unmistakeable signs of its unfitness long to continue the rivalry—shall fall back from the race, and take its place among the stationary nations who, in a peaceful repose, look on at the struggles and triumphs of their successor nation, adopt its inventions, read its literature, imitate its fashions, employ its busy artisans, but of their own energy contribute nothing to the cause of progress.

The historical sketch of which we have given this bare outline is written with an eloquence and enthusiasm which cannot but command the reader's sympathy; but as an exposition of the real meaning of history, we think it painfully deficient. In the first place, it is a dreary and selfish theory of civilisation that conceives of national life as secondary to the acquisition of "positive science," and holds that it is worth while for nations to rise and fall that mankind in the abstract may increase its knowledge of physical facts and intellectual laws,—which is evidently the sort of advance which the author has mainly in view. (We should rather say that the chief value of this increase of knowledge and power consists in its increasing the *means* of developing nobler and

stabler forms of civilisation,—but the means only, which may be either used, abused, or neglected.) In the second place, it is scarcely conceivable that in any state of civilisation which admitted of one nation's entering so completely into the intellectual heritage of another as this theory (to be consistent) requires, the succession of ideas should be confined to single nations, and should not embrace groups of such, more or less alive to the same influences. Thirdly, it is still more inexplicable why the possession, any more than the succession, of vital thought should be miraculously restricted to one nation at a time. What possible law of nature or decree of Providence can there be to prevent France and England, and Germany and Italy to boot, from "holding the torch" simultaneously? Lastly, we object that the author has greatly mutilated his facts in order to support his theory. The history of civilisation is not confined to the nations whose acmes he enumerates. Where are we to intercalate the vast and age-long civilisation of India, with its poems, dramas, codes of legislation, and systems of philosophy? Do we owe nothing to the active civilisation of Phœnicia? or to the wonderful nationality of the Hebrews, which has quickened all Christendom with its intense religious life, and left its mark in every quarter of the globe? Were not these nations as essential to the "progress of humanity" as the Greeks and Romans?

But if our author's theory is thus untenable as regards the pre-Christian ages, it is still more at fault in respect to modern times, as may be seen from the meagre list of "acmes" which we quoted above. No one can fail to see that this meagreness arises in the necessity of pruning down the facts so as to represent that (until within the last century and a half) no two nations were in their glory together. For instance, the author keeps back the acme of England till the eighteenth century, thus virtually ignoring some of the very richest periods of our national life. If it had but suited his theory, what a glorious acme he would have made of the Elizabethan age! Again: he passes over the intellectual development of Germany during the last seventy years in the most superficial manner. He dismisses the subject in three pages of disparagement, the substance of which is that Frederick the Great, "by his meddling, has undone German literature" (p. 167). Another of these suppressions of fact is the assertion that as "there is *no* history of Bœotia," so there is "no history of Switzerland, because there is nothing to relate. Let Epaminondas and William Tell have all their honour, but of the nation there is no history because there is no progress" (p. 238). Does our author, then, count as nothing the names of Zwingli and Rousseau, of the Bernouillis, Eulers, and Bonnets, of De Saussure, Johann Müller, and Sismondi? When, too, he speaks of "the total deficiency of literature in America" (p. 159), we should like to ask how it is that his foot-notes so often include references to the works of Prescott and Motley, and whether he utterly disesteems the writings of Bryant and Longfellow, of Hawthorne and Mrs Stowe. Had he taken as much pains to work into his programme all the authentic records of civilisation and thought as he has taken to prune them down, he would have found his present theory of a merely linear progress wholly untenable. Such a process would have shown that various centres of civilisation have been scattered over the globe, sometimes visibly connected with and greatly influencing each other, as in some of the cases which he enumerates; sometimes, although co-existent in time, only touching each other at isolated points, as in the case of India and Greece; sometimes not even doing that. But as the progress of civilisation multiplies the points of contact, opens up new lines of connection, and stimulates mutual needs of every kind, the true interdependence of nations, both material and spiritual, becomes more and more visible. "America is not civilised while Africa is barbarous," was the remark of the most independent of living American authors. And he was right. It is only when surrounded by the healthy vitality of *all* nations that the civilisation of any one of them can attain to its fullest development.

We must defer to another article the remainder of our criticisms on this interesting volume.

THE NATIONAL REVIEW. No. XXIII. January.

Chapman and Hall.

THE predominant element in this number of the "National" is political history. "Frederick the First, King of Italy," is, in some sense, a pendant to the article in the last number on "The Franks and the Gauls." As the object of the earlier paper was "to show that Louis Napoleon Buonaparte was not the successor of Charles the Great," so the object of the present article is to explain "that Francis Joseph of Lorraine is just as little the successor of the Saxon Ottos or the Swabian Fredericks." This is accomplished in an interesting sketch of the history and surroundings of Frederick Barbarossa. "Demosthenes" is another historical article of much ability, not without a pointed bearing on the political situations of to-day. "The Growth of Italian Unity,"—one of the best papers on Italian politics we have ever read,—is a retrospect of its subject during the last twelve years, and is written with great beauty of style and in a generous and impartial spirit. "The Slave States and the Union" briefly traces the widening of the black spot from the founding of the Republic to the present time, with intent to show that slavery "is a despotic, an overruling, a *missionary* principle, which must mould the whole policy of the States in which it has once taken root," and that every American statesman who deserves the name "must either virtually approve it and heartily accept the logical inferences to which it leads," or he must do precisely the opposite of this. "Any third course, based on mere neutrality and Unionism, must necessarily fail, because admitting, in fact, of no coherent policy at all."

There are two other articles on political, or semi-political subjects. The first of these is on "The Statutes at Large," in which the writer passes in review "all the principal projects for accomplishing what is called statute-law reform," and thus sums up the principal results at which he arrives:—

The notion of putting the whole law, or the whole statute-law, of England into a form in which it can be carried in a plain man's pocket is mere rodomontade; codification of the common law is most objectionable, consolidation of the whole statute-law out of the question; some groups of statutes may be consolidated, but the process will be of little use unless amendments accompany it.

The second article to which we refer is on the "Tests for the Public Service," and consists of a comparison of the system of pass-examination with that of open competition which has been proposed as its substitute, and against which the reviewer powerfully marshals a large number of objections. He thinks, however, that although the present plan, "on the whole, works well," it "might be modified so as to work still better."

Of the literary articles, the most striking and brilliant is the opening one, on "Chateaubriand." It is full of interest and point, but the character of its subject is so repulsive, from his vanity and selfishness, that his history, instructively and graphically as it is here presented, is yet painful reading. In curious contrast to this, we have a brief but very pleasing account of "Eugénie de Guérin," a lady not long deceased, whose life has been printed by her friends for private circulation, and who seems to have been one of those rare Frenchwomen who command at once our esteem and admiration. "With a little change of names and local colouring, the journal might have been kept, and the life lived, by hundreds of English ladies." Yet the record of Mdlle de Guérin's pure and thoughtful life is a melancholy one, from the absence of any sphere of external activity at all adequate to absorb her mental power. As the reviewer well remarks:—

The native quickness and unrivalled conversational talent of French women enables them to talk, and even to think well, on less knowledge than would sustain any other race. If they marry early, they scarcely feel the want of high intellectual training; or if they come in contact with superior men, they easily seize the ideas that circulate around them. But the want of thought tells none the less, and avenges itself naturally; it leads to a brilliant hollowness in the intercourse of the *salons*, where trifles, scandals, and little narrow views of faith or politics take the place of serious ideas: it is the source of vice, or at least of indiscretion, among the more impulsive and worst trained, who take refuge from vacuity in passion; and in nobler natures, like that of Mdlle de Guérin, it wears away life itself, by the ceaseless tension of the soul.

Of the remaining articles, one gives a sketch of "The Autobiography of Dr Carlyle," which is curious, but which does not convey a very attractive picture either of the man or of his times.

There is a very thoughtful paper on Miss Yonge's novels, not so much on their literary aspects as on the ethical idealism which they involve, especially in its relation to the positive Anglo-Catholic dogmatism which she takes as her starting point in all her delineations of moral character. The paper is subtle as well as able,—but subtle only in its exposure of Miss Yonge's moral assumptions;—in other respects it is based on a broad and healthy catholicity of spirit, without any of that spurious liberalism which despises faith. In "Old Creeds and New Beliefs," we have a criticism mainly favourable of several recent German and English theological works, the chief of which is the celebrated "Essays and Reviews."

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The Bank of France has for once acted with energy and prudence; on Tuesday it raised its discount to 7 per cent. in consequence of the increase at London and of the heavy demands made on it. The belief is that the monthly return to be published to-morrow will show a large diminution in the bullion: the amount is named by some persons, but as it is a mere guess, it need not be repeated, especially as the telegraph will to-morrow transmit to you the true figure. The suggestion is once again made that the Bank of France ought to publish its return weekly like the Bank of England, instead of only once a month: certain it is that if it were to do so, it would render a great service to the financial community. Should the demands on the Bank continue to be heavy, it is to be hoped that the Directors will not hesitate to raise the discount again: to do so would, it is true, cause a great outcry, for here the majority of the public understand financial matters so ill, that they think the Bank can fix what discount it pleases, and that consequently a high one is little better than robbery; but it is more advisable to brave an outcry than to incur the dangers which recourse to expedients and violation of sound principles are sure to occasion.

The Ministry of France has raised the interest on Treasury bills to 3 per cent. for those of from three to five months, 3½ for those of from six to eleven months, and 4 for those of a year. But if the present state of things continues, these rates cannot rule long.

In presence of "the situation" depression naturally exists in all branches of trade, and failures are apprehended. On the Bourse a veritable discouragement prevails, and two speculators in Spanish stock unable to meet their engagements—those of one of them exceeded 1,000,000f—have had to be "executed." Subjoined are the week's quotations of the Bourse; there has been, it will be seen, a general fall, and a rather large one in Credit Mobilier shares:—

M. Mirès has vouchsafed no statement respecting the result of the subscription to the Turkish loan, and yet he made known last Friday that in the event of the full amount required not being offered by the public, a number of bankers would make up the deficiency. He, however, has this day published a declaration that the first instalment of the loan has been paid to the Ministry of Finance at Constantinople, through Messrs. Arlaud, Court, and Co.

The French Government has just taken another and very important step in the path of commercial reform, by issuing the following decree:—

"Art. 1. From the 10th January, 1861, the duties on the importation of the following goods shall be fixed as hereafter:—

Skins, fresh or dry, large or small, and Furs of all kinds, prepared or not.—By sea, by French vessels, from countries out of Europe, produced by countries of Europe—free;
From elsewhere,* and by foreign vessels—2f 50c the 100 kilogs;
By land, produced by European countries—free;
From elsewhere—2f 50c the 100 kilogs.†

Bristles of all kinds.—By French vessels, from countries out of Europe, the production of European countries—free;
From elsewhere, and by foreign vessels—3f the 100 kilogs.

Tallow, Lard, &c. (*graisses*) of all kinds—By French vesssels, from countries out of Europe, the production of European countries—free;
From elsewhere, and by foreign vessels—2f the 100 kilogs.

Elephants' Teeth.—By French vessels, from countries out of Europe—free;
From elsewhere, and by foreign vessels—3f the 100 kilogs.

Tortoise-shell.—By French vessels, from countries out of Europe—free;
From elsewhere, and by foreign vessels—5f the 100 kilogs

* This phrase here means European entrepots.
† The 100 kilogs are nearly 2 cwts, and 25f=1*l*.

Nacreous Shells.—By French vessels, from countries out of Europe—free;
From elsewhere, and by foreign vessels—4f the 100 kilogs.

Oleaginous Fruits of all kinds.—By French vessels, from countries out of Europe, the production of countries in Europe—free;
From elsewhere, and by foreign vessels—2f 50c the 100 kilogs;
By land, the production of European countries—free;
From elsewhere—2f 50c the 100 kilogs.

Oleaginous Grain of all kinds.—By French vessels from countries out of Europe, the production of European countries—free;
From elsewhere, and by foreign vessels—2f 50c the 100 kilogs;
By land, the production of European countries—free;
From elsewhere—2f 50c the 100 kilogs.

Gum-Benjamin.—By French vessels, from countries out of Europe—free;
From elsewhere, and by foreign vessels—2f 50c the 100 kilogs.

Caoutchouc and Gutta Percha.—By French vessels, from countries out of Europe—free;
From elsewhere, and by foreign vessels—3f the 100 kilogs.

Odoriferous Woods.—By French vessels, from conntries out of Europe—free;
From elsewhere, and by foreign vessels—3f the 100 kilogs.

Cocoa-nut Shells.—By French vessels, from countries out of Europe—free;
From elsewhere, and by foreign vessels—3f the 100 kilogs.

Beads, &c.—By French vessels, from countries out of Europe, the production of European countries—free;
From elsewhere, and by foreign vessels—3f the 100 kilogs.

Hemp, flax, and other vegetable filaments not named.—In stalks, hackled and tow—free.

Jute.—In stalks or hackled—free.

Madder.—In roots, &c., &c.—free.

Sulphur.—Not purified, and ore included—free.

Ores of iron, copper, lead, tin, cobalt, antimony, arsenic, zinc, and others not named—free.

Copper, pure, or alloyed with zinc.—By French vessels, in pigs, bars, plates, filings, and old broken articles—free;
By foreign vessels—25c the 100 kilogs.

Lead.—By French vessels, filings and broken articles—free;
By foreign vessels, ditto—25c the 100 kilogs;
By French vessels, in pigs—2f 50c the 100 kilogs;
By foreign vessels, ditto—2f 80c the 100 kilogs.

Tin.—By French vessels, in pigs, filings, and broken articles—free;
By foreign vessels, ditto, 25c the 100 kilogs.

Bismuth (Etain de glace).—By French vessels—free;
By foreign vessels, 25c the 100 kilogs.

Zinc, crude, and in pigs, bars, plates, filings, and broken articles.
By French vessels—free;
By foreign vessels, 25c the 100 kilogs.

Nickel, pure, or alloyed with other metals (argentine or German silver), in pigs.—By French vessels—free;
By foreign vessels, 25c the 100 kilogs.

Bones and hoofs of oxen.—In the natural state, calcined, &c.—free."

The decree further enacts that the drawbacks now allowed on the export of sulphur, skins, hides, lead, copper, and copper alloyed with zinc, shall within two months from this day (the 10th) be suppressed.

The first thing which will strike the English readers in this decree is, that certain of the articles figure in the treaty of commerce with England, so that the advantages accorded by that convention to that country are now extended to all countries. The second and much more important matter which will be noticed is, that the decree strikes a heavy blow at the protection which French shipowners have so long enjoyed: under it, all sorts of ores, flax, hemp, jute, madder, &c., can henceforth be brought free by foreign vessels as well as by French; whilst on copper, zinc, tin, and some other articles the differential duty on foreign vessels is insignificant, and on other articles brought by them not excessive. This reform will probably cause an outcry from the shipping interest, but it will be advantageous to the country at large.

Compared with the old tariff, the one above is excellent. In the old tariff the word "free" scarcely ever appears in the new one it figures repeatedly; and when duties are retained, they are about one-half, and in some cases greatly more than half, of what they used to be. Thus skins, which are now to pay 2f 50c, were formerly taxed 4f 50c; bristles, which are to pay 3f, were 5f and 5f 50c; tallow, lead, &c. (*graisses*) which are to pay 2f, were from 9f to 30f; oleaginous fruits and grains, which are to pay 2f 50c, were from 1f to 7f; and so on. Such reductions as these cannot fail to be most advantageous to French commerce.

A writer in the *Journal des Débats* recommends that in continuation of these reforms the duty on salt used in the manufacture of chemical productions shall be abolished. This duty weighs heavily on several branches of trade, and particularly dyeing and soap; and the abolition of it was not only demanded by several practical men from the Conseil Superieur du Commerce, which made an investigation into the state of French trade previous to fixing the duties under the English treaty, but might, it is affirmed be accorded without inconvenience to the Treasury.

M. Michel Chevalier has been named Grand Officer of the Legion of Honour. This is a high dignity in these parts, and

assuredly it could not be better bestowed than on the man who has done more than any other in France to promote the cause of commercial reform.

Messrs Guillaumin et Cie. have brought out an excellent translation by M. Dupont White of Mr J. Stuart Mill's treatise on *Liberty*. It is preceded by a very remarkable dissertation by the translator. As Mr Mill's work has made a great noise in France, this translation of it must be acceptable to the public.

The Directors of the Credit Mobilier announce the annual meeting of the shareholders for the 30th April next, but they do not state what dividend they intend to declare. If they gave none at all it would occasion no surprise, regard being had to the bad state of affairs for such an institution as theirs during the past year.

An Imperial decree enacts that the drawback for steam engines made in France for international navigation shall henceforth be calculated on the basis of the duties on British steam engines imported into France for navigation.

Since the 1st of this month several companies are paying interest on dividends: the Bank of France, 72f for balance of dividend; the Credit Foncier, 6f 25c per share to complete the interest of 5 per cent., of which one-half has already been paid; the Northern Railway, 25f on old shares, 16f 50c on certain new shares, 9f 70c on other ditto, and 7f 50c on bonds; Dauphiné, 10f per share, and 7f 50c per bond; Southern, 10f per share, 7f 50c per bond; Suez Canal Company, interest; Credit Mobilier Company, 25f interest (this must not be confounded with dividend); Services Maritimes des Messageries Imperiales, interest on shares issued in 1858; Omnibus Company, 25f per share, on account of dividend; Western, Eastern, and Lyons railways, payment of bonds; and many others.

The following were the highest and lowest quotations of some of the principal securities on the Bourse in the last and preceding years:—

Annexed is an account of the markets:—

FLOUR at *Paris*, yesterday, was very firm at 65f to 67f the sack of 159 kilogs. Business in four marks was active at 65f 50c and 65f 75c for disposable; 64f 50c to 65f for the current month.

WHEAT.—At *Paris*, yesterday, the market was animated, and quotations were 34f to 36f 50c and 37f the sack of 120 kilogs. Of the provincial markets, 33 present a rise of 5c to 1f 50c the hectolitre, 78 a fall of 6c to 1f 80c, and 60 have undergone no change. It is said that the Government contemplates decreeing that wheat shall be sold by weight instead of by measure; and it is certain that a great many farmers and dealers would approve the change.

COTTON.—At *Havre*, in the week ending Friday, the sales were 7,396 bales, and the importations 25,031. Prices remained unchanged, low New Orleans being 95f the 50 kilogs, and very ordinary 100f. The stock on the 1st of this year was 105,020 bales; at the corresponding date of 1859 it was 45,130. This week, business has been very dull, and prices show a downward tendency.

SUGAR.—At *Havre*, in the week ending Friday, the sales consisted of 165 casks French West India, disposable at 50f 50c to 51f the 50 kilogs, duty paid; 7,650 bales Reunion, for delivery, at 54f; 800 ditto, *gros grain*, in the port, 54f 25c; 1,883 ditto for delivery, same price; and a lot of San Domingo, at 49f. The arrivals were 400 casks French West India, 17,172 bales Reunion, 580 sacks from Dunkirk. The stock of French West India on the 1st of January was only 2,200 casks; at the same date of 1859 it was 12,100. No sales have been made this week. At *Nantes*, last week, 27,451 bales Reunion were sold; 17,631 of these for delivery, the rest disposable. The quotation was 52f 50c. Mauritius was nominally 53f 25c to 54f; French West India, 49f 50c; Havana, 54f. This week, some Java has been sold, but prices are not stated. At *Bordeaux*, last week, 4,700 bales Reunion disposable went at 52f 50c to 53f 50c; 6,700 for delivery, 72f 50c; and 1,667 ditto, *gros grain*, 74f; some French West India at 48f 50c to 49f. This week, French West India has been at 48f 50c; Mauritius, for delivery, 54f; and some Reunion, *gros grain*, have also been sold. At *Marseilles*, last week, in French colonial sugar nothing was done, and in foreign 2,000 sacks Pernambuco went at 37f.

COFFEE.—The sales at *Havre*, in the week ending Friday, consisted of 399 sacks Hayti Port au Prince, disposable at 81f, fine quality in bond; 3,000 ditto for delivery, 76f 50c to 77f; 100 sacks Gonaives for delivery, 82f; 800 sacks Rio not washed, also for delivery, 73f; and 339 sacks Costa Rica at prices not stated. The arrivals in the course of the week exceeded 10,000 sacks. The stock on the 1st of this month was 4,415 tons, including the quantities not yet entered in bond; at the corresponding date of last year it was 3,346. This week, sales have not been large Rio at 78f in bond; Hayti, 77f 50c. At *Bordeaux*, last week, 650 sacks Mysore went at 112f the 50 kilogs, and 90 sacks Guayra at established prices. A lot of damaged Mysore also went at 107f to 108f. This week, a lot of Mysore has been sold at 111f, and one of Rio not washed 76f. At *Nantes*, this week, nothing has been done. At *Marseilles*, last week about 2,000 sacks Rio went at 75f for good qualities, 68f to 69f for inferior. Some lots of damaged were also disposed of by auction.

INDIGO.—At *Havre*, last week, business was active, as many as 86 cases Bengal and 4 Java having been disposed of; prices were firm, but were not stated. The sales would have been more numerous if the stock had been large enough to admit of greater choice. The stock on the 1st of this month was 1,018 cases; at the same date last year it was 1,563. This week, some small sales of Bengal have been made at prices kept secret. At *Bordeaux*, last week, the demand was active; the sales having been 35 cases Kurpah, 6 Madras, 12 Bengal, and quotations were above the estimates made by the brokers. This week, several sales have been made, also at quotations above the estimates.

HIDES.—The sales, at *Havre*, in the week ending Friday, were 193 Buenos Ayres dry at 127f 50c the 50 kilogs duty paid; 3,500 Monte Video salted, 75f. The arrivals did not amount to 4,000. The total sales in the course of last year were 681,326, and of horse 95,161. This week, Buenos Ayres dry cow have been at 107f 50c to 131f 25c; Uruguay salted, 75f.

WOOL.—At *Havre*, in the week ending Friday, business was confined to the sale of 9 bales of Buenos Ayres at 122f 50c the 50 kilogs duty paid. The total sales of different sorts of wool at *Havre*, in the course of the year 1860, was 13,100 bales and 2,570 of sheepskins. This week, Buenos Ayres unwashed has been at 1f 70c to 2f 50c the kilog; La Plata sheepskins, 1f 10c to 1f 20c.

TALLOW.—There were no sales at *Havre* last week, and no arrivals, and there have been none this week. At *Paris*, yesterday, the 100 kilogs were 134f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, were 104f to 105f the hectolitre; Montpellier, of 86 deg., 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c; beetroot, first quality, 109f.

ANTWERP, Jan. 9.

The stock of coffee at this place on the 1st of this month was 22,000 bales,—same date last year, 23,000; of cotton, 1,953,—last year, 5,720; of hides, the number was 183,990,—last year, 43,684.

CONSTANTINOPLE, Dec. 30.

It is stated here in well-informed quarters that negotiations have been entered into with the French and English Governments for the conclusion of commercial treaties.

COMMERCIAL AND MISCELLANEOUS NEWS.

Messrs W. Nicol and Co. of Bombay, writing on the 12th ult. observe:—Imports.—We noticed in our last report the combination among the native dealers in British imports to suspend purchases; we regret to say that it has continued up to this date, and that we are, therefore, without the means of furnishing any detailed report of our import market, none but retail bazaar transactions having taken place. In grey goods we have scarcely any change to notice; the only descriptions we can point to as likely to be inquired for soon, are 40 in. 8¼ to 8½ lbs shirtings; 40 to 45 in. domestics; and 32 in. 6 and 7 lbs T cloths of fine makes; for these we expect a good demand when business is resumed, though we hardly look for any improvement on late currencies meantime. In twist there is no alteration to note. Turkey red goods, generally, keep dull. White Goods—Except a slight inquiry for low white shirtings, to sell at about Rs. 5 to 5½ per piece, there is nothing doing. Prints are quiet, being now quoted at Rs. 60 to 60 8. Metals—Copper has slightly declined, and British bar iron is also lower: Swedish bar has fetched Rs. 54 8 per candy. Exports.—Cotton—The news brought by last steamer on 26th ultimo, of a further advance in prices of cotton at home, with a receipt also of more reliable accounts of the reported injury of the American crop, had a very exciting influence on our market, and was immediately availed of by the dealers to advance prices Rs. 4 to 5 per candy over the quotations current previous to the departure of last mail. A very brisk demand set in, and purchases of about 10,000 bales transpired the day after the mail left, chiefly of Dhollera, at Rs. 124 to 125 per candy, bld Oomrawuttee at Rs. 115 to 116, and some Compta at Rs. 114½ to 115 per candy. Heavy purchases have since transpired at higher rates, Dhollera having been bought at Rs. 127 to 128, and sawginned Dharwar at Rs. 135 per candy. The telegram of home news up to 10th ultimo was received here on 8th instant, and the advice it brought of a further advance at home of an eighth per lb, caused increased excitement, and a further advance in rates has taken place; the latest purchases reported being at Rs. 130 for Dhollera, Rs. 138 for sawginned Dhaswar and Rs. 120 for Compta. Including these we give about 30,000 bales as the aggregate amount of transactions during the past fortnight, exclusive of some pretty large contracts for new fine Oomrawuttee cotton at Rs. 132½ to 134¼; and for new Hinglnghaut cotton at Rs. 146 per candy, deliverable in April next.

The production of oil from coal and petroleum, or rock oil, having passed through its experimental stages and become an article of commerce, and having assumed a form of utility which commends its use in all localities where gas is not attainable, as well from its illuminating properties as its economy, and as it bids fair to compete successfully with the production of burning fluid and camphine, and finally, to perhaps exterminate their manufacture, we devote some space to a consideration of its history and production. The production of petroleum, which occurs at the present time mainly along Oil Creek and its tributaries in Pennsylvania, in the vicinity of Mecca, Ohio, and Parkersburg, Virginia, may be stated as follows:—January, 1860, 30 barrels per day; July, 500 ditto;

December, 1,600 ditto. The oil has commanded an average price in its crude state, at the wells, of 18 cents per gallon. At the present time it is selling for about 23 cents, although it has been sold during the past summer as low as 10 cents per gallon. But as we estimate the yield for July, 1861, at 5,000 barrels, of 40 gallons each, per day, it is probable the price will decline to a lower point than it has yet reached. The manufacture and sale of oil refined from coal and petroleum, which has already had a marked effect on the whaling interest and the production of fluid, may be stated as follows:—In 1858, 100 barrels per day, at an average price of 80 cents per gallon; in 1859, 300 do. per day, at an average price of 100; in 1860, 1,500 do. per day, at an average price of 70. Its production before the close of 1861 will doubtless reach 5,000 bbls, or 200,000 gallons per day or upwards, at an average price below rather than above 50 cents per gallon. As it is an oil perfectly free from danger of explosion, gives a light fully equal to gas, and is more than three times as lasting as fluid, it is very probable that when these low prices are reached, whales may have some rest, and the camphine operators turn their attention to the manufacture of rock oil. Much capital has been invested in the manufactuee of coal oil; but as the rock oil can be pumped so much more cheaply than the oil can be extracted from coal by the agency of heat, the coal oil manufacturers will have eventually to give over the field to the rock oil. We close with a brief description of the oil wells. These are borings through the solid rock of from three to six inches in diameter, and of various depths, from fifty to five hundred feet, the drill being kept in operation till a vein of oil is "struck," or the attempt abandoned. If successful, the hole is tubed, and a pump, worked by the hand or the feet, or steam, put in operation, and rude tanks erected to contain and separate the oil and water which flow from the pump. The wells in successful operation number about 200, principally in Pennsylvania, Virginia, and Ohio, and the total number in operation and in course of construction at the present time is about 2,500.—*New York Shipping List.*

The following statements respecting the bullion movements of the past half-year are from Messrs Pixley, Abell, and Langley:—

STATEMENT of IMPORT of BULLION into LONDON from UNDERMENTIONED PLACES during Six Months ending 31st of December, 1860.

There has been much variation in the tone of the cotton market this week, according as influenced by American accounts or by financial action at home. There was a buoyant feeling on the first day or two, with some advance in prices. This was arrested by the rise to 7 per cent. in the Bank rate, and prices receded slightly. In the last two days confidence has again been restored, and yesterday a large business was done, fully on the level of last week's quotations, if not higher. Our quotations for American are but little altered. Egyptian have been in fair demand, at steady prices. Brazil have sold in some cases higher. East India are without change. The sales to-day are 20,000 bales. The market closes firmly. The reported export amounts to 3,770 bales, consisting of 1,860 American, 200 Brazil, and 1,710 East India.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 9th day of January, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,971,515	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	9 869 817
		Silver Bullion	1,627,098
	25,971,915		25,971,915

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,019,721
Rest	3,285,418	Other Securities	21,499,766
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	3 787,397	Notes	5,518,115
		Gold and Silver Coin	678,471
Other Deposits	15,477,425		
Seven Day and other Bills	662,833		
	37,716,073		37,716,073

Dated the 10th January, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,716,633	Securities	31,441,487
Public Deposits	3,737,397	Coin and Bullion	12,175,386
Private Deposits	15,477,425		
	40,331,455		43,616,873

The balance of Assets above Liabilities being 3,285,418*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£35,379
A DECREASE of Public Deposits of	3,538,509
An INCREASE of Other Deposits of	2,252,931
An INCREASE of Government Securities of	531,553
A DECREASE of Other Securities of	1,326,717
A DECREASE of Bullion of	477,458
An INCREASE of Rest of	38,340
A DECREASE of Reserve of	419,658

The present Bank return is not so unfavourable as might have been anticipated, considering the first day of the payment of the dividends is included in it. The decrease in the "Public deposits" is not followed by a corresponding increase in the other deposits; therefore the liabilities of the Bank are lessened, and, as a consequence, its reserve bears a greater proportion to them. The decrease in the bullion is not more than usually takes place on payment of the dividends.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,125,108	£ 20,555 608	£ 21,918,700	£ 22,648,759	£ 21,116,633
Public deposits	6,455,107	2,986,996	5,518,742	5,564.925	3,737,397
Other deposits	10,975,856	13.124,733	15,725,808	15,543,469	15,477,425
Government securities	14,150,256	9,191.986	10,698,867	10,963,822	10,019,721
Other securities	13,511,364	23,849,662	16,564,194	13 892.930	21,499,766

Price of Consols	96⅛	94⅞	95⅜	95⅝	92
Average price of wheat	38s 1d	47s 10d	40s 6d	44s 2d	56s 3d
Exchange on Paris (shrt)	24 90 95	25 20 25	25 10 15	25 7½ 12½	25 20 30
— Amsterdam ditto	11 15⅝ 16	11 14 15	11 15	11 12½ 13	11 15 ⅛
— Hamburg (3months)	13 4½ 5	13 6	13 6	13 4½ 5	13 7 ½

In 1851, the exchanges were against this country, and an export of gold to Paris and Hamburg was taking place. Still the rate of money was not above 2½ per cent. in the discount market. Peace had been concluded between Denmark and Holstein. Great excitement prevailed on the currency question, and on the effect of the substitution of gold for silver.

In 1858, attention was directed to the marvellous narrative of the defence of Lucknow and the reverse sustained by General Wyndham. The proposed transfer of the Government of India to the Crown was under agitation. The Bank of England rate of discount had been lowered from 6 to 5 per cent. In the open market the best bills were discounted at 4. The Bank returns for the dividend week showed a decrease of 1,811,404*l* in the other securities, and an absolute increase of half a million in the reserve; although the Bank had redeemed from the Stock Exchange and elsewhere Government securities to the amount of no less than 1,426,677*l*, upon which they had obtained loans during the crisis of the previous autumn. At Hamburg the rate of discount had fallen to 2½ per cent.

In 1859, the world was startled by the bold bid for the suffrages of the Italian revolutionary party contained in the speech of the King of Sardinia at the opening of the Chambers. Austria was pouring troops into Lombardy to strengthen her garrisons. Great agitation prevailed in the stock markets throughout Europe. The French 3 per Cents. had fallen no less than 5 per cent. within 11 days, the price being 68.50, while the fall in Consols amounted to 1½ per cent. Immense losses had been sustained in Paris, where the connection between the Court and the Bourse excited general disgust. The discount on the Turkish, Chilian, and Brazilian loans varied from 2 to 4 per cent. The shares of the Lombardo-Venetian Railway had fallen to ½ premium. The decrease in the Bank's reserve in the dividend week was only 151,214*l*, the other securities having decreased 1,645,548*l*.

In 1860, considerable withdrawals of bullion from the Bank of England were taking place, in consequence of the heavy drain for India. Large quantities of India enfaced paper were being absorbed in this country. The Bank of France returns showed a decrease of 1,800,000*l* in the bullion, but the Bank then still held 21,000,000*l*. A great rush for the new Canadian loan of 2,800,000*l* was made. The applications to Messrs Baring amounted to no less than 22,000,000*l*. The loan had been quoted as high as 3⅜ pm.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,535,508*l*; in 1858, a deficiency of 4,724,929*l*; in 1859, a deficiency of 838,386*l*; and in 1860, a deficiency of 4,349,461*l*. In 1861, the deficiency is 6,022,341*l*.

DISCOUNT AND MONEY MARKET.—The Directors of the Bank of England met early on Monday morning, and the result of their deliberations was to raise the rate of discount from 6 to 7 per cent.

This decision was doubtless arrived at from two causes.

1st. The American exchange not showing the improvement that had been anticipated from the arrival of the Persia at New York with upwards of 650,000*l* sterling, and still remaining at a price which left a large profit on the export of bullion from this country. 2nd. The large withdrawals of bullion from the Bank of France, and the knowledge that this would be followed by further operations by that establishment to obtain gold from this country.

The raising of the rate by the Bank of England was followed on Tuesday by the Bank of France raising their rate of discount from 5½ to 7 per cent., which in a great degree neutralises the effect of the rise in the rate by the Bank of England, and renders the importation of gold into France less unprofitable. That the raising the rate was necessary is proved by the continued drain of bullion from both establishments since the rate has been raised.

The telegraph this morning brings the following monthly return from the Bank of France:—

	£
DECREASE.	
Cash	3,286,000
Advances	90,000
Treasury balance	2,045,000
INCREASE.	£
Bills discounted, not yet due	2,760,000
Bank notes	1,270,000
Current accounts	690,000

This return shows a very serious state of affairs, the more especially as the drain cannot be considered as terminated; and it clearly shows that either the Bank of France must resort to the old plan of purchasing more gold at a premium, or enter into another operation with the Bank of England, or sell the silver it holds at a premium, or go on raising the rate of discount.

In consequence of the Bank of England raising the rate of discount, a meeting of a Committee of Joint Stock Banks took place on Tuesday, when they came to the resolution not to allow a higher rate of interest than 5 per cent. on money at call, and 5½ on money at notice; and it was generally laid down as a principle that 5 per cent. was the maximum that ought to be allowed on money at call. That it was wise to abandon the old rule of allowing interest on money at call at 1 per cent. under the Bank rate, no matter what that rate might be, we have no doubt whatever, for circumstances *might* arise when the Bank of England, in

self-preservation, might have to raise the rate of discount to 10 per cent. or even higher, for the express purpose of preventing applications to them for discount. Apart from this, all fixed rules attempting to regulate the money market are absurd, and ought to be abandoned. No two times in the monetary world are precisely alike, any more than any two things in nature; and every derangement or crisis should be dealt with according to its especial features. We think, however, as a general rule, that it is hardly prudent for discount houses or joint stock banks to allow more than 5 per cent. for money at call. The margin in times of panic or in a crisis like the present, ought to be sufficiently wide to insure those who take money at call for the risk they run.

Notwithstanding the raising the rate to 7 per cent. by the Bank of England, the demand for discount there still continues very active. The demand is, doubtless, very much increased by the discount houses acting with such extreme caution in preparing themselves for any emergency that might arise by curtailing their discounts, which necessarily throws additional applications on the Bank of England. This is nothing more than the natural result of the resolution the Bank has come to of refusing to rediscount their paper. As we have more than once remarked, this resolution does not save the Bank from the inconvenience of being called on when their reserve is low; they discount quite as much, and probably more than before they came to the resolution they did, but with this difference, they now discount the paper *without the guarantee* of the discount houses *instead of with it*. The rule of the Bank certainly has this effect, that it compels the discount houses to keep a much larger reserve of bank notes, and consequently the public suffer in the accommodation that would be afforded them but for this compulsory locking up of capital; and there certainly does appear this amount of unfairness in the matter, that the Bank of England can and do use the reserve they compel the discount houses to keep, *which constitutes a portion of the reserve of notes held by the Bank*, in discounting with the money belonging to the discount houses the very bills which they refuse to discount merely *because they are presented by discount houses*, thereby transferring the profit which equitably belongs to the discount houses to itself. And this the Bank is enabled to do with impunity, because it knows that if it over-discounts, and its reserve is reduced to nil, the Directors have only to apply to the Government for a letter to permit them to infringe the law, and they obtain it.

This certainly does seem a very hard case, and we mention this now because it may be attended, should the drain of bullion still continue, with very grave consequences to the Bank.

Money, although the rate is high, continues abundant. We have heard of nothing, however, being discounted under 6¾ per cent. The discount houses are acting with great caution, and, although they discount bills having a few days to run at 6¾, they charge the Bank rate on the great bulk of the paper presented. The arrival of the Persia is expected tomorrow, and the advices by her will tend greatly to guide the future of the money market. If the American exchanges come lower and the drain of bullion continues either to France or America—and by the latest advices from New York the exchange showed symptoms of going lower—a still further rise might be anticipated. On the other hand, if it rises to 105½, as the mint of the United States can only coin 750,000 dols a week, the delay, with the rate of money at 7 per cent., is so great, that it would tend to paralyze transactions, and might cause a suspension of remittances of bullion.

But the most serious cause of alarm is the state of the Bank of France, and, as we believe, French finance altogether; corn and cotton have much to do with the matter, but these causes may be greatly aggravated by a reckless expenditure.

To-day the demand for discount at the Bank and in Lombard street has been active, but money continues very abundant, and the least improvement in American affairs would be immediately followed by an ease in the money market.

But for the present we see no sign of an easy money market. Gold continues to be exported both to France and America, and corn and cotton continue to be higher here than they are there, and the demand for them is apparently as great as ever. One good feature is observable, and that is, that the prices of American securities in London and New York have approximated, and therefore the temptation to send gold out to buy them for the purpose of selling them here no longer exists.

	Bank Rate. Per cent.	Open Market. Per cent.
London	7	6¾ to 7
Paris	7	6 to ½
Brussels	4	4
Amsterdam	3	3
Hamburg	...	3

The National Bank of Turin has raised the rate of discount to 7 per cent.

ENGLISH FUNDS.—The settlement of the Consol account passed off favourably; the rate of continuation from account to account was from 4½ to 5 per cent. The Bank of England has given largely on stock, and delivered on the account day about 560,000*l* Consols, and has, since been a borrower in the market—as the rate of continuation has been from 4½ to 5 per cent. it answers to borrow money on stock and lend it on bills of exchange at 7 per cent.

Money has been very abundant in the Stock Exchange, and it is evident that a large amount of stock has been sold on speculation, which gives facilities for carrying over stock at a cheap rate. Consols have been as low as 91⅜, but close this afternoon at 91⅝ ¾ for money, and 92 buyers for the February account. Reduced and New 3 per Cents. were 91½ ⅝, Exchequer Bills 5 to 1 discount.

French funds close this afternoon at 67.25, which is an improvement of ¼ per cent.

FOREIGN FUNDS.—The only feature has been a considerable fall in Spanish funds. Turkish bonds have been very steady. It is stated that a greatly improved tariff has been concluded with Turkey, under the auspices of France and England.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

RAILWAYS.—The railway market has been depressed, but there is no feature in it worthy of comment. We have no doubt that the pressure of money has caused stock to be brought to market from the fact of loans being called in; the consequence will probably be, that high rates of continuation will have to be given at the approaching settlement.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

BULLION.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes:—

Gold.—We mentioned in our last circular of the 3rd instant the probability of the shipment of sovereigns to New York still continuing, and the past week has witnessed the sailing of the Canadian with 13,000*l*, the Asia with 330,000*l*, the Teutonia with 70,000*l*, the City of Washington with 107,000*l*, the Arago with 12,600*l*, and the North Briton with 2,250*l*. In addition to these amounts about 50,000*l* has been withdrawn from the Bank to-day, and further sums may yet be sent by the steamer leaving on Saturday next; the total now sent exceeds 2,415,000*l*. 100,000*l* of the gold ex Great Britain having been refined, has been sent into the Bank of England. The Magdalena takes 3,087*l* to the Brazils, and the Ellora will take some bar gold to Bombay. The following ships are now on the way from Australia:—The Roxburgh Castle, with 167,000*l*; the Wellesley, with 132,000*l*; the Stratheden, with 196,000*l*; the Essex, with 60,000*l*; Champion of the Seas, with 36,000*l*; and the first of these vessels may be hourly expected.

Silver.—The bar silver, per Seine, has been sold at 61¼d per oz standard, and at this price there has been a fair demand for the steamer to Bombay of the 12th inst., which vessel will take out about 350,000*l*. The Magdalena has taken 19,000*l*. to the Brazils.

Mexican Dollars.—There has not been any demand during the past week; prices are rather weak, and but little will be doing until the arrival of the mail from China, which may be now expected in a day or two.

Exchange on India, prior to the rise in the Bank's rate to 7 per cent., was rather firmer, but since then has relapsed to our quotations of last week. Sixty days' sight bank drafts on Bombay and Calcutta are 2s to 2s 0¼d. Bills with documents 1s 11⅜ to 1s 11½d.

India Government Loan Notes.—There is little or nothing doing in these securities, and prices are nominal:—5½ per Cents. at 100 to 101; and 5 per Cents. 94 to 95; 4 per Cents. 78 to 80.

Quotations for Bullion.—Gold—Bar gold, 77*s* 9d per oz std; bar gold, fine, 77*s* 10d per oz. std; bar gold, refinable, 78s per oz std. Silver—Bar silver, 5s 1¼d per oz std; bar silver, containing 5 grs gold, 5*s* 1½d per oz std; fine cake silver, 5*s* 5⅞d per oz; Spanish dollars (Carolus), 6s 2d per oz, last price.

MEETINGS OF CREDITORS, &c.—In the Bankruptcy Court, in reference to the case of a leather merchant named Gibbs, Mr Commissioner Goulburn gave a wholesale denunciation of the entire system of accommodation paper, and awarded the following sentence:—"The certificate of the bankrupt would be suspended for twelve months. When granted, it would be of the third class only, and protection would be granted for six months, to be renewed at the end of that period unless cause should be shown to the contrary.

A preliminary meeting of creditors of Messrs Whistler, Dawson, and King, colonial produce agents, who stopped last week, has been held, when an approximate statement, showing liabilities 19,170*l*, and assets 11,009*l*, was presented by Mr Lowell Price, the accountant. It was resolved to adjourn for a fortnight, to enable a complete investigation of the books, and Messrs Whistler and Dawson agreed to sign a declaration of insolvency, to be acted upon after the adjourned meeting, if thought necessary.

At a meeting of creditors of Mr W. H. Surridge (Surridge and Son), wholesale cheesemonger and provision agent, who stopped about a week back, the following statement was presented by Messrs Honey, Humphreys, and Honey, the accountants, by which the liabilities amount to 40,121*l* 17s 5d, and the assets to 30,294*l* 1s 4d. The assets are not expected to realise the sum at which they are stated. It is roughly estimated that the book debts will yield about 10s in the pound, causing a deficiency of about 14,000*l*. The stock of provisions, on the other hand, is taken at cost price, and by some creditors is expected to bring more. There have been no accommodation transactions. Mr Surridge did not appear to have regularly taken stock, but a year and a half ago he considered he had a surplus of about 5,000*l*. An offer was made of a composition of 12s in the pound, payable in instalments extending over a year; but, the creditors generally being of opinion that this sum was insufficient, it was subsequently increased to 13s, the last instalment of 2s to be secured.

At a meeting of the creditors of Messrs Holdsworth and Co., sugar refiners, who stopped on the 13th December, it was determined to appoint three inspectors and trustees to clear off the small remaining stock, and examine the books and report thereon a fortnight hence. It appears that the firm commenced in July, 1857, with a very inadequate capital, and have every year incurred large and increasing losses. Their conduct for reckless trading was severely commented upon. Messrs Wallace, Man, and Dowse were appointed trustees and inspectors. The statement of affairs showed debts 27,019*l*, and assets 3,549*l*.

It is stated that Messrs John and George Rennie, the engineers, who, in 1849, effected a composition with their creditors of 8s in the pound, are now honourably liquidating the balance in full.

MISCELLANEOUS.—Several cargoes of grain are now on their way from California to this country, which have been shipped at prices that, according to the present rates, will leave a large profit.

Accounts from San Francisco to the 9th of November show that sanguine expectations are still entertained of the results shortly to derived from the Washoe Silver Mines. It is averred that the quantity exceeds both in extent and richness all previous mining experience. "Persons perfectly conversant," it is stated, "with the mines of Mexico and Peru say that there can be no comparison between these and the Washoe mines, and the main trouble at present seems to be that the ore is too rich, and therefore too difficult of reduction.

The Government of New South Wales have ordered, through the Board of Trade, a supply of tram-rails and two cars from Mr G. F. Train for a horse railway to connect the railway at Sydney with the docks.

It is stated that a further quantity of 10,000 shares of the Pernambuco Railway have been transmitted to Brazil for conversion into 6 per cent. home bonds, which at the date of the last advices were still maintained at about par.

The Committee of Investigation of the Great Western of Canada Railway have at length, after a remonstrance from an influential body of shareholders, promised that their long delayed report shall be ready in about three weeks.

A successful trial has been made between Paris and Amiens of a new telegraphic apparatus, which transmits messages textually, and which reproduces line for line the handwriting of the person who forwards the despatch. It is expected that the Government will shortly reduce the price of transmitting telegraphic messages, and that the increase in the revenue will be equal to that produced by the reduction of the postage on letters. The number of offices in Paris for the transmission of messages by electric telegraph is increased from nine to 23. The railway companies have 12 telegraphic offices in the department of the Seine and 23 in the Seine-et-Oisé. During the four years subsequent to the chief towns of departments having been placed in communication with Paris there were 1,492,500 private messages transmitted, for which the Government received 12,550f. Of these messages, 40 per cent. related to trade and manufactures, 34 per cent. to operations on the Stock Exchange, 20 per cent. to private affairs, 4 per cent. to newspaper intelligence, and 2 per cent. to sundry other matters.

The recent contract between the Banks of France and England is now completed, the whole 2,000,000*l* of silver having been received and paid for. Of this amount of silver nearly half-a-million has since been sold by our Bank. There are no further arrangements pending between the two establishments.

The last quotation from New York for bankers' bills is 104¼. In consequence of the advance in the Bank of England rate of discount and the delays in coinage in America, the calculation now is, that for sovereigns from this country to yield a profit the returns must be made at a price scarcely exceeding 105¾.

The following is an extract of a letter from Mr Thomas E. Walker, chairman of the Executive Committee of the Illinois Central Railway, to Messrs Robert Benson and Co.:

The census returns of Illinois are nearly complete. The gain in

the 49 counties touched by our road has been 142 per cent. since 1850, having increased from 335,598 to 814,891 in population. Thus 479,293 have been added to our numbers. The State has 102 counties. In the other 53 counties, which had 515,872 persons in 1850, there are now 904,605, a gain of 77 per cent. The whole State has now a population of 1,719,496. These figures are still subject to corrections in the department at Washington, but are sufficiently correct for our Government.

It is quite apparent, and generally admitted in Illinois, that the the corn crop will exceed the earlier estimates, and not fall short of 140,000,000 of bushels, and that there is still a large stock of wheat in the country for sale—probably 12,000,000 to 15,000,000 bushels; thus the 1860 crop of wheat was fully 35,000,000 of bushels.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.20 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about the same price in Paris and London.

By advices from Hamburg the price of gold is 424 per mark, and the short exchange on London is 13.4⅛ per 1*l* sterling. Standard gold at the English Mint price is, therefore, not quite 1-10th per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is about 104 per cent., which, when compared with the Mint par between the two countries, shows that the exchange is against England. At the above rate there is a profit on sending gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Very little English wheat was on show at Mark lane to-day, owing to the vessels recently reported from Essex and Kent being firmly fixed in the ice; consequently the cargoes cannot be landed. The few samples on offer by land carriage were taken off steadily, and, in some instances, prices were a shade higher than on Monday last. Foreign wheat was very firm in price. Fine barley and oats commanded very full prices, and the value of all other kinds of produce was freely supported. The imports from abroad this week amount to 9,010 quarters of wheat, 5,770 barley, 8,850 oats, 500 sacks and 3,230 barrels of flour.

At Liverpool, this morning, wheat and all other articles were taken in retail quantities only, at slightly reduced rates.

The Liverpool cotton market at the commencement of the present week wore a quiet aspect and prices until Wednesday had given way a little; but suddenly yesterday the market assumed an animated appearance, caused by a partially anticipated further rise in the Bank rate not having taken place, combined with encouraging news from China. The total sales of the week amount to 59,000 bales (25,000 of which were yesterday), and include 47,000 bales to spinners, 9,000 bales on speculation, and 3,000 bales for export. Prices are again fully as high as on Friday last. To-day's sales are 20,000 bales at extreme rates.

Messrs Briggs and Co.'s cotton circular, dated Alexandria, Dec. 24th, says:—

Since our last advices of the 18th inst., an active business has been transacted in our market. During the earlier part of the week, a quiet feeling seemed to prevail, but the demand gradually strengthened, and has been followed by an advance in the price of all descriptions of the staple. The following are the sales since our last, with present prices free on board:—300 bales ordinary to middling, 7.72d to 8d; 4,410 bales fair to good fair, 8d to 8.35d; 690 bales good to fine, 8.40d to 12d; total, 5,400 bales. Freights—By steamer to Liverpool, ⅜ths of a penny per lb; by sailing vessel, ⅜ths to 7-16ths per lb. Exchange on London at 3 months' date, 96½ to 96 piastres per £ sterling.

The following statistics show the consumption, &c., of cotton in 1860:—

		bales.
Imported into Great Britain in 1860		3,366,500
Exported from ditto as follows:—		
From Liverpool	531,150	
— London	77,850—	609,000
Net import		2,757,500
Stock in Great Britain December 31, 1859		469,520
		3,227,020
Stock in the Kingdom December 31, 1860	594,510	
More in spinners' hands than last year	100,000—	694,510
Consumption of the country in 1860		2,532,510

or 48,700 bales weekly, against 44,121 in 1859, 41,818 in 1858, 38,859 in 1857, 42,368 in 1856, 40,395 in 1855, 37,834 in 1854, 36,616 in 1853, 35,777 in 1852, 31,840 in 1851, and 29,120 in 1850. Average weight of American cotton since 1855:—1860, 444 lbs; 1859, 440 lbs; 1858, 428 lbs; 1857, 438 lbs; 1856, 440 lbs; 1855, 422 lbs.

"The falling off in the receipts of cotton," write Messrs Neill and Co., of New York, "has become the chief point of interest in the crop question, and by telegraph already exceeds 500,000 bales. The present rate of deliveries cannot be regarded as a criterion to the extent of the crop; for the receipts of the past month would indicate a result of less than three million bales if compared with the same month in former years. But it shows how seriously the movement of the crop has been interrupted by low prices and political agitation, and while either of these causes continue to operate, it is impossible to foresee the ultimate result on the crop. All estimates for the present have, therefore, been abandoned. The advance in prices this week will, if supported, probably draw cotton more freely to the ports; but, whatever the solution of the political difficulty, it is feared that the movement of much cotton will be retarded until planters are fully occupied in preparing for another crop, and thus practically reduce the extent of the present one."

The public sales of tea, held this week, have gone off heavily, and prices have declined ½d to 1½d per lb. The demand by private contract, owing, in some measure, to the high range in the value of money in the discount market, is extremely inactive, and all kinds of tea are freely offered on lower terms. Dealers, however, operate with great caution. A telegram from China states that the increase in the exports of tea is 5,000,000 lbs.

IMPORT of TEA in London, from Jan. 1 to Dec. 31, 1860, and the STOCK on hand on Dec. 31, 1860, compared with the corresponding date in 1859.

* Exclusive of several recent arrivals.

There has been no disposition shown to operate in any kind of raw sugar, and a few forced sales have been made at a further decline in the quotations of from 6d to 1s per cwt. In the value of refined goods, no change has taken place, but the supply on offer is very moderate.

All descriptions of coffee have moved off heavily, and prices have continued to show signs of weakness. Cocoa has been neglected; nevertheless the currencies have been mostly supported

Notwithstanding that wheat still continues to harden in price, the rice market is still in a most inactive state, yet prices may be considered steady.

Writing in reference to the silk trade during the past year, Messrs Durant and Co observe:—

The chief feature of the year and almost the only feature, was the importation from Japan—a most welcome and seasonable addition to our sources of supply. The only drawback to its advantage is the very small "breaks" in which it comes forward, but this is comparatively unimportant, and will no doubt be remedied in time. The grand point is, that it promises to be an increasing supply, and that the nature of the silk is intrinsically good and much of it of a size to render it especially available. We might also mention as a feature the increased export of Asiatic silk to the Continent, and it has been considerable. The public tables mark it as nearly 30 per cent., and yet with all this it is not supposed that foreign consumers are holding larger stocks than our own. For the last three weeks they have been very reluctant buyers, and for some time previously had not taken any large quantity. Of China silk, we have little to remark, except that the proportion of good silk, both Tsatlee and Taysaam is unusually small, and that all is more or less objectionably coarse. Bengal silk has not maintained its improved position in the scale of consumption. Our figures mark a diminution of 4,000 bales. Of Italian silk, we have again to report, as for the last three years, "another failure in the crop, exaggerated prices, and still more limited consumption." Fortunately the failure of the crop is not to the extent of former years—leaving ground for hope that the disease, from whatever cause, is wearing itself out, and that within some reasonable time we may look to a return of former production. Of Brutia silk, all is now reeled like Italian silk and shares its fate. Of Persian silk, the import and delivery, although materially larger than last year, is unimportant, and latterly it has shared the fate of all the lower classes of silk.

A fall of 1s 6d per cwt has taken place in the value of saltpetre, the market for which is extremely heavy.

English wool has been held at very full prices; but the demand, both for home use and export, is trifling. Foreign wools are nominal in value, but colonial qualities are firm. The stocks of the latter in London are as follows:—Cape, 7,918 bales; Sdney, 2,692; Port Philip, 3,340; Van Dieman's Land, 150; Adelaide, 161; New Zealand, 900. Total, 15,161 bales. Hemp, both Russian and Manilla, has ruled heavy, at about previous rates.

English tin has moved off heavily, at a decline in value of 4l per ton. In the value of other kinds, very little change has taken place. Scotch pig iron has sold slowly, and the leading quotations for the week are 49s to 49s 3d per ton cash mixed numbers. Other metals have commanded very little attention.

The transactions in rum have been much restricted, at late currencies. Brandy and grain spirits have ruled about stationary, but with a very poor demand.

The dealings in the oil market, generally, have been much restricted. Linseed oil has sold at 28*l* per ton on the spot. Spirits of turpentine are drooping.—American, in barrels, being freely offered at 31s per cwt.

The dealings in tallow have been on a very moderate scale. To-day, P.Y.C, on the spot, is selling at 60s; all the month, 59s 6d; April to June, 58s 6d; October to December, 57s 6d per cwt. Town tallow, 59s 3d net cash.

"In money, the tendency is to greater ease," observes the New York *Shipping List* of the 26th ult. "There is certainly less difficulty in negotiating long dated-paper, at a reduction of from 1 to 2 per cent. per annum from the rates current last week. Prime lists are done at 10 to 12 per cent., and on call, the supply is, if anything, in excess of the demand. We quote:—

	Per cent. per annum.
Loans on call, stock securities	6 to 7
Do. other good securities	8 9
Prime endorsed bills, 60 to 90 days	10 15
Do. 4 to 6 months	15 18
First class single signatures	18 24
Other good bills	24 36

"The weekly statement of the City banks is a very favourable one. The specie reserves show an increase of nearly two millions, with a liberal augmentation of the loans and discounts. The deposits also show a heavy increase, the result, no doubt, of the accumulations from the payment of interest and dividends. We annex the usual summary, compared with the returns for the previous week:—

	Dec. 15. dols		Dec. 22. dols			dols
Loans	131,740,172	...	132,152,299	...	Inc.	412,027
Specie	18,348,398	...	20,326,970	...	Inc.	1,978,572
Circulation	8,675,793	...	8,284,172	...	Dec.	391,621
Deposits	83,214,394	...	85,876,876	...	Inc.	2,662,482

"The exchanges, foreign and domestic, exhibit little or no variation from our last paper. If there is any change at all, it is towards an improvement. The specie shipments, from the 1st of January to date, are unofficially stated at 43,368,433 dols, against 69,360,088 dols in 1859, and 25,555,290 dols in 1858. Below will be found the usual custom house tables, showing the foreign trade of the port, for the week, and from 1st of January, compared with the previous season:—

	1859. dols		1860. dols
Imports.			
For the week.			
Dry goods	2,490,408	.....	1,609,890
General merchandise	2,844,400	.....	1,429,421
Total for the week	4,634,808	.....	3,039,318
Previously reported	223,168,831	.....	216,913,518
Since January 1st	227,803,959	.....	219,952,836
Exports.			
For the week	1,098,057	.....	2,568,385
Previously reported	65,677,536	.....	98,297,671
Since January 1st	66,775,593	.....	100,956,056

"As near as can be ascertained, the imports and exports at this port for the twelvemonth just closing, compared with the trade of last year, will foot up about as follows:—

	Imports. dols		Exports. dols
1860	222,000,000	.....	102,000,000
1859	235,000,000	.....	68,000,000

"The arrivals of foreign merchandise are undergoing a steady reduction. The importations now coming to hand are for the most part to fill orders that went from this side before the politico-financial troubles commenced. The receipts for customs yesterday amounted to but 23,000 dols, and on Saturday 42,000 dols."

MARKETS IN THE MANUFACTURING DISTRICTS.

Owing to the rapid upward movement in the value of money, and the unusually small number of continental and American buyers which have made their appearance this week, trade generally in the manufacturing districts has continued in a most inactive state, and prices have shown signs of weakness. Iron has moved off heavily at further depressed rates; but owing to the severity of the weather coals have commanded very high prices.

MANCHESTER, Jan. 10.—The tightness of money has been the sole check which has restrained an extensive business this week, other circumstances all pointing in the direction of rising prices. On Monday telegrams to 11th ult. reported a partial rally at Calcutta, a few staples, such as 7 lb shirtings, almost touching rates which would cover cost and charges, so causing hopes to be entertained that a turn had arrived in that market; to-day, telegrams to 15th report sales had ensued, and rates relapsed about two annas. Buyers, however, have operated throughout the week where extreme prices were not held for. The news from China, with absence of further change in the Bank rate, has also added confidence to-day. Sellers, on the whole, remain very firm, at previous quotations.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—Both on Monday and Thursday there has been an evident holding off on the part of buyers of wool. The stringency and uncertainty of the money market occasions extreme caution, and as staplers hold with great firmness to the high rates now current, very few transactions take place. The business doing by spinners in yarns is exceedingly limited, The export trade is most insignificant, and the home consumption becomes more and more curtailed.

LEICESTER.—There has been very little doing in the hosiery trade this week; very few orders are being received, and, indeed, not much is expected to be done for a few weeks. In Loughborough and the country districts trade is flat, and many of the operatives both in Leicester and the neighbourhood are unemployed. Yarns hold up in price, but are not much in demand. The wool market is firm.

NOTTINGHAM.—There is very little alteration in the state of the lace trade; the improvement, if any, is of a very gradual character. A slight movement is perceptible in the fancy trade, and there is expected to be a better demand for all sorts of goods shortly. A little continues to be done in plain sorts used for foundation purposes. In hosiery there is no improvement perceptible.

HUDDERSFIELD.—Black doeskins, more especially in piece dyes at about 4s, and wool dyes at from 5s to 5s 6d, have been in good demand, and the various broadcloth warehouses in town have done a considerable trade. Several buyers from shipping houses have been purchasing low goods and unions in small parcels, but this department continues quiet. We have no change to note in the state of the country trade, or of that of the local wool market. Business in the warehouses during the week has been quiet.

LEEDS.—The little inquiry that existed was for seasonable goods, but the parcels cleared during the market did not represent any important aggregate. Rates are without change, and no decrease in prices is anticipated. Heavy goods in second hands are also beginning to move, in consequence of the severity of the weather.

ROCHDALE.—Prices still remain exceedingly firm, but with little doing. Flannel—The severe weather has caused a good run on the blanket trade, which is just now very active. Unions, though not very active, keep their ground, and Yorkshire goods are very much in request. Prices are generally very firm for all sorts, while upon some, advances are demanded with great firmness.

BELFAST.—Though the frosts of the week have in some degree retarded work out of doors, the labour at bleachfields has been very active for the last few days. We cannot report any improvement in the demand for goods for the foreign market. Some transactions have been effected for continental houses, but for the American Union there is little doing, the reversal of several orders having added materially to the previous inaction. In the home trade the dulness which usually succeeds the holidays has been felt in threefold ratio. Prices have not been influenced by the unsettled affairs across the Atlantic, firmness of value forming one of the chief features connected with the year's trade.

WOLVERHAMPTON.—The usual quarterly series of the assemblies of the ironmasters of this district for the current quarter have

taken place. The attendance was the smallest we have ever witnessed, and the business transacted was nominal. Sales of pig iron might in all probability have been effected if very low prices had been accepted; but, so far as we could ascertain, the pig-masters evinced no disposition to press sales on those terms, though it was admitted that stocks are increasing rapidly, and that unless furnaces are blown out, and the make reduced, there is no chance of prices maintaining even their present low range. The transactions in finished iron were also moderate. The exporting firms are doing very little in Staffordshire iron at this moment, and home consumers buy nothing beyond their immediate requirements. The coal trade alone is prosperous; and up to this time the old canal has been kept open, which is very much attributable to the quantity of hot water flowing into it from the various works along its banks.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec 29.—Under an increased demand from the local and Eastern trade, together with an active inquiry for shipment, the market for State and Western flour has assumed a decidedly more buoyant tone, and holders have succeeded in establishing a further advance of 15c to 20c per bbl. Transactions have been pretty heavy at the improvement, and though there was less activity yesterday, there was manifest no disposition to accept of lower rates, and at the close the market was firm. Canada flour has been in fair request, and the lower grades may be written 10c per barrel higher. The demand for Southern flour has also been more active, and prices have advanced 10c to 15c per bbl, at which the market closed with firmness.

EXPORT, from 1st to 25th December.

	1860. barrels.	1859. barrels.
Wheat Flour	190,006	119,123

During the past three days a much better feeling has obtained in the market for wheat, and with a steady fair demand from the local millers, combined with a tolerably active demand from shippers, based upon a reduction in the rates of freight to the principal European marts, operations have been on a more extensive scale than for some time previously, while nearly all kinds have experienced a further considerable appreciation in value. Transactions during the three days comprise 206,000 bushels, of which 53,440 were placed yesterday, including 3,500 Canada Club at 1 dol 28c; 56,000 Milwaukee Club and amber Wisconsin, 1 dol 23c to 1 dol 27c; 140 white Western, 1 dol 45c; and 13,800 Chicago Spring, 1 dol 17c to 1 dol 21c, closing dull. For corn there has prevailed an active demand, and prices have further advanced 2c to 3c per bushel; the sales for the three days aggregate 220,000 bushels, of which about 98,000 found purchasers yesterday, at 67c to 75c per bushel for white Southern, 71c to 73c for yellow do., 70c to 71c for mixed do., 71c to 73c for round yellow, 70c to 75c for do. white, 69c to 70c for Western mixed, and 68c to 69c for unsound.

EXPORT, from 1st to 25th December,

	1860 bushels.	1859 bushels.
Wheat	1,644,885	92,691
Corn	738,403	7,756

NEW YORK, Dec. 26.—FLOUR AND MEAL.—A moderately active demand has prevailed for State and Western flour since our last, and transactions have been pretty heavy, both for consumption and shipment, at prices showing an advance of 15c to 20c per bbl on all descriptions. The market remains buoyant, and closed on Monday with a steady fair demand, and with a tendency to a further advance in prices. The sales for the two days comprise 24,000 bbls. Canada flour has also been in fair request, and the lower grades may be written 20c per bbl higher. The sales comprise 1,000 bbls, of which 550 bbls found buyers on Monday. We quote:—State, superfine brands, per bbl, 5 dols to 5 dols 10c; State, extra brands, 5 dols 25c to 5 dols 35c; Michigan, fancy brands, 5 dols 10c to 5 dols 20c; Ohio, common brands, 5 dols 20c to 5 dols 25c; Ohio, fancy brands, 5 dols 30c to 5 dols 35c; Ohio, fair extra, 5 dols 40c to 5 dols 50c; Ohio, good and choice extra brands, 5 dols 60c to 7 dols; Michigan, Wisconsin, Indiana, &c., 5 dols 30c to 5 dols 60c; Genesee, fancy brands, 5 dols 40c to 5 dols 50c; Genesee, extra brands, 5 dols 60c to 6 dols 75c; Missouri, 5 dols 30c to 7 dols; Canada, 5 dols 40c to 7 dols. The inquiry for Southern flour has also been fair, at full previous prices. The sales since Friday foot up 4,000 bbls, including 2,000 bbls on Monday at 5 dols 15c to 6 dols per bbl. Rye flour is quiet, but steady, with trifling sales. Corn meal is quiet, but firm at previous rates, with sales of 300 bbls Coloric.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Owing to the severity of the weather, which has rendered it almost impossible to land cargoes, and to the further advance in the value of money in the discount market, the English wheat trade has been far from active this week, and prices have shown less firmness. The frosts appear to have greatly improved the condition of the new wheat in the stack, and the samples shown in the midland districts have mostly been fit for millers' purposes, without a large admixture of foreign. The transactions in foreign wheat have been on a very moderate scale, and at Liverpool, on Tuesday, prices gave way 2d per cental. Good and fine barley has commanded extreme rates; but inferior foreign has met a dull inquiry, on former terms. Malt has ruled high in price, with a fair demand. Oats have have changed hands freely at 6d to 1s per quarter more money for selected samples. No quotable change has taken place in the value of either beans or peas. The flour trade has continued tolerably healthy, on former terms.

The latest advices from New York state that both wheat and flour were in improved request, on higher terms. The supplies still on passage to England are large. Throughout the Continent, wheat has commanded extreme rates, and other produce has continued steady. A letter from Nantes, dated the 5th inst., says:—"The increased export duty comes into force on Monday next, and will be as follows:—Wheat, 5s 6½d per 840 lbs; wheaten flour, 4s 10½d per 280 lbs.; rye, 3s 4d per 460 lbs; barley, 2s 9½d per 420 lbs; Indian corn, 3s 0½d per 480 lbs; oats, 1s 11½d per 320lbs; and buck wheat, 2s 2½d per 420 lbs. The export duty upon flour other than wheaten is in proportion, but as none is exported we do not give the details. Beans, peas, and all descriptions of 'Legumes' and seeds do not come under the sliding scale, and consequently remain unaltered. The market has been very excited, and high prices have been paid, to complete contracts, by parties who sold uncovered. From the high rates ruling in the interior, and the quantity supposed to be required for the North, it seems probable that the duties will not be diminished before April or May. The farmers are said to hold much less than at the same period last year. Freights have risen considerably for vessels ready to load. Bordeaux, Bayonne, and the Mediterranean ports still remain at the minimum export duty, and high prices are consequently demanded for all grain and flour. The same is likely to prevail on the North coast of Spain."

In Scotland, there has been a moderate inquiry for wheat, at full prices. Both barley and oats, of fine quality, have realised rather more money. Other produce has commanded extreme rates.

The Irish markets have been very inactive for wheat, at about previous currencies. The oat trade has continued firm, and maize has commanded more attention.

To-day's market was scantily supplied with English wheat, wholly ex granary. The demand, however, both for red and white qualities was limited in the extreme, and in the few sales effected a slight advance on Monday's currency was obtained. All spring corn changed hands at prices fully equal to last week. The flour trade was firm at full quotations.

Mr E. Rainford reports the state of the floating trade as follows:—A fleet of grain-laden vessels is overdue, but contrary winds keep them out. Only 10 arrivals for orders are reported up to last night from the 2nd inst., consisting of 6 cargoes of wheat, and 4 miscellaneous, viz.:—Wheat, 1 from Venice, 3 Santander, 1 Alexandria, 1 Marianople; rye, 1 Odessa; maize, 1 New York; barley, 1 Nantes; oats, 1 Prince Edward's Island. Of the above, 3 were disposed of before arrival. The business in cargoes afloat continues very inactive, partly in expectation of the fleet, and partly owing to the high rate of discount. The following are the transactions mentioned since this day week:—Wheat, arrived, Marianople, at 58s 3d; another cargo, with damage in main hatch, at 57s, tale quale, both per 492 lbs; Galatz, at 52s per 480 lbs; and Saide, at 44s 9d per imperial quarter; on passage, Saide, at 44s 6d per imperial quarter. Rye, arrived, Eupatoria, supposed 36s. for Continent; Odessa, supposed 38s 6d, for U.K., both per 480 lbs. Maize, arrived, American mixed, at 38s 9d per 480 lbs, bill of lading quantity; Mazagan, at 39s 6d per 480 lbs; on passage, Galatz, 2 cargoes at 41s per 492 lbs. Barley, arrived, Odessa, at 31s per 400 lbs; on passage, Odessa, at 29s 9d and 29s 6d per 400 lbs.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—There were not any symptoms of improvement in the market at the opening on Tuesday, and it subsequently ruled inactive, quotations being frequently 6d to 1s per cwt lower than during the previous week. The refiners continue to make limited purchases, consequently the transactions to yesterday reached 595 casks, including the few parcels by auction: Barbadoes, 40s to 44s; grainy Demerara, 38s to 42s. Owing to the protracted frost arrivals are delayed. There were about 1,110 tons landed last week, and the deliveries amounted to 3,560 tons, against 5,500 in the corresponding one of 1859. The stock was consequently reduced to 51,000 tons on the 5th inst, or 4,200 tons less than in the previous season.

Mauritius.—4,148 bags about two-thirds sold at 6d to 1s decline: brown, 33s to 36s 6d; grainy brown and yellow, 37s to 41s 6d. Privately, business has been done at 44s per cwt.

Bengal.—1,100 bags by auction partly sold at 39s to 41s for yellow syrups; brown ditto, 36s to 36s 6d. Privately, good Cossipore has realised 43s per cwt.

Madras.—2,435 bags of the lower qualities were principally bought in: native, low brown to middling yellow, 32s 6d to 35s 6d per cwt. A portion of the grainy bought in last week has found buyers at easier prices.

Penang.—768 bags sold at 34s 6d to 37s 6d per cwt for dark brown to low middling soft grey.

Siam.—Of 8,446 bags brought forward in the sales, about two-thirds met with purchasers from 39s to 43s for middling soft greyish to fine dry greyish yellow.

Java.—447 baskets were partly disposed of at 36s 6d to 39s for brown to low middling, the remainder being taken in above the value.

Foreign.—500 boxes Havana have been disposed of by private contract: white in bond, 33s 6d; grainy Florettes, duty paid, 48s. A floating cargo of Havana No. 10½ to 11, sold for a near port at 26s 9d per cwt.

Refined.—Limited purchases have been made, but the refiners do not seem anxious to sell, and prices must be considered partly nominal.

Rum.—The market is unsettled, and some few contracts have been made in West India at easier rates. Demerara proof, 1s 10d to 1s 11d: Leewards, 1s 9½d to 1s 10d; middling Jamaica, 3s 6d to 3s 8d. 120 casks Bengal, 1s 8½d per proof gallon.

Coffee.—Prices have given way slightly for plantation Ceylon, and the market is inactive. 985 casks 679 barrels and bags offered by auction were partly sold: small berry, 63s to 65s; fine fine ordinary to middling, 65s to 71s; good middling to fine, 72s to 80s. 1,531 bags 49 casks native went at 62s 6d to 63s for good ordinary to good, and 34s to 41s for blacks and triage. 314 bales Alexandria Mocha were withdrawn at 110s. 262 cases 20 bags East India partly sold at 65s to 73s 6d for pale to good. A floating cargo of Santos has obtained 58s 1½d per cwt for a near port.

Cocoa.—Some business has been done privately in Trinidad, but 738 bags offered by auction were mostly bought in at high rates: grey to good red, 76s to 86s. 1,520 bags Guayaquil were withdrawn at 70s per cwt.

Tea.—The large public sales which commenced on Wednesday have passed off flatly. Of 60,161 packages brought forward, 35,050 packages passed, and 9,525 packages sold, including the parcels offered "without reserve." Congous went from ½d to 1½d cheaper, Tayshan kinds showing the greatest depression.

Rice.—There has been very little business done by private contract this week, and the market presents a dull appearance. Good white Benga sold privately at 15s, and about half of 1,482 bags middling broken ditto at 12s 9d. The sound portion of 14,371 bags new Necrancie Arracan was bought in at 11s 6d to 12s; sea-damaged selling from 8s 6d to 11s. 1,600 bags middling old Rangoon were withdrawn at 11s per cwt. The stock was reduced to 32,600 tons on the 5th instant, against 71,600 last year, and 85,700 tons in 1859, at the corresponding period.

Sago.—100 packages fine small grain realised 19s 6d to 20s per cwt.

Spices.—White pepper is rather lower. Of 646 bags Singapore by auction, about two-thirds sold at 5¾d for middling, and 6⅞d to 6⅞d for a few lots good quality. Black has been quiet. Of 4,770 bags by auction, about half sold at previous rates: Singapore, 3⅞d to 4d; common Penang, 3⅜d to 3¾d. The stock continues large. Pimento sells slowly, and 1,020 bags by auction went off at 2¾d to 3d for ordinary to good, and 2½d to 2⅝d for low and dusty. 27 cases brown nutmegs: low and mouldy to middling, 10d to 1s 5d. 112 packages Zanzibar cloves were taken in at 4d to 4½d per lb. 111 packages cassia vera were held at 20s. A few lots Jamaica ginger realised 66s to 71s per cwt.

Saltpetre.—The market remains depressed, with sellers at further reduced quotations. Yesterday, 400 bags fine Bengal were disposed of at 38s 6d per cwt, being quite 2s 6d per cwt decline.

Cochineal.—160 bags went off without further change in prices: Honduras silvers, 2s 9d to 3s 1d; Teneriffe silvers, 2s 10d to 3s; blacks, 3s 1d to 3s 6d per lb.

Other Dyestuffs.—Of 290 bales Bengal safflower in public sale, 180 bales sold at lower rates, from 3*l* 10s to 8*l* 5s for ordinary to fine. Bengal turmeric was taken in at 12s 6d to 13s 6d, being above the value. Bombay sold at 10s to 11s 6d. A very large quantity of Cutch is declared for sale to-day. 4,306 bags by auction were withdrawn at 25s.

Dyewoods.—70 tons red Sanders were bought in at 5*l* 15s to 6*l* per ton.

Japan Wax.—3,860 cases were partly disposed of: block, 57s to 60s; cake, 65s per cwt.

Drugs.—The first series of sales this year will be held next Thursday. Nothing of importance has been done this week.

Metals.—The general condition of the market has been without improvement, and the transactions are very limited. English tin has been reduced 4s per cwt: common blocks, 132s; Bars, 133s. Foreign continues depressed, and 127s to 128s is the nominal value for Straits. Iron is still unsettled. The last sale effected in Scotch pig was at 49s 3d per ton for mixed numbers. 150 tons spelter sold at 18*l* 15s per ton.

Hemp.—1,321 bales Manilla by auction went at 22*l* 10s to 26*l* per ton for common to good roping.

Jute.—The sales on Wednesday went at 10s to 15s decline. 5,100 bales chiefly sold at 13*l* 15s to 18*l* 10s per ton.

Oils.—Sperm has advanced to 104*l* to 105*l* per tun. Olive is quiet, but firm. Rape quiet with ample stocks: foreign refined, 44s to 44s 6d; brown, 41s to 41s 6d. Linseed oil is lower, and production large. Purchases on the spot can be made at 28s to 28s 3d. The export demand is checked by the frost. This also unfavourably affects cocoa-nut, but prices have not given way. Palm is in moderate demand at 46s 6d to 47s per cwt for fine.

Turpentine.—About 2,000 barrels American spirits have sold at 31s per cwt.

Linseed.—Quotations are rather easier: Calcutta, 58s to 58s 6d; Bombay, 61s 6d; Black Sea and Azoff afloat, 57s 6d to 58s per quarter.

Tallow.—There was a better feeling in the market towards the middle of the week, and Y.C. touched 60s 6d on the spot. On Wednesday a reaction ensued, and Y.C. was subsequently quoted 60s on the spot; the same for delivery in the next three months; 58s 6d April to June; 57s 6d per cwt for the last three months.

Particulars of Tallow.—Monday, January 7.

POSTSCRIPT.

Friday Evening.

Sugar.—The market has been steady, and the trade showed rather more desire to buy at to-day's sales. 1,300 bags Siam, 610 bags Penang, and 1,000 bags Bengal realised fully previous quotations. Of 7,030 bags Mauritius, 3,000 sold without material variation in prices. The week's transactions in West India reach 864 hhds. Privately, 500 boxes Havana have sold at 41s, and some parcels of colonial.

Coffee.—320 casks 80 barrels and bags plantation Ceylon and 1,500 native triage, &c., realised previous quotations. 619 packages Mocha were bought in, or withdrawn (including some long berry of indirect import at 110s). 32 cases, 1913 bags East India were principally taken in, a few lots pale Malabar and Madras selling at 64s to 65s 6d per cwt.

Cocoa.—3,200 bags Guayaquil were bought in at 70s. 321 bags Trinidad were mostly taken in at 65s to 71s 6d per cwt.

Tea.—At the sales, 4,400 packages sold without further alteration. The sales conclude on Monday.

Rice.—4,561 bags Bengal, by auction, were chiefly bought in at 12s 9d to 13s 9d for middling to good. Privately, more inquiry prevailed for Arracan on the spot. Two floating cargoes of Necrancie sold at 11s 6d and 11s 9d; one of Rangoon at 11s 9d per cwt.

Spices.—167 cases Cochin ginger sold at 41 6d to 45s for wormy. 338 bags pimento went at previous quotations.

Saltpetre.—2,035 bags Bombay partly sold at 32s, for refraction 44½ to 45.

Cochineal.—382 bags chiefly sold. Honduras as before. Mexican silver, 2s 9d to 2s 10d; black, 2s 11d to 3s 4d; Teneriffe black, 3s to 3s 2d per lb.

Tallow.—Town unaltered; also foreign. By auction, 544 casks Australian went at 53s to 58s 6d; 237 casks Odessa bought in at 59s; 507 cases East India went at 55s 3d to 60s per cwt.

Oils.—700 casks palm was bought in at 45s to 47s. 395 casks cocoa-nut partly sold: Cochin at 54s 6d; Ceylon taken at 53s. 225 casks Sydney brought 47s 6d to 51s per cwt.

ADDITIONAL NOTICES.

Refined Sugar.—There is nothing worth noting, either in the home or foreign markets, as respects refined sugar.

Green Fruit.—The severe weather is checking consumption and depressing prices. Some cargoes of oranges from St Michael, Terceira, Lisbon, and Valencia, sold by Keeling and Hunt at public sale, went at a reduction of 2s to 3s per package. Messina lemons 1s per case lower. Spanish nuts in good demand; Barcelona 1s per bag higher. A short stock both here and at the outports. No arrivals of Seville sours, which will be scarce and dear.

Dry Fruit.—There is hardly any business doing yet in fruit, but in the course of a few days a good trade may be looked for. All articles in this market are in a healthy condition, and, as far as can be ascertained, the trade are not overburdened with stock of any description. Arrivals are taking place of Chesme raisins, the quality of which proves very superior to that of last year.

Colonial Wool.—No change to report in the colonial wool market.

Flax.—Market still very firm. Stocks are very small.

Hemp market quiet at the quotations.

Cotton.—Sales of cotton wool from Friday, 4th January, to Thursday, 10th, inclusive:—2,700 bales Surat at 4⅝d and ¾d for middling Oomra-

wattee; 5⅛d to 5⅜d for middling fair to good fair Dhollera; 300 bales Tinnivelly at 5⅜d to 5⅝d for fully fair to fully good fair; 100 bales Western Madras at 4½d for middling to fair. On Friday and Saturday a good demand prevailed, and a fair amount of business was transacted at rather higher prices. Since the rise of the discount on Monday last by the Bank of England from 6 to 7 per cent., there was less doing up to yesterday. Holders, however, evinced great firmness, and offers were refused of ⅛d per lb concession from the highest price paid. Yesterday afternoon a good demand sprung up, and a large business was done at full prices, and the market closes very firm at the quotations of last week. P.S.—Market good, little offering. Sales, 500 middling to middling fair Omrawattee, 4⅝d to 4⅞d per lb.

SILK.—The silk market flat.

TOBACCO.—Sales have been been of a limited character, consisting chiefly of small lots for immediate consumption. Prices remain unchanged.

LEATHER AND HIDES.—The demand for leather since the commencement of the new year has decidedly improved, and, with very small fresh supplies, which the severity of the weather occasions, the stocks are somewhat diminished. At Leadenhall, on Tuesday, however, there was not much activity. Good English Butts of medium and heavy weights were in request. Prices in general were unaltered.

METALS.—The unfavourable state of the money market protracts, or rather aggravates, the state of inactivity so long existing in our market. Copper keeps steady by a little underselling on favourite specifications, and the ore market keeps well up. Foreign copper continues neglected. Tin fell in price of English on the 7th inst. to our quotations, and since has been quiet in demand. Transactions in foreign have also been limited. Lead is unchanged, continuing steady in demand and in prices. Spelter is still lower, and without demand for export. Tin plates show no improvement from the serious depression of many weeks past.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	61	9
Fat by ditto	3	2½
Yellow Russian	61	6
Melted stuff	43	0
Rough ditto	26	0
Greaves	18	0
Good dregs	7	0

PROVISIONS.

There has been a good business doing in bacon this week; last week's prices were fully maintained; a rise may now be looked for. The make of Friesland butter is now getting short. Irish in good demand, especially anything from 96s to 104s, no doubt owing to the short arrivals and advanced price of Bosch and articles of that description. Most of the Dutch ports are now closed, so that we may expect to have things very awkward for some time.

METROPOLITAN CATTLE MARKET.

MONDAY, Jan. 7.—The total imports of foreign stock into London, last week, amounted to 1,118 head. In the corresponding period in 1860, we received 1,852; in 1859, 2,310; in 1858, 601; in 1857, 1,370; in 1856, 985; and in 1855, 4,386 head.

A fair average time-of-year supply of beasts was received fresh up from our own grazing districts, and the quality of each kind was tolerably good. The present severe frost having checked the consumption of butchers' meat, the beef trade was in a sluggish state, at barely last week's currency. From the Eastern districts we received about 960 Scots and Shorthorns; from the Northern, 1,500 Shorthorns; from other parts of England, 800 various breeds; from Scotland, 90 Scots and crosses; and from Ireland, 80 oxen, &c. We were seasonably well supplied with sheep, and most breeds came to hand in somewhat improved condition. On the whole, the mutton trade was steady, at full currencies. The extreme value of the best old Downs, however, was 6s per 8 lbs. The supply of calves was trifling, and the veal trade ruled steady, at very full prices.

	Supplies, Jan. 10, 1859.	Jan. 9, 1860.	Jan. 7, 1861.
Beasts	3740	4830	3560
Sheep	23700	21050	19900
Calves	121	148	65
Pigs	400	290	300

THURSDAY, Jan. 10.—There was a fair average supply of beasts on offer in to-day's market, and all breeds moved off steadily at fully Monday's currency. We were tolerably well supplied with sheep, for which the inquiry ruled very inactive. Prime Downs and half-breeds sold at full prices; but the value of long-woolled sheep had a drooping tendeney. The few calves in the market were taken off steadily, at full quotations. Pigs realised previous rates; but milch cows were very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	8	Prime Southdown sheep	5	8	6	0
Second quality ditto	3	10	4	4	Large coarse calves	4	4	4	10
Prime large oxen	4	6	4	8	Prime small ditto	5	0	5	4
Prime Scots, &c.	4	10	5	0	Large hogs	4	0	4	6
Coarse and inferior sheep	3	10	4	0	Small porkers	4	8	5	2
Second quality ditto	4	2	4	8	Suckling calves, each	18	0	23	0
Prime coarse-woolled do.	5	0	5	6	Quarter old store pigs	23	0	30	0

Total supply—Beasts, 1,010; sheep and lambs, 3,140; calves, 70; pigs, 310.
Foreign supply—Beasts, 190; sheep, 620; calves, 43.

HOP MARKET.

BOROUGH, Monday, Jan. 7.—We have a steady demand for yearling hops and earlier dates, at rather improved prices, but scarcely any trade for the last year's growth. The currency the same as last week.

FRIDAY, Jan. 11.—Messrs Pattenden and Smith report the demand for fine old and yearling hops continues active, but only the finest new move off unless at very reduced prices.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Jan. 7.—During the past week the late fleet has been fast clearing away, and arrivals have been limited. In consequence of the renewal of the frost, prices this day have somewhat improved. The following are this day's quotations:—Yorkshire Flukes, 165s to 175s; Lincolnshire Regents, 105s to 125s; Dunbar red soil ditto, 130s to 150s; North Berwick ditto, 125s to 130s; Fife, Forfar, and Perth ditto, 110s to 120s; ditto reds and Rocks, 95s to 100s; French whites, 90s to 100s; Belgian ditto, 85s to 90s; Dutch ditto, 80s to 85s per ton.

BOROUGH AND SPITALFIELDS, Jan. 10.—The supplies are almost entirely stopped; in consequence of the severity of the weather. Trade was good at the annexed prices:—Scotch Regents, 140s to 160s; ditto Cups, 100s to 130s; ditto Rocks, 120s to 130s; York Flukes, 160s to 180s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 10s to 5*l* 15s; clover, 3*l* 10s to 5*l* 18s; and straw, 1*l* 16s to 2*l* 5s per load. A short supply.

CUMBERLAND.—Meadow hay, 2*l* 12s to 5*l* 15s; clover, 3*l* 10s to 5*l* 18s; and straw, 1*l* 18s to 2*l* 5s per load. Trade firm.

WHITECHAPEL.—Meadow hay, 2*l* 10s to 5*l* 15s; clover, 3*l* 10s to 6*l*; and straw, 1*l* 16s to 2*l* 5s per load. Trade steady.

COAL MARKET.

FRIDAY, Jan. 11.—Walls-end Gosforth 25s 6d—Hilda 24s 6d—West Hartley 17s 6d—Buddle's Hartley 17s 6d—Bebside Hartley 17s 6d—Davidson's Hartley 17s 6d—Howard's Hartley 17s 6d. 44 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 11.—There is not much doing here this week in consequence of our public sales being so close at hand, when the trade will have a good opportunity of supplying their wants. The total quantity advertised comprises 25,000 bales, of which 17,000 bales are East India wools.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 11.—The arrivals since Tuesday are very moderate. The weather for a day or two past has been less severe, and there are now strong indications of a thaw. The trade has been very quiet, the demand being chiefly of a local retail character, and prices generally have favoured buyers.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 11.—The market for manufactured iron generally continues very dull, but the prices for good iron remain without change. The business in Scotch pig iron during the past week has been very limited, with a drooping market. Copper continues to be little inquired for, and the same remark applies to the article of lead. The tin-plate trade is in a depressed state, and prices are still tending downwards.

The Gazette.

TUESDAY, Jan. 8.

BANKRUPTCY ANNULLED.

T. Godfrey, Forston street Sheperdess fields, egg merchant.

BANKRUPTS.

L. Sewell, Savage gardens, merchant.
T. Barnes, Wokingham, innkeeper.
J. Wiseman, Luton, printer.
T. B. Howson, Oxford, chemist.
E. Keith, Hamilton terrace, Queen's road, Bayswater, builder.
J. R. Andrews, Hanover place, Park road, Regent's park, ironmonger.
H. R. Palmer, Wellington street, St James road, Holloway, porkman.
C. T. Board, wholesale bedding manufacturer, Nelson square, Blackfriar's road.

G. Morton and J. Williams, builders, Portmadoc, Carnarvonshire.
J. Noble, rope maker, Carlisle.
J. H. Cottam, machine maker, Kirton-in-Lindsey, Lincolnshire.
W. Hilliar, hotel keeper, Eastham, Chester.
J. Smith, lace manufacturer, New Lenton, Nottinghamshire.
H. Pinchbeck, builder, Horncastle, Lincolnshire.

SCOTCH BANKRUPTS.

J. Logan, farmer, Lindston, Ayrshire.
R. Gilchrist, draper, Linlithgow.
J. Sinclair, slater, Alexandria.
A. M. Stephen, bookseller, Dundee.

ROYAL COLOSSEUM.—Amidst the variety of places of amusement open at this festive season, few, if any, have obtained more deserved or decided success than the above Institution. The entertainments here are short and varied—so varied, indeed, and withal so good, that it appears incredible how so much can be remuneratively given for so small a sum; added to which, on Wednesday last, the generous and indefatigable lessee stripped a gigantic Christmas tree of its thousands of toys, watches, and jewellery. And an announcement was made of another distribution from the tree on Wednesday next, and which has our earnest good wishes for its success.

COMMERCIAL TIMES

Weekly Price Current.

☞ the prices in the following list are carefully revised every Friday afternoon, by an eminent house in each department.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 29th of December amounted to 483,445*l*, and for the corresponding week of last year to 465,610*l*, showing an increase of 17,835*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 202,142*l*, and for the corresponding week of 1859 to 202,736*l*, showing a decrease of 594*l*. The decrease on the London and North-Western Railway amounted to 6,011*l*; on the London and Blackwall to 11*l*; and on the South-Eastern to 174*l*; total, 6,196*l*. But from this must be deducted 1,296*l*, the increase on the Eastern Counties, 2,116*l* on the Great Northern, 460*l* on the Great Western, 1,167*l* on the London, Brighton, and South Coast, and 563*l* on the London and South-Western, together 5,602*l*; leaving the decrease, as above, 594*l*. The receipts on the other lines in the United Kingdom amounted to 281,303*l*, and for the corresponding week of last year to 262,874*l*, showing an increase of 18,429*l*, from which must be deducted the decrease on the metropolitan lines, leaving the total increase 17,835*l*, as compared with the corresponding week of 1859.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Jan. 7.—The railway market to-day was very flat, partly from the increasing dearness of money, and partly on the belief that the injury from the American crisis to trade would affect the traffic returns. Colonial stocks were less affected than British, but still closed heavily. Grand Trunk of Canada fell to 22½ to 23, and Great Western to 10⅝ to ¾. In foreign railways a reduction occurred in Lombardo-Venetian and Great Luxembourg, the last prices being respectively 1¼ to ⅝ dis, and 6¾. New Brunswick and Nova Scotia bonds were lower. In American railway securities the shares of the Illinois Central, New York and Erie, and New York Central declined, especially the former.

TUESDAY, Jan. 8.—In the railway market to-day there were several changes, but at the close most of the leading stocks were quoted the same as yesterday. An advance, however, took place in Midland, while London and North-Western, North-Eastern descriptions, and North British receded. The general business was moderate. In the colonial market, Indian guaranteed descriptions slightly declined. Canadian also fell; Great Western shares closing at 10½ to ¾; Grand Trunk stock, 22 to ½; the ordinary bonds, 46 to 48; and the preference, 72 to 74. Foreign railways were depressed, especially Lombardo-Venetian. New Brunswick debentures were again lower. American securities were dull, particularly those of the New York and Erie. Mines were inactive and heavy. Joint stock banks likewise presented a less favourable appearance.

WEDNESDAY, Jan. 9.—The railway market opened firmly this morning, and experienced a general improvement, from which there was subsequently a reaction. The closing quotations, however, were in several cases higher than yesterday, especially as regards Midland, North-Eastern, North British, South-Eastern, Caledonian, and Sheffield. Eastern Counties was rather dull. In the colonial market, Indian guaranteed descriptions were a shade firmer, while Canadian were without recovery. Grand Trunk stock left off at 22 to ½; ordinary bonds, 46 to 48; preference ditto, 72 to 74; and Great Western shares, 10½ to ⅝. The only change of importance in the foreign department was a rally in South-Austrian and Lombardo-Venetian to 1⅜ to ½ dis.

THURSDAY, Jan. 10.—Railway stocks were flat in the morning, owing to the apprehension of a decline in the traffic from the disturbance in the American trade, but afterwards experienced a partial recovery. Several stocks closed ¼ to ½ per cent. lower, particularly Midland, North-Eastern description, South-Eastern, and Great Northern. Lancashire and Yorkshire was slightly firmer. In the colonial market a fresh reduction took place in Canadian descriptions, Great Western shares leaving off at 10¾ to ⅞; and Grand Trunk stock 21¾ to 22¼.

FRIDAY, Jan. 11.—The railway share market to-day exhibited increased heaviness. A fall varying from ¼ to ½ per cent. took place in most of the leading stocks. Grand Trunk of Canada railway stock was a little more inquired for. Foreign lines generally were very dull. Mining shares continued dull.

FORD'S EUREKA SHIRTS.—Patterns (post free) of the New Fancy Flannel, including the various mixtures in the new colour called MAGENTA, a perfectly fast colour, although so brilliant, and may be had woven with Black, Drab, or Grey, to suit various tastes.
RICHARD FORD, 38 Poultry, London.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS, with Square Opening; Ladies' Dress Trunks; Dressing Bags, with silver fittings; Despatch Boxes, Writing and Dressing Cases, and 500 other articles, for home or continental travelling. Illustrated Catalogues for 1860, by post for two stamps.—J. W. ALLEN, Manufacturer of Officers' Barrack Furniture and Military Outfitter (see separate catalogue), 18 and 22 Strand London

SOYER'S SULTANA SAUCE
Relish, Succulante, Aromatic Mustard, &c.—These excellent preparations, of which the LANCET, in its sanitary analysation of Articles of Food, reported so favourably of their purity and wholesomeness, are to be obtained of all grocers and Italian warehousemen in the United Kingdom. 'They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes, impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE and BLACKWELL, Purveyors to the Queen, 21 Soho square, London.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.
CHEAP, LIGHT AND DURABLE ROOFING.
CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates
1st. It is a non-conductor.
2nd. It is portable, being packed in rolls, and not liable to damage in carriage.
3rd. It effects a saving of half the timber usually required.
4th. It can easily be applied by any unpractised person.
5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.
INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.
Price ONE PENNY PER SQUARE FOOT.
CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and
DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.
Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

SAUCES.—CONNOISEURS have Pronounced LEA and PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea and Perrins' name on Bottle, Label, and Stopper. Sold by Crosse and Blackwell, London, and all respectable Oilmen and Grocers. Sole manufacturers—Lea and Perrins, Worcester.

ON SPINAL AND OTHER DEFORMITIES.
DR RAMADGE ON ASTHMA AND DISEASES OF THE HEART.
1 vol. 8vo, greatly improved, second edition, price 10s 6d,
ASTHMA; ITS VARIETIES and Complications, with Practical Remarks on their Specific Treatment. Illustrated by cases, and plates coloured from nature. To which is annexed a succinct Treatise on the Principal Diseases of the Heart.
By F. H. RAMADGE, M.D.,
Fellow of the College of Physicians, late Senior Physician to the Royal Infirmary for Asthma, Consumption, and other Diseases of the Lungs, &c.
London Longman and Co.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.
The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

KEATING'S COD LIVER OIL. Just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.
DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.
Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurzer Dr Shorland; Dr Campbell.
We extract a few out of 56,000 cures:—
Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies.——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Ridlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.
Similar testimonials from 56,000 patients who can be referred to.
The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S, &c.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
London: John Churchill; and may be had of all booksellers.

FINE TEA CHEAPER.

STRACHAN & CO.'S justly celebrated DRAWING ROOM TEA is now reduced to 4s per lb. Guaranteed the Finest and Cheapest Tea in the United Kingdom.
26 Cornhill, London, E.C.

THROUGH 500 AGENTS Mr THORLEY is giving a circulation to "Thorley's Agricultural Gleaner," unsurpassed by all the other agricultural papers of the day. 77 Newgate-street, City.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS

LONDON	61 King William st. City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

HOLLOWAY'S OINTMENT AND PILLS are surprising remedies for bad legs and all kinds of wounds. The sale of these invaluable medicines in every part of the world is the most convincing proof of their efficacy in curing bad legs, old wounds, scrofula, and diseases of the skin. Thousands of persons suffering from these dreadful maladies have been cured by their use, after every other means had failed; and it is a fact beyond all doubt that there is no case, however obstinate or long standing, but may shortly be cured by these wonderful medicines, therefore the afflicted should immediately try them. No sore, from the merest skin abrasion to the foulest ulcer, can long resist their purifying and curative powers.

FREEDOM FROM COUGH IN TEN MINUTES is ensured by DR LOCOCK'S PULMONIC WAFERS. "Sir,—Will you be so good as to send by David Miller one 11s box of Locock's Pulmonic Wafers. You need not send any smaller ones, for many spoons in one dish soon consume the contents. God bless Dr Locock for his invaluable medicine." The above true copy from J. Staley, a collier in Greenburn, was sent to me, J. Freeland, Druggist, Bathgate. DR. LOCOCK'S PULMONIC WAFERS give instant relief and a rapid cure of asthma, coughs, and all disorders of the breath and lungs. To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists.

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing a Cough or Cold; they are good alike for the young or for the aged.

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's Churchyard, London. Retail by all Druggists, &c.

FREE ISSUE.

Notice.—The following invaluable works have just been published, and are now being issued gratis to all who enclose two stamps for postage, to No. 27 Alfred place, Bedford square, London.

DR WATSON'S NEW MEDICAL ESSAY on Nervous and Physical Debility, with their easy Detection and Self Cure. Lately discovered and now made public by the author, with cases and diagrams, showing the connection between the brain and other organs. Also prescriptions and other appropriate remedies for the self-treatment and cure of those special diseases, and whether acquired in youth, manhood, or old age. By Dr Watson, F.R.A.S., London, Member of the Medical Society of Rouen, the National Academy of Sciences, Paris, and Fellow of the Imporial stitute of France, &c., &c. (vide Diplomas and Medical rectory).

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow Station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

DR BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London, and sitting Magistrates. Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d, and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Prout, 229 Strand, &c., &c.

Just published, gratis, or post free for one stamp, to be had of all agents, and at 22 Newman street, Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

RUPTURES.—BY ROYAL LETTERS PATENT

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects; is here avoided, a soft bandage being worn round the body while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly London.

Price of a single Truss 16s, 21s, 26s 6d and 31s 6d; Postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d

WHITE, MANUFACTURER, 228 Piccadilly, London

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity ha induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London Bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills."—TIMES.

Also, by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Females and Children.

London: J. Churchill, and to be had of all booksellers.

A New Edition of

THE PHILOSOPHY OF MARRIAGE. By JOSEPH KAHN,

Graduate in Medicine, Surgery, and Midwifery, in the Royal and Imperial Universities of Vienna, Erlangen, &c., &c.

This popular work (which has been translated into four different languages) has now gone through forty-one Editions of 10 000 each, and is designed to impart accurate knowledge on subjects which involve the means of securing moral and physical happiness.

Price One Shilling, or free by post (in an envelope) for eighteen stamps.

J. Allen, 20 Warwick lane, Paternoster row; or from the Author's address, 17 Harley street, Cavendish square, W.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.

DR LA'MERT ON SPERMATORRHŒA; an Original Essay on the Treatment and Cure of NERVOUS and PHYSICAL DEBILITY, resulting from pernicious habits contracted in Youth, excesses in Manhood, or residence in Tropical Climates. With Cases and Engravings from Life, representing the various Organs in Health and Disease.

CONTENTS.

SECTION I.—The Physiology of the Generative Organs.

SECTION II.—Puberty—Manhood—The Morals of Generative Physiology—True and False Morality.

SECTION III.—Marriage in its Moral, and Physical Relations—Happy and Unhappy Unions—How to secure Healthy Offspring.

SECTION IV.—Youthful Abuse—The Secret Causes of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.

SECTION V.—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences—The Sterility of Age.

Dr LA'MERT, Honorary Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., is the only legally qualified practitioner who, for 20 years, has devoted his attention to the treatment of these disorders, which are so frequently aggravated by the unskilfulness of ignorant empirics, either self-styled physicians or surgeons, sometimes assuming names of eminent medical men, &c. At home for consultation daily, from Ten till Two, and from Six till Eight.

37 Bedford square, London.

TO THE NERVOUS AND DEBILITATED.

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.

CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion

MR CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by J. Allen, 20 Warwick lane, Paternoster row, and Mann, 39 Cornhill, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

CANDLES, SOAPS, OILS, AND

NIGHT LIGHTS of all kinds. Five pounds worth sent free by railway.—WHITMORE and CRADDOCK, 16 Bishopsgate street within, London, E.C. (Lists of prices on applications.)

TRADE B/P MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th. Supplied by BROWN and POLSON, to Her Majesty the Queen, by order from Buckingham Palace. It is in great favour wherever it has been made known, for Puddings, Blancmange, &c., preferred to the best arrow root, and especially suited to the delicacy of Children and Invalids.—BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

CROSSE AND BLACKWELL,

Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. and B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their Manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable oilmen, grocers, &c., and wholesale of Crosse and Blackwell, 21 Soho square, London.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

STRENGTH AND HEALTH

WITHOUT MEDICINE.

One of the most delicious preparations of the present day, and warmly recommended by all the first physicians, is the

LENTILLA PURA,

obtained from the celebrated vegetable Pulse called 'Ervalens' (or Lentils), and combined with other pure ingredients so as to form a delicious, feeding, and strengthening compound. It is a food fitted for all persons, whether in health or sickness, and is admirably adapted for infants and young children. Constipation, and its numerous maladies, including indigestion, debility, coughs, &c., &c., are wholly averted by the use of the LENTILLA PURA. Testimonials from patients, and the first physicians and surgeons of the day. This celebrated food is sold in canisters, viz.: 1 lb at 2s; 2 lbs at 4s. All is super-refined in purity.

Sent on receipt of P. O. Order, by Theodore Pliny, Brooksby street, Barnsbury, N.

Sold by grocers and chemists.

TRUSTEES, SOLICITORS, AND

OTHERS desiring to meet with a well-secured Investment for Money, yielding a liberal Rate of Interest, the principal sum being withdrawable on short notice, may do so by communicating with THOMAS H. BAYLIS, 429 Strand, London.

FREDERICK DENT,

Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in
HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

JULLIEN FUND.

Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same time afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

London and County Bank, Havover square

Who, as well as the honorary treasurers, have kindly consented to receive subscriptions.

April, 25th, 1860.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Dr Lankester, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Sir Henry March, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure oil, not likely to create disgust, and a therapeutic agent of great value."

Dr Lawrance, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr Stavely King, Physician to the Metropolitan Free Hospital.—"I have employed Dr de Jongh's Oil with great advantage in cases of mesenteric and pulmonary tubercle, and in the atrophic diseases of children."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE AGENTS,
ANSAR, HARFORD, and CO., 77, STRAND,
London, W.C.

CAUTION.—Beware of Proposed Substitutions.

SALE OF LAMPS, CHANDELIERS,

AND GAS FITTINGS.

TUCKER and SON having purchased of Messrs Pearce and Son (of Ludgate hill) their entire stock of Lamps, Gas Chandeliers, &c., (on their relinquishing that branch of their business to devote exclusive attention to the China and Glass Trade) have distributed it among their three Show Rooms as under; and being goods of first-rate quality, and offered to the public at a reduction of one-third from their usual price, to insure their immediate realisation, they must command the attention of purchasers.

City Show Rooms, 36 King William street (4 doors from London Bridge); Central do., 190 Strand (opposite St Clement's church, and near Temple Bar).

TUCKER and SON—Established 43 years.

Manufactory, Essex Works, W.C.—November, 1860.

DUTY OFF MODERATOR LAMPS.

—J. Schlossmacher's celebrated Manufacture. Burner of every Lamp stamped J. S. The duty being now off, and J. S. being enabled by machinery to reduce the prices of his Lamps to the charges of other makers for their commonest qualities, the full benefit of both reductions is given to the public through his London Agents, TUCKER and SON, at their Establishments, as under:—

Central Show Rooms, 190 Strand (near Temple Bar); City Show Rooms, 36 King William street (4 doors from London Bridge). Established 43 years.

Engravings free by Post.

EXTRACTS FROM THE PRESS

referring to the new Branch establishment of E. MOSES and SON, at the corner of Tottenham Court road and Euston road.

"Upon each floor there are several apartments called the 'trying-on rooms,' affording customers an opportunity of avoiding the guess-work which has hitherto prevailed in ready-made emporiums, and everywhere immense mirrors are placed in which the buyer may satisfy himself with the fit and shape of the garment which he proposes to purchase."—STANDARD.

"On the whole, the new establishment of Messrs E. Moses and Son is decidedly the most complete of its class in the metropolis."—MORNING HERALD.

"The whole exterior of the building presents a noble aspect. It combines an appearance of lightness and solidity, grace, and strength."—ILLUSTRATED NEWS OF THE WORLD.

"The interior arrangements are in a corresponding scale of elegance, whilst convenience and comfort have not been lost sight of.....Nothing, in fact, that goes to constitute the completeness of an organised whole can be said to be omitted."—DAILY NEWS.

"Like skilful logicians, they laid down the solid premises of their trade syllogism in the Minories; they next constructed their middle term in Oxford street; they have just now brought out their conclusion to Tottenham Court road."—EXPRESS.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are now prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by indorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest, upon notice being given by him twelve months previous to the expiry of the first term. Failing such notice, the Debentures will be paid off at the expiration of the first five years.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the limited amount, £194,000, which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into the Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, upon giving notice at any time before the Debenture becomes payable, of converting it into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London,
1st January, 1861.

THE EAST INDIAN RAILWAY COMPANY is prepared to receive tenders for CAST-IRON PIPES.

Specification, drawings, and form of tender, upon which only tenders will be received, may be seen at the Company's offices. Tenders, endorsed "Tender for Iron Pipes," must be delivered to the Secretary, on or before 12 o'clock at noon, on Tuesday, the 22nd day of January instant.

The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk,
New Bread street, London, Jan. 8, 1861.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company having received authority from the Secretary of State for India to raise the remaining sum of £1,500,000, required to complete the total amount which the Company has the power to borrow on debentures not convertible into shares, the Directors will receive applications for debentures at par, to the above extent, bearing interest at the rate of 5 per cent. per annum, payable by coupons at the Bank of England.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years, from the 15th December inst., transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice the bonds will be paid off at the expiration of the first five years, on presentation at the Bank of England.

Payments will be required as follows:—25 per cent. on allotment, and the remaining 75 per cent. in three equal instalments, at intervals of one month. Or the bonds may be paid in full on allotment.

Interest will accrue on the respective payments from the dates fixed for the same.

Pending the payment of the several instalments scrip receipts will be issued, which will be exchanged for bonds, with interest coupons annexed, after all payments shall have been completed.

In default of the payment of any instalment on the day fixed, the previous payments will be forfeited.

No scrip receipt or bond will be issued for a less sum than £50.

Applications for the bonds will be received at the offices of the Company in the following form.—By order of the Board. D. I. NOAD, Secretary.

East Indian Railway House, Alderman's Walk,
New Broad street, London, Dec. 11, 1860.

FORM OF APPLICATION.

To the Secretary of the East Indian Railway Company.

SIR,—I beg to apply for bonds to the extent of £ in terms of the notice issued by the East Indian Railway Company under date 11th December, 1860, and I hereby agree to accept the same, or any less amount that may be allotted to me, and to pay the full amount thereof.

W. J. VIAN, Secretary.

64 Cornhill, E.C., January, 1860.

IMPERIAL LIFE ASSURANCE

COMPANY, 1 Old Broad street, London. Instituted 1820.

DIRECTORS.

Frederick Pattison, Esq., Chairman.
Thomas Newman Hunt, Esq., Deputy-Chairman.

Thomas G. Barclay, Esq.	George Field, Esq.
James C. C. Bell, Esq.	George Hibbert, Esq.
Charles Cave, Esq.	Samuel Hibbert, Esq.
Edward H. Chapman, Esq.	James G. Murdoch, Esq.
George W. Cottam, Esq.	William R. Robinson, Esq.
George H. Cutler, Esq.	M. T. Smith, Esq., M.P.
Henry Davidson, Esq.	Newman Smith, Esq.

Security.—The assured are protected from the liabilities attaching to mutual assurance by a fund of a million and a half sterling, of which nearly a million is actually invested, one-third in Government Securities, and the remainder in first-class debentures and mortgages in Great Britain.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Claims.—The Company has disbursed in payment of claims and additions upwards of £1,500,000.

Proposals for insurances may be made at the chie office, as above; at the branch office, 16 Pall Mall, London; or to any of the agents throughout the kingdom.

SAMUEL INGALL, Actuary.

*** Service allowed in Local Militia and Volunteer Rifle Corps within the United Kingdom.

ATLAS FIRE AND LIFE

ASSURANCE OFFICE, 92 Cheapside, London.
Established 1808,
And Empowered by Act of Parliament of the 54th Geo. III., c. 79.

DIRECTORS.

CHAIRMAN—J. Oliver Hanson, Esq.
DEPUTY-CHAIRMAN—Wm. Geo. Prescott, Esq.

Sir William Baynes, Bart.	John George Maclean, Esq.
Arthur E. Campbell, Esq.	Samuel E. Magan, Esq.
Thomas Chapman, Esq., F.R.S.	Capt. A. L. Montgomery, R.N.
Benjamin B. Greene, Esq.	Joseph Pulley, Esq.
Joseph Grote, Esq.	Arthur A. Rasch, Esq.

AUDITORS—John Oliver Hanson, jun., Esq., and Philip Ainslie Walker, Esq.
ACTUARY—Charles Ansell, Esq., F.R.S.
SOLICITOR—Thomas Browning, Esq.
MEDICAL OFFICER—William Coulson, Esq., F.S.A.
BANKERS—Messrs Prescott, Grote, Cave and Cave.

This office having been established upwards of 52 years, more than sufficient time has elapsed to test the soundness of the principles on which it has been conducted. During that period its prosperity and the magnitude of its operations have been constantly increasing. In the

LIFE DEPARTMENT

the accumulated premiums are over £1,700,000, and the annual income exceeds £190,000.

Bonuses have been declared on some policies to an amount greater than the sum originally assured.

Premiums have been extinguished, where the parties assured have applied the bonus in reduction of the annual premium.

At the valuation up to Christmas, 1859, there existed a surplus of £270,295,—the whole of which belonged to the policy-holders.

The next valuation will be made up to Christmas, 1864. Policies on the Participating Scale, in England or Ireland respectively, which may be effected before that date, will, if the parties be then alive, participate in the surplus in proportion to the time they may have been in force.

The sum of upwards of £3,500,000 has been paid during the existence of the office for claims under life policies, of which amount a very considerable part was for bonuses.

Persons assuring in Great Britain have the option of Participating Rates of Premium, or of Non-Participating Rates.

The Directors beg to announce that the rates of premium have been recently revised and readjusted in accordance with a long experience, and that the New Scale will be found very advantageous to persons desiring to commence assuring early in life.

The Non-Participating Scale is particularly adapted to parties wishing to assure a fixed sum only, at a fixed rate of premium, and on low terms.

Premiums may be paid Annually, Half-yearly, or by a limited number of Annual Payments.

FIRE DEPARTMENT.

This Company undertakes the assurance of almost every species of Property in the United Kingdom, at rates of premium and upon principles which will be found quite as advantageous to the interests of the assured as those offered by any other office. The Directors can confidently refer to the well-known character of the Company for liberality and promptitude in the discharge of claims made upon it during the many years it has been established.

Renewals should be paid within fifteen days after the respective Quarter-days when they become due.

Tables of rates, forms of proposal, and any information needful to effect Life or Fire Assurances, may be obtained on application to the office, No. 92 Cheapside, London, or to any of the Company's Agents.

RICHARD RAY, Secretary.

ACCIDENTAL DEATH

INSURANCE COMPANY.—A yearly ticket to insure £1,000 in case of death by Railway Accident, and Six Pounds a week if disabled, may be obtained from this Company by a payment of Fifteen Shillings.

EDWARD SOLLY, Manager.

Advances on policies when their value exceeds £50.

Half or one-third credit allowed on whole life policies.

Residence in time of peace in any part of Europe. No extra charge for the Militia, Volunteer Rifle, or Artillery Corps, on home service.

Claims paid one month after proof of death has been admitted.

Medical attendants remunerated for their reports.

The medical officers attend every day at a quarter before 2 o'clock. E. BATES, Resident Director.

ARMY CONTRACTS.—

Sealed Tenders will be received at this office until noon on the 9th of February, from persons who may be willing to enter into Contracts for the supply of WOOD, for Lighting Fires in the London and Woolwich Military Districts, in such quantities as may be required for the use of Her Majesty's Land Forces stationed in any of the following places, from 1st March, 1861, to 31st March, 1862:—

1. Hyde Park and Kensington.
2. Regent's Park, St John's Wood, and Portman Street Barracks.
3. Wellington Barracks, Horse Guards, and St George's Barracks.
4. Tower.
5. Hounslow and Kneller Hall.
6. Hampton Court.
7. Croydon and Carshalton School.
8. Woolwich.

Tenders must be made for each of the above-mentioned stations or barracks as separately grouped or numbered.

Printed forms of tender, together with the conditions of contract, may be obtained on application at this office between the hours of 10 and 4 o'clock, where every information which may be required on the subject will be furnished.

The tenders must be made on the printed forms, which should be properly filled up and signed, and delivered under sealed envelope at the undermentioned office, marked on the outside "Tender for Army Supplies," before noon on the 9th February next.

W. T. POWER, Deputy Commissary-General.
Deputy Commissary-General's Office, 5 New street, Spring gardens, London, S.W., Jan. 1, 1861.

PRIZE CATTLE.—

During the month of September 1860, there were seventy-eight prizes awarded to cattle fed on food seasoned with THORLEY'S CONDIMENT. A pamphlet post free on application. Address "Thorley's Steam Mills, Caledonian road, King's Cross, London."

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are now prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by indorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest, upon notice being given by him twelve months previous to the expiry of the first term. Failing such notice, the Debentures will be paid off at the expiration of the first five years.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the limited amount, £[illegible], which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into the Capital of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, upon giving notice at any time before the Debenture becomes payable, of converting it into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London,
1st January, 1861.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company having received authority from the Secretary of State for India to raise the remaining sum of £1,500,000, required to complete the total amount which the Company has the power to borrow on debentures not convertible into shares, the Directors will receive applications for debentures at par, to the above extent, bearing interest at the rate of 5 per cent. per annum, payable by coupons at the Bank of England.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years, from the 15th December inst., transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice the bonds will be paid off at the expiration of the first five years, on presentation at the Bank of England.

Payments will be required as follows:—25 per cent. on allotment, and the remaining 75 per cent. in three equal instalments, at intervals of one month. Or the bonds may be paid in full on allotment.

Interest will accrue on the respective payments from the dates fixed for the same.

Pending the payment of the several instalments scrip receipts will be issued, which will be exchanged for bonds, with interest coupons annexed, after all payments shall have been completed.

In default of the payment of any instalment on the day fixed, the previous payments will be forfeited.

No scrip receipt or bond will be issued for a less sum than £50.

Applications for the bonds will be received at the offices of the Company in the following form.—By order of the Board. D. I. NOAD, Secretary.

East Indian Railway House, Alderman's Walk, New Broad street, London, Dec. 11, 1860.

FORM OF APPLICATION.

To the Secretary of the East Indian Railway Company.

SIR,—I beg to apply for bonds to the extent of £ in terms of the notice issued by the East Indian Railway Company under date 11th December, 1860, and I hereby agree to accept the same, or any less amount that may be allotted to me, and to pay the full amount thereof.

Name .....
Address .....
Description .....
I desire to pay* .....
Date .....
Signature .....

N.B.—No bond will be issued for a less sum than £50.

*Here insert the words "by the instalments specified," or, "in full."

It is requested that debentures may be prepared in the sums stated below:—

Number.	Amount.	Number.	Amount.
.....	Of £50 each.	.....	Of £600 each.
.....	Of £100 each.	.....	Of £700 each.
.....	Of £200 each.	.....	Of £800 each.
.....	Of £300 each.	.....	Of £900 each.
.....	Of £400 each.	.....	Of £1000 each
.....	Of £500 each.	.....	Of £ each

N.B.—The debentures will be endorsed in blank, unless instructions are given to the contrary.

S. W. SILVER AND CO.,

OUTFITTING WAREHOUSES, 66 and 67 CORNHILL, E.C.

Special Outfits for Australia, India, and China, for Naval and Military Officers, Cadets, Midshipmen, and Civilians. Clothing for Gentlemen's Home Use,—viz., Naval and Military Uniforms and Civilian Dress of the best Materials and Workmanship. Shirts, Hosiery, Gloves, &c. Ladies' Outfits. Furniture for Camp, Barrack, Cabin and Colonial use, embracing every variety of Cabinet Work, Canteens, Trunks, Portmanteaus, &c., portable and suited to all climates.

Manufactory, Silvertown, opposite H.M. Dockyards Woolwich.

The Political Economist.

THE DISRUPTION OF THE UNION, AS IT WOULD AFFECT ENGLAND.

We last week promised our readers that we would take the earliest opportunity of considering the bearing of the dissolution of the American Republic on the interests of our country, both political and commercial. We will suppose that matters will *go on as they have* begun; that the other Slave States will join South Carolina, and that a Southern Slave-holding Confederation will be formed as an independent nation, prepared to enter into relations with other States.

The first question that arises, is, "Will England recognise "the independence and sovereignty of the new State?" The natural and spontaneous answer is, of course, in the affirmative. Our principle is, and has long been, to recognise, and enter into amicable relations with, all *de facto* States and Governments. The moment the severance is complete and admitted, we have no concern either with antecedent causes or proceedings. But here a difficulty arises:—What *is* our actual relation to the new Republic? Is the whole Union dissolved, or has there merely been a separation of a portion of it? Are our treaties and engagements with *both* sections of the Union dissolved, by the dissolution of the Union itself?—or do they still hold with the North, as with the original body with which they were made? Do the Southern States, in seceding, still remain bound by the engagements entered into by the Confederation of which they formed a part at the date of those engagements? Or will they hold themselves liberated from all foreign contracts by the same act which has severed them from their domestic connection.

These are somewhat difficult questions for international jurists to decide. Probably as far as regards the Northern States, they will continue to call and consider themselves as still THE UNITED STATES, and as holding their former position and treaties,—none the less that they have lost a portion of their territory. The real, immediate, *practical* problem that lies across our path is this:—"Will the Southern Con-"federated States consider themselves bound by those "mutual engagements as to abstinence from and suppres-"sion of the slave trade, entered into and still subsist-"ing between the United States and Great Britain?"—Probably not—since one of their chief motives for seceding is to be able to renew the slave trade. If they hold themselves freed, we do not know how we can bind them, or make themselves regard themselves as bound. But supposing our diplomacy were able to obtain this point, the only consequence would be that they would give us formal notice of their intention to abrogate those treaties and engagements after a certain date. We might remonstrate; we might negotiate; but we do not know that we could refuse to accept such notice. The practical shape, therefore, in which the question will come before us is this:—"Shall we *recognise* "their independent sovereignty, without requiring as a con-"dition that they shall renew and observe the anti-slave-"trade treaties which subsist with their Northern brethren, "—or even accept more stringent *ones?*" Doubtless we shall endeavour, and in consistency and as a matter of duty ought to endeavour, to make this condition; since we cannot shut our eyes to their notorious and avowed design of reviving the abominable traffic, and to pretend to do so would be to surrender the most passionately and pertinaciously pursued object of our national policy. We shall urge upon them that the trade is prohibited by international agreement and by municipal law in every civilised nation in the world, and that we can recognise and treat with no nation as civilised which persists in upholding it. They will, of course, refuse to accept such a condition, as it would defeat one of their principal purposes; and will insist on *unconditional* recognition. What are we to do then? It might seem that we are simply helpless in the matter. Three courses are open to us—none of them entirely satisfactory.

We may recognise their independence at once, in accordance with our usual practice; and, when we have done so, may proceed to make the best terms that we can as to the anti-slave-trade treaties. But this course, though the simplest and easiest, would be very painful to our feelings of humanity,—for we cannot disguise from ourselves that it would be nearly equivalent to unconditional surrender.—Or, secondly, we may formally refuse to recognise them, and abstain from all diplomatic intercourse with them, unless or until they shall consent to abstain from and prohibit the slave-trade;—but it is scarcely likely that this negative proceeding would bring them to terms, as it would not prevent commercial intercourse, and would at most inflict some trifling inconveniences which might be felt as much on one side as on the other. If we chose slightly to vary our course and to ignore the fact of their separation and continue to regard and treat them as still part of the United States (which would be rather a childish mode of action), all that we could gain would be the right of forwarding formal remonstrances, as against a violation of existing engagements, in case of any of their citizens being discovered to be engaged in the slave trade—remonstrances which they would of course disregard, and which the treaties give us no right of following up by any active measures.—Or, again, we may take up the matter in a high-handed way, and, while refusing our recognition of their independent national existence, treat any of their citizens whom we detect in carrying slaves as pirates, sailing under no known flag, and protected by the nationality of no known State. As to the advisability of so decided a proceeding, we will not as yet offer an opinion.—But there is a fourth and a preferable alternative,—viz., a *cordial* agreement between ourselves and the Northern Federation to prevent the renewal of the traffic at all hazards and by all means. Such cordial agreement *may* now be attainable, but even with it we must bring our forcible interference within the limits of international morality and usage, by procuring from all other civilised nations a consentaneous declaration rendering the slave-trade, like piracy, a crime

against humanity and the world's law, and, as such, punishable by any witness and pursuer.

Apart from this perplexing question, we see no reason for anticipating that a severance of the Union, *once effected* peaceably and without catastrophe, will be in any way injurious to Great Britain. On the contrary, we are not sure that it may not indirectly be rather beneficial than otherwise. In the first place, we may expect that America will be somewhat less aggressive, less insolent, and less irritable than she has been. Instead of *one* vast State, acting on every foreign question *cum toto corpore regni*, we shall have *two*, with different objects and interests, and by no means always disposed to act in concert or in cordiality. Instead of *one*, showing an encroaching and somewhat bullying front to the rest of the world, we shall have *two*, showing something of the same front to each other. Each will be more occupied with its immediate neighbour, and therefore less inclined to pick quarrels with more distant nations. Then, too, for some time at least, that inordinate, though most natural sense of unrivalled prosperity and power, which swelled so flatulently and disturbingly in the breast of every citizen of the great Transatlantic Republic, will receive a salutary check. Their demeanour is likely to become somewhat humbler and more rational, and it will, therefore, be easier to maintain amicable and *tranquil* relations with them than it has been. In place, too, of Europe being obliged to watch and thwart their annexing tendencies, the two federations will probably exercise this sort of moral police over each other. Neither of them will look with much complacence on the annexation of States or territories which will add power and dominion to the other, and so disturb their relative equilibrium. Unprincipled and reckless Southerners, like Mr Buchanan, may talk of seizing on Mexico, Nicaragua, and Cuba; unprincipled and inflated Northerners, like Mr Seward, may talk of seizing on Canada; —but there will be some hope that we may leave them to each others' mutual control, and smile at the villainous cupidities of both. With the Northern Federation, too, we may look to maintaining more cordial relations than we have often heretofore been able to do:—not only will the embarrassing question of Slavery, which has caused so much righteous indignation on our side, and so much bitter resentment and irritation on theirs, be for ever removed from between us;—but the immediate and marked improvement which we may look for in the tone and working, if not in the form of the institutions, of the North, when Southern Democracy, complicated as it has been with Slavery, shall have ceased to poison and degrade them, can scarcely fail to bring them more into harmony with English feeling, because to command more of English confidence and respect. The more they *civilise* (they must pardon us the word, for assuredly they are getting rid of a barbarising element), the more friendly and cordial shall we inevitably grow.

But what will be the consequences to Great Britain, in a commercial point of view, of the disruption of the Union, if that disruption should be accompanied by war, and should be followed (as in that case would be not improbable) by such a general insurrection of the Slave population as would interrupt for a longer or shorter period the growth of cotton in the Southern States. This catastrophe would be so terrible, its accompaniments so shocking, and its results everywhere and in every way so deplorable, that we most earnestly pray it may be averted:—but the danger of it, if a civil conflict does break out, is so obvious and so imminent that it would be simple folly to shut our eyes to so possible a contingency. How, then, would it affect this country?

It is not easy to overestimate the extent or gravity of the consequences to Great Britain of a cessation, or even of any large or sudden diminution, of the supply of cotton from the United States. But even in facing a danger of such vast and admitted magnitude, it is important to be exact as to our facts and reasonings, and to avoid all exaggerated terrors. Let us recall to our readers' minds the precise bearing of the case. The cotton manufacture, from the first manipulation of the raw material to the last finish bestowed upon it, constitutes the employment and furnishes the sustenance of the largest portion of the population of Lancashire, North Cheshire, and Lanarkshire, of a considerable number in Derbyshire, Leicestershire, Nottinghamshire, and Yorkshire, and of scattered individuals in several other parts of England, Scotland, and Ireland. The actual number of hands directly employed was stated by M'Culloch in 1854 to be rather more than half a million: there can be no doubt that it now greatly exceeds this figure;—and if we take into account the subsidiary trades and occupations, coal mines, machine-works, &c., and add the unemployed families of the workmen, we may safely assume that nearer four than three millions are dependent for their daily bread on this branch of our industry.

The total aggregate value of British produce and manufactures exported in 1859 was 130,440,000*l*:—of this sum cotton goods and yarn constituted 48,200,000*l*, or more than one-third. Of this sum the United States took 4,635,000*l*.

Let us now see to what extent we are dependent on the United States for our supply of the raw material for all this enormous production. Many countries contribute to our consumption, but none so largely as North America. In ordinary years she supplies us with about *three-fourths* of our consumption; and we take off more than *half* her production. During the last four years of which we have full accounts, 1857-1860, our consumption was, of all sorts, 9,062,700; of the United States' cotton, 7,140,000 bales, or rather more than 77 per cent.

But although we usually receive 75 per cent. of our supplies from North America, we must not confound this with being actually *dependent* upon that country for this amount. The practical question,—if we wish to measure the precise degree of dearth to which we should be subjected in case of the American supply being interrupted,—is, what proportion of our supply *could* we, under the pressure of high prices and stimulated mercantile enterprise, obtain from other quarters? To answer this question we must look back for exceptional years. It is true that the West Indies send us little, and send us all they grow, Brazil and Egypt might send us somewhat increased supplies, especially by sending less to the Continent. India can send us a very much larger amount than she usually does, because vast quantities are always *grown*, and they are shipped here or consumed at home according to the ruling prices of the year. Now we find that in one year (1857) when the crop in the United States fell short, India sent us 680,000 bales, and other quarters 255,000;* while America supplied only 1,482,000 bales. It will, therefore, we think, be fair and moderate to assume that under such extraordinary pressure and inducements as would be presented by a cessation of the American supply, we should be able to obtain from India, Egypt, Brazil, and miscellaneous quarters, at least *one-third* more than we did in 1857,—or a total supply of about 1,200,000 bales. Now, in 1859 our actual *consumption* (after deducting re-exports) was 2,300,000 bales; and in 1860 (an extraordinary year) 2,630,000 bales. The *extreme* effect, therefore, of an *entire* cessation of the production of cotton in America, would appear to be this:—that all our mills would have to work about half time, as long as the dearth lasted in full intensity. What would be the effect on wages and on profits—whether the manufacturers would gain half-profits, or no profits at all, and whether the workpeople would still earn half wages, or less or more than half—would of course depend upon the question whether the scarcity of the manufactured article raised its price in the same or in a greater or a smaller ratio than the scarcity of the raw material raised *its* price;—a matter as to which conjecture would be simply idle. The result upon our exports it is equally impossible to predict. Very possibly the home market might take off a larger *proportion* of the total production than heretofore: if it did not and if we exported half the *quantity* we usually do, the probability is that the price of this quantity would be so largely enhanced as to leave the aggregate *value* of our cotton exports not far short of its present amount. The influence on the shipping trade would of course be great:—freights will necessarily fall.

We have stated what in our judgment—and apart from the possible effects of panic—will be the *extreme* effect of the

* It is true that a considerable part of this was re-exported; but we have assumed as the most probable result, that, in such a peremptory demand as the case supposes, we should retain *all* we import, our necessities being more imperious than those of any other country.

worst that can ensue (viz., an entire stoppage of cotton cultivation in America) on our chief branch of national industry. It is serious enough, no doubt, and may well cause grave uneasiness to all concerned—and who is not directly or indirectly implicated?—in the prosperity of the cotton manufacture. But we may anticipate that the effects we have described will in actual operation be mitigated by degrees in various ways. In the first place, a great stimulus will be given to the already awakened activity of our merchants in procuring supplies of the raw material from quarters that are only now just beginning to be thought of, but from whence, under sufficient pressure, considerable quantities might ere long be procured. Thus, we know by experiment that excellent cotton of the Sea Island description can be grown in Australia. The small shipments of the article that have from time to time been forwarded to this country from Port Natal resemble in quality the production of the United States much more closely than do those from either Egypt, India, or South America. The same observation will apply to the sample bales which have been received from the West Coast of Africa. From both these quarters there is reason to believe that, under the stimulus of high prices, considerable quantities might be procured as soon as a regular traffic could be set on foot and means of transport be procured. It has lately become known that cotton is largely grown in the interior, and is even manufactured there; and adequate inducements would no doubt persuade the natives not only to grow more for our use, but to sell instead of manufacturing much of what is already grown. In a few years, too, considerable quantities might again be procured from Asia Minor, as was the case formerly. "Smyrna cotton" was once well known in the trade, and some is still imported.

In the second place, a considerable economy in the consumption of the raw material would be at once effected, under the influence of a high rate of prices, by a general tendency among manufacturers towards the production of the finer fabrics. Most mills have a range of potential production (without any alteration in their machinery) of at least 30 per cent.—often more. Manufacturers who now use weekly 100 bales, could easily, by turning to finer fabrics, reduce their consumption to 70 or 75 bales. Those articles into which the raw material enters most largely would of course be those which relatively would be most enhanced in price, and for which, therefore, the demand would be most curtailed. "Domestics," as they are called, or strong cotton cloths and shirtings, and coarse yarns would be discouraged; and, as their price approached more nearly to that of linen and woollen fabrics, would be to a considerable extent superseded by them. This would cause an increase in the production of these latter articles, and a consequent increased demand for work-people; and by this process a considerable number of the hands thrown out of work in the cotton trade would be absorbed, and the suffering to the operatives, though not the loss to the masters, would be greatly mitigated.

These palliatives would no doubt be a work of time; but they would *begin* to operate immediately; and, in conclusion, it must be remembered that, though we have preferred to consider the case in reference to a *total* cessation of cotton production in North America, yet such a total cessation, even in the event of negro insurrection and a servile war, is scarcely to be apprehended. In Texas, already a considerable amount of cotton is grown by free labour, and on many isolated plantations production would most probably continue—at all events for a time.

As to the consequences of the severance of the Union on our trade with North America, in case the severance is peaceably effected and no extensive Slave insurrection ensue,—we do not apprehend that any material change will be felt, so soon as the monetary derangement shall have subsided, and the existing organisation of drafts and payments shall have been modified as far as is necessary to meet the altered circumstances. We shall of course continue to receive from the Planting States all the cotton that we wish to buy and that they have to sell. Our exports will not probably be much, if at all, affected. It is probable that the Northern States will raise their tariff as much as the Southern States lower theirs:—we shall send more manufactures to New Orleans, and less to New York than we do now. What would be the consequences to our aggregate commerce with America of a general negro insurrection, or of negro emancipation, it is idle to speculate, and impossible to estimate.

ECONOMY FALSE AND TRUE.

We thoroughly agree with the Liberal members of Parliament who have addressed a memorial to Lord Palmerston respecting the expenditure of the country. We agree with them that the expenditure "has increased, is increasing, "and ought to be diminished"; we agree with them that its revision is one of the most pressing duties of the Executive Government; we concur in the latent doctrine which animates every sentence of the memorial; we are very sure that there is scarcely a single subject which should more occupy the attention of Liberal members of Parliament, or which should have a greater share in determining the degree in which they should give their support to the present Administration, or should withhold it from them. The progressive augmentation of our national expenditure undoubtedly excites the anxiety of the country; and if the Cabinet do not deal with it skilfully and zealously, they will show themselves unequal, intellectually or morally, to a pressing exigency of the present time.

We fear, however, that the conclusion of the Liberal members of Parliament on this matter is much better than their arguments. If we had to rest the case on them—if we had no other grounds for believing economy to be possible or advisable, we should despair of ever seeing it. They tell us "the foreign relations of the country at the close of the "year are such as to encourage a reasonable confidence in "the maintenance of peace. The war with China is at an "end. The Italian revolutions appear to be issuing in the "establishment of the constitutional rule of Victor Ema-"nuel over the Peninsula, while the neutrality which has "been observed by England is acknowledged both at home "and abroad to have been the policy of wisdom. Above all, "our relations with France have become decidedly amicable, "having obtained the guarantee of a commercial treaty "favourable to the interests of both countries, and being "made still more friendly by the abolition, on the part of "the Emperor, of the passport system in France, especially "on behalf of the subjects of Her Majesty." The war with China is indeed at an end, and all the extra provision made last year for that object will no longer be needful, while we have the indemnity money coming to us in the future to make up in part for the expenditure of the past. But with this exception, we have little change in our foreign relations since this time last year. It is just as difficult to anticipate the future now as it was then. Now, as then, we could not venture to predict what a day may bring forth. The progress of events in Italy has indeed been far better and more satisfactory than we could have anticipated, but have they lessened the likelihood of continental convulsion? Who can tell whether Garibaldi will try some new adventure in the spring? Who can tell whether Cavour will try to restrain him?—who can tell whether, if he do try, he will be successful? Again, is there no possibility of collision on the Danube?—is not Austria menaced by Hungary as well as by Italy? Now, as last year, our military preparations should be based on the probable anticipations of diffused trouble, rather than on that of general quiet and substantial tranquillity. Nor are our relations with France really altered since last year. We have, indeed, the commercial treaty—an excellent arrangement, beneficial to both countries; we have the abolition of passports—a minor reform, but indicative of good intentions. But the main difficulty remains where it was. We must not rely for our safety on the goodwill and forbearance of France. We need not impute anything but the best present intentions to the French Emperor, but we know that, whether his secret policy changes or not, his open public policy varies from day to day. We know that his declarations are of one sort at one time and of another sort at another time; we know that his conspicuous acts are mutable and shifting; we can hardly fail to believe that their variations show some vacillation in his resolutions, if not some modification in his wishes. It is idle indeed to dilate on this branch of the subject. *The English people have spoken plainly*; they are resolved to be safe against France should the worst come to the worst; they are resolved to be strong enough to resist any attack, however

improbable it may be; they are resolved to be strong enough to pursue a dignified and independent foreign policy without fear and without any need to humble themselves before, or to conciliate, any neighbour however powerful. This feeling has rather gained strength than lost strength during the year. The volunteer movement has made the true feeling of the English people known throughout Europe as well as their real power; and we everywhere trace the beneficial results.

We cannot, therefore, think that we ought to be less safe than we are. But cannot we be equally safe at a less cost? Millions on millions are spent on our army and navy. Is the gain proportionate? Could not a better management give us more for the same money? The figures are very startling:—

	1850.		1859-60.
	£		£
Army, ...	8,955,061	...	14,057,186
Navy	6,437,883	...	11,823,859
	15,392,944	...	25,881,045

Can it be that all this money is needed? Are there not some secret deficiencies in our system which render it at once costly and inefficient? Could not a vigorous statesman give us an economical remedy more certain and sure than our present expensive security? Could we not somehow obtain that well-appointed efficiency which is as inconsistent with squandering as it is with penuriousness?

We do not blame our naval and military departments; at least not the individual men who compose them. On the contrary, we believe that they have the best intentions, the most accurate habits, the most conscientious industry of routine. But the training of our civil service is at fault; it is not calculated to produce the efficiency we require from it, but, on the contrary, is calculated to render that efficiency improbable and well nigh impossible. It has lately been described, evidently by one who knows it well:—"The first five years of their "official life are probably spent in copying letters and "arranging documents, and calculating plain arithmetical "accounts;—all of them occupations requiring obedient "steadiness, plodding patience, and unfastidious industry; "none of them requiring ability or knowledge, or any intel- "lectual qualifications beyond the simplest and most ordi- "nary. The next five years are spent in work of a rather "higher order, in writing the ordinary letters which formerly "they copied; perhaps in analysing ordinary papers, in "collating regular accounts; usually in getting through "routine tasks, in routine order, and under routine sur- "veillance. Even for these functions the most moderate "amount of talent suffices: independent judgment is scarcely "ever wanted, and would often be in the way; accuracy, "steadiness, and fair intelligence are the qualities specially "in demand. After twelve or fifteen years of official ex- "perience as the higher positions are approached, and the "trained civilian has a prospect of rising to the headship of "one of the many branches into which his office is divided, "such talent and knowledge as may have survived the be- "numbing ice-house of his preliminary service come into "play and help him forward in the department; and if he be "a man of really distinguished ability, he may aspire to "the highest posts attainable through regular promotion."* Who can expect efficiency from such an education? Mercantile men should expect it least of all. They know by daily observation the distinction—the almost impassable distinction—between clerks and men of business. In mercantile life young men of a little capital start early as men of business; while the mind is fresh and vigorous they are trained to habits of capacity and decision. At the same period the clerk begins his life-long career of punctuality and obedience. In only the rarest cases do the two classes ever afterwards mix. Ask any merchant to let his ledger-keeper—his old, experienced, valued ledger-keeper—manage his business for him. How *long* would he escape the *Gazette*? Yet this is the system of our public offices; we train men to be clerks, and we expect them to be masters.

If we could remedy this evil,—if we could place efficient men of business, procured from the exterior or rapidly pushed up from the interior, in all the principal posts of our public departments,—we believe we should attain a degree of economy of which we have but a very little idea now. We believe that the cost of a real efficiency that would be respected in all Europe would be as little, or nearly as little, as that which was paid during the period of irrational self-confidence which preceded the Crimean war, for a degree of inefficiency which was as discreditable as it was ludicrous.

And this source of economy would be real and permanent. It would be based on the only two sources of saving—practicality and consistency. We should be always attempting a defined object with well-chosen means; we should soon, therefore, make those means adequate, and should soon attain an end. It is otherwise with the source of economy suggested or pointed out in the memorial. A sudden reduction in our armaments would be far from saving us money. We should only lose the benefit of what we have done lately, and should have in a year or two to do it all over again. The most costly method of management is to be "always beginning "things." Let us act like men of business. Let us arrange the national establishments on what we think—looking to reasonable fears as well as sanguine anticipations—*may* be wanted. Let us keep some well-framed scheme—some clear, intelligible scheme—of national defence before us, year after year; let us choose the best men we can find to carry out the scheme; then, and then only, we shall have real efficiency and real economy. On any other plan we shall, as formerly, spend our money and not be safe after all.

We had intended, likewise, to make some mention of the recommendation of the memorialists as to our miscellaneous civil expenditure, but our space is for the present exhausted, and we must take an early opportunity of resuming the subject.

We subjoin the memorial on which we have been commenting:—

To the Right Hon. Viscount Palmerston, First Lord of the Treasury.

My Lord,—We feel it our duty, as members of the Liberal party in the House of Commons, who have generally supported your Government, respectfully to express to you the anxious concern with which we view the present state of the public expenditure, and to request for the subject the very serious consideration of the Government in preparing the estimates for the next session.

We cannot but hope that the enormous expenditure of the current financial year was forced upon the Gonernment against their will by an unhappy combination of circumstances. Its amount, however, was so far beyond what has ever been known when the country was not engaged in a European war that a great responsibility will rest on the Government and the House of Commons if it should not be materially reduced at the earliest opportunity.

The foreign relations of the country at the close of the year are such as to encourage a reasonable confidence in the maintenance of peace. The war with China is at an end. The Italian revolutions appear to be issuing in the establishment of the constitutional rule of Victor Emanuel over the Peninsula, while the neutrality which has been observed by England is acknowledged both at home and abroad to have been the policy of wisdom. Above all, our relations have become decidedly amicable, having obtained the guarantee of a commercial treaty favourable to the interests of both countries, and being made still more friendly by the abolition, on the part of the Emperor, of the passport system in France, especially on behalf of the subjects of Her Majesty.

Under these circumstances the country will naturally expect a considerable reduction of our warlike establishments from the extraordinary scale of the present year.

We would also invite attention to the civil and miscellaneous expenditure of the country, which has for many years been in course of rapid and extraordinary increase, until it has reached an amount which loudly demands revision and retrenchment.

We are convinced that retrenchment will prove the truest policy of the Government as the only method of meeting the financial exigencies of the State, satisfying the expectations of Parliament, conciliating the good opinion of the commercial and moneyed interests, allaying the dissatisfaction of the taxpayers, and preventing the loud outcry which would inevitably arise in case of another unfavourable harvest or any check to the public prosperity.

We are compelled to say that we should view an expenditure for the coming year approaching that of the current year with great regret and disapprobation; and we believe that would be the feeling of our constituents and of the country at large.

We have therefore thought it right to offer these suggestions in a friendly spirit to your Lordship, and we trust they may not be thought unworthy to receive the serious consideration of the Government.

We are, my Lord, your Lordship's most obedient servants.

Among the signatures already obtained are those of Sir James Duke, Mr R. W. Crawford, Mr Baines, Mr Bristow, Mr Buxton, Mr Crossley, Mr Ewing, Mr S. Gurney, Mr R. Hanbury, Mr Mellor, Mr Pilkington, Sir J. Shelley, Colonel Sykes, and M. J. A. Turner.

* "National Review" for January. Article V., page 135.

THE DWELLINGS OF THE POOR AND THE POOR LAW.

WHILE heartily approving of all that was said, and so well said, by Mr Cowper on Monday afternoon at Romsey, in his able speech on the measures that are desirable for the improvement of the dwellings of the poor, we doubt if any efficient remedy is likely to be found for the present state of things until the temptation which now exists,—and in considerable strength in the case of "close parishes,"—to keep down the cottage accommodation of the parish be taken away. So long as the supply of cottages in special localities is insufficient to the demand,—so long will there be not only a high rent, and as well on that account, as from motives of convenience, a strong temptation to overcrowding,—but a comparative indifference on the part of the builder to the comfort and decency of the residences which he provides. While it is the case, as it certainly still is in a great number of places, that landed proprietors set their faces against the building of cottages for the poor, from the wish to keep down the poor rates in their parish,—a great temptation is held out to needy speculators to buy up the nearest bit of land to the parish thus destitute of labourers' residences of which they can get hold, to crowd it with cheap cottages of the worst class, and to let them at a rack-rent to those whose employment compels them to be as near the parish in question as possible. Such men are not philanthropists, and are not at all likely to build the kind of comfortable cottage which Mr Cowper so graphically describes. On the contrary, their only desire will be to supply at the least possible cost that which will bring them in the greatest possible rent. For this purpose the supply must be decidedly less than the demand, so that every room shall be occupied, and if possible have a separate tenant; and for this reason also, few of those appliances which, as Mr Cowper says, are so essential to health, are likely to be introduced. So long as the residences of the agricultural labourer are not the care of the landlord, but are provided by small capitalists at a distance looking out for the largest and most rapid returns for their investments, so long the residences of the agricultural poor can never be what every one is now crying out that they ought to be.

We regard it, therefore, as one of the most important steps to the satisfactory remedy of this grievance, to remove the real motive which renders so many landlords unwilling to build proper cottage accommodation on their own estates; and we do not think that nearly enough stress has been laid on this side of the question during the discussions of the last few weeks. Of course the great impediment to the proper relation between the landowner and his labourers, is the dread which almost every landed proprietor feels of depreciating the value of his property by rendering it liable to a heavy poor rate. This motive induces him, if not to pull down labourers' cottages, still to build much fewer than he otherwise would, and so to force his own labourers to seek a a roof at a distance in a neighbouring parish,—notwithstanding the serious loss of time and strength which is involved in the interposition of a long walk between their homes and their work. We see that several members of the Committee which sat last session on the Poor Law and reported in August last, maintained that the force and wide prevalence of this motive had been quite overrated, and that landowners were beginning to see more and more clearly every day the great advantage of locating their labourers in immediate juxtaposition to their work. We trust that it is so. Still both the evidence and the report of that Committee bear ample testimony to the real existence and strength of this dislike of landed proprietors to admit on to their estate residents who might one day cause an increased poor rate. If any recent evidence of this were wanting, take the following instance. Deeping Fen is a district in Lincolnshire, from four to six miles distant from Spalding, and they are in different Unions. The following evidence was given:—

Was there a system of getting the poor who worked in Deeping Fen to reside in Spalding?—Yes. Is there a great deal of labour employed at Deeping Fen?—Very great. You say the majority of those labourers live in Spalding?—Yes. You say that something like a scheme or system of pulling down cottages or dwelling places for these labourers has taken place for many years past, and the consequence is, that those labourers reside in Spalding?—They did not pull them down; they would not allow them to be built. They did live there before 1810?—I think principally those only who were hired into the house; they did not live in cottages. Do you mean that the farmers have discontinued the practice of having labourers in their houses?—No. They do still have labourers in their houses?—Yes. They must have people who have acquired a settlement from their irremovability?—Whenever those parties require relief, they have sent them away to Spalding. It was a common thing to bring sick persons into Spalding. I have known cases where they have actually left them on the roadside, as soon as they got over the boundaries of the parish.—So that the effect of sending them into Spalding is to get them into that union?—Yes. Have they at present no charge for the poor?—Very small. I have examined their books within the last few days, and I find that they have only a small charge for the last few years. Their average for the last three years would be 61*l* 12*s* 8*d*. What is the extent of Deeping Fen?—It is 14,555 acres. Have you seen any valuation of the property there?—I have; the gross parochial assessment of that district is 29,078*l*. The rateable value 23,591*l*. For county rate purposes it is 24,591*l*. Do you know what is the number of the poor working in that district of Deeping Fen, who occupy houses, or at least live in Spalding, or in your union of Spalding?—I have this week set men on two of the principal roads to watch the number of labourers going into Deeping Fen from Spalding, and it shows a daily average of 117 men, 53 women, and 215 children. Those are only two of the roads into Deeping Fen. There are various other inlets into Deeping Fen which I did not watch. I had some conversation with people who are more conversant with the matter than I am, and I think I might fairly add one-half to those numbers.

Now, though we are well aware that this is an extreme case, and probably a case of less and less frequent occurrence every day, we are quite sure that this class of motives for withholding cottage accommodation from the labourers of small parishes is still of very considerable force throughout England. If we were to accept without reserve the now fiercely disputed statements of the Commissioners appointed by the late Mr Charles Buller to inquire into this question, who issued a series of reports which were laid before the House of Commons in 1850 on the subject, we should say much more than this. The majority of these Commissioners reiterate their conviction that the wretched accommodation of the poor, the crowding of their cottages, and the distance of those cottages from the scene of labour, is almost entirely due to the parochial pressure of the Poor Law. "I wish to "intimate," says Mr A'Beckett, who reported on the counties of Suffolk, Norfolk and Essex, and the Reading Union in Berkshire, "as a general result of my inquiries on this head, "that the labouring classes are to a great extent demoralised "and deprived of domestic comfort by the inducement "offered to owners of property in close parishes to clear their "estates of cottage habitations, an inducement for which the "present law of settlement and removal of the poor must be "held chiefly if not entirely responsible. The desire to shift "the burden of parochial chargeability prevails almost coex-"tensively with the former, though I have met with some ho-"nourable exceptions to which I shall further allude; and in "many cases I have heard the *motive openly avowed.*" The same statement is reiterated, with the same strong conviction, and on strong evidence, by all the other Commissioners except Mr Heale and Mr Hawley, the Commissioners who reported respectively on Bedfordshire and Northumberland. In the case of Bedfordshire, the influence of the Duke of Bedford, who has perhaps done as much for the peasantry of that county as any landowner in the kingdom, had to a great extent neutralised the evil effect of the landowners' indisposition to incur poor rates. Yet even Mr Heale concludes that "the tendency of parochial chargeability is to pro-"duce the evil complained of, as may be inferred from the "facts which I have shown." The Commissioner who reports on Northumberland is the only one who seems to disbelieve altogether in the attempts of landowners to shift the responsibility of poor rates from their own on to other parishes.

The only remedy for this evil is that which would remove in great measure the *motive* of the landowner,—by taking at least some step towards making the poor more chargeable on the Union, and less on the parishes. Such steps were in fact recommended by the Committee which reported last session. They propose measures which would have the effect of very much increasing the charges on the "common "fund" of the Unions, at the expense of the charges on the special parochial funds. They also propose to raise this "common fund" after a manner which would make the quota of each parish depend in great measure on the rateable

value of its property, instead of solely on the number of "settled poor" whom it supports. Both these steps are in the right direction, and tend to share more equally among the parishes of the various Unions the burden of their poor, and thus to diminish the objection of landlords to permit the building of cottages suitable to the poor on their estates. We are convinced that this question has far more to do with the amelioration of the condition of our agricultural poor than the public are at all aware of. Philanthropic Building Societies may do something in towns and open parishes, but they will effect nothing in places where the evil is greatest without some modification of the present Poor Law.

MR COBDEN AND THE BIRMINGHAM CHAMBER OF COMMERCE.

THE following letter from Mr Cobden has been received by the Mayor of Birmingham in acknowledgment of the vote of the Chamber of Commerce :—

Algiers, Jan. 8, 1861.

SIR,—I beg to acknowledge the receipt of your letter communicating a resolution passed at a meeting of the Chamber of Commerce for Birmingham and the Midland District, approving my services in connection with the Treaty with France. I feel the more indebted for this liberal interpretation of my conduct, because it emanates from a body representing an interest which in one important branch has met with very unfavourable treatment. I allude, of course, to the duty on rail and bar iron, which, not by any inadvertence or mistake, but by an exceptional provision in the treaty itself, has been subjected to a rate of duty far exceeding that of the other articles in the French tariff. This arrangement, by which a most important raw material, forming the main ingredient in the productive force of almost every industry, is rendered nearly inaccessible to the French manufacturer, forms as great an anomaly as did the preservation of the Corn Law by Sir Robert Peel in his early reforms of the English tariff. It is self-evident that, in justice to the French producer, such an arrangement can only be temporary. It would, however, be unreasonable, and this is doubtless the view taken by your enlightened body, to expect that the Emperor of the French could, by one sudden measure, reverse entirely a system which has been fostered by successive Governments for centuries; and it will certainly be only in accordance with our own experience if in the struggle for existence it be found that the most powerful monopolies prove also to be the longest lived. In begging you to convey my grateful acknowledgments for their kindness to the members of your body, it must not be forgotten that my thanks are particularly due to Messrs Fletcher and Wagner for their repeated visits to Paris, and whose practical knowledge guided my colleagues and myself in all our estimates and calculations. Let me also assure you personally how highly I appreciate the friendly expressions contained in your letter.—And I remain, Sir, your obliged servant,

RICHARD COBDEN.

Arthur Ryland, Esq.,
Vice-President of the Chamber of Commerce for
Birmingham and the Midland District.

Agriculture.

THE AGRICULTURAL LABOURER.

HIS CONDITION AND DWELLING-HOUSE.

FOR some time past the condition of the agricultural labourers, particularly their condition as affected by the state of their cottages, has attracted much and earnest attention both in England and Scotland. This is a natural consequence of the recent progress of agriculture and a pretty general rise in the rate of agricultural wages. Social improvers and philanthropists have long pointed out the evils incident to the wretched and insufficient dwellings in which by far too large a proportion of our agricultural population has been lodged, and farmers have again and again complained that their farms afford no sufficient cottage accommodation for their constant workmen, whose residence on the farm is necessary to carry on the work of cultivation. Many landowners, too, have felt the necessity of improving the cottages on their estates, and have erected new and improved old cottages at considerable expense. But it has now become a question, whether the best classes of agricultural labourers, availing themselves of facilities for locomotion in the country and for emigration, will not desert the work of husbandry in such numbers as seriously to impede its operations, if something effectual be not done to provide them with better dwellings. Thus it will no longer be a matter of choice with landowners whether they will or will not provide more cottages for the labourers whose services are necessary to cultivate their estates. Encumbered or entailed though their estates may be, they must find the means of housing the needful labouring population, or their rentals will soon tell the tale of a neglected economical, no less than social duty.

It is admitted on all sides that this question of cottage accommodation must be solved. To improve the comfort, to elevate the moral and physical condition of the labourer, the first, the preliminary step must be to afford him the means of living decently. In Scotland, where the standard of comfort amongst the rural population is lower than in England, the improvement of cottages has been actively enforced. A society for improving the dwellings of the rural labourers has been for some time in operation, and has published some very useful plans and estimates. Last week a meeting of landowners and agriculturists was held in Edinburgh to take into consideration the condition of the rural labourers in Scotland, at which some statements were made proving that an improvement in the cottages of the rural districts has become an economical necessity. Mr Saddler, of Norton Mains, said that "without something is done soon to improve the condition of the labourers by better accommodation, we shall in a short time be left without a supply of rural labourers." Mr J. F. Cadell, of Cockenzie, Tranent, a landed proprietor, as well as an extensive merchant, said that in the West part of East Lothian "the number of labourers' houses was not anything like sufficient for those who were to cultivate the soil.....Besides, the system which had been pursued hitherto had been a knocking down of cottages wherever it could be done, and what had been the result? The hinds—a more respectable body than whom was not to be found in Scotland—could not find houses in which to live and bring up their families.....their daughters had to be sent into the towns to domestic service, and their sons had to go abroad and emigrate as soon as they came to man's estate....." Speaking of the parish of Tranent, in which he was a proprietor, he declared that the amount of labour which was required was not to be got. Speaking from fifty years' experience, he could say that it was much more difficult to obtain labour now than ever it was." The well-known agriculturist, Mr George Hope, of Fenton Barns, in moving the resolution "that as improved cultivation necessarily implies an increase in the amount and quality of labour employed, it is the duty and interest of both landlords and tenants that a sufficiency of cottage accommodation be provided on every farm," indicated that a serious deterioration was taking place in the character of the labourers of East Lothian. Irish and Highland labourers came over into East Lothian in great numbers on the potato failure of 1846; since that time many of the Irish have settled there, and several of them are to be found on each farm. Highland women also come every summer as out-worken taking the place of the families of the hinds, whose daughters go out to service, and whose sons learn "trades, or are employed on railways, or emigrate." Thus, "there is already," says Mr Hope, "a difficulty in obtaining the required numbers of the same class of labourers we have been accustomed to, and to whom we, the farmers of East Lothian, are so much indebted for the comfort and happiness of our lives. I confess I do not like to see them superseded by the new comers, but employers will tell you they cannot get on without the latter." With respect to the dwellings of the labourers, Mr Hope said a great improvement had taken place within his recollection. "In the place of having four bare walls covered with thatch, having a small hole twelve or fifteen inches square, with a fixed piece of glass for a window, and a door covered with keyholes made to suit the lock of each successive occupant, on many estates they have been rebuilt in a commodious and comfortable manner." Yet much remained to be done, and the East Lothian landowners seemed to be aware of the responsible position in which they are placed, and, "on the whole, to meet the requirements of the times in a creditable manner, *in so far at least as* the quality of the cottages is concerned that are being built or that have lately been built.....However, I must confess that in too many cases, *where two new cottages have been built, three old ones have been pulled down.* The size of many villages is gradually decreasing, and on a large proportion of farms the cottages are too few for the requirements of the labourers necessary to work them." And he added that most tenants would willingly pay four per cent. on the outlay their landlords might incur in erecting proper cottages. This indeed points to a natural remedy for the evil. Let landlords build a sufficient number of cottages on each farm, the tenants paying 4*l* per cent. on the outlay, which they could in most cases receive back from the occupying labourers as rent. Cottages may be built for from 80*l* to 100*l* each, for which a rent of 15d or 18d per week would afford a fair interest.

In England there is an equal deficiency of cottage accommodation in most of our rural districts, and even on those properties where old cottages are replaced by new ones the number is often diminished. Mr Scott Burn, in an able paper on the "Condition of the Labourer," read at the London Farmers' Club, said that "good house accommodation must precede all other movements calculated to raise the position of the agricultural labourer in the social scale." This is perfectly true; if indeed it be not the only effectual measure by which any other class can improve the labourer's social position. Let good cottages be found on every farm,—if with half a rood of garden ground attached so much the better,—let farmers be freed from the impediments and obstacles they now so generally endure and their capital be secured by leases, so that the natural progress of agriculture may produce its due effect in an advance of rural wages, and then, without any patronage or interference with farmers or their labourers, the landowners will have done all that is in their power to improve the position of the agricultural labourer.

We are sometimes told, however, that the English farmers are

not to be trusted with the control of the cottages in which their own workmen dwell, and that therefore the cottages must not be let with the farms, but must be let directly by the landowner to the labourers. This is not only unjust to the farmer, it is a mistake. The landowner commonly imposes a lot of petty and vexatious restrictions no farmer would think of imposing, while the labourer seldom gets any advantage from the arrangement. An instance of the results of such a direct tenancy recently came under our observation. A very industrious labourer earning 15s a week, rented a cottage and garden of a great landowner at 8*l* a year, the tenant paying besides all rates and taxes. Having occupied and paid his rent for eleven years, and being desirous of improving his cottage, he asked the steward to paper the sitting room. This was refused, but paper of the most inferior description was given to him, which he was told he must have put up at his own expense. He also asked that a sash window might be put into the place of an old casement window. This, too, was refused, but so determined was the man to improve his cottage that he sold some pet canaries, and with the price put in his sash window. This man had a family, and maintained himself in a position somewhat better than most labouring men by means of a rigid frugality, yet though he had for so many years paid a very high rent, the trifling encouragement of his meritorious exertions he sought was refused by the great man's steward.

AGRICULTURAL FACTS: FEEDING COMPOUNDS.

A SECOND volume of the "Year-Book of Agricultural Facts," by Mr Scott Burn, has been published, which contains an extremely useful selection of practical agricultural facts and data which have during the year been scattered amongst the numerous works—British and foreign—on rural affairs. These are classed and arranged in good order, and will afford the busiest and least studious farmer many useful hints, with no more than the application of his spare odds and ends of time to the perusal. The book is of convenient size for a pocket volume. At this moment nothing will be more acceptable to the farmer than suggestions of food of moderate cost for his stock. In a letter, originally in an agricultural paper, and republished by Mr Burn, an agriculturist of Leicestershire, who had used Thorley's food for cattle according to "the printed directions" without finding it answer, adopted a mixture of his own, which, used in the same quantities as is directed by Thorley for his own compound, was found to be very satisfactory in its results. The following is the mixture, with the weight and cost, in March last, of each ingredient:—

	Weight. lbs	Cost. £ s d
2 bushels wheat	124	0 11 6
2 bushels oats	99	0 7 6
2 bushels beans	100	0 10 0
2 bushels peas	100	0 10 0
1 bushel linseed	60	0 9 0
1 peck mustard seed	14	0 1 6
Grinding	...	0 3 0
	488	2 12 6

A bushel and a half of chaff—three parts hay and one part oat straw—dusted over with a measure of this meal twice a day, and mixed with a small quantity of mangold, was found to keep a dairy cow in good condition. Another person speaks of having derived great produce from feeding his cows with 6 lbs of rape cake per head daily. The cake is dissolved by pouring boiling water upon it, and being then mixed with chaff is readily eaten.

Again, Mr Lawrence, in the "Royal Agricultural Journal," recommends dissolved rape cake for feeding bullocks, with 2 lbs of meal per head per diem. He begins with 1 lb of rape cake per head, gradually increasing it to 4 lbs, and uses the gruel thus made by pouring it over chaff and pulped roots. Such are some of the contents of this useful compilation.

Literature.

COMMERCIAL LITERATURE.

THE RAILWAY AND THE MINE. Lever's Illustrated Year-Book. Simpkin, Marshall, and Co.

THIS little book contains very useful information relative to railways and mines, and has a very able article on the "Coal Measures of Great Britain," written with force and clearness, and very nicely illustrated. The progress of the consumption of coal is curious. In the year 1280 it began to be consumed in London, but only at first by smiths, brewers, soap-boilers, and others. The innovation, however, was complained of as injurious to health, and in 1316 Parliament petitioned the King to prohibit the burning of coal, and a proclamation was issued against the burning of sea coal, but with little effect, for in 1400 it was generally used in London. In 1661, 200,000 chaldrons of coals were annually imported into London; in 1773, 600,000; in 1793, 800,000 chaldrons. In 1858, 4,447,191 tons were imported. With regard to the duration of our coal supplies, and how long they will continue, the following opinions have been given. It would appear that the annual consumption is at present 70,000,000 of tons. Professor Ansted computes that our stores will last at the present rate of consumption about 600 years. Dr Buckland computes that the coal of the Newcastle field alone will last 400 years. Mr Bailey reduces this to 200 years; but other coal owners who were examined before the House of Commons extended it to 300 years.

By a late account, the estimated extent of the coal measures of Great Britain is about 4 millions of acres. Assuming the average thickness of workable coal throughout this area at 15 feet, it will take 1,050 years to exhaust the coal-fields of Great Britain. Another authority (one of the geological survey) estimates the duration at 1,300 years. Mr Bakewell estimates that the South Wales coal-field alone will supply the consumption of Great Britain for 2,000 years.

At all events, we need not be anxious about fuel for many generations, and doubtless means will be found even in our time to economise its use.

A LETTER ON THE COLLECTION OF RAGS FOR THE MANUFACTURE OF PAPER. James Ridgway, Piccadilly.

ENGLAND, observes the author of this letter, requires 120,000 tons of rags yearly, a large proportion of which she derives from a foreign source. The question is—Can our home supply be enlarged? And he asserts that it can. His plan of adding to the supply is that "every householder ought to have three bags; a white one for white rags, a green one for coloured, and a black one for the waste paper (the three might be furnished for a shilling), which would prevent litter, waste, and the trouble of collecting when the demand came." We don't suppose the colours suggested for the bags to be an essential part of the scheme, but it is certain that the preservation of rags and paper might be more systematically organised; the more especially if it be true "that there are more rags wasted, burnt, or left to rot, than would make our paper manufacturers independent of all assistance from abroad."

GENERAL LITERATURE.

THE PROGRESS OF NATIONS; or, the Principles of National Development in their Relation to Statesmanship. A Study in Analytical History. London: Longmans. 1861.

[SECOND NOTICE.]

IT will be evident to our readers, from what we have already said of this work, that the author displays a considerable fluctuation in his views as to what the chief characteristics of civilisation really are,—those which he puts forth as constituting the glory of one nation being often rejected as inadequate to establish the glory of another. We must now mention one of his theories which bears essentially upon this part of his subject.

Throughout the national development there are two distinct currents of civilisation and refinement; the one derived from the conquering or quasi-conquering race—the Homeric; the other from the conquered—the Hesiodic. The first is the earliest in its development, but it never arrives at any high pitch of development without a very considerable contemporary progress in the second. The national acme is the moment when these two currents arrive at a nearly equal pitch of development, and contribute, each after its different fashion, but in an almost equal proportion, to the glory of the national civilisation.—(P. 145.)

Now, this theory seems to us a conglomeration of several social elements of quite different qualities and duration. First, as to race; no one would deny that difference of race produces different kinds of culture. But the author himself admits that this distinction is not a permanent one in all civilised countries, and that in our own country, for instance, the fusion of races has long bridged over the chasm between the conquerors and the conquered. Secondly, whether the inhabitants of a country be of one race or of several, it is no doubt true that up to a certain point in its history, that element of civilisation which our author calls the "Homeric" is predominant. Then is the period of individual prowess in arms and arts, of unreasoning faith, and of heroic loyalty. But it does not follow that all the subsequently arising elements of civilisation can properly be classed in one category as "Hesiodic." As the separate races become gradually fused into one nation, and the centres of power and culture become multiplied, and exert ever widening circles of influence, the difference between the upper and the lower classes becomes more one of degree than of kind; or, to speak more accurately, the varieties of kind become more developed in every degree of society; men are less hampered by the restrictions of the class in which they happen to be born, and find greater room for individuality of genius and culture. But at this point we must take into examination another of our author's questionable theories. He says, in his chapter on "the Place of Literature in National Progress":—

In order that a national literature should be brought within any respectable approximation towards perfection, there are two necessary political conditions; first, social inequality; second, a refined taste in the higher classes of the State.

The principal motive in every artist of the pen is either a desire of bread or personal eminence. The two desires are usually combined in different proportions.....The essence of literary ambition is to attain an intellectual supremacy, and it thrives only in a society where those who are lofty by birth feel a noble emulation to be the patrons of merit.

Norway has no literature. There is no social inequality, and nothing is to be gained by intellectual labour.....Germany has laboured under a similar disadvantage; it has had both social inequality and a general

refinement of taste and manners, but unhappily not at the same time. .....It is not an idle love of literature that makes a great author; there must be some more active instigation urging him on. Now, in aristocratic ages, mere love of money may in some few instances be the instigator; but as wealth can be acquired in greater degree, and with more ease, in almost any other occupation, wealth does not deserve to be called the main object to men of real literary genius. Their great inducement, beyond the pleasure of intellectual creation, is the love of being praised by those whose esteem they value, or whose society and acquaintance they covet.....Swift, who, after the death of Sir W. Temple, was as independent of any patron as an author could well be, frankly states in a letter to Lord Bolingbroke his inducement to become literary. "All my endeavours to distinguish myself were only for want of a great title and fortune, that I might be used like a lord by those who have an opinion of my parts; whether right or wrong, is no great matter."....In short, Swift's ambition was to make himself an aristocrat by literature. When the aristocracy declines, and some other object, such as the possession of money, is the inducement of the literary man, then the character of literature, as I have said, alters; but, in fact, by that time the literature of a country, if it is to have one at all, has been created.

This theory curiously reverses the true proportions of literary impulses, passing over "the pleasure of intellectual creation" with the slightest possible mention (and wholly ignoring that it may be something much more noble and imperative than any mere "pleasure" can be), while it attributes the main inducement to intellectual creation to the external facilities which a leisured class have often so honourably afforded to its development. Such a narrow view surprises us in a writer so able as the author of this work. Can he really suppose that Chaucer or Shakspere wrote either for gain or for the favour of the nobility? And for what introductions into society did Milton compose the "Paradise Lost," or Dante reveal the visions of the "Inferno"? That "the desire of bread or personal eminence" has had a great deal to do with the production of *books*, there can be no manner of doubt; but in the production of permanent *literature*, such desires can never have been more than secondary and accidental causes, and to represent them as primary impulses is to degrade the whole intellectual history of man. And this narrow estimate of human motives considerably distorts the author's views of political as well as of literary life, and leads him to underrate some of the most interesting features of past history, no less than to ignore some of the noblest possibilities of future good.

One of the most important assumptions which runs throughout this book, bears a certain analogy in the field of history to Darwin's recent theory of the moving power which determines the gradual ascent in the various species of animal life. Our author regards "conflict for existence" as being the root of all moral expansion, whether this conflict take place between the various classes of a single nation,—or between various nations for the supremacy in leading the career of human civilisation. This is the key to his whole theory. He holds the morality of the individual members of the primitive clans or tribes to be superior to that of the individual members of great nations, at least in this sense, that, having a simpler standard of right, they realise it far more perfectly, than in the subsequent stage of national development. But while this simple and primitive standard is retained, our author sees no chance of progress or expansion, and regards the national career as not even begun till some conquest over another people introduces that fermentation between conflicting elements which opens the minds and strains the energies of the newly combined elements. So where, as in the case of Norway, the aristocratic invaders succeed in completely expelling the invaded population and in occupying their places,—though he recognises the possibility of a certain stationary happiness in such a state of aristocratic equality,—he denies the possibility of true history, or of national expansion. A nation's greatness begins, he conceives, with the fermentation of different and dissimilar (though not *too* dissimilar) elements of race or class, and ends whenever, unfortunately, any one social element obtains too complete an ascendancy over the others. He sees the greatest chance of permanent political greatness for England, because in England the social and political elements, the monarchical, aristocratic, democratic, and theocratic principles, while retaining their characteristic differences, have become so closely fused together, that no internecine war, resulting in the complete conquest of any one over the others, need be feared. Thus the democracy, and plutocracy (or power belonging to mere wealth), which our author evidently regards as certain to prove fatal to American progress, he thinks may be consistent with the permanence of England's greatness, because amongst us the democracy shades off gradually into the plutocracy, and the plutocracy into the aristocracy, without any hard lines of division; while in America, wealth is the only aristocracy, and is divided by a far more impassable chasm from the poorest classes of the country than is that English aristocracy into which the pride of English wealth is in a very considerable measure absorbed.

We do not in the least deny the inestimable advantage which England derives from having an old landed aristocracy in such close connection with the *new* riches, the capitalist classes, of the country. We are sure that the result is to impress our rich men much more early and deeply with the grave character of the trust which wealth imposes, and to associate with luxury the notion of personal honour, of hereditary claims and duties, and of moral obligations to the poor, to a degree which cannot be expected in a country without such an aristocracy. But the fundamental defect in this book appears to us to be the *purely* historical view which it takes of the origin of aristocracies. The author evidently does not believe that an aristocracy can *grow up* in a nation without some original distinction of race or caste to produce it. He does not believe that a pure plutocracy, that is a class whose wealth consists in personal rather than in landed property, and whose abode is by preference in the cities rather than in the country, can ever develop great qualities of its own. He almost ignores the relation which wealth and leisure may bear—in a great and energetic people—to intellectual and moral enterprise of a higher kind than either the mere multiplication of mechanical inventions or the production of great works of mere taste or art. He has evidently no belief in the gradual *generation* of intellectual and moral aristocracies, on which alone, we believe, the hope of most modern nations depends.

Now while we would not deny that a certain variety of element,—a certain mixture of different races,—a certain fermentation between opposite phases of character—was in the first ages of the world almost as essential to the moral expansion and development of a national character, as the nobility of that character itself,—we think that in applying this consideration to modern times, our author entirely ignores the elements of variety which the universal interchange of thought and conviction among the different races of man tend to supply. So various and so mutually auxiliary are these, that when cast into the mind of an uncorrupted nation, they are in themselves sufficient to generate those differences of culture, thought, and feeling, which are needful to sustain the progress of society. In such a nation, a plutocracy may well be expected to become an aristocracy of the best kind, if the mind of the class so raised to opulence is sufficiently pure and energetic. In short, the author of this book, in discerning the necessity for a complete fusion between the original types of human character, and the natural classes of human society, has ignored too much the formative and fermenting power both of human thought and human faith in modern times in generating and sustaining the best elements of a natural nobility. We do not know,—no one can yet say,—how far these powers may yet save American or French society from the degradation to which pure democracies or democratic despotisms are prone; but we are sure that it is an error to deny, at least in modern times, that where the character of a nation is not finally degraded, the natural inequalities of human wealth may not ally *themselves* with intellectual and moral distinctions which shall preserve them from the hollowness of mere external distinctions.

We cannot conclude without again expressing our conviction of the general ability of this book. In breadth of historical insight, and moral discrimination, it far surpasses Mr Buckle's volume,—which latter is, however, we must recollect, expressly a history of civilisation, and not a philosophy of history. Mr Buckle had no wish to determine the laws of national life,—he was looking only for the laws of human progress. Perhaps both these writers distinguish too broadly between the two. Perhaps it is the great error of Mr Buckle that he thinks that the nobility of national character has no tendency to promote the general progress of human civilisation, while it is the main error of the present author not to perceive that the general progress of human civilisation has a direct tendency to promote the moral stability and development of uncorrupted national characters.

SHAKSPERE: HIS BIRTHPLACE AND ITS NEIGHBOURHOOD. By JOHN R. WISE. Illustrated by W. J. LINTON. Smith, Elder, and Co., 65 Cornhill.

THIS prettily got up and beautifully illustrated little work endeavours to collect from the writings of Shakspeare, from the few and slight records of contemporary writers, and from local archives and traditions, an outline of his life, and a clear conception of his character. This is its main object; but the description, carefully and tastefully done, of all the places in and around Stratford in any way connected with the poet forms a second; and a third is found in the influence of local scenery over the descriptive portions of his plays, and of local idioms in rendering obscure many passages which a knowledge of Warwickshire provincialisms can alone explain. In this part of his subject, Mr Wise is evidently most at home, but the whole work reflects credit upon his taste and industry. He has spared no pains in making his study of Shakespeare's character as full as the resources at his command would admit of, and he shows a nice appreciation of the more hidden and subtle, but not less convincing traits of goodness and nobility of disposition to be found throughout Shakespeare's writings. A style simple almost to affectation, and a somewhat dainty tone (as where he defends Shakespeare from the "reproach" of having drawn such characters as Quince the carpenter, Snug, and Sly), take away from the value of his book, and, with its fair outside, fit it more for the drawing-room than for the library, in spite of certain untranslated Greek and Latin quotations. The collection of Wawickshire idioms, and the happy application of them to the elucidation of obscure passages in some of the plays, is, after all, the most valuable result of Mr Wise's exertions. We will give one passage in exemplification:—

"Wherever there has been an unusual disturbance or ado—for I prefer using plain country words to explain others—the lower orders round

Stratford-upon-Avon invariably characterise it by the phrase "there has been old work to-day," which well interprets the porter's allusion in 'Macbeth" (act iii., scene 3), "If a man were porter of Hell gate, he should have old turning the key," which is simply explained in the notes as "frequent," but which means far more. So, in the "Merchant of Venice" (act iv., scene 2), Portia says, "We shall have old swearing." And in the "Merry Wives of Windsor" (act i., scene 4), we find, "Here will be an old abusing of God's patience, and the King's English." And in the second part of King Henry IV. (act ii., scene 4), "By the mass, here will be old utis." And so also in "Much Ado about Nothing" (act v., scene 2), Ursula says, "Madam, you must come to your uncle; yonders old coil at home"; and to this day, round Stratford, is this use of "old" still kept up by the lower classes.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

It will no doubt be remembered by your readers that in the month of May last a law came into force by which a considerable reduction was effected in the duties on native, colonial, and foreign sugar; but, to the great grievance of the public, no material diminution in the price of sugar, and consequently no very marked increase in the consumption has since taken place. This matter has excited the serious attention of the Minister of Commerce, M. Rouher, and he has applied a remedy to it. A decree in the *Moniteur* of this day abolishes the surtax of 3f the 100 kilogs (about 2s 5d the 2 cwts) imposed by the law of the 23rd May on foreign sugar imported into France *from countries out of Europe by French vessels:* in other words, the duty on that description of sugar is reduced from 28f to 25f, the same as that paid on native (beetroot) sugar. Attention should be paid to the words underlined, which are taken textually from the decree: they show that it is not *all* foreign sugar brought into France which will profit by the reduction of the duty, but only that which is imported "from countries out of Europe by French vessels." Perhaps the Minister would have done better if he had allowed the import to be made from countries *in* Europe, and by foreign as well as French vessels; but the concession, as it stands, will probably not be without importance to the sugar trade.

In a report which precedes the decree, the Minister says that several causes may be assigned why the consumption of sugar did not largely increase in consequence of the reduction of the duty, which was nearly 50 per cent. The principal were, he states, the delay which occurred between the announcement of the reduction and the realisation of it; the facilities allowed to the exportation of sugar with drawbacks; and the scheming of speculators who took advantage of stocks running low to send up prices higher than was quite justifiable. The Minister anticipates that the diminution he effects will be large enough to cause foreign sugar to be consumed to some extent in France, instead of as heretofore being merely brought in to be refined and then exported with drawback: and he states that the stock of such sugar now in bond exceeds 20,000,000 kilogrammes (20,000 tons). He also notices the fact that up to November last, the production of native sugar was 18,533,000 kilogrammes less than at the corresponding date of last year, and he calculates that the total production of native in the present season compared with that of last one will exceed that quantity.

Mr Lindsay has been conferring with the Emperor on the subject of the differential duties in favour of French shipping, and has laid before His Majesty a mass of statistics proving that they act injuriously thereto, inasmuch as French shipping has made nothing like the progress which that of England has done under a liberal system. Assuredly Mr Lindsay has done well in combating the differential system; and every one must wish him all success. We must, however, not forget that the Chamber of Commerce of Bordeaux, Nantes, and Havre, showed a few weeks back (*vide* Paris Correspondence of the ECONOMIST of November and December) that the shipping interest pays for the real or supposed advantages of that system by accepting various onerous obligations,—such as having to pay enormously dear for its vessels, being obliged to put more men on board and employ more cabin-boys than are absolutely necessary, to have at least three-fourths of every crew Frenchmen, to discharge the crews not at the port at which the vessels unload their cargoes, but at those at which they were engaged, &c. It is desirable that these obligations should not be overlooked; as otherwise the real state of the case with regard to French shipping will not be understood. It is also to be remembered that by Imperial decrees—one of them issued not later than last week (see ECONOMIST of the 12th)—not unimportant modifications have been made in the system. Nevertheless, much undoubtedly remains to be done; and I repeat that Mr Lindsay has done well in calling attention to the matter.

It may be useful to extract from the present French tariff, with its recent modifications, the duties charged on the principal imports by French and foreign vessels:—

	By French Vessels. Per 100 kilogrammes	By Foreign Vessels. (about 2 cwts.)
Balm	15f to 20f	30f
Gum-Benjamin	free or 2f 50c	2f 50c
Wood for cabinet-making	free or 3f to 4f	6f to 7f
Odoriferous woods	free or 3f	3f
Dyeing woods	free or 3f to 20f	6f to 22f
Cocoa	20f to 35f	40f
Coffee	30f to 50f	55f
Camphor	20f to 40f	50f
Flax, hemp, jute, &c.	free	free
Wax	1f to 2f	6f to 7f
Cochineal	free or 10f	15f
Horns	10 centimes	1f
Cotton	free or 3f	3f
Bristles	free or 3f	3f
Copper	free	25 centimes
Curcuma	free or 2f	4f
Elephants' tusks	free or 3f	3f
Tortoise shell	free or 5f	5f
Bark, &c.	free	1f
Tin	free	25 centimes
Gum	free or 3f	5f
Oleaginous seeds and fruits	free or 2f 50c	2f 50c
Tallow, &c. (Graisses)	free or 2f	2f
Oils of fish	10f to 20f	30f
Oils	1f 50c to 8f	10f
Indigo	free or 25f	28f
Wool	free or 3f	3f
Ore of iron, copper, lead, tin, &c., &c	free	free
Nitrates	free or 2f	4f
Bones, hoofs, &c.	free	free
Hides and skins	free or 2f 50c	2f 50c
Lead	free or 2f 50c	25c to 2f 80c
Pepper	10f to 80f	105f
Rice	50c to 2f	2f
Sugar	25f to 34f,* but a reduction in favour of that of French colonies	39f
Tea	75f to 200f	250f
Zinc	free	25 centimes

* The sum of 34f here mentioned *is* for sugar bought from European entrepots, and is not affected by the modification in the duties noticed above.

As to iron, pig iron, coal, coke, and some other articles, on which the import duties have been fixed by the treaty of commerce and its annexes, the duties in favour of French shipping are (by article 8 of the treaty) not to be interfered with; but a treaty of 1826 enacts that "productions of all origins imported by English vessels directly from England or her possessions in Europe," shall pay the same duties as those brought in by French vessels; and under this treaty of 1826, the articles in the above tables comprised in the said category are of course included.

Some of your London contemporaries give part of the statistics which Mr Lindsay is stated to have presented to the Emperor. I will not reproduce them, because they are not of a later date than 1858, whereas they might easily have been brought down to 1859, and because, also, they do not seem to be quite correct. The following is a statement of the shipping in this country in 1859, extracted from the last published volume of Customs returns:—

ENTERED.

	No. of Vessels Sailing and Steam.	Tonnage.	Crews.
French	11551	1714828	147136
Foreign	17183	2563291	168794
Total	28734	4278119	315930

SAILED.

	No. of Vessels Sailing and Steam.	Tonnage.	Crews.

Dutch	419	63491	4615

The preceding figures refer only to the navigation of foreign countries, the colonies, and the deep sea fishing; the coasting trade is not included.

The Government has published a return of the direct and indirect taxes for 1860. *Of direct taxes*, the amount due for the year was 480,128,000f, and the portion thereof paid up to the 31st of December last was 467,159,000f, which was 27,041,000f more than could legally have been exacted; direct taxes being only payable in monthly instalments and after a month's credit. In 1859, the total due was 472,784,000f, and the portion paid in advance on the 31st of December only 26,060,000f. Moreover, whilst in 1859 the expenses of proceedings to enforce payment were at the rate of 1f 35c the 1,000f, it was in 1860 only 1f 23c the 1,000f. The return of the *indirect taxes* is not quite so favourable. The amount of them paid in 1860 was 1,073,712,000f, which was 20,932,000f less than in 1859, and 18,016,000f less than in 1858. But it is to be remarked that the decline is owing chiefly to the large reduction in import duties which have been effected in the course of the present year, and that that decline was not only foreseen but has been provided for. It must also be remarked that in addition to the 1,073,712,000f paid, a sum of 4,597,000f remains to be got in; so that the real amount of the indirect taxes for 1860 is 1,078,309,000f. The following is a detailed account of these taxes for the three years. The marked increase in the consumption of tobacco will be particularly noticed:—

Designation of Taxes.	1860.	Amount paid in 1859.	1858.	Difference between 1860 and 1859. Augmentation.	Difference between 1860 and 1858. Augmentation.	Diminution.
	f	f	f	f	f	f
Registration, mortgage duties, &c.	301,069,000	271,311,000	286,347,000	29,758,000	14,722,000	
Stamp duties	56,419,000	53,504,000	52,983,000	2,915,000	3,436,000	
Custom duties on Grain	1,385,000	1,227,000	650,000	158,000	735,000	
Custom duties on Various merchandise	76,124,000	109,810,000	107,113,000			33,686,000
Custom duties on the import of French colonial sugar	33,149,000	43,565,000	51,981,000			10,416,000
Custom duties on the import of Foreign sugar	20,727,000	34,891,000	22,871,000			14,164,000
Customs duties on exports	3,427,000	4,221,000	3,796,000			794,000
Navigation dues	4,440,000	4,351,000	3,794,000	89,000	176,000	
Various customs duties and receipts	1,848,000	2,024,000	3,513,000			
Tax on the consumption of salt in the customs districts	30,343,000	28,348,000	27,823,000	1,995,000	2,520,000	
Duty on wines, &c.	176,036,000	174,271,000	165,832,000	1,765,000	10,204,000	
Tax on the consumption of salt beyond the customs districts	9,834,000	8,723,000	7,752,000	1,111,000	2,082,000	
Duty on the manufacture of native (beetroot) sugar	36,239,000	57,585,000	63,871,000	21,346,000	27,632,000	
Various duties and receipts	56,184,000	52,635,000	49,962,000	3,549,000	6,222,000	
Sale of tobacco*	194,191,000	178,744,000	177,273,000	15,447,000	16,918,000

Duty on securities and articles of value sent by post	454,000	183,000		271,000	454,000	
Duty on transit of foreign mails	1,403,000	1,495,000	1,469,000	13,000	21,000	
Various receipts	45,000	32,000	24,000			66,000
Totals	1,073,712,000	1,094,644,000	1,091,728,000	59,856,000	63,681,000	81,697,000
Diminution				20,932,000	18,016,000	

* The sale of these two articles is a Government monopoly.

The official *Moniteur* the other day, you may remember, boldly affirmed that the depression in trade, the fall that has taken place in the Bourse in *rente* and shares, and the increase in the rate of discount of the Bank of France, were owing exclusively to the state of affairs in foreign countries. It has within the last few days repeated this statement, and in proof draws attention to the fact that the purchases of *rente* which the Treasury makes for people in the provinces on the demand of the receivers-general of taxes have lately considerably increased: thus last year it says they amounted to 163,000,000f, whilst the sales were only 48,000,000f,—excess of purchases 115,000,000f, and that in the twelve first days in the present year the purchases were 9,400,000f, the sales 1,150,000f,—excess of purchases 8,250,000f. But these purchases (which by the way were last year 90,000,000f more than in 1857, and 113,000,000f more than in 1841) simply prove that the people in the distant provinces have at last made the useful discovery that it is more profitable to invest money than to hoard it: they do not assuredly show that distrust and anxiety do not prevail, and that the Bank of France has not been subjected to severe pressure: and it is these circumstances which have caused depreciation in public securities and an increase in the rate of discount.

There is nothing new with regard to the Bank of France. The demands on it continue, and it would at once again increase its discount if the Bank of England were to set the example. The last monthly return, of which the ECONOMIST gave the principal features last week, excited a painful sensation.

The depression on the Bourse continues, but there has been a slight improvement in *rente* and railway shares. Credit Mobilier shares continue to show a downward tendency, and the directors still maintain silence with regard to the dividend. The report that the charge of admission to the Bourse is to be abolished has again been current; the Government, it is said, will buy the Bourse from the municipality of Paris in order to throw it open. The following are the quotations:—

	Thursday, Jan. 10.		Thursday, Jan. 17.	
	f	c	f	c

Subjoined is an account of the markets:—

FLOUR.—At *Paris*, prices continue firm, and were yesterday 65f to 68f the sack of 159 kilogs. The four marks for delivery and the current month were 66f 50c; for January, February and March, 65f 75c to 66f.

WHEAT.—At *Paris*, yesterday, offers were not large, and prices were 35f 50c to 37f, and 37f 50c, even for some lots 37f 75c the sack of 120 kilogs. Of the country markets, 67 present a rise of from 10c to 2f the hectolitre; 29 a fall of from 17c to 2f; 32 have undergone no change; and 28 are reported firm.

COTTON.—At *Havre*, in the early part of the week ending Friday, business was not very active, but it was greatly animated in the latter. On the whole, 32,758 bales were disposed of, and prices rose 2f the 50 kilogrammes for the very low qualities, and 1f for the low, other sorts remaining unchanged. Low New Orleans was consequently 96f, and very ordinary ditto 100f. The arrivals were 10,570 bales. This week, business has been active, and yesterday low New Orleans was 98f.

COFFEE.—At *Havre*, in the week ending Friday, business was not very animated: 152 sacks Hayti Port-au-Prince disposable went at 77f 50c the 50 kilogs in bond; 1,900 sacks for delivery, part at 76f 50c, part at 76f; 158 sacks Rio not washed disposable 78f; 300 db. for delivery, 71f to 73f 75c; and 58 ditto washed disposable 87f. The arrivals were more than 14,500 sacks and some casks. This week, Hayti has been at 75f in bond; Port-au-Prince 76f; sales numerous. Some other large quantities of damaged have also been disposed of. At *Nantes*, last week, the sales were only one small lot of Reunion *fève pointue*, at 125f 50c, and 68 ditto Roy, 113f 75c; also some damaged Java. This week, a small lot of Reunion has been taken at 128f. At *Bordeaux*, last week, the sales were 200 sacks Rio washed, 92f; 871 ditto not washed, 75f 50c to 76f; 160 sacks Guayra, 87f; 500 Mysore, 111f. This week, a small lot of Rio not washed has been sold at 73f. At *Marseilles*, last week, 5,000 sacks Maracaibo for delivery went at 80f; 4,000 Rio in the port, inferior quality, 79f. In addition, some rather large quantities of damaged and very inferior Rio were sold by auction.

SUGAR.—The sales at *Havre*, in the week ending Friday, were only 302 casks French West India at 49f the 50 kilogs duty paid. The arrivals were more than 1,000 casks 1,751 sacks. This week nothing has been done. At *Nantes*, last week, 3,945 sacks Reunion were sold for Paris, prices not given; a small lot of Java went at 59f. This week, some Guadeloupe "usine" has been sold at 57f 50c; some Reunion, 55f 50c. At *Bordeaux*, last week, 133 casks French West India went at 48f 50c; about 4,500 sacks Reunion, 52f to 54f. This week the demand has been rather active: Mauritius 54f 25c, Reunion 52f 25c, French West India 48f 25c and 48f. At *Marseilles*, last week, business was calm, and there were no arrivals.

INDIGO.—The sales at *Havre*, in the week ending Friday, were only 14 cases Bengal, and prices were kept secret. No sales of importance have

been made this week. At *Bordeaux*, last week, the sales were 30 cases Bengal, 35 Madras, 3 Vellore; prices not stated. Nothing of importance done this week.

HIDES.—At *Havre*, in the week ending Friday, the sales consisted of 3,100 La Plata dry at 107f 50c to 135f the 50 kilogs (the latter price for a fine lot of 500 ox Buenos Ayres); 500 Urugnay salted, 75f; and 500 New Orleans salted, 52f. In addition, various lots of damaged were sold by auction. A large quantity of different sorts, chiefly La Plata, is advertised for sale by auction on the 25th of this month. This week, thus far, there have been no transactions.

WOOL.—At *Havre*, in the week ending Friday, the sales were 42 bales: La Plata unwashed at 1f 5c to 3f 15c the 100 kilogs; 5 bales Donskoy, 2f 30c; 38 bales sheepskins La Plata unwashed, 1f 10c to 1f 60c; and 5 bales lambskins, 1f 35c. The arrivals were nearly 100 bales. This week, Buenos Ayres has been sold at 122f 50c the 100 kilogs; Chili, 160f; Rio Grande, 115f; also Buenos Ayres unwashed, 2f 10c the kilog.

TALLOW.—At *Havre*, last week, business was rather important, the sales having been 237 casks La Plata disposable in the port at 69f 50c to 70f 50c the 50 kilogs, and 358 at 70f. The arrivals were about 100 casks. Nothing done this week. At *Paris*, yesterday, the average price of the 100 kilogs was 132f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, were 105f the hectolitre; Montpellier of 86 deg., 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c; beetroot, first quality, 108f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following commercial intelligence is dated Calcutta, Dec. 8:—Import Market—The steadiness that we mentioned in our last report continues unabated, and, with the exception of metals, generally all other articles of import are in a better position to-day. Piece goods have had an improvement in price, and it is a great misfortune that this improvement is only the result of the extreme firmness of sellers, which, if it is, as is to be expected, continued, will soon cause better prices. We are sorry to report that the consumption of piece goods in our market, as also in the principal up-country markets, is very limited, and consequently buyers are acting very cautiously. Yarns all on a sudden, owing to some speculative purchases, have also improved, and we have to report higher prices to-day. Metals—Occasional sales are reported at 40.8r to 40.12r for sheathing copper. Government Securities—The market for all description of Government securities still continues to droop, and only small sales can be effected at lower rates than those last quoted; the quotations is nominaly 110-12 for the 5½ per Cents., 95 for the 5 per Cents., and 80 for the 4 per Cents. Money Market—There is rather more demand for money; in consequence of the indigo shipments, and investments of their spare funds by the banks in exchange, higher rates are looked for.

The *Moniteur* has published the following monthly debtor and creditor account of the Bank of France, made up to Thursday se'nnight The corresponding figures of last month and of the corresponding period in 1860 are added :—

From Adelaide, South Australia, the advices reach to November 26. Trade continued to improve. There was a good demand for most articles of import, and business generally was considered healthy. Money was plentiful. The revenue returns for the quarter ending September 30, 1860, show a large deficiency. The harvest was greatly in excess of the average for the last three years. The clip of wool is reported heavy and of good quality. Copper, 97*l* per ton. Burra Burra shares, 127*l* ex div. Banks issued draughts on London at 60 days' sight at 1 per cent. premium, and bought bills at 1 per cent. discount.

A circular of Messrs Arles Dufour and Co., of Lyons, mentions that although the United States take annually about 8,000,000*l* worth of silk goods from Europe, the fall in prices since the outbreak of the disunion crisis has not been more than between 2 and 3 per cent. on the superior descriptions, owing to the limited supply in the market. In the common descriptions there has been a reduction of between 6 and 12 per cent.

The export of sherry from Cadiz during the past year, according to the official Spanish list, was 51,859 butts. Of these, Messrs Gonzalez, Dubosc, and Co. shipped 4,035 butts; F. and W. Cosens, 3,947; P. Domecq, 3,092; P. Garvey, 2,974; M. Misa, 2,669; Pemartin and Co., 2,657; M.M. de Mora, 1,975; Duff Gordon and Co., 1,912; Widow Harmony, 1,895; Widow Portilla, 1,781; Haurie Nephews, 1,722; Ysasi and Co., 1,681; B. Vergara, 1,604; all the other shippers figuring for less than 1,500 butts each.

The accounts from Barbadoes received yesterday, are favourable as regards the coming *crops*. Exchange on London, 30 days, was quoted 490 dols. At Demerara, manufacturing operations were drawing to a close. The crops generally showed favourable results. The Jamaica markets exhibited no change in prices. Exchange on London, 90 days, 1 per cent. premium. St Thomas continued healthy.

From Tuesday's *Gazette* returns, it appears that each 100*l* of tithe rent-charge will for the year 1861 amount to 112*l* 3s 4¾d, which is a little more than 1¼ per cent. above the last year's value, which was itself the highest of the twenty-four preceding years. The value for 1855 was only 89*l* 15s 8¾d, or 22½ per cent. below the value of the current year. The following statement shows the worth of 100*l* of tithe rent-charge for each year since the passing of the Tithe Commutation Act, viz :—For the year 1837, 98*l* 13s 9¾d; 1838, 97*l* 7s 11d; 1839, 95*l* 7s 9d; 1840, 98*l* 15s 9¼d; 1841, 102*l* 12s 5¼d; 1842, 105*l* 8s 2¾d; 1843, 105*l* 12s 2¼d; 1844, 104*l* 3s 5¼d; 1845, 103*l* 17s 11¼d; 1846, 102*l* 17s 8¾d; 1847, 99*l* 18s 10½d; 1848, 102*l* 1s; 1849, 100*l* 3s 7¾d; 1850, 98*l* 10s 10d; 1851, 96*l* 11s 4¾d; 1852, 93*l* 16s 11¼d; 1853, 91*l* 13s 5¾d; 1854, 90*l* 19s 5d; 1855, 89*l* 15s 8¾d; 1856, 93*l* 18s 1¼d; 1857, 99*l* 13s 7¼d; 1858, 105*l* 16s 3½d; 1859, 108*l* 19s 6¼d; 1860, 110*l* 17s 8½d; 1861, 112*l* 3s 4¾d; total, 2,510*l* 3s 1¾d. General average for twenty-five years, 100*l* 4s 1½d.

The quantity of coal and coke exported from the various coal ports in the United Kingdom during the month of December, 1860, was of coal 399,482 tons, and of coke 18,336 tons. Of this quantity, which is very much smaller than that exported during the preceding month, Newcastle-upon-Tyne exported 101,505 tons of coal and 11,029 tons of coke; Blyth, 4,323 tons of coal; Amble, 5,137 tons of coal; Sunderland, 30,998 tons of coal and 1,643 tons of coke; Hartlepool and West Hartlepool, 27,511 tons of coal and 2,475 tons of coke; Middlesborough, 2,122 tons of coal and 1,158 tons of coke; Hull, 20,074 tons of coal and 14 tons of coke; Goole, 3,078 tons of coal; Liverpool, 20,735 tons of coal; Cardiff, 93,926 tons of coal and 483 tons of coke; Greenock, 2,001 tons of coal; Grangemouth, 7,369 tons of coal; Swansea, 31,745 tons of coal and 40 tons of coke; Alloa, 7,871 tons of coal; Borrowstonness, 3,045 tons of coal; Newport, 14,774 tons of coal and 145 tons of coke; Charlestown, 2,794 tons of coal; Llanelly, 4,561 tons of coal and 1,300 tons of coke; Inverkeithing, 2,558 tons of coal; Glasgow, 4,991 tons of coal and 15 tons of coke; and St David's, 7,294 tons of coal. The total quantity of coal and coke shipped during the month from the various coal ports to London and other ports in the United Kingdom was 661,630 tons of coal, 5,609 tons of coke, 377 tons of culm. Of this quantity, which likewise shows a falling off when compared with the returns for the preceding month, Newcastle shipped 187,888 tons of coal and 411 tons of coke; Blyth, 8,559 tons of coal; Sunderland, 135,040 tons of coal and 30 tons of coke; Hartlepool and West Hartlepool, 108,491 tons of coal and 495 tons of coke; Middlesborough, 12,797 tons of coal and 190 tons of coke; Goole, 5,924 tons of coal; Swansea, 13,357 tons of coal and 2,456 tons of coke; Newport, 56,601 tons of coal; Cardiff, 58,688 tons of coal and 991 tons of coke; Ayr, 6,037 tons of coal; Llanelly, 14,536 tons of coal and 991 tons of coke; Alloa, 600 tons of coal; Borrowstonness, 3,899 tons of coal and 44 tons of coke; Maryport, 30,600 tons of coal; Whitehaven, 13,547 tons of coal, 11 tons of coke, and 377 tons of culm; Charlestown, 4,030 tons of coal; and Inverkeithing, 418 tons of coal. The returns for Seaham Harbour are not yet made known. During the month 5,614 British and foreign vessels were engaged in the coal trade, of which number 3,915 were employed in the home, and 1,699 in the oversea trade.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.27½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about 2-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 424 per mark, and the short exchange on London is 13.5½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 3-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is about 103¼ to 104½ per cent., which, when compared with the Mint par between the two countries, shows that the exchange is against England. At the above rate there is a profit in sending gold to the United States.

The arrivals have been from Georgia, 381 bales; Virginia, 684—total, 1,065 bales. Total import from 1st to 31st December, 48,421 bales; ditto since 1st September, 186,403 bales. Export from 1st to 31st December, 40,319 bales, against 25,807 in 1859.

At the hour of going to press our Liverpool letter had not arrived.

MARKETS IN THE MANUFACTURING DISTRICTS.

Considering the high range in the value of money in the discount market, there has been a fair average business doing in the manufacturing districts during the present week, both for home use and export, and prices generally have been well supported. Iron, however, has continued to move off heavily; but, owing to the severe weather, coals have sold at unusually high prices.

MANCHESTER, Jan. 17.—The influence of the American news on the cotton market has imparted a qualified measure of animation here. Yarns have advanced about ¼d per lb, particularly the middle numbers of cop twist and weft most used in the district; but transactions have been rather moderate in consequence. Spinners having a full complement of orders, are exceedingly chary of selling even at the advance, and buyers are more than ever averse to maintaining their own consumption of yarns at the present utterly unprofitable rates for weaving. A small but certainly increasing number of looms have been put on short time. Cloths have had a fair business at a fraction over the rates of last week. Shirtings have been well sold in 39-inch and 54-inch widths. Madapollams and printers in the narrow widths have been in demand. To-day there has been rather a better spirit since the non-alteration of the Bank rate.

BRADFORD.—No change to speak of has arisen during the week in any branch of our trade, and things this morning are as flat or more so than they have yet been. In wool there is very little business passing, and the sales of the week are very small. Prices are not quotably lower for any class. In bright-haired sorts there is great firmness, with perhaps an occasional concession in Cobourg wools. Noils and brokes are taken into consumption as produced. We are unable to report any improved demand for yarns for export; the ports continue frozen up, causing any orders received to be delayed in execution. Spinners act with caution, holding very little stock, and buying only what they require. There is a great number of frames idle. Pieces—The attendance of buyers is an average, but their purchases are limited to immediate requirements.

LEEDS.—All things considered, there has been a fair market in the cloth halls for woollen fabrics, chiefly in light goods and mixtures.

ROCHDALE.—The market was rather flat, there being no great demand for either flannels or wool, and the tone of the trade was scarcely so good as of late, the unsettled state of America being one of the causes rendering operations less active. The manufacturers continue, however, in fair employ, and stocks are not large for the season of the year. There is a little more inquiry for Saxonies, but Lancashire and Welsh imitations are quiet. There is a good demand for Yorkshire low and heavy goods, the manufacturers of which are very busy; some of them, indeed, working overtime. Prices in general are quite firm, but wool was a shade lower in some instances.

LEICESTER.—There is very little doing in the hosiery trade, business generally remaining in a very quiet state. Manufacturers hold off producing, except to order, and consequently many of the workpeople are unemployed. At Loughborough and all the other hosiery districts business is extremely dull. There is no change in the price of wool, material remaining firm. Yarns are stiff.

NOTTINGHAM.—The lace trade is yet dull in most branches. The fancy trade continues without much change, some fair orders having been executed during the past fortnight. There is not much doing in plain nets at present. The demand for silk goods is very limited. In hosiery there is very little change noticeable. In some branches rather more is doing, but, as a whole, business is very depressed; indeed, there has not been so much distress among both the lace-makers and framework-knitters for a number of years past. Yarns hold up in price.

BELFAST.—In light linens some reduction in price has taken place; heavy fabrics better maintain their position. Heavy and medium makes of linens, suitable for the home trade, are in moderate request. For roughs, manufacturers are still tolerably well supplied with forward orders.

BIRMINGHAM.—Most of the brass-founders are busy, and there are other branches in which an average trade is being done; but these are the exceptional instances. In all the fancy trades much depression exists; in these and other branches manufacturers are compelled to give up making goods for stock.

A COTTON MERCHANT.—Our exports to the Atlantic ports of the United States reached the (declared) real value of 22,000,000*l* in 1859, and will be somewhat less in 1860. To California the declared real value of our exports was 437,000*l* in 1859. The value of our *cotton* exports to the United States was about 4,500,000*l* in the same year, and of our woollen exports about 4,370,000*l*.

A TRAVELLER.—We hope to give his communication next week.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria. cap. 32, for the week ending on Wednesday, the 16th day of January, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,479,845	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	9,535,002
		Silver Bullion	1,469,843
	25,479,845		25,479,845

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	8,783,721
Rest	3,335,181	Other Securities	21,123,578
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	2,746,319	Notes	5,081,625
Other Deposits	14,433,956	Gold and Silver Coin	770,518
Seven Day and other Bills	690,986		
	35,755,442		35,759,442

Dated the 17th January, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,089,206	Securities	29,829,299
Public Deposits	2,746,319	Coin and Bullion	11,775,363
Private Deposits	14,433,956		
	38,269,481		41,604,662

The balance of Assets above Liabilities being 3,335,181*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£27,427
A DECREASE of Public Deposits of	991,078
A DECREASE of Other Deposits of	1,043,469
A DECREASE of Government Securities of	1,236,000
A DECREASE of Other Securities of	376,188
A DECREASE of Bullion of	400,023
AN INCREASE of Rest of	49,763
A DECREASE of Reserve of	344,443

The Bank return continues unfavourable; every item bespeaks a drain of money. The decrease in the public and private deposits amount together to 2,034,537*l*. The decrease in the Government securities arises in a great measure from the large amount of stock the Bank has given on in the Stock Exchange, and possibly partly from real sales.

The decrease in the other securities, although only to the extent of 376,188*l*, is a favourable feature, as it shows that the high rate of interest is beginning to tell on the applications for discount.

The drain of bullion still continues, and amounts to 400,023*l*, and the decrease in the reserve to 344,443*l*. Altogether, however, the position of the Bank, looking at the proportion the reserve bears to the deposits, is not weakened compared with last week's return.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 21,153,455	£ 20,911,410	£ 21,857,551	£ 22,912,487	£ 21,089,206
Public deposits	5,847,019	2,813,738	6,260,269	5,166,259	2,746,319
Other deposits	10,517,783	13,886,698	14,948,727	14,850,754	14,433,956
Government securities	14,150,256	9,191,986	10,698,807	10,813,822	8,783,721
Other securities	12,619,768	22,250,659	16,507,901	19,593,664	21,123,578
Reserve of notes & coin	8,579,417	8,888,790	12,670,084	8,306,358	5,852,143
Coin and bullion	14,526,447	14,435,815	19,166,269	15,884,498	11,775,363
Bank rate of discount	3 p. c.	5 p. c.	2½ p. c.	3 p. c.	7 p. c.
Price of Consols	96⅜	95	96	95⅛	91⅛
Average price of wheat	38s 0d	48s 8d	41s 3d	43s 11d	57s 1d
Exchange on Paris (shrt)	24 92½ 97½	25 15 22½	25 7½ 12½	25 5 10	25 20 30
— Amsterdam ditto	11 15⅝ 16	11 14 15	11 15	11 12½ 13	11 16 17
— Hamburg (3months)	13 5⅞ 6	13 5½	13 6½ 6¾	13 4⅛ 5	13 7⅛ 8

In 1858, Orsini and his confederates had made their atrocious attempt on the life of the Emperor Napoleon. An unfavourable impression had been produced by the prospect of fresh measures of repression in France and by the opening of the foreign refugee question. At Hamburg, the rate of discount was only 2 per cent. Here, the disturbance in the money market was subsiding rapidly, but the Bank of England had not yet reduced their minimum below 5 per cent., although the bullion had again increased more than a million and the reserve three-quarters of a million within the week.

In 1859, considerable sensation had been excited by the announcement of the approaching marriage of Prince Napoleon and the Princess Clotilde of Savoy. The stock markets throughout Europe were sensitive and agitated. Immense speculations were going on in Lombardo-Venetian shares between Paris, London, and Vienna.

In 1860, the rate of money was beginning to advance, and the Bank had raised the minimum rate to 3 per cent. A large demand existed for gold for the Continent, and large remittances of silver were taking place to India in payment for the Indian enfaced paper which had been largely invested in in England. A great sensation had been created by the Emperor Napoleon's letters to M. Fould on the subject of free trade, and the something more than rumours which were prevalent as to a treaty of commerce with England.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,101,985*l*; in 1858, a deficiency of 3,863,961*l*; in 1859, a deficiency of 1,559,174*l*; and in 1860, a deficiency of 4,742,910*l*. In 1861, the deficiency is 6,689,622*l*.

DISCOUNT AND MONEY MARKET.—The discount market throughout the week has been remarkably steady, the rate being, as a rule, 6¾ to 7 per cent., although bills having a few days to run have been discounted at 6½ per cent., but these cases are exceptional. Money continues abundant, although the rate is high, and it is the opinion of the best informed that for the present there is no probability of the rate of money being lower. The Bank of England is the great index which regulates the rate of money, and so long as the drain of bullion exists, the present Bank rate must not only be maintained, but, if necessary, increased; and so long as the present rate of exchange between America and England exists, so long will gold continue to flow there. The latest rate of exchange from New York is 103¾ to 4 for bankers' credits, and 102 to 3 for commercial paper; the par of exchange is 109. We wish not to refine on obstacles (such as the United States mint only being able to turn out 750,000 dols in coin in one week); suffice it to say that so long as this disparity between the actual price and the par of exchange exists, so long will gold continue to be exported from this country to the United States.

There has been a great amount of anxiety during the week relative to the Bank of France. At one period a rumour prevailed that the Bank of France were about to suspend specie payments; at another, that a new proposal had been made to the Bank of England to effect another exchange of gold for silver. No one can venture to predict what the present drain of bullion *may do*. It may compel both the Bank of England and the Bank of France to suspend specie payments, but for the present neither establishment have any intention of the kind, and we believe both intend to adopt the same rule should the present drain of specie continue, viz., raise the rate of discount.

As to the Bank of France having made any further application to the Bank of England to exchange silver for gold, there is no truth whatever in the rumour. There is, however, a rumour this evening that the Bank of France has entered into an arrangement similar to that entered into with the Bank of England to exchange silver to the amount of 1,250,000*l* sterling for gold with the Bank of St Petersburg, and also that the Bank of France has purchased about 160,000*l* of gold in Germany. And it is well known that the Bank of France has an amount of silver disproportionate to the amount of gold it holds. There is nothing remarkable in selling one and buying the other, wherever a favourable opportunity occurs; indeed this is the business of all Banks. There is no doubt, also, that the drain of bullion from France and England to America arises precisely from the same causes, viz., a balance of trade against both countries, arising from a deficient and badly gathered harvest, and greatly increased purchases of corn and cotton from the United States. These, coupled with a

falling off of orders from America, have created a balance of trade in favour of the United States, which is being paid in gold; hence the large exportation, which will continue, as we before observed, so long as the exchanges, which are the index of the balance of trade, continue as they are.

The latest accounts from America continue very unfavourable in a political extent, and it is feared that any hopes of now preserving the Union are almost forlorn. As for predicting what may be the consequences of secession on the money market, it is pure presumption. One thing we hope it will do, and that is, prevent further purchases of American securities for the present. It possibly may turn out that we have enough and to spare.

We have already exported 2,750,000*l* gold to America, and it is probable that the Arabia, which sails to-morrow, will take out 250,000*l* more. To these amounts may be added that portion of the gold from California which belongs to this country, which is very considerable. It is computed, also, that our investments in America amount to nearly 100,000,000*l* sterling. A great portion of these pay dividends; consequently, as remittances of their dividends would at the present rate of exchange be made in bills rather than in bullion, it may be fairly estimated that we have pretty well paid our debt, so far as the balance of trade goes, to the United States.

What we now have to dread is the breaking out of civil war there, which will cause every man to hoard gold and exchange the notes of the banks for gold, and the mutual mistrust that will arise, and our having to send gold to purchase corn and cotton.

The Oneida, from the West Indies, with 79,000*l*; and also the Indus, from Alexandria, with 29,000*l*, have arrived to-day; and about 600,000*l* are on the sea from Australia. About 40,000*l* in bar gold and 40,000*l* in sovereigns have been taken from the Bank of England to-day; the 40,000*l* is stated to be for Spain.

The rate of money in the Stock Exchange is about 5 to 5½ per cent. The rates at the following places are:—

	Bank Rate. Per cent.	Open Market. Per cent.
London	7	6¾ to 7
Paris	7	6
Brussels	5	5
Amsterdam	3	3
Hamburg	3	3
Turin	7	7
Cadiz	6½	6½

English Funds.—The market in English funds continues very flat, although the public have invested largely, and stock would be scarce were it not that the Bank of England and others continue to raise money in the Stock Exchange, which temporarily supplies the market with stock.

Exchequer bills have been very heavy, at 10s to 7s discount, which as March approaches will cause them to be paid into the Exchequer, or a higher rate of interest given to induce the public to hold them.

They have lately been upheld in price by purchases on account of railway and other companies, for the purpose of lodging as deposits with the Accountant-General of the Court of Chancery. These deposits are stated to have amounted to about 1,300,000*l* in stock and Exchequer bills, and 650,000*l* in money.

Foreign Funds.—The market in foreign funds has been heavy, but does not present any feature on which to comment.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

Consols

Railways.—The railway market has been very depressed. The public have apprehensions that the disturbed state of America will cause a diminution in the traffic. No doubt, however, the calling in of loans has caused a good deal of stock to be brought to market.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

Railways.	Closing prices last Friday.	Closing prices this day.

Bullion.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an accoun of the bullion transactions of the week, and also those in India Government loan notes:—

Gold.—The export of gold still continues, and we have to report the following shipments since our circular of the 10th instant:—The Ellora, to Bombay, with 16,360*l*; the Niagara, to United States, with 190,000*l*; the Etna, to United States, with 212,500*l*; the Seine, to West Indies, with 2,500*l*. The shipments to New York now amount to about 2,750,000*l*, and it is supposed that the Arabia, which sails from Liverpool for New York on the 19th instant, will take a considerable amount. About 70,000*l* in bar gold has been withdrawn from the Bank of England since the 10th instant. In addition to the Australian gold ships specified in our last, the Clutha is announced to sail on the 16th November with about 40,000 ounces. The only arrival of moment is the Armenian, from Africa, with 6,500*l*. Any immediate arrivals of gold would probably be taken for export.

Silver.—The price of bar silver remains as last quoted, viz., 61¼d per ounce standard, with a quiet market. The West India steamer Oneida is now several days overdue, but the amount to be expected by her is not named. The shipments comprise 380,000*l* per Ellora to Bombay, and 7,500*l* per Seine to the West Indies.

Mexican Dollars.—We have to report a further considerable decline in the price of Mexican dollars, the amount on hand by the last West India steamer having been disposed of at 60½d per ounce, being a reduction of 1½d per ounce as compared with the price obtained for dollars ex Atrato on 1st inst. The demand for China is inactive.

Exchange on India remains much the same as at date of our last circular; we quote Bank's sixty days' sight drafts on Bombay and Calcutta, 2s to 2s 0⅛d. Bills with documents, 1s 11⅜d to 1s 11½d. Bank's drafts on Madras, sixty days' sight, 1s 11¾d to 2s.

India Government Loan notes are quite nominal, but such quotations as can be given are weaker. The only transactions we have to record have taken place at 100 for 5½ per cents., and 94 to 94½ for 5 per Cents.; 4 per Cents. 78 to 80.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 10d per oz. std; bar gold, refinable, 77s 11½d per oz std. Silver—Bar silver, 5s 1½d per oz std; bar silver, containing 5 grs gold, 5s 1½d per oz std; fine cake silver, 5s 5⅞d per oz; Mexican dollars, 5s 0¼d per oz; Spanish dollars (Carolus), 6s 2d per oz, last price.

Miscellaneous.—The most interesting incidents of the week have been the meetings of the shareholders of the Joint Stock Banks, which have passed off in a satisfactory manner: the balance sheets of the various Banks will be found in our advertising columns. At a half-yearly meeting of the London and

Westminster Bank, Alderman Salomons, M.P., in the chair, the report was adopted unanimously, and a dividend and bonus were declared at the rate of 10 per cent. for the half-year, free of income tax, making a total division of 20 per cent. for 1860, against 18 per cent. in 1859. It was stated that the deposits show an increase of about 1,300,000*l* over the previous year, and of about half a million over the first six months of 1860. The high rates of interest have thus been attended by an augmented accumulation of capital which the bank have been enabled to employ safely and profitably. The amount reserved to meet the deficiency by the failures in the leather trade, 10,000*l*, has been found more than ample, the total loss by this gross and reckless abuse of credit being little more than 5,000*l*. The loss had not arisen by directly discounting for Streatfeild's, but through some of the bank's customers in the Borough. In the present unsettled state of affairs, the joint stock banks, by mutual consent, have not raised their rates of allowance on deposits, as in ordinary times, the London and Westminster taking the lead in calling a meeting on the question. The Board have voted a sum of 150*l* for the poor-boxes of the various police courts. In answer to a question respecting the sum written off for bank premises, it was mentioned, among other particulars, that the head office, a freehold, cost about 67,000*l* for the original purchase and enlargements, and now stands in the books as an asset for 30,000*l*; the Westminster branch, also a freehold, cost 18,000*l* to 20,000*l*, and is taken as an asset for 11,000*l*; the Bloomsbury branch cost 20,000*l*, and stands at 9,500*l*, &c.

At a meeting of the Union Bank of London, Mr Northall Laurie presiding, the report, announcing a dividend of 12s per share clear of income tax, was unanimously agreed to. It was stated that the Directors view the proceedings of the past half-year with unmixed satisfaction. The business has gone on favourably, both the head office and the branches showing a proportionate increase. The expenditure has been carefully controlled. The financial year of the bank expires next June, but the profits for the calendar year 1860 have been 127,000*l*, showing the confidence reposed by the public in this institution. There is every prospect of an equally good result in the current six months, notwithstanding the unsettled state of the money market. Nothing further has been recovered on account of the Pullinger frauds, but the Directors hope to get something more. With reference to the Chancery proceedings taken by an individual proprietor, an amicable consultation took place between the solicitors on each side, and the matter has been settled by the bank paying the small amount of costs incurred, as whatever the eventual result might be it was thought preferable to keep out of litigation. There have been no bad debts within the past half-year. On a suggestion that the principal part of the sum proposed to be carried forward be appropriated to a reserve fund, it was mentioned that the Directors fully concur in the policy of having a large reserve. The benefit of it was found on the last occasion, and the Board consider it of primary importance. The disposal, however, of the present balance properly rests with the annual meeting to be held in July.

A half-yearly meeting of the London Joint Stock Bank has been held, Mr F. Bennett Goldney in the chair, when the report was adopted unanimously, and a dividend declared at the rate of 12½ per cent. per annum, free of income tax. It was stated that it is very painful to the Directors not only to have to write off so large a sum as 60,000*l* for the losses by Streatfeild and Co. and other firms in the leather trade, but also that such old customers should have acted so disgracefully. It is satisfactory, however, that the profits have been more than enough to clear off the whole sum. A shareholder expressed his surprise that the Directors should have been deceived to so large an extent, especially from the rigid examination to which all securities tendered to the bank are subjected. He thought the Directors, not of this establishment, but of joint stock banks in general, should have had some means of knowing the true state of the failed houses. Mr Ambrose Moore, a director, in reply, observed that the 60,000*l* represented bills discounted in the ordinary way of business for a customer of twenty-four years' standing, a firm that had long held a high position, and from which partners were known to have retired with fortunes. The bills were drawn for uneven sums, and purported to represent regular transactions. The bank had no means of knowing the numerous sources of discount used by Streatfeild's, and the skilful mode by which Mr Laurence had contrived that no particular house should have a preponderating account. The Directors were deceived with many others. It is necessary in a business like the present to repose confidence and accommodate largely. The bank might do a parsimonious business, but the profits would proportionately suffer. To prove the general success of the past management, Mr Moore proceeded to show that the profits realised in the 23 years ending in 1850 were 1,726,000*l*, of which more than a million and a half have been paid as dividend (including the income tax), while a guarantee fund has been accumulated of 205,195*l*. The average return to the shareholders in the concluding five years was 22½ per cent, In 1860, after providing for the ordinary bad debts, exclusive of the losses by Streatfield's, the amount realised was nearly 23 per cent. The total losses in the above 23 years were 124,000*l*, or about 5,435*l* a year, being less than one per cent. on the paid-up capital—a most satisfactory result, considering that the bank is dealing with millions. It was also mentioned that the 124,000*l* loss was originally estimated at 160,000*l*, 36,000*l* having been afterwards recovered. These explanations were received with approbation.

At a meeting of the Bank of London, Sir J. V. Shelley, M.P., presiding, the report, announcing a dividend at the rate of 5 per cent. per annum, free of income tax, was carried unanimously. The business of the bank continues to progress satisfactorily, the liabilities and assets showing an increase of 100,000*l* over 1859, notwithstanding that a public account held by the bank was considerably lower on this occasion than at the same period of last year. The profits have been larger than in any previous six months. It has been found necessary to write off a further sum of 8,674*l*, making 12,674*l* in all, for the losses by the failures in the leather trade.

At the half-yearly meeting of the shareholders of the City Bank, the report was adopted, and a dividend of 6 per cent. per annum, free of income tax, was declared. The accounts show the continuous prosperity of the bank, and the profits of the last half-year have exceeded by some thousand pounds those of any previous similar period. The loss sustained through the failure of Messrs Laurence and Mortimore is estimated at 17,000*l*, and the bad debts of the half-year, including that amount, are only 17,250*l*. With this exception, and it is a fearful one, operations have been successfully carried on.

At the half-yearly meeting of the shareholders of the Commercial Bank of London, the report and accounts were agreed to. After providing for bad and doubtful debts, and paying all charges of management, there remained an unappropriated profit of 17,109*l*, which allowed the Directors to declare a dividend at the rate of 8 per cent. per annum, free of income tax, on the paid-up capital of the Company, leaving a balance of 517*l* to be carried to the credit of the current six months. It was a matter of congratulation that, notwithstanding the difficulties of the past half-year, the Directors have been in a position to divide the same amount of dividend as before, and to carry forward a balance.

It has transpired that the payment into the Bank of England to the credit of the Accountant-General in Chancery on the 12th and the 14th, representing the deposits for new railway and other projects, amounted altogether to about 1,900,000*l*, of which over 600,000*l* was in money, and 1,300,000*l* in stock and Exchequer bills.

The suspension of Messrs Windsor Brothers, of Leadenhall street, ship and insurance brokers, has been announced, but their operations have only been of a limited character. The debts and liabilities represent about 11,000*l* to 12,000*l*, and the assets, it is asserted, will prove unfavourable. Losses on underwriting have been experienced, and the business of the firm has been decaying for some time past.

We subjoin an extract from E. F. Satterthwaite's weekly circular, dated Jan. 16, 1861:—

We have advices from New York to the 1st inst., reporting a much better tone in Wall street; money was decidedly easier, and exchange on Europe improving. The Banks' return was very favourable, the specie line having run up to 23,275,058 dols. In railroad stocks there had been a general improvement; Illinois shares advancing in the week, 10 per cent.; Erie, 5 per cent.;

Galena and Chicago, 5 per cent.; New York Central, 2 per cent.; and Reading, 1½ per cent.

The whole of the issue of 5,000,000 dols treasury notes had been made by the Government at the extravagant rate of 12 per cent.; the takers, it was expected, would make a profitable operation.

The following is the return of the New York banks :—

COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark lane, to-day, a very limited supply of English wheat was on offer; yet the demand was inactive, at Monday's quotations. No change took place in the value of foreign wheat. Other produce was unaltered in value. The imports from abroad are 9,710 quarters of wheat; 1,720 oats; 1,530 sacks and 13,860 barrels of flour.

The demand for produce generally, at Liverpool, this morning, was wholly in retail, at previous rates.

Advices from New York, to the 5th inst., state that breadstuffs were in good request, and that prices were rather on the advance.

Writing on the 3rd inst., Messrs Briggs and Co., of Alexandria, thus refer to the grain trade:—

The demand for all descriptions of breadstuffs since our last advices of the 24th ult. has been very active, and prices, under the influence of favourable advices from England, scarcity of supplies from the interior, and depressed freights, have exhibited a strong upward tendency. For the past two days, however, business has been altogether suspended by excessive falls of rain. The following are the sales since our last, with present prices quoted, free on board:—Wheat, Saide, private trade produce, 11,590 qrs, at 37s 6d to 39s; ditto, Pacha's, 2,500 qrs, 38s to 39s; Beheireh, private trade produce, 1,000 qrs, 36s to 37s 2d; ditto, Pacha's, 1,625 qrs, 37s to 37s 6d: beans, Saide, 5,050 qrs, 29s to 29s 10d; ditto, Beheireh, 225 qrs, 28s to 29s: Indian corn, 3,950 qrs, 28s to 29s; barley, 240 qrs, 21s to 22s per quarter. Freights—Shipping continues very abundant, and freights may be considered to have undergone a further decline. Beans to the United Kingdom for orders may be quoted 4s 6d to 4s 9d per quarter; other grain and seed in proportion; to a direct port, 4s. Grain ballasts to Liverpool, by steamer, 6s; by sailing vessel, 3s 6d to 4s nominal.

A very extensive business has been transacted in the Liverpool cotton market during the past week, the total sales having reached the large cipher of 132,000 bales. Prices are ⅛d to ¼d per lb above last Friday's rates. Spinners have taken 79,000 bales, speculators 37,000, and exporters 16,000 bales. The sales to-day are again 20,000 bales, at very full prices. The market has been influenced favourably by the accounts from America of anticipated troubles in the cotton States, as well as by the absence of a further rise in the Bank discount rate, and holders of cotton have been very independent sellers. In this market also very large transactions have taken place. The sales are 10,300 bales, at fully ⅛d to ¼d per lb above last Friday.

At New York, on the 5th inst., middling cotton was firmer at 12½c

The public sales of tea held this week have gone off steadily, at very full prices. In the private market, however, the transactions continue on a limited scale, at previous rates. At a meeting of the London tea trade on Tuesday, a committee was appointed with absolute power to settle the question of lot money. The committee met on Wednesday, when they determined that in future the lot money should be 4d per lot, instead of 6d, and that lots of the value of 10*l* or under should be exempt from charge. The question, under these circumstances, may be considered to be entirely closed.

We have received the annexed report of the state of the tea and silk markets in China from Hong Kong, under date the 29th November:—

Canton Silk—Transactions amount to only 50 piculs for India. Quotations as before. Tea—Settlements have been very moderate, and on the whole no reduction can be quoted in congou. The stock is not large, and it is confidently asserted that not more than 35 chops are to come forward, making less than was at one time estimated. Scented orange pekoes have declined 1 tael, and scented capers may be quoted 1 to 2 taels lower. Canton-made gunpowders are also easier. There have been no further arrivals of country greens, but supplies are expected within a month. The hyson portion of the Moyune parcel reported as having arrived in our last has been taken at extreme rates for the Indian market, and high offers are said to be out for the remainder of the chop. The settlements for the fortnight are as follows:—Congou, 15 chops; Oonams, at 22½ to 26½ taels; Oopacks, 27½ to 31½ taels; Canton packed congou, 1,000 half-chests, at 20 to 21½ taels; scented orange pekoe, 5,000 boxes, at 18 to 30 taels; scented capers, 1,000 boxes, at 13½ to 21 taels; Canton gunpowder, 400 half-chests and 6,000 boxes, at 15½ to 19.2 taels; country greens, hyson, at 30 taels to 53 taels. Stocks—Congou, 90 chops; Souchong 8 chops; scented orange pekoe, 20,000 boxes; scented caper, 40,000 to 50,000 boxes. Country Greens—Balance of a small chop of hyson. Freight, 3*l* to London. Macao—Tayshans continue to be taken at 18 to 19 taels, and contract deliveries are also going on. Settlements to the 27th inst. are estimated at 81,000 packages. Tea—A considerable business has been done, and prices throughout have been fairly maintained, owing to the active demand for the colonies. Supplies are to a moderate extent, and chiefly consist of common to medium kinds; some parcels very low and inferior. Souchongs—small sales, and stocks reduced; Oolongs in moderate request, and recent purchases of very common grade; pekoes in little inquiry, and scented teas quite neglected. Sales from 6th to 21st November:—Congou, 28,600 chests at 9 taels for low dusty kinds, to 20 taels for good flavoury Foochow teas; and 21.5 taels to 22.5 taels for fair Ningchows. Souchong, 1,400 chests, at 23 taels to 28 taels; Oolong, 8,800 half-chests, 13 taels to 23 taels; Pekoe 400 chests, at 24 taels to 34 taels. Stocks on 22d November:—Congou, 10,700 chests; Souchong, 600 chests; Oolong, 6,000 half-chests; Pekoe, 2,000 chests; scented teas, 6,000 boxes. Shanghai advices are to the 22d inst. Silk—Settlements during the fortnight amount to 5,000 bales, at an advance of 10 taels on Tsatlees and former rates for other kinds. Stock, 8,000 to 9,000 bales, chiefly inferior. Good silk was scarce, and likely to continue so. Tsatlee—Nos. 1 and 2, none; No. 3, 405 taels; No. 4, 385 taels; inferior, 330 to 375 taels. Taysaam—No. 1, 350 taels: No. 2, 330 taels; No. 3, 310 taels; No. 4, 290 taels; inferior, 250 to 280 taels. The total export of silk from China to Europe is 46,726 bales, against 33,792 bales last year, or an increase for this season of 12,934 bales. Tea—Settlements have been very trifling in blacks, and the probability of small supplies for some time causes holders to remain very firm. Sales are as follows:—Congou—Ningchow and Oopack, 2,000 chests at 29 to 30 taels duty paid; Hohow, 600 chests at 23 taels; ditto, 1,300 chests contract: Shanghai packed, 1,000 chests at 19 to 20 taels; Pekoe, 500 chests at 30 to 39. Green Teas—Settlements are 1,300 half-chests Pingsury and Hoochow at fully last quotations, and the teamen ask an advance for those on offer. 3,000 half-chests on contract account and 3,400 half-chests Japan have also been shipped. The stock of black is 1,000 chests, and green 6,500 half-chests. Total export of tea from China to Great Britain, 45,560,500 lbs, against 40,592,000 lbs last year, or an increase for this season of 4,968,500 lbs. To the United States the export is 14,138,700 lb against 16,371,800 lbs, or a decrease of 2,233,100 lbs for this season.

Notwithstanding that there has been an improved inquiry for most descriptions of raw sugar, no quotable change has taken place in prices. Refined goods have met a very dull inquiry.

Coffee has commanded rather more attention, and, in some instances, plantation kinds have realised 6d per cwt more money. Other coffees have ruled about stationary.

We have received the following report of the state of the coffee trade at Ceylon to the 15th ult. from Messrs Volkhart Brothers:—

The weather since our last has been unfavourable for the preparation of produce, and but little coffee has been shipped. The exports of the present season's crop to date are as follows:—

PLANTATION COFFEE.

To Great Britain .....cwts	63,816	against last year, cwts		52,581
Foreign Ports	...	—	—	1,262
Australia and India.....	4,467	—	—	2,657
	68,283			56,470

NATIVE COFFEE.

To Great Britain.....cwts	20,384	against last year, cwts		26,200
Foreign Ports.....	1,496	—	—	7,162
Australia and India.....	2,812	—	—	293
	24,692			33,655

Continued rains have impeded the transport of plantation coffee from the interior, and at the present moment the stocks in Colombo are very light. We hear of one or two transactions in this description at 11s 6d to 11s 9d for high grown samples. Native coffee continues to arrive slowly and of indifferent quality, and the present high price obtained for it arises more from the scantiness of the supply than from any eagerness on the part of purchasers. We call it rather dearer than at the date of our last. Plantation coffee, mountain, 11s 3d to 11s 9d per bbl; native coffee, 43s to 43s 6d; ditto, picked and dried, 46s per cwt. Cinnamon, plantation, 9d to 10d; inferior, 6d to 7½d per lb.

Rice has sold briskly for arrival; but, on the spot, the transactions have been trifling on former terms.

The demand for all kinds of fruit has been in a very inactive state, but no change has taken place in the currencies.

Indigo continues to rule very firm in price; but the business doing is by no means extensive. The state of the indigo trade at Calcutta to the 8th ult., is thus reported by Messrs Moran and Co.:—

Our indigo market is now fairly open, and about 11,000 maunds have been sold. The quality of the new indigo is generally good, and in some cases unusually fine, and judging from what has already come to market from Tirhoot, that district bids fair to maintain the high character it has gained of late years for producing fine indigo. Five public sales have been held up to date, and the biddings have been very animated for the English, French, and Russian markets, at prices ranging from the equivalent of the London July sales to 5d per lb higher for qualities worth from 6s upwards, and July rates to 3d lower for inferior kinds. Exports of indigo from 1st November, 1860, to the 7th current, 697 chests.

All kinds of wool have continued to move off heavily, and to force sales lower rates must be submitted to. The auctions now in progress at Liverpool show a decline of fully ½d per lb in the value of East India wools when compared with the September sales. Hemp and flax have sold heavily, and prices are with difficulty supported.

Very moderate prices continue to be offered for saltpetre, and the market is very inactive.

Metals, generally, have been devoid of animation.

Several parcels of rum have changed hands somewhat freely, at full currencies. In brandy and grain spirits the transactions are very moderate.

The oil market, generally, has shown signs of inactivity. Linseed oil has realised 28*l* per ton on the spot. Cakes support the late advance in the quotations; but turpentine is again a shade lower.

Tallow has somewhat fluctuated in price; but, on the whole, a fair amount of business is doing in it. To-day, P.Y.C., on the spot, has sold at 60s; January to March, 59s 9d to 60s; March, 60s 6d; April to June, 58s 6d; July to September, 58s; October to December, 57s 6d per cwt. Town tallow is 59s 6d net cash.

"Money is largely in excess of the wants of borrowers," says the New York *Shipping List* of the 2nd inst., "and, what with the steady and rapid accumulation of coin from England and California, and the protracted suspension of the activities of general trade, the amount of capital seeking investment ere long is likely to be immense. The discount houses, it is probable, will be competitors with the banks for business before January is over. We hear of some transactions in prime paper as low as 10 per cent., the same

grade that sold at 15 per cent. a fortnight ago. On call, the supply is free at from 5½ to 6½ per cent. The weekly statement of the city banks is a very strong one. The specie reserves are between four and five millions higher, while the loans are down to the extent of nearly a million. The deposits show an increase of nearly eight millions. We say this is a strong showing for the banks, but at the same time nothing would more forcibly demonstrate the general stagnation in all the various branches of trade and commerce than this extraordinary plethora of gold and silver. The foreign trade of the port for the closing year, when the official figures are in, will show about 13,000,000 dols falling off in the value of the imports, as compared with the previous year (specie not included), and about 35,000,000 dols increase in the exports. The shipments of specie will fall below that of 1859, after deducting the recent receipts from Europe, direct and via Boston, about 35,000,000 dols. We subjoin our usual weekly table:—

For the week.	1859. dols		1860. dols
Dry goods	2,937,224	.....	1,869,381
General merchandise	2,488,946	.....	2,223,354
Total for the week	5,426,170	.....	4,092,735
Previously reported	227,803,639	.....	219,952,836
Since January 1	233,229,709	.....	224,045,371

The stock market is quiet—remarkably so, indeed, under the exciting rumours that are constantly reaching us from Washington and the South. The course of the Bank of Commerce and its associates in coming to the rescue of the Government, and taking the balance of the 5,000,000 dols, is doing something to restore confidence in Federal credit. At the Second Board, most descriptions of securities were firm and active, and the day closed with a more cheerful look than has been visible for some time past."

IMPORTS OF FOREIGN AND COLONIAL WOOL.

COLONIAL and FOREIGN WOOL imported into London, Liverpool, and Hull, from Jan. 1 to Dec. 31, 1859 and 1860, and the total imports, including Bristol, Leith, Grimsby, and Hartlepool.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Jan. 2.—FLOUR AND MEAL.—The advance in the rates of freight mentioned in our last review, operated to impede transactions in States and Western flour on Saturday, when sales were light, and at barely supported prices. The continued favourable European advices imparted renewed buoyancy to the market on Monday, however, and though the inquiry was very light, holders were enabled to obtain an advance over previous prices of 5c to 10c per bbl, closing steady under a limited inquiry at the improvement. The transactions for the two days amount to 17,000 bbls, of which 8,500 bbls were placed on Monday. The estimated stock in New York is 569,800 bbls; in 1859, 671,876 bbls; in 1858, 558,225 bbls; and in 1857, 476,500 bbls. Canada flour has been in slight request, but prices are a shade firmer. The sales are 650 bbls, including 350 bbls on Monday. The estimated stock is 10,200 bbls, against 17,150 last year, 2,916 bbls in 1858, and 7,800 bbls in 1857.

PRICES in NEW YORK, 1st January.

Wheat Flour	237,343	139,612

GRAIN.—On Saturday the demand for wheat was exceedingly light, and holders were somewhat anxious to dispose of their offerings at the closing prices of the previous day, but on the receipt of the more favourable European advices on Monday, the market assumed a more buoyant tone, and holders demanded an advance of 1c to 2c per bushel. The improvement in the rates of freight, combined with the higher prices demanded and the unfavourable weather, served to counteract the favourable news from England, however, and business has been on an unusually small scale, only about 12,000 bushels having found purchasers during the two days, of which 2,900 winter red Western sold on Monday at 1.35 dol; and 1,000 white Michigan, 1.50 dol. The estimated stock is 3,535,711 bushels, against 1,915,333 last year, 1,211,312 in 1858, and 369,000 in 1857. Corn has been in steady fair demand, and prices have experienced a further advance of 1c to 2c per bushel. The estimated stock is 2,712,000 bushels, against 79,400 last year, 669,690 in 1858, and 97,000 in 1857.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Most of the local markets, held this week, have been fairly supplied with wheat, in somewhat improved condition. The demand has been much restricted, but without leading to any quotable change in prices. At the outports, owing to heavy importations and unusually large stocks, together with the high range in the price of money in the discount markets, foreign wheats have shown a tendency to give way. The best kinds of barley have commanded extreme rates, but low and damp parcels have commanded very little attention. No change has taken place in the value of any kind of malt. There has been a good consumptive demand for oats, at very full prices. Both beans and peas have realised previous rates. No quotable change has taken place in the value of flour, either English or foreign.

Advices from New York state that several large parcels of wheat, flour, and maize had been purchased for shipment to England on higher terms. There is, therefore, a heavy supply of bread stuffs still on passage for the time of year. Throughout the Continent, wheat has further advanced in price, although the business doing for Spring shipment is not to say extensive. Barley and oats have continued in active request, at full currencies. The stocks in the North of Europe appear to be seasonably large. We learn that about 500 vessels, laden with grain, &c., are still on passage from the Black Sea, &c.

Most of the Scotch markets have been fairly supplied with wheat in good saleable condition. The demand has been much restricted, at barely late rates. Barley and oats have commanded very full prices; but other articles have met a dull inquiry.

In Ireland, there has been no particular movement in the grain trade. Barley and oats have moved off steadily, at very full prices; but other descriptions of produce have met a dull inquiry.

At Mark lane, to-day, scarcely any English wheat was on offer. The demand for both red and white qualities, however, ruled very inactive, and prices ruled next to nominal. In foreign wheat the transactions were also on a limited scale. Fine Dantzic parcels realised fully previous rates. Other kinds with difficulty obtained Monday's quotations. All spring corn was in limited request, yet no change took place in their value. The flour trade was slow, owing to the large arrival of American barrels. Prices, however, ruled about stationary.

Mr Ed. Rainford thus reports the state of the floating trade:—Floating Cargoes—Since the 9th inst. up to last night only 4 arrivals for orders are reported, viz.:—Wheat, 1 cargo from New York; maize, 1 cargo from Mazagan, and 2 from New York. Of these part were previously disposed of. The non-arrival of the expected fleet, the stringency of the money market, and partially other causes have almost reduced the business in cargoes afloat to a nullity. Since this day week less has been done than has occurred in the same space of time in my recollection. The following are the only transactions mentioned:—Wheat, arrived, white Spanish, 2 cargoes at 67s and 68s per 480 lbs; on passage, soft Sicilian at 62s 6d per 492 lbs. Maize, on passage, Galatz at 41s; to be shipped in March, Foxanian at 40s, both per 492 lbs. Barley, arrived in London, Danube at 30s per 400 lbs. Beans, on passage, direct to London, at about equal to 38s 6d per imperial quarter. No arrived cargoes now remain for sale.

The London averages announced this week are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market opened with a steady demand from the grocers, and the public sales on Tuesday went off well at full prices. Subsequently there was less disposition shown to buy some descriptions, yet the importers generally maintained a firm position. A parcel of soft Cuba, from America, went cheap for low to middling descriptions. The sales of West India to yesterday (Thursday) evening reached 1,140 casks, several parcels being offered by auction. Barbadoes, 37s 6d to 44s; grainy Demerara, 37s 6d to 44s; Jamaica, 36s 6d to 41s 6d per cwt for heavy brown to good middling yellow. The deliveries have not improved, and amounted to 3,225 tons last week, being about 230 tons in excess of the landings, consequently the stock, according to the returns made up to the 12th inst., had fallen to 50,650 tons, against 54,400 tons in 1860 at the corresponding date.

Mauritius.—By auction, 17,120 bags about two-thirds found buyers at full rates: grainy sorts, grey to fine yellow, 39s to 44s; 16s duty, 46s to 46s 6d; crystallised, 41s to 44s; soft grey and yellow, 37s 6d to 40s 6d; brown, 34s to 37s per cwt.

Bengal.—1,988 bags met with ready buyers: Ballam and Cossipore, 43s to 44s 6d; Gurpatta date, 39s 6d to 41s; syrups, 41s 6d to 42s. 2,000 bags low brown sorts sold privately at 32s 9d per cwt.

Madras.—420 bags grocery brought 43s 6d to 44s; 149 bags brown native, 33s to 34s per cwt.

Siam.—6,600 bags were chiefly disposed of, at and after the sale: yellow and white, 40s 6d to 44s; soft greyish, 38s to 40s; strong white (16s duty), 45s 6d per cwt.

Foreign.—473 casks Cuba, including some of indirect import, went at 36s 6d to 41s, with a small portion of light grocery at 42s to 43s. 228 casks Porto Rico: brown, 38s 6d to 40s; yellow, 40s 6d to 44s 6d. 700 boxes Havana afloat, No 11½, have sold at 27s 6d for a near port.

Refined.—The market remains without change, and there has been a moderate amount of business done. Low to middling goods may be quoted 50s 6d to 51s 6d; crushed, 48s 6d to 49s 6d per cwt.

MOLASSES.—No sales are reported.

RUM.—A steady business has been transacted this week. Demerara 1s 10d to 2s for puncheons, according to quality; 1s 10d for Berbice and 1s 9½d per gallon for proof Leewards. Several contracts have been made in Jamaica.

COCOA.—30 bags Trinidad, by auction, were chiefly sold: grey and middling mixed red, 63s 6d to 67s 6d; good red, 75s per cwt.

COFFEE.—The market presents rather a firmer aspect this week, and the public sales of plantation Ceylon have gone off steadily at 6d to 1s advance, 516 casks 621 barrels and bags chiefly finding buyers at 65s 6d to 78s for fine ordinary and small berry to good coloury. A few contracts have been made in native, by private contract, at previous rates. 56 packages long berry Mocha were withdrawn at 120s per cwt, being above the value.

TEA.—The public sales concluded on Monday, when 1,533 packages sold at former rates. On Wednesday and yesterday, further sales of 7,250 packages were held, including 3,000 packages of Assam and 4,248 packages China and Japan, the bulk of which sold at full prices. By private contract, the transactions have been limited; but the market shows greater steadiness than of late.

RICE.—This article continues firm, and the demand for soft grain descriptions to arrive is very active. Privately, a few parcels have sold, including good Necrancie Arracan at 11s 6d; pinky Madras, 11s 7½d cash; old Rangoon, 10s 3d to 11s; and white Bengal at 12s 6d to 13s 3d. Considerable transactions are reported in Necrancie Arracan to be shipped next spring, at 11s 6d. Three floating cargoes of Necrancie Arracan have been sold at 11s 6d to 11s 9d 600 tons cargo Bengal, at 11s per cwt, ex-ship. The clearances last week were smaller than for some time past; yet the stock at the close was reduced to 32,430 tons, against 70,220 tons in 1860, and 86,000 tons in 1859, at the corresponding period.

SALTPETRE.—Some few orders have been executed in Bengal, at 35s to 38s 3d, for refraction 10 to 3 per cent.; and the low Bombay bought in last week found purchasers at 31s 6d to 32s. The deliveries last week were only 113 tons, and the stock amounts to 3,915 tons, against 3,810 tons last year, 3,000 tons in 1859, and 6,620 tons in 1858.

SAGO.—900 boxes good small grain sold at 18s 6d to 19s. Sago flour has advanced to 17s 3d per cwt.

INDIGO remains firm at the advance lately established, and the stock of 12,870 chests East India is far below the average of preceding years. The next quarterly sale will commence on Tuesday, the 12th proximo, and only 2,209 chests were declared this morning.

INDIA RUBBER.—Fine Para is firm at 1s 11d per lb.

METALS.—Few changes have occurred in this market since last Friday. Manufactured iron is dull, and Scotch pig last sold at 49s per ton for mixed Nos. The most prominent feature of the week has been the business done in spelter, viz., several hundred tons on the spot and a spring shipment at 18*l* 10s to 18*l* 15s per ton. Lead is steady. Copper dull. A small sale of good Straits tin has been made at 127s, but the demand is still inactive.

JUTE.—There were only 300 bales offered by auction on Wednesday, which sold at about former rates, viz., from 14*l* 7s 6d to 16*l* 10s per ton, and there is not much business doing by private contract.

HEMP.—Manilla meets with partial inquiries at the recent decline, Petersburg clean is quiet at 32*l* 10s to 33*l* per ton.

LINSEED.—Extensive supplies continue to arrive from the East Indies. Floating parcels of Calcutta quoted 57s to 57s 6d; Black Sea and Azoff, 57s 6d. A cargo of Berdianski has sold for the Continent at 56s 9d per quarter.

TURPENTINE.—American spirits have sold at 31s per cwt. No sales of rough reported.

OILS.—Sperm continues to realise 104*l* to 105*l*. Common fish oils are inactive. Olive firm, but rather quiet: Gallipoli, 61*l* 10s; other kinds, 56*l* 10s to 59*l*. Cargoes of Gallipoli have sold at 60*l* to 61*l* 10s per tun for Cronstadt. Linseed still meets with few inquiries for export, but consumers appear more inclined to operate at 28s, and 28s 3d is now demanded. Notwithstanding the large consumption and moderate prices, rape oil is rather lower, owing to forced sales: foreign refined, 44s; brown, 40s to 40s 6d. Cocoa-nut is quiet, in the absence of export business: Cochin, 54s 6d to 55s; Ceylon, 52s 6d to 53s; for arrival, considerable business is reported at 50s and 51s 6d respectively. Palm is scarce at 47s per cwt.

TALLOW.—Prices of foreign for early delivery receded about 6d at one period this week, Y. C. on the spot touching 59s 6d. Latterly the market has become firmer. This morning, Petersburg Y.C. was quoted 59s 9d to 60s; April to June, 58s 6d; October to December, 57s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, January 14.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was firmer to-day, and the public sales, which comprised 12,564 bags Mauritius, 13,278 bags Bengal, and 1,194 bags grocery Madras, went off at full rates to 6d per cwt advance, a considerable portion finding buyers. There were only 286 casks West India sold, making 1,725 casks for the week.

COFFEE.—479 bags Singapore ranged from 53s 6d to 62s 6d for low to good ordinary. 75 casks 94 barrels and bags plantation Ceylon sold upon rather higher terms, especially for the better descriptions.

COCOA.—A small parcel Guayaquil sold at 66s 6d per cwt.

PEPPER.—150 bags Penang realised 3¾d per lb.

COCHINEAL.—275 bags Honduras went at extreme rates to a slight advance.

SAFFLOWER.—84 bales Bengal sold at 3*l* 12s 6d to 6*l* per cwt.

CUTCH.—Common quality partly sold at 23s to 23s 6d per cwt.

OILS.—Cocoa nut sold by auction as follows: Cochin, 52s 9d to 54s 6d; Ceylon bought in at 53s; Sydney sold at 46s 6d to 46s 9d. 440 casks palm were bought in at 47s per cwt. 72 tuns sperm went at 105*l* to 105*l* 5s per tun.

TALLOW.—Town unaltered. 121 casks Australian, by auction, part sold at 58s to 58s 3d. 284 casks Odessa part sold at 58s to 60s 3d; East India, 56s 3d to 57s 3d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The refined market remains steady; some few sales have been made in crushed at 35s 6d for export. The Dutch market presents no new feature.

GREEN FRUIT.—A depressed market, caused by the continuance of severe weather. Oranges do not improve in value. Some cargoes St Michael, Terceira, and Sicily, sold by Keeling and Hunt at public sale, went at the reduced prices obtained last week. Nuts of all kinds in better demand, without alteration in value. The first cargo Seville sours to hand, and realised a high price; a moderate demand for sours.

DRY FRUIT.—With the exception of a few public sales this week, there have not been any signs of animation in fruit. At the sales only a few damaged Chesme raisins sold at slightly easier rates. Currants are firm. The only demand is for 26s sorts, which are not plentiful. A good trade is anticipated when the frost breaks up.

ENGLISH WOOL.—Very little doing. Prices, where sales are pressed, in favour of buyers.

COLONIAL WOOL.—The market is without change.

FLAX.—Very firm.

HEMP.—Very dull. No transactions to report this week.

COTTON.—Sales of cotton wool from Friday, 11th Jan., to Thursday, 17th, inclusive:—8,000 bales Surat, at 4¾d to 5d for ordinary to middling Oomrawattee: 4¾d to 5¼d for ordinary to good fair Verawul; 5d to 5¼d for ordinary to good fair Broach; 5¾d for fair sawginned; 5⅞d to 5½d for fair to fully fair Dhollera; 800 bales Western Madras, at 4⅞d and ¾d to 5d for middling fair to good fair; 1,500 bales Tinnivelly, at 4¾d to 6d for middling to good fair. A brisk demand has prevailed throughout the week, and an extensive business has been transacted at an advance of ¼d to ½d per lb, the market closing with great firmness. P.S.—Market firm. Sales 500 bales, at full prices.

SILK.—The silk market affected by political and financial difficulties. Very little doing; prices with a downward tendency.

TOBACCO.—A slightly improved demand has been experienced for home trade descriptions, and a few sales were effected at present quotations. Market firm and steady.

LEATHER AND HIDES.—Not any alteration can be quoted in prices of leather during the past week. The demand has been of a moderate character, embracing all kinds of goods, but without any very important transactions. Good English butts, 24 lbs and upwards, were the only article of which the supply at Leadenhall, on Tuesday, was not adequate to the demand, although the state of the weather prevents large arrivals of any fresh goods.

METALS.—There is no rally in metals. Copper is steady in English, but foreign uninquired for. Ores again rather lower in price. Iron continues in slack demand. Tin has found no increased demand from the late reduction in prices. Spelter has been largely done in during the week, but we fear that much has been merely the change of hands from one speculator to another. Lead is without change. Tin plates continue depressed.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	61	9
Fat by ditto	3	2½
Yellow Russian	61	6
Melted stuff	43	0
Rough ditto	26	0
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

THURSDAY, Jan. 17.—Although the supply of beasts on offer to-day was very moderate, the demand for all kinds was in a sluggish state, at Monday's decline in the quotations. The show of sheep was very limited; nevertheless the mutton trade was heavy, at a fall in prices of 2d per 8 lbs. The best old Downs sold at 5s 10d per 8 lbs. The few calves in the market were taken off freely at quite Monday's currency, the top figure being 5s 4d per 8 lbs. There was very little business doing in pigs, and the quotations had a drooping tendency. Milch cows were very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	2	3	6	Prime Southdown sheep	5	6	5	10
Second quality ditto	3	8	4	2	Large coarse calves	4	4	4	10
Prime large oxen	4	4	4	6	Prime small ditto	5	0	5	4
Prime Scots, &c.	4	8	4	10	Large hogs	3	10	4	4
Coarse and inferior sheep	3	6	3	8	Small porkers	4	6	5	0
Second quality ditto	3	10	4	4	Suckling calves.....each	19	0	22	0
Prime coarse-woolled do.	4	8	5	4	Quarter old store pigs	22	0	29	0

Total supply—Beasts, 950; sheep and lambs, 1,971; calves, 80; pigs, 200.
Foreign supply—Beasts, 135; sheep, 320; calves, 40.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Thursday, Jan. 17.—The supplies of potatoes continue limited, owing to the severity of the frost. Since our last report the arrivals coastwise and by rail have been unimportant, and the demand is limited in consequence of the high prices now current for sound potatoes:—York Regents, 160s to 180s; ditto Flukes, 160s to 180s; Scotch Regents, 140s to 170s; ditto Cups 120s to 140s; ditto Rocks, 120s to 130s per ton.

SOUTHWARK WATERSIDE, Monday, Jan. 14.—In consequence of the frost there have been but few arrivals at the Waterside and limited by rail. Prices have advanced accordingly; the following are this day's quotations:—Yorkshire Flukes, 165s to 175s; Lincolnshire Regents, 110s to 130s; Dunbar red soil do., 180s to 190s; North Berwick do., 130s to 140s; Perth, Forfar, and Fife do., 120s to 130s; ditto, ditto, ditto Reds and Rocks, 110s to 120s; French whites, 95s 105s; Belgian do., 90s 95s; Dutch do., 85s to 90s per ton.

HOP MARKET

BOROUGH, Monday, Jan. 14.—We have no material alteration to report in our market. The demand for yearlings continues steady, and their improved value is firmly maintained. In the new growth there has been more inquiry, but the sales effected have been very limited.

FRIDAY, Jan. 18.—We have to report a steady demand for consumption for yearlings, and the best grown samples of the new growth, at firm rates.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 10s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 10s to 2*l* 0s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 10s to 5*l* 15s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 10s to 2*l* 2s per load. A slow trade.

WHITECHAPEL.—Meadow hay, 2*l* 5s to 5*l* 10s; clover, 3*l* 10s to 5*l*; and straw, 1*l* 10s to 2*l* 0s per load. Trade less active.

COAL MARKET.

FRIDAY, Jan. 18.—Wall's-end Lambton 25s—Russell Hettons 24s—Framwellgate 23s 6d—Bell's Primrose 18s—Merthyr Dare 23s—Buddle's Hartley 17s 6d—Bebside Hartley 17s 6d—Davidson's Hartley 17s 6d—Howard's Hartley 17s 6d. 45 ships at market.

LIVERPOOL MARKETS.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 18.—To-day's market well attended. Wheat only retail demand at Tuesday's prices. Flour rather more inquiry. Indian corn mixed, 38s to 38s 3d. Other sorts unchanged. Beans steady. Oats and oatmeal dull sale at unchanged prices.

The Gazette.

TUESDAY, Jan. 15.

BANKRUPTCY ANNULLED.

H. Redgate, Nottingham, lace manufacturer.

BANKRUPTS.

J. Crook, Winckworth place, City road, indiarubbia web manufacturer.
V. Faelli, Crutchedfriars, and Alie place, Goodman's fields, shipbroker.
W. Blundell, New Broad street, dentist.
W. Allanson, late of Castle street, Holborn, Australian merchant.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 5th of January amounted to 447,756*l*, and for the corresponding week of last year to 447,684*l*, showing an increase of 72*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 191,942*l*, and for the corresponding week of 1860 to 196,034*l*, showing a decrease of 4,092*l*.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Jan. 14.—The railway market was dull, on the apprehension of a decline in the traffic through the derangement of trade by the American crisis and the rise in the value of money. No material change, however, took place to-day. The general transactions were limited, the fortnightly settlement, which commenced this morning, chiefly attracting attention. The stocks most supplied were Midland and Berwick, while London and North-Western was comparatively scarce from investments. American securities again improved on the better commercial accounts from New York, the principal rise being in the shares of the New York and Erie and Illinois Central. The highest prices, however, were not maintained, Erie closing at 32¾ to 33¼. Mines were dull at an occasional decline. Joint stock banks were quiet, but firm. In miscellaneous descriptions, there was another rise in Australian Agricultural.

TUESDAY, Jan. 15.—The railway market was dull all day, and closed with a heavy tendency, owing to an increased supply of some stocks, especially of Midland and North-Eastern. Although the present prices were for the new account they showed a decline of ¼ per cent. in Midland, about ¼ in York and North Midland, South-Eastern, Great Northern, and Caledonian, and ½ in Lancashire and Yorkshire and Eastern Counties. In colonial descriptions there were no changes of importance: Great Western of Canada shares were last quoted 10⅜ to ½; Grand Trunk stock, 21¾ to 22¼; ordinary bonds, 45 to 47; and preference, 71 to 73. The foreign market was quiet, the only alteration being a decline in South Austrian and Lombardo-Venetian. American securities remained steady at the late rise. There was rather more business in mines, and, in some instances, an improvement took place. Joint stock banks closed the same as yesterday. In miscellaneous descriptions, Electric Telegraph stock was firmer, while Australian Agricultural and Canada Land declined.

WEDNESDAY, Jan. 16.—In the railway market, this morning, there was a general disposition to press sales, and in all the principal stocks a decline consequently took place. Late in the afternoon, however, a recovery occurred from purchases to cover previous operations for the fall. The final quotations were, in most cases, only a fraction lower than yesterday. In the colonial market, Indian guaranteed stocks were rather dull. Canadian declined, Great Western closing at 10¼ to ⅜, and Grand Trunk, 21¼ to ½ the stock, 44 to 46 the ordinary bonds, and 71 to 73 the preference. The principal movement in foreign railways was a recovery late in the day in South Austrian and Lombardo-Venetian to 1¼ to ⅝ dis. In American securities, Illinois Central and New York and Erie shares relapsed. Mines were quiet but steady. English, Scottish, and Australian Chartered Bank shares were higher. In miscellaneous descriptions, Van Diemen's Land advanced.

THURSDAY, Jan. 17.—The railway market was flat nearly the whole day, a temporary recovery in the afternoon being soon lost. The depression was caused by a falling off in the traffics, and the prospect that the future returns will show a further diminution, owing to their being compared with large receipts last year. Midland was likewise prejudiced by some influential bona fide sales, and left off 1 per cent. lower. Colonial descriptions were firmer, especially Canadian, Atlantic and St Lawrence, however, receded. Grand Trunk left off at 21¼ to 22; the ordinary bonds, 45 to 47; preference ditto, 71 to 73; and Great Western shares, 10⅜ to ½. In the foreign market, South Austrian and Lombardo-Venetian relapsed to 1⅛ to ¼ dis.

FRIDAY, Jan. 18.—The reduction to-day amounted to 1 per cent. in Lancashire and Yorkshire stock, ⅝ per cent. in Midland, ¾ to ½ per cent. in Great Western and Caledonian, and about ½ per cent. in most of the other leading stocks. South Eastern was comparatively steady. London and North-Western stock was quoted 99½ to 100; Great Western, 71¾ to 72¼; Lancashire and Yorkshire, 115½ to 116; Midland, 132½ to 133; Caledonian, 96 to ½; South-Eastern, 85½ to ¾; and Eastern Counties, 51 to ½. In mining shares, very little was done. Compared with yesterday, however, very little change took place in the quotations.

KEATING'S COD LIVER OIL.

Just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

HEALTH AND HAPPINESS for the NERVOUS and DEBILITATED.—The proprietors of the Birmingham Institute of Anatomy desire to make known an infallible means of self-cure for the nervous, debilitated, &c., and will forward the same gratuitously on receipt of a *stamped* directed envelope.—Address "To the Secretary, Institute of Anatomy, Birmingham."

NO MORE PILLS OR ANY other Physic.—*For* Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DR BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; *Dr* Harvey; Dr Wurzer Dr Shorland; *Dr* Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies. ——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Ridlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, *Surrey*, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

FREE ISSUE.

Notice.—The following invaluable works have just been published, and are now being issued gratis to all who enclose two stamps for postage, to No. 27 Alfred place, Bedford square, London.

DR WATSON'S NEW MEDICAL ESSAYS on Nervous and Physical Debility, with their easy Detection and Self Cure. Lately discovered and now made public by the author, with cases and diagrams, showing the connection between the brain and other organs. Also prescriptions and other appropriate remedies for the self-treatment and cure of those special diseases, and whether acquired in youth, manhood, or old age. By Dr Watson, F.R.A.S., London, Member of the Medical Society of Rouen, the National Academy of Sciences, Paris, and Fellow of the Imperial Institute of France, &c., &c. (vide Diplomas and Medical Directory).

FREEDOM FROM COUGH IN TEN MINUTES is insured by DR LOCOCK'S PULMONIC WAFERS. Extract of a letter from Mr Morris Banks, Chemist, 3 High street, Birmingham. "Gentlemen,—I have much pleasure in stating that I do not remember keeping a remedy for coughs, asthmas, &c., that sold so freely, or gave such general satisfaction. I am, M. BANKS." DR LOCOCK'S PULMONIC WAFERS give instant relief and a rapid cure of asthma, consumption, coughs and all disorders of the breath and lungs. To Singers and Public Speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists.

HOLLOWAY'S OINTMENT AND PILLS.—Vigilance Rewarded.—With the damp foggy cool mornings and evenings the *weak in* constitution find out their feeble points, and well were it for them if they applied early treatment for invigorating them. Is the chest affected? Rub Holloway's Ointment well twice a day upon that organ, take his Pills in conformity with their accompanying "rules" the disease disappears, and with it future danger flies. Is the liver sluggish? The Pills unaided will rouse it to its healthful activity, or, if long inactive, use the Ointment. Is irregularity of any particular function the disorder? Consult Holloway's instructions for using his medicaments, and regulate by their timeful application. They will benefit, and can do harm in no case.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE's Two-Hole Black Pens, 46 King William street, London bridge."

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition, NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills."—TIMES.

Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.

London: J. Churchill, and to be had of all booksellers.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either from the publisher, J. Allen, 20 Warwick-lane; or from the author's address, 17, Harley street, Cavendish-square, London.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by MANN, 39 Cornhill, or direct from the Author.

DR LA'MERT ON SPERMATORRHŒA; an Original Essay on the Treatment and Cure of Nervous and Physical Debility, resulting from pernicious habits contracted in youth, excesses in manhood, or residence in tropical climates. With cases and engravings from life, representing the various organs in health and disease.

CONTENTS.

SECTION I.—The Physiology of the Generative Organs.

SECTION II.—Puberty — Manhood — The Morale of Generative Physiology—True and False Morality.

SECTION III.—Marriage in its Moral and Physical Relations—Happy and Unhappy Unions—How to secure Healthy Offspring.

SECTION IV.—Youthful Abuse—The Secret Causes of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.

SECTION V.—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences—The Sterility of Age,

Dr LA'MERT, Honorary Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., is the only legally qualified practitioner who, for 20 years, has devoted his attention to the treatment of these disorders, which are so frequently aggravated by the unskilfulness of ignorant empirics, either self-styled physicians or surgeons, sometimes assuming names of eminent medical men, &c. At home for consultation daily, from Ten till Two, and from Six till Eight.

37 Bedford square, London.

TO THE NERVOUS AND DEBILITATED.

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.

CHAPTERS V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion.

Mr CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by J. Allen, 20 Warwick lane, Paternoster row, and Mann, 39 Cornhill, London.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

DR BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates, Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Prout, 229 Strand, &c., &c.

Just published, gratis, or post free for one stamp, to be had of all agents, and at 22 Newman street. Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton cresent, Tavistock square, London, W.C.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

CANDLES, SOAPS, OILS, AND NIGHT LIGHTS of all kinds. Five pounds worth sent free by railway.—WHITMORE and CRADDOCK, 16 Bishopsgate street within, London, E.C. (Lists of prices on applications.)

HEAL AND SON'S EIDER-DOWN QUILTS, from One Guinea to Ten Guineas. Also GOOSE DOWN QUILTS, from 8s 6d to 24s. List of prices and sizes sent free by post. Heal and Son's Illustrated Catalogue of Bedsteads and Priced List of Bedding, also sent post free.
196 Tottenham Court Road, W.

VOLUNTEER PIPE.—RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 2s stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

JULLIEN FUND.
Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same ime afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchell	Mr W. Duncan Davison
Mr W. R. Sams	Mr Jules Benedict
Mr Thomas Chappell	Mr A. Blumenthal

HONORARY TREASURERS.

EXTRAORDINARY CURES for Rheumatic Gout, Epilepsy, Palsy, Chest Sores, Consumption, Obstinate Sores, Ulcers, Cataract, &c., through the only remedial agents of nature—Electricity and Magnetism, by Dr J. Jankowski, 11 Bedford street, Bedford square, between 11 and 4 p.m. daily.

STRENGTH AND HEALTH WITHOUT MEDICINE.

One of the most delicious preparations of the present day, and warmly recommended by all the first physicians, is the

LENTILLA PURA,

obtained from the celebrated vegetable Pulse called 'Ervalens' (or Lentils), and combined with other pure ingredients so as to form a delicious, feeding, and strengthening compound. It is a food fitted for all persons, whether in health or sickness, and is admirably adapted for infants and young children. Constipation, and its numerous maladies, including indigestion, debility, coughs, &c., &c., are wholly averted by the use of the LENTILLA PURA. Testimonials from patients, and the first physicians and surgeons of the day. This celebrated food is sold in canisters, viz.: 1 lb at 2s; 2 lbs at 4s. All is super-refined in purity.

Sent on receipt of P. O. Order, by Theodore Pliny, Brooksby street, Barnsbury, N.
Sold by grocers and chemists.

TRUSTEES, SOLICITORS, AND OTHERS desiring to meet with a well-secured Investment for Money, yielding a liberal Rate of Interest, the principal sum being withdrawable on short notice, may do so by communicating with THOMAS H. BAYLIS, 429 Strand, London.

RIMMEL'S PERFUMED VALENTINE of the LANGUAGE of FLOWERS, beautifully illustrated, price 1s; by post for 14 stamps. Rimmel's new Perfume for the ball-room, the Magenta, price 2s 6d. Sold by all the trade.—Rimmel, Perfumer to Her Majesty, 96 Strand, and Cornhill, London; and at 17 Boulevard des Italiens, Paris.

FINE TEA CHEAPER.

STRACHAN & CO.'S justly celebrated DRAWING ROOM TEA is now reduced to 4s per lb. Guaranteed the Finest and Cheapest Tea in the United Kingdom.
26 Cornhill, London, E.C.

THROUGH 500 AGENTS Mr THORLEY is giving a circulation to "Thorley's Agricultural Gleaner," unsurpassed by all the other agricultural papers of the day.—77 Newgate street, City.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Dr Lankester, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Sir Henry March, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure oil, not likely to create disgust, and a therapeutic agent of great value."

Dr Lawrance, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr Stavely King, Physician to the Metropolitan Free Hospital.—"I have employed Dr de Jongh's Oil with great advantage in cases of mesenteric and pulmonary tubercle, and in the atrophic diseases of children."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE AGENTS,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged.

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.
THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

MEDITERRANEAN EXTENSION TELEGRAPH COMPANY (Limited), Gresham House, Old Broad street, London, January 18, 1861.

Notice is hereby given, that the next Ordinary Half-yearly General Meeting of this Company will be held at the London Tavern, Bishopsgate street, within the City of London, on Thursday, the Seventh day of February next, at One o'clock, for the purpose of the genera business of the Company.—By order,
HENRY C. ORTON, Secretary.

SALE OF LAMPS, CHANDELIERS, AND GAS FITTINGS.

TUCKER and SON having purchased of Messrs Pearce and Son (of Ludgate hill) their entire stock of Lamps, Gas Chandeliers, &c., (on their relinquishing that branch of their business to devote exclusive attention to the China and Glass Trade) have distributed it among their three Show Rooms as under; and being good of first-rate quality, and offered to the public at a reduction of one-third from their usual price, to insure their immediate realisation, they must command the attention of purchasers.

City Show Rooms, 36 King William street (4 doors from London Bridge); Central do., 190 Strand (opposite St Clement's church, and near Temple Bar).

TUCKER and SON—Established 43 years.
Manufactory, Essex Works, W.C.—November, 1860.

DUTY OFF MODERATOR LAMPS.—J. Schlossmacher's celebrated Manufacture. Burner of every Lamp stamped J. S. The duty being now off, and J. S. being enabled by machinery to reduce the prices of his Lamps to the charges of other makers for their commonest qualities, the full benefit of both reductions is given to the public through his London Agents, TUCKER and SON, at their Establishments, as under:—

Central Show Rooms, 190 Strand (near Temple Bar); City Show Rooms, 36 King William street (4 doors from London Bridge). Established 43 years.
Engravings free by Post.

EXTRACTS FROM THE PRESS referring to the new Branch establishment of E. MOSES and SON, at the corner of Tottenham Court road and Euston road.

"Upon each floor there are several apartments called the 'trying-on rooms,' affording customers an opportunity of avoiding the guess-work which has hitherto prevailed in ready-made emporiums, and everywhere immense mirrors are placed in which the buyer may satisfy himself with the fit and shape of the garment which he proposes to purchase."—STANDARD.

"On the whole, the new establishment of Messrs Moses and Son is decidedly the most complete of the class in the metropolis."—MORNING HERALD.

"The whole exterior of the building presents a noble aspect. It combines an appearance of lightness and solidity, grace, and strength."—ILLUSTRATED NEWS OF THE WORLD.

"The interior arrangements are in a corresponding scale of elegance, whilst convenience and comfort have not been lost sight of.....Nothing, in fact, that goes to constitute the completeness of an organised whole can be said to be omitted."—DAILY NEWS.

"Like skilful logicians, they laid down the solid premises of their trade syllogism in the Minories; they next constructed their middle term in Oxford street; they have just now brought out their conclusion to Tottenham Court road."—EXPRESS.

TWENTY-FOURTH REPORT OF THE DIRECTORS OF THE

COMMERCIAL BANK OF LONDON,

for the Half-year ending December 31, 1860.

At a Half-yearly General Meeting of the Shareholders, held at the Banking house, Lothbury, on Tuesday, the 15th January, 1861.

DIRECTORS.

Mark Hunter, Esq., Chairman.

John Alfred Chowne, Esq.	Sir Joseph Paxton, M.P.
James Clay, Esq., M.P.	Robert Stacey Price, Esq.
George Clive, Esq., M.P.	Herbert Taylor, Esq.
Jonathan Hopkinson, Esq.	Joseph Thompson, Esq.
William Jackson, Esq., M.P.	Thomas Winkworth, Esq.

MANAGER—Mr Alfred Richard Cutbill.

SOLICITORS—Messrs Upton, Upton, and Johnson, and Messrs Norris and Son.

Present—Thirty-five Proprietors.

The advertisement calling the meeting was read, and afterwards the following

REPORT.

The Directors present the balance-sheet for the half-year last passed, which the proprietors will see exhibits a net unappropriated profit of £17,109 11s 1d, after providing for bad and doubtful debts, and paying all the charges of management.

This enables the Board to declare a dividend at the rate of £8 per cent. per annum, on the paid-up capital of the Company for the six months ending on the 31st of last December, free of income tax.

The balance of £517 5s 5d will then remain, after allowing £4,592 5s 8d for rebate on bills not yet due, to be carried to the credit of the current half-year.

The dividend will be in course of payment on and after the 28th inst.

Jan. 15, 1861.

The report and balance sheet having been read, it was resolved "that the report and balance sheet just read be approved, printed, and circulated amongst the proprietors."

The Chairman, John Alfred Chowne, Esq., on the part of the Directors, declared a dividend on the paid-up capital of the Company at the rate of £8 per cent. per annum for the past half-year, free from income tax, payable on and after Monday, the 28th instant.

Resolved—That the thanks of this meeting be presented to the Chairman and Directors for their attention to the affairs of the bank during the past half-year.

Resolved—That the thanks of the shareholders be given to the Manager, Mr Cutbill, and the other officers of the bank.

JOHN ALFRED CHOWNE, Chairman.

COMMERCIAL BANK OF LONDON.—The Directors hereby give notice, that a Dividend on the paid-up capital of the Company, at the rate of £8 per cent. per annum, for the half-year ending 31st Dec., 1860, free from income tax, will be payable at the Banking house in Lothbury, on and after Monday, the 28th inst.—By order of the Board,

A. R. CUTBILL, Manager.

Dated Jan. 15, 1861.

CHUBB'S PATENT SAFES—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

SOYER'S SULTANA SAUCE Relish, Succulante, Aromatic Mustard, &c.—These excellent preparations, of which the LANCET, in its sanitary analysation of Articles of Food, reported so favourably of their purity and wholesomeness, are to be obtained of all grocers and Italian warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes, impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE and BLACKWELL, Purveyors to the Queen, 21 Soho square, London.

TWENTY-FIFTH REPORT OF THE

UNION BANK OF LONDON.

—At a Half-yearly Meeting of the Proprietors, held at the Court Room of the Banking House, 2 Princes street, Mansion House, on Wednesday, the 16th of January, 1861, P. Northall Laurie, Esq., in the chair, the following report was read by the Secretary:—

The Directors have the pleasure of reporting that the net profits of the Bank for the six months ending 31st December last, being the first half of this Bank's financial year, after payment of all charges, and including the sum of £69,855 9s for interest paid and due to customers on their current and deposit accounts, and making ample provision for all bad and doubtful debts, amount to £63,063 19s 8d, which, with the sum of £3,406 18s 4d, brought forward from the 30th of June last, leaves for appropriation £66,470 18s.

The Directors now declare a dividend of 12s per share, clear of income tax, for the six months ending 31st December last, amounting to the sum of £36,000, which will leave a balance of 30,470 18s of undivided profit, to be carried forward.

The Directors greatly regret that W. Scott Binny, Esq., has been obliged, by impaired health, to resign his seat in the Direction; and, in accordance with the deed of settlement, they have elected John Gilchrist, Esq., a duly qualified proprietor, to supply the vacancy.

THE UNION BANK OF LONDON,

For the Half-year ending 31st December, 1860.

PROFIT AND LOSS ACCOUNT.

	£	s	d
Amount of dividend of 12s per share	36,000	0	0
Balance, being undivided profit carried forward to next half-year	30,470	18	0
	66,470	18	0
Profit unappropriated on 30th June, 1860	3,406	18	4
Amount of net profit of the half-year ending 31st December, 1860, after deducting all expenses, and interest paid or due (£69,855 9s), allowed to customers on their current and deposit accounts	63,063	19	8
	66,470	18	0

The Chairman then declared a dividend for the past half-year of 12s per share, clear of income tax.

It was resolved unanimously—

That the report now read be agreed to, printed, and circulated among the proprietors.

That the best thanks of the meeting be given to Sir Peter Laurie, the Governor; the Deputy-Governor; and the Directors; for their judicious management of the Bank during the past half-year.

That the thanks of the meeting be given to Mr W. W. Scrimgeour, the General Manager; Mr Barton, the Deputy-Manager; Mr Ingpen, the Manager of the Regent Street Branch; Mr St Barbe, the Manager of the Charing Cross Branch; Mr Beattie, the Manager of the Temple Bar Branch; and to Mr Newmarch, the Secretary, for the zealous and efficient manner in which they have discharged their several duties.

(Signed) P. NORTHALL LAURIE, Chairman.

That the thanks of the meeting be given to P. Northall Laurie, Esq., for his conduct in the chair this day.

(Signed) JAMES FARQUHAR, Deputy-Governor.

Extracted from the Minutes.

HENRY NEWMARCH, Secretary.

N.B. The dividend and bonus will be payable on and after Monday, the 21st instant.

FORD'S EUREKA SHIRTS.—Patterns (post free) of the New Fancy Flannel, including the various mixtures in the new colour called MAGENTA, a perfectly fast colour, although so brilliant, and may be had woven with Black, Drab, or Grey, suit various tastes.

Illustrated Catalogues for 1860, by post for two stamps.—J. W. ALLEN, Manufacturer of Officers' Barrack Furniture and Military Outfitter (see separate catalogue), 18 and 22 Strand London

BANK OF NEW SOUTH WALES.

The Twentieth Half-yearly Meeting of the shareholders of this Bank was held at the Banking house, Sydney, on Wednesday, the 24th day of October, 1860, Sir Daniel Cooper, President, in the chair,

The following Report of the Board of Directors was read and unanimously adopted:—

"The Directors have the pleasure to submit to the Proprietors the accounts for the half-year ended on the 30th of September, and congratulate them that, notwithstanding the untoward state of mercantile affairs in the colonies, they are in a position to submit the following favourable result of the bank's operations during that period:—

	£	s.	d.
The undivided balance of the 31st of March was	3,277	4	0
To which is to be added:—			
The profits, after deducting rebate on current bills, allowing interest on deposits, paying all expenses of management, and providing for bad and doubtful debts	55,239	7	1
Leaving for distribution	58,516	11	1
Which the Directors recommend to be applied as follows:—			
To payment of dividend on capital paid up to date, at the rate of 15 per cent. per annum £55,954 15 0			
Balance carried to present half-year 2,561 16 1			
	58,516	11	1

"The Candidates for the office of Director, in the room of James Henderson, Esq., who retires by rotation, are—the Hon. George Allen, M.L.C., and Robert Allen Hunt, Esq. It will, therefore, devolve upon this meeting to elect one of these gentlemen to fill the vacant seat.

"It will further be the duty of the Meeting to elect an Auditor, in the room of R. A. Hunt, Esq., who retires at this time.

"An agency of the Bank has been opened at Toowoomba, Queensland, and the Directors advise the continuance of authority to establish branches or agencies where they may be deemed advantageous.

"The dividend will be payable at the Head office to-morrow, and at the branches on receipt of advice.

"For and on behalf of the Board of Directors,

"DANIEL COOPER, President."

A vote of thanks to the President and Directors for their able management of the affairs of the bank was unanimously passed.

BANK OF NEW SOUTH WALES.

Established 1817.

Notice is hereby given, that at a Half-yearly General Meeting of Proprietors, held within the Head Banking House of the Corporation, at Sydney, on the 24th day of October last, a Dividend on the capital stock of the Bank was declared at the rate of 15 per cent. per annum. The same will be payable at this office, on and after Wednesday, the 16th instant, on the Capital Stock standing on the London Register. The Share Register will be closed from this date to the 17th instant.—By order of the London Board,

JOHN CURRIE, Secretary.

37 Cannon street, London, 12th January, 1861.

FORTY-SEVENTH REPORT OF THE

LONDON JOINT STOCK BANK.—

At a General Meeting of the Shareholders, held at the Banking House of the Company, in Princes street, Mansion House, on Thursday, the 17th January, 1861,

Francis Bennett Goldney, Esq., Chairman.

Philip William Flower, Esq., Deputy-Chairman.

DIRECTORS.

William Bird, Esq.	Donald Larnach, Esq.
William Blount, Esq.	Henry Lee, Esq.
Henry Christy, Esq.	John George Maclean, Esq.
Francis J. Delafosse, Esq.	Sir John M'Taggart, Bart.
Ald. Sir J. Duke, Bt., M.P.	Ambrose Moore, Esq.
Philip W. Flower, Esq.	John T. Oxley, Esq.
Francis B. Goldney, Esq.	George Pollard, Esq.
Charles J. Heath, Esq.	John Joseph Silva, Esq.
Wm. J. Lancaster, Esq.	George Tayler, Esq.

THE MANAGER—Fleming Hewett, Esq.

SOLICITORS—Messrs Clarke and Morice.

The following Report was presented:—

It will be seen by the annexed statement of accounts that, including the sum of £24,534 13s 9d, brought forward from the last half-year, and after reserving £60,000 to meet the losses incurred by the failures of Messrs Streatfeild, Laurence, and Co., and other firms in the leather trade, there remains for division a net profit of £33,528 13s 1d, which, with £3,971 6s 11d, taken from the Guarantee Fund, enables the Directors to declare the usual dividend, at the rate of £12½ per centum per annum, free of income tax.

It is with regret that the Directors have to announce so large an increase to the loss, as compared with the estimate made in July last; but since that period several additional failures in the above-named trade have occurred, and the estates of nearly the whole of the insolvent houses are being wound up in the Bankruptcy Court, whereby the expected dividends have been much diminished. It is, however, confidently believed that the amount now reserved will be sufficient to cover every contingency.

The Guarantee Fund, with the six months' interest accrued, amounted on the 31st ultimo to		£214,733 18 1
From which has to be deducted for depreciated value of Government and Indian securities as compared with the prices on the 30th June last	£6500 0 0	
And the sum as before-mentioned of	3971 6 11	
		10,471 6 11
Leaving the present amount of the fund		£204,262 11 2

The Directors have to announce with deep concern the death of their much-esteemed colleague, Sir George Carroll, which event will render an Extraordinary General Meeting necessary during the present half-year to elect a gentleman to supply the vacancy thus occasioned.

The seats on the Direction which now become vacant are those of Henry Christy, Esq.; Francis Bennett Goldney, Esq.; Charles James Heath, Esq.; Henry Lee, Esq.; George Pollard, Esq.; and these gentlemen offer themselves for re-election.

The dividend will be payable on and after Friday, the 25th inst.

The preceding report having been read to the Meeting by the Secretary, a Dividend for the half-year ending the 31st December last after the rate of £12½ per centum per annum was declared by the Chairman.

Resolved unanimously,—That the report now read be received, and that it be printed for the use of the Shareholders.

The following Directors having retired by rotation, were unanimously re-elected, viz.:—Henry Christy, Esq.; Francis Bennett Goldney, Esq.; Charles James Heath, Esq.; Henry Lee, Esq.; George Pollard, Esq.

Resolved unanimously,—That the Shareholders desire to express their sincere thanks, and not thanks only, but entire confidence in the judgment, diligence, and ability of the Directors.

(Signed) F. B. GOLDNEY, Chairman.

Accounts of parties are kept agreeably to the custom of London bankers.

Parties keeping Banking Accounts with the Bank can at all times transfer to a Deposit Account such portion of their balance as they may not immediately require, upon which interest at the current rate of the day will be allowed.

Deposits are also received from parties not customers either at call or for fixed periods, on interest at the market rates.

The agency of joint stock, and other country and foreign banks, undertaken on such terms as may be agreed upon.

Investments in, and sales of, all descriptions of British and foreign securities, bullion, specie, &c., effected.

Dividends on English and foreign funds, on railway and other shares, debentures, and coupons, received without charge to customers. Every other description of banking business and money agency transacted, and letters of credit granted on the Continent, and on the chief commercial towns of the world.

TENTH REPORT OF THE

BANK OF LONDON.

—At the Tenth Annual General Meeting of the Shareholders, held at the London Tavern, Bishopsgate-street, on Thursday, the 17th of January, 1861, Sir John Villiers Shelley, Bart., M.P., in the chair, the following report was read by the Secretary:—

"The Directors have pleasure in submitting the annexed statement of accounts, made up to the conclusion of the past half-year, showing that the balance of profit and loss account amounts to £31,533 12s 3d.

"This result enables them to make the most ample provision for all outstanding debts, which, on this occasion, are rendered unusually large by the great failures in the leather trade, and after liquidating the current expenses, allowing for rebate of interest, and the usual appropriation for preliminary expenses, there remains for disposal the sum of £11,738 4s 1d.

"The Directors, therefore, declare a dividend at the rate of £5 per cent. per annum, free of income tax, and they carry £4,000 to the Reserve Fund, by which addition that fund is increased to £31,000. The balance—viz., £238 4s 1d, is transferred to profit and loss account of the current half-year.

GEO. THOMSON, HENRY ASTE, ALFRED LAMB, } Auditors.

It was resolved unanimously,—"That the report now read be received and adopted."

The Chairman announced that the dividend would be payable on and after Thursday, the 24th of January, 1861, at the Head Office, Threadneedle street.

It was resolved unanimously,—

"That the best thanks of the shareholders be tendered to the Directors for the able manner in which the business of the Bank has been conducted, and for the assistance rendered by them in obtaining a searching investigation of the circumstances attending the bankruptcy of Messrs Streatfeild, Laurence, and Co."

"That the thanks of the Shareholders be given to Mr Marshall, the manager, and the other officers of the Bank, for their zeal and efficiency in the performance of their several duties."

amount tendered and accepted to be
nk of England, on account of the Secre-
ce for India in Council, on Friday, the 19th
1861, as, when added to the deposit paid, on the
s being delivered, will leave eighty pounds for
hundred pounds of stock to be paid, as under,
:—
20 per cent. on Tuesday, the 20th of August, 1861;
20 per cent. on Tuesday, the 24th of September, 1861;
£20 per cent. on Tuesday, the 22nd of October, 1861;
£20 per cent. on Tuesday, the 19th of November, 1861;
but parties who so desire may pay up in full, and will be allowed a discount at the rate of five per cent. per annum upon the anticipated payments.

The dividend payable on the 5th of January, 1862, to be a six months' dividend upon the capital amount of stock contracted for on the said 12th July.

In the event of the receipt of tenders (at or above the minimum price to be fixed by the Secretary of State for India in Council on the 12th July) for a larger amount than that proposed to be raised, the tenders, at the lowest price accepted, will be subject to a pro rata diminution.

Due notice will be given when the scrip receipts are ready, and these will be delivered only to the parties entitled, or to their order, at the Chief Cashier's office at the Bank of England.

For each instalment after the payment of the first, which is due on the 19th of July, 1861, a proportional amount of stock will be created for the contributors. The stock for the first instalment, including the deposit, to be created at the same time with that which will be due on the last.

No tender will be received after Twelve o'clock on the said 12th day of July, nor unless upon a printed form, which must not be enclosed in an envelope.

This form may be obtained at the Chief Cashier's office, Bank of England, or of Mr Henry Scott, the broker to the Secretary of State for India in Council, 16 Throgmorton street, London, E.C.

LETTERS OF CREDIT ON THE BRANCHES are GRANTED on the most favourable terms. Bills on the Australian Colonies negotiated and sent for collection.—By order of the Court.

73 Cornhill, E.C. HENRY MOULES, Secretary.

SOUTH AUSTRALIAN BANKING

COMPANY.—Incorporated by Royal Charter, 1847.—Letters of Credit and Bills issued upon Adelaide, Port Adelaide, Gawler, Robe, and Wallaroo. Approved Drafts negotiated and sent for collection.

Every description of Banking business conducted with Victoria and New South Wales, through the Company's Agents. WILLIAM PURDY, Manager.

54 Old Broad street, E.C.

BANK OF VICTORIA,

AUSTRALIA.

Paid-up Capital, £500,000.

London office, 3 Threadneedle street.

The London Board of Directors grant Letters of Credit and Drafts on the Head Office of the Bank at Melbourne, and its Branches at Avoca, Ballaarat, Beechworth, Belfast, Castlemaine, Geelong, Hamilton, Maryborough, Portland, Port Albert, Gipps Land, Raglan, Sale Gipps Land, Sandhurst, Warrnambool.

They also purchase approved Bills of Exchange; send Bills for collection, and transact every kind of Banking and Exchange business between this country and the Australian Colonies.

JOHN MATHESON, Managing Director.

ORIENTAL BANK

CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.

Paid-up capital, £1,250,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, not falling below 2 per cent. nor rising above 5 per cent. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.

Threadneedle street, London, March 23, 1860.

BANK OF NEW SOUTH WALES

(Established 1817, Incorporated by Act of the Colonial Legislature in 1850, and confirmed by Her Majesty in Council), 37 Cannon street, City. Capital, £750,000. Reserve Fund, £205,000.

The Board of Directors GRANT LETTERS of CREDIT, payable on demand, and BILLS of EXCHANGE, at 30 days' sight, on the undermentioned Establishments of the Corporation, at the rate of £101 for every £100 sterling paid here.

	NEW SOUTH WALES.	
Sydney	Albury	Rocky River
Maitland	Mudgee	Deniliquin
Newcastle	Tamworth	Adelong
Bathurst	Kiandra	Windsor
	VICTORIA.

KINAHAN'S LL WHISKY

v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d each, at most of the respectable retail houses in London; by the appointed agents in the principal towns in England; or wholesale at 8 Great Windmill street, Haymarket.—Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

TRADE MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th. Supplied by BROWN and POLSON, to Her Majesty the Queen, by order from Buckingham Palace. It is in great favour wherever it has been made known, for Puddings, Blancmange, &c., preferred to the best arrow root, and especially suited to the delicacy of Children and Invalids.—BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

OVERLAND ROUTE.—COMMUNICATION by STEAM

to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

NOTICE.—The Steamers call at Cork Harbour, on both outward and homeward passages, to land and receive Mails.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS,

appointed by the Admiralty to sail between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX to land and receive passengers and Her Majesty's mails. The following, or other vessels, are appointed to sail from Liverpool:—

CANADA, for BOSTON, Saturday, January 26.

AFRICA, for NEW YORK direct, Saturday, Feb. 2.

AMERICA, for BOSTON, Saturday, Feb. 9.

*AUSTRALASIAN, for NEW YORK direct, Saturday, Feb. 16.

*Taking Passengers and Goods for Nassau and Havana to be transferred at New York on board the R.M.S.S Karnak.

Passage money, including steward's fee and provisions, but without wines or liquors, which can be obtained on board:—To Halifax and Boston, chief cabin, Twenty-two Pounds; second cabin, Sixteen Pounds. To New York, chief cabin, Twenty-six Pounds; second cabin, Eighteen Pounds. Freight to Halifax, Boston, and New York, £3 per ton and 5 per cent. primage. Small parcels, 5s each and upwards. These steam ships have accommodation for a limited number of second cabin passengers.

For passage or other information, apply to J. B. Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. M'Iver, Queenstown; or D. and C. M'Iver, 8 Water street, Liverpool.

During the present severe weather, application should be made at the chief office for the precise departure of the Company's vessels, owing to the accumulation of ice in the river.

STEAM SHIPS.—

The General Steam Navigation Company's powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

HAMBURG—Chief cabin, 2*l*; fore, 1*l* 5s.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

FOR SALE, BY PRIVATE Contract, in excellent condition, and fit for exportation to any part of the world, about 300 dozen Archangel smoked NEATS' TONGUES of last year's importation, in casks of 16 dozens each. Price 13s 6d per dozen, delivered at any railway station or in any of the docks.—Apply to the importers, Messrs Hy. Clarke and Co., of 34 Great St Helens, London, E.C., by whom a one-dozen sample will be sent carriage free on receipt of a Post Office order for 15s.

TO INVESTORS.—Five per cent. interest allowed on Money, withdrawable at Short notice. Undoubted Security. Particulars furnished on application to THOMAS H. BAYLIS, 429 Strand, London.

TO BANKERS, MERCHANTS, AND OTHERS.—Wanted, by a Gentleman, aged 28, with ten years' banking experience, a situation either as bookkeeper or cashier, in London or other large town. Satisfactory references can be given, and the highest testimonials will be submitted.—Address R. W., Post Office, Shrewsbury.

PARTNERSHIP.—A Gentleman, having £10,000 at his command, may join an established mercantile business of unexceptionable standing. None but principals and their solicitors treated with.—Apply to Mr William Kimberley, solicitor, No. 18 Broad street buildings, City.

PARTNERSHIP.—The Advertiser wishes to meet with a gentleman with about £6,000 to £7,000, to join him in taking the Plant of a Manufactory established about 50 years, with a view to a considerable enlargement of the same. First-class references given.—Address A. A., 142 Sloane street, Chelsea.

PARTNERSHIP.—Required, shortly, in an old and well-established Manufacturing business of 40 years' standing, and which is capable of extension, a Partner who can command about £4,000. An energetic young man, willing to take part in the management, would find it a good opportunity. The concern is well known throughout the United Kingdom. References given to parties of the highest standing in the city of London.—Address Z. Z., Post Office, 161 Sloane street, Chelsea.

AGENCY WANTED AT Copenhagen, for Fire, Life, and Marine Insurance Companies, by a well-qualified Gentleman of high respectability.—Apply to Mr Grönsund, 2 John street, Minories.

A GENTLEMAN OF SOME YEARS' Banking experience in the East, is desirous of an engagement as MANAGER, SECRETARY, or ACCOUNTANT of a Colonial Joint Stock Bank. No objection to go abroad. The most satisfactory references in every respect.—Address C. O. J., care of Mr Smith, Stationer, 4 Hungerford street Strand.

A SWISS GENTLEMAN, having been for many years employed in first-class Houses in Italy, and at present in a Shipping House in Manchester, is willing to form another Engagement. He possesses some knowledge of manufactured goods, is well acquainted with office business, and fully competent to correspond in French, German, Italian, and English, and also conversant with Spanish. References unexceptionable.—Address F. K., Letter Box S 56, Post Office, Manchester.

THE ADVERTISER WITH influence and experience in the Manchester market, wishes an agent who could introduce respectable connections, exporters of Manchester goods. To a party, capable and suitable, after a fair trial, a partnership if wished would be arranged.—Address H. B. Wheeler, Esq., Exchange Arcade, Manchester.

THE CITY TURKISH BATHS, 5 South street, Finsbury, were Opened on Monday the 28th instant.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

No. 8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.

CHARLES BERWICK CURTIS, Esq., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December 1861, should, in order to enjoy the same, make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without imparting to the recipients the risk of copartnership, as is the case in mutual societies.

To show more clearly what these bonuses amount to, the three following cases are put forth as examples:—

Sum Insured.	Bonuses added.		Amount payable up to Dec., 1854.	
£	£	s	£	s
5,000	1,987	10	6,987	10
1,000	397	10	1,397	10
100	39	15	139	15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security for the payment of the policy when death arises; in addition to which advantages, one-half of the annual premium may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit the policy.

The Assets of the Company at the 31st December, 1859, amounted to £690,140 19s, all of which has been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

Immediate application should be made to the Resident Director, 8 Waterloo place, Pall Mall.

By order, P. MACINTYRE, Secretary.

ACCIDENTAL DEATH

INSURANCE COMPANY.—A yearly ticket to insure £1,000 in case of death by Railway Accident, and Six Pounds a week if disabled, may be obtained from this Company by a payment of Fifteen Shillings.

EDWARD SOLLY, Manager.

7 Bank buildings, E. C., 16th January, 1861.

THE STANDARD LIFE

ASSURANCE COMPANY.—Established 1825.

The first Division of Profits took place in 1835, and subsequent Divisions have been made in 1840, 1845, 1850, and 1855.

The next Division will be declared in 1861, when the amount can be added to each Policy, its value taken in Cash, or applied to the reduction of future Premiums at the option of the Assured.

Accumulated Fund ..... £1,800,000.
Annual Revenue ..... £300,000.

The Company purchases its Policies on equitable terms, and grants Loans to the extent of their value at a moderate Rate of Interest.

Forfeited Policies can be revived within Thirteen Months of lapsing, on certain conditions.

Policies of Five Years' duration are eligible for admission to Select class of Assurance, which includes Free Residence in any part of the world.

One of the Medical Officers attends at the London Office daily at half-past One o'Clock.

WILL. THOS. THOMSON, Manager,
H. JONES WILLIAMS, Resident Secretary.

LONDON: 82 King William street, City.
EDINBURGH: 3 George street—(Head Office.)
DUBLIN: 66 Upper Sackville street.

NATIONAL PROVIDENT

INSTITUTION, 48 Gracechurch street, London, for Mutual Assurance on Lives, Annuities, &c.

Established December, 1835.

PHYSICIANS.

J. T. Conquest, M.D., F.L.S. | Thomas Hodgkin, M.D.

BANKERS.

Messrs Brown, Janson, and Co., and Bank of England.

SOLICITOR—Septimus Davidson, Esq.

CONSULTING ACTUARY—Charles Ansell, Esq., F.R.S.

MUTUAL ASSURANCE WITHOUT INDIVIDUAL LIABILITY.

Extracts from the Report of the Directors for the year 1860:—

Number of new policies issued during the year, 988.

	£	s	d
Assuring the sum of.....	481,231	1	10
Producing an annual income of.....	16,053	15	7
Making the total annual income, after deducting £50,112, annual abatement in premium.....	298,251	10	4
Total number of policies issued, 23,573.			
Amount paid in claims by the decease of members, from the commencement of the institution in December, 1835...	1,034,268	5	4
Amount of accumulated fund.....	1,898,895	14	11

The effect of the successful operations of the Society during the whole period of its existence may be best exhibited by recapitulating the declared surpluses at the four investigations made up to this time.

	£	s	d
For the 7 years ending 1842 the surplus was	32,074	11	5
— 5 — 1847 —	86,122	8	3
— 5 — 1852 —	232,061	18	4
— 5 — 1857 —	345,034	3	11

The Directors accept surrenders of policies at any time after payment of one year's premium, and they believe that their scale for purchase is large and equitable.

The Prospectus, with the last Report of the Directors, and with illustrations of the profits for the five years ending the 20th November, 1857, may be had on application, by which it will be seen that the reductions on the premiums range from 11 per cent. to 98½ per cent., and that in one instance the premium is extinct. Instances of the bonuses are also shown.

Members whose premiums fall due on the 1st of January, are reminded that the same must be paid within 30 days from that date.

January, 1861. JOSEPH MARSH, Secretary.

BONUS DIVISION.

GLOBE INSURANCE,

Cornhill and Charing cross, London.

NOTICE.—OAK BARK FOR SALE,

comprising about 1,614 tons of capital Timber Bark, all flawed in 1859 and got in good condition, well stacked and protected from the weather, very desirably situate at Kenilworth, Dursley, Charfield, Craven Arms, Bromfield, and Kington, and within five minutes' walk of the respective railway stations at each of the above places, and thus exceedingly easy of transit.

Messrs DRIVER have been instructed to Sell by Auction, at the Mart, Bartholomew lane, London, on Friday, 22nd February, at 12 for 1 o'clock precisely, in 30 lots, about 1,614 tons of capital Timber Bark, viz.:—

758 tons at Kenilworth, in Warwickshire, in 15 lots.
126 tons at Dursley, in Gloucestershire, in 2 lots.
80 tons at Charfield, in Gloucestershire, in 1 lot.
357 tons at Craven Arms, Shropshire, in 7 lots.
137 tons at Bromfield, in Shropshire, in 2 lots.
156 tons at Kington, in Herefordshire, in 3 lots.

The above Bark can be recommended to the attention of Tanners and Bark Dealers. It is mostly of excellent quality, and some very superior; and, with very small exceptions, has been got in capital condition. All the bark is stacked, and well thatched and protected from the weather, and each rick is situate within five minutes' walk of the railway station at each place, and thus exceedingly well situate for transit.

Samples on view at the Auction Mart on the day of Sale.

Further particulars will appear in future advertisements; in the meantime, information may be had of Messrs Driver, surveyors, land agents, and auctioneers, 5 Whitehall, London, S.W.

THE IMPORTANT FREEHOLD and COPYHOLD PREMISES known as the WHITECHAPEL DISTILLERY.

MESSRS FULLER AND HORSEY

are instructed to SELL by AUCTION (unless previously disposed of by private contract), on MONDAY, March 18, at 11 for 12 precisely, on the Premises, in Two Lots, the highly important FREEHOLD and COPYHOLD PROPERTY well known as the WHITECHAPEL DISTILLERY, the property of Messrs Smith and Co. The site occupied is about three acres, covered with buildings of the most substantial character, arranged in the most perfect manner for the purposes of the distillery business, and capable of producing 1,500,000 gallons of spirit per annum. The premises are readily convertible to the purposes of a brewery, or any large manufacturing establishment. The property is situate in Buck's row, a wide thoroughfare in Whitechapel, within a few paces of the London Hospital. The buildings are entirely and securely enclosed by lofty walls. There is a most commodious residence for a principal, finished in the best taste. The manufacturing premises consist of a block of buildings of great extent, occupying the central portion of the yard, accessible by carts or waggons on all sides, and comprising—1. The Brewhouse: a substantial, lofty, ground-floor building, with basement, brewer's room, men's room, sitting room for revenue officers, and store rooms. 2. The Cooler-house: a lofty building of three floors, strongly timbered on iron columns, with lantern lights in the roof, and folding shutters. 3. The Back Rooms, two in number. 4. Yeast-house. 5. A deep Artesian Well, affording a nearly inexhaustible supply of pure liquor. 6. The Mill, substantially built of brick, of four floors. 7. The Old Mill, a brick building of three floors. 8. Steam-engine House, Boiler-house. 9. The Still-house. Surrounding the main building are various accessory erections, including the spirit store, of one lofty ground floor, with dry basement, loop-hole doors, offices for clerk, &c. A most substantial brick building of three floors, strongly timbered on iron columns, used as a joiners' shop and stores, a steam-engine house, boiler house, bricklayers' shed, piggeries, fire-engine house, and surface well steened; an extensive range of brick-built workshops for carpenter, blacksmith, millwright, and cooper, beer-cellar, small brew house or scalding house, and grain shed. The large and commodious yards are paved throughout with granite. Approached from a separate entrance are the duty-free spirit warehouse, a lofty ground-floor building, store for methylated spirit, a brick building adjoining, of two floors; a paved yard enclosed, containing warehouse of two floors, next Buck's row, and sundry other conveniences: also a very superior range of counting-houses, of two floors and basement, partly fitted as a dwelling-house.—May be viewed, by cards only, which may be had of the Auctioneers. Printed particulars are in course of preparation, and, with plans, may be obtained in due time of Messrs M'Leod, Stenning, and Watney, solicitors, London street, E.C.; of Messrs' Tennant and Darley, solicitors, 4 Raymond buildings, W.C.; of Messrs Bockett, Son, and Barton, solicitors, 60 Lincoln's inn fields; of S. Lowell Price, Esq., accountant, 5 Gresham street, E.C.; and of Messrs Fuller and Horsey, Billiter street, E.C.

MISS EMMA STANLEY'S SEVEN

The Political Economist.

The Editor of the ECONOMIST *intends to publish a Supplement half-yearly, giving* IN A COMPACT FORM *the Balance Sheets and Directors' Reports of* ALL *the Joint Stock Banks in the United Kingdom, as far as the same are made public, with some account of the most important Meetings of Shareholders.*

THE IMPROVEMENT IN THE MONEY MARKET.

THERE is and there ought to be an improved feeling in the money market. The combination of remarkable events which has raised the value of money so rapidly throughout the world has not indeed ceased to operate. But a little time has passed on; the effects of the 'situation' are rather more clear, and, as far as we can judge, they are not so bad even as reasonable persons expected—certainly not so pernicious as some vaguely feared.

The political aspect of American affairs is as clouded as ever; perhaps it is even more clouded. But the financial aspect is, for the moment, strikingly improved. It is certain that even the agony of the secession crisis will not produce any such disorganisation of the New York money market as was at first apprehended. There will be, and there must be, a long period of severe trial. Strange political events must happen, even if the Union should be for the moment preserved; it will take a long time in preserving; there must be harassing negotiations, contradictory proposals, a prolonged and perplexing uncertainty. If the Union be dissolved peacefully or forcibly, by negotiation or by war, there must be a period of alarm and apprehension. But for the moment there is comparative ease in the money market at New York. Money at call is fairly abundant; the rates of discount are much lower; the exchange is much improved; the prices of stocks have risen; public confidence is augmented, and the tone of public feeling is improved. The quickness of the alteration has excited surprise, but it is susceptible of an easy explanation.

The New York money market is a small market, and, like all small markets, it is liable to rapid change whenever the transactions are large and sudden. The weekly Bank statement proves this unmistakeably. On the 13th of November

	£
The aggregate deposits of the New York Banks were	16,190,303
— circulation — — was	1,969,092
	18,159,395

Any two of the large Joint Stock Banks in London, though by law prohibited from issuing notes, have a greater amount of 'indebtedness.' *Three millions* of gold have been poured into this small market from this country, and naturally they have produced a great effect. We know how great an influence even smaller arrivals of gold have in the great London market, and we must not therefore wonder at the rapid and great change which this large supply has produced in New York.

The effect of this great influx of gold will be best seen from the following figures:—

	Dec. 29.		Jan. 5.
	£		£
Aggregate deposits in New York Banks	19,612,257	...	19,452,416
— circulation — —	1,864,705	...	1,957,113
	21,476,962	...	21,409,529
And the reserve of specie	5,236,887	...	5,558,881

while on the 13th of November the specie was only 4,195,000*l*:—the increase of liabilities, as compared with the return in November, showing an increase in the confidence of the public, and the increase in the reserve showing that their confidence was well placed.

Nothing can be more satisfactory on every ground than this practical demonstration of the stability of the New York system of banking. At first, as we pointed out some weeks since, the Banks permitted themselves to be hurried into a sort of panic, but they soon recovered; they acted in concert; they threw their reserves into a common stock;—an expedient new, we believe, in banking, and showing their great confidence in each other. The result has been eminently satisfactory. The New York Banks may not, during the whole of their future existence, have to meet a more critical, anomalous, and perplexing period than the last few weeks. Good native observers seem to have been almost perplexed at the stability they witnessed. The Superintendent of the New York Banks, writing his periodical report as by law required to the Government, observes, "It is one of the strange phases "of the present money panic that it produced no change in "the usual transactions of the Banking department. At the "time of closing this report—December 10th—no signs of "the actual existence of any change in our monetary affairs "from their usual condition is shown in this department," nor has any occurred since. Nothing can be more creditable to the New York Banks than the confidence which they have retained in a period which must have tried confidence, or than the judgment which, except during the first instant of sudden apprehension, they have consistently shown.

If we turn to what is the more practical part of the subject, the effect on ourselves, we must be on our guard against forming too sanguine an expectation. It is true that we have for the moment produced a considerable effect in the New York money market by our gold. It is true that any portion which may have been sent thither for the purchase of stocks will have in many cases been sent to a bad market; it is true that much more gold may not be sent at any rate for some time. But we must not too soon expect to see the gold which we have already transmitted, return; some sanguine speculators on futurity talk as if it were already here again: nor must we too boldly congratulate ourselves on the immediate cessation of the export of gold from hence, even though there may seem to be a momentary probability that it may cease.

There is a great difference between flooding the small money market of a single influential city and providing for the pecuniary wants of a whole continent. It is evident that the New York Banks are subject to a very considerable drain. The whole of the gold exported from hence has not stayed with them by any means: much of it has drained through them doubtless to more troubled and disturbed districts. Nor is this the worst. New York is a great centre of steady trade in Californian gold. During the year 1858—no exceptional or anomalous period—the following sums were received month by month :—

	£
In January	650,707
February	638,020
March	599,478
April	668,246
May	678,334
June	717,501
July	604,373
August	691,981
September	636,649
October	703,719
November	772,435
December	643,652
Total	8,005,095

No part of this, however, now finds its way to strengthen the New York Banks: it is absorbed elsewhere: it finds its way to the other parts of the Continent, where it is more anxiously sought for.

In the face of this remarkable drain, we must not be too confident in our expectations of the permanent effect of the supplies we have sent. The causes which may attract even more gold there are serious; the political alarm in the Southern States of America—an alarm which no one can measure, and which is scarcely acknowledged even by those who feel it—their inability to buy our manufactures, our bad harvest and need of their corn,—are enduring causes which must tend to disturb the usual course of commerce with this country. Facts prove that though the banking trade of New York is not so much affected by the peculiarities of the period as might have been anticipated, yet other trade is largely affected. The value of imported cotton, wool, and silk manufactures, and other dry goods taken for home consumption at New York, was in—

	£
November, 1859	1,246,825
December, —	1,748,023

It was in—

	£
November, 1860	997,112
December, —	602,916

and we must not be surprised if this diminished demand for European manufactures should produce, when prolonged, a considerable and unfavourable effect.

It is to be remembered too that in ordinary states of the money market, we obtain much gold from America, and that gold is in these days as regular an article of export and import into this country as tallow or tea. Any sudden cessation of our habitual supplies must tend to make money dearer. In the ten months ending 31st October, 1860, we received from the United States—

	£
Gold	3,855,936
Silver	838,856
	4,694,792

And the protracted stoppage of a supply so considerable and important must tend to sustain the rate of interest, even though no additional gold should be abstracted from hence.

It is alleged with every probability of correctness that the wise though tardy course of the Bank of France in raising the rate of interest has produced its natural and beneficial effect. The Bank is believed to be growing stronger. The measures which she appears to be taking for the disposal of her silver are also satisfactory. Her store of bullion is not inconsiderable, if it were only the right bullion. By what theoretical notion, what Imperial dream, so trifling a cause should have been allowed to aggravate serious difficulties, it is impossible to conceive. We can only hope that it will now at length be removed.

On the whole, therefore, we would wish to moderate some too sanguine expectations that are not unnaturally current. We are the first to admit the improvement which has taken place; we hope for its continuance; we greatly rejoice at the improved policy of the Bank of France; we believe the monetary stability of the Northern States of America to be the single cheerful item in much cheerless and disheartening intelligence from that quarter. But we must be careful not to form exaggerated anticipations; we must not hope that we are soon to see cheap money. The causes which have made it dear are very potent, and they are not yet exhausted.

DISSOLUTION OF THE UNION AS REGARDS AMERICA.

Although the latest accounts from America still speak of compromise, and although numerous suggestions continue to be made in Congress as to the terms on which such compromise might be effected, yet we confess we have little expectation that they will prove successful. The march of events has been too rapid for the effective intervention of the wiser and soberer politicians; and the insolence of the South is beginning to arouse a corresponding temper in the North. It is true that we have indications that the prompt and passionate steps taken in Carolina to consummate the act of secession have been forced on by the least wealthy, the least really influential, and the most democratic classes of the population; and that the great proprietors and the more respectable public men deprecate those acts which have made retrogression all but impossible. It is true that the danger attendant on the process of severance begins to be seen much more clearly than at first, and that, amidst all their bluster, the South Carolinians are growing very anxious that their secession should be a peaceful and amicable one, as was shown by the speech of Mr Benjamin in the Senate. But the phrenzy and enthusiasm of the mob have been so violently excited and have now become so general, that it is too late for the warnings of self-interest or of alarm to avert the crisis; shots have already been fired against a Federal vessel in Charleston harbour; and at least three other States have followed the example of Carolina. It is true, certainly, that the proposals for compromise and reconciliation so profusely made even by Northern and Free-soil politicians show an extraordinary eagerness to prevent a dissolution of the Union if it be possible; but the very nature of these proposals indicate also a general conviction that the South can only be conciliated and recovered by concessions which would be equivalent to renouncing the entire fruits of the victory of which Mr Lincoln's election was the proof and seal, and which would be simply unprincipled, inconsistent, and dishonouring to the whole Republican party;—and it is pretty certain, too, that these terms of compromise, though discussed by the leaders of that party, are not likely to be ratified by their followers, and could scarcely, with any decency or self-respect, be accepted by the new President. We believe, therefore, that they will come to nothing, and that the Union will be, or is already, dissolved. Whether the disruption will be peaceably effected, is beginning, however, to be more doubtful.

Some people seem to fancy that the Southern States will secede, but only with the intention of making better terms with the Northern ones, and of re-entering the Federation on their own conditions. We see no ground for entertaining such a notion. For, in the first place, it is evident enough that the North will yield more to prevent a severance of their cherished Union than to patch it up again when once dissolved. It is evident that at this moment the victorious Republicans are willing to concede everything short of actual surrender, base compliance, and cowardly departure from the ground of principle and justice which alone enabled them to conquer in the recent Presidential election. It is clear that any *re*-admission of the seceding States, except on the inconceivable ground of *their* acknowledgment of error and defeat would be equivalent to an acceptance by the North henceforth of a position of subordination and humiliating helplessness; which proud, powerful, and wealthy States, *who feel themselves to be in the right*, could never submit to. It is clear, finally, that the South can never again obtain such favourable terms from the incoming President and the next Congress as from the authorities now in power. The secession of the Slave States, therefore, if it shall take place, will, we conceive, be final and irrevocable.

The most conclusive consideration to our minds, how-

ever, is this. The dissolution is consummated already, and by "the inexorable logic of facts," as the French Emperor says,—not by the hand of man or the decisions of politicians and popular assemblies. The discrepancy of character, interests, objects and feelings between the Free and the Slave States has year by year been growing wider, and has now become complete and incurable. When the Federation was formed there were slaves in every State except Maine and Massachusetts, but the total number scarcely exceeded 500,000, and every State looked upon slavery as an institution to be regretted, and as one that ere long was certain to die out, and therefore needed not to be violently extinguished. At that time there were fewer slaves in the United States than in the West Indian Islands, and the extinction of the slave trade after a specified date was provided for. Now, all the North-Western and Atlantic States, with the single exception of Maryland, have ceased to hold slaves, yet the slaves in the entire Union have increased from *half a million* to *four millions*. But the change of feeling is even greater than the change of social condition. While the detestation of slavery has been growing and spreading in the North under the threefold consideration of its guilt in a moral point of view, of its mischief in an economic point of view, and of its confounding and dishonouring influence in a political and social point of view,—the South has clung to it as the source of their wealth, the necessity of their existence, the basis of their agricultural and domestic life; till at last they have reached a point at which (at least in words) they boast of it as a distinction and proclaim it to be a beneficence, a blessing, and a virtue. Thus what one-half of the Union have grown to regard as an evil and a stain, the other half, in the same period, have taught themselves to regard as a merit and a good. While the North could fancy that the damaging and disreputable "*institution*" was temporary only, and in process of mitigation and extinction, it might put up with the inconvenience and hope for some solution; but with a slave population of four millions and an entire system of cultivation and society based upon the "institu-" tion,"—and moreover with its entire policy coloured and guided by the "institution"—it has to consider how far coexistence is compatible with a dark and fearful permanence like *that*. How a people who think slavery bad and wrong, can continue to form part of the same nation with a people who think slavery right and beneficial, when slavery has reached such vast dimensions and such a hopeless and unmanageable magnitude,—we confess ourselves unable to imagine. The moral dissolution of the Union is complete: the political dissolution is only an expression of this foregone fact, and a question simply of time and mode. We do not see how the gulf *can* be bridged over, how the connection can be kept together, how any union worth the name or worth the trouble can be patched up even for a time, unless the South will consent to a plan of gradual abolition, or the North make up its mind to the continuance and illimitable spread of slavery—both of which appear to be morally and equally impossible. Even if the present crisis could, by any contrivance, be got over, we should not expect any advantage from the result:—the same inevitable issue would still hang like a black cloud over the Federation—the same insoluble question, the same radical and incurable discrepancy, would still lie between the partners to poison and sever the unnatural bond.

We, therefore, agree with Mr Benjamin that the efforts of all patriotic politicians in America should be exerted not to prevent the severance of the Union, but to effect it in as peaceable a mode and in as amicable a spirit as possible. If done by deliberate and tranquil arrangements, the frightful folly of civil bloodshed will be averted, and the danger of wide-spread negro insurrections greatly diminished. If war once broke out, the slaves in many parts would probably rise, with greater or less unanimity and a greater or less degree of organisation; and the planters are well aware, notwithstanding their boastful words, that they could not possibly make head at once against the forces of the Free States and the outbreak of their own slaves. On the other hand, both the Northern States and the general Government (even when it passes into firmer hands than Mr Buchanan's) will probably shrink from shedding the blood even of insurgent brethren (unless absolutely forced to do so), even if it should be ruled that constitutional right is on their side;—it is doubtful, too, whether the navy would act against South Carolina; and it is nearly certain that the frontier States would refuse a passage to the Federal troops.. We assume, therefore, that the disruption will take place by arrangement, and without any serious fighting. Our object is to inquire how such peaceably arranged disruption will affect the two new Republics—the slaveholding and the free?

We need not trouble ourselves much with the prospects of the Northern States. The same energy and enterprise which have made them so great in spite of the difficulties of a slave connection will carry them on still faster and further when liberated from this hampering incubus. We know how commerce contrives to hold on its wonted course in defiance even of actual war, how soon it can modify its action to meet altered circumstances, how soon it can find out fresh channels or new contrivances. It will very speedily adapt itself to the fact of two Federations instead of one. The North will soon renew in one form or another its old transactions with the South. It will still supply the Southerners with ships; it will still advance them money; it will still discount their bills,—more cautiously no doubt, at perhaps higher interest, with perhaps stricter security. It will still send them provisions, and receive their cotton in return. It will continue to be their bankers and their carriers, for the slaveholders have few ships and little cash. So long as there is mercantile honesty and productive industry, there will be mercantile transactions and brisk interchange.

But what will be the condition and future of the Southern States? Their trade, as we have said, will, after brief confusion perhaps, go on much as before. British vessels and New York vessels will still carry their corn and tobacco; British mills or Massachusetts mills will clothe their negroes. But what will henceforth be the relation of the Planting interest to the "mean whites"? and what that of the slaveholders to their slaves? The former question we can only answer conjecturally. We have not yet received the census of 1860, so must take our figures from that of 1850. The white population of the Slave States was then in round numbers 6,300,000, of which slaveowners and their families could scarcely amount to more than 1,250,000—or one-fifth. (The actual *possessors* of slaves were, and we believe still are, only 350,000). The slaveowners, the men of wealth and realised property, are, therefore, only a small minority of the free population, and the institutions of the States being all democratic, the political power, potentially or actually, is in consequence in the hands of the "poor whites"—perhaps the most degraded, ignorant, brutal, drunken, and violent class that ever swarmed in a civilised country. The ultimate issue of such a state of affairs we see at once must be most terrible and sad. But we cannot pursue this part of the subject here. We must pass on to consider the result of the dissolution of the Union on the planters and their slaves.

The first thing that seems inevitable is, that "the under-" ground Railway," as it is called, will work faster than ever. The Fugitive Slave Law will fall with the Union, and the Northern Republic, we apprehend, will repeal or nullify it at once. This, which has long been the sorest point between the two sections of the Union, cannot survive their severance. The South, which complained so furiously of the imperfect execution of this obnoxious law, must now lay its account to have no such law at all. But this is by no means all—nor the worst. Not only will slaves find it far easier to escape than formerly, and be far safer from recapture; but it is next to impossible that the exasperated fears of the masters and the excited hopes of the slaves, consequent upon the severance, should not lead to more frequent insurrections on the one side and to more merciless severities on the other. Probably large bodies of the "mean "whites" will be organised into irregular troops, half soldiers, half police, in order to control and suppress the negro population; and the condition of restless fear, barbarism, and intestine hostility, already bad enough, will grow yearly worse, more shocking and more intolerable. The following table, taken from the census of 1850, will show the relative proportions of white men and slaves in the several States which will probably compose the Southern Federation. We leave out the *free* coloured population altogether. We may observe that since 1850 about 700,000 have been added to the total of the slave population. What

the increase of the whites has been we have no means of knowing accurately:—

	Whites.	Slaves.
Virginia	894,800	472,500
North Carolina	553,000	288,500
South Carolina	274,500	385,000
Georgia	521,500	381,700
Florida	47,200	39,300
Alabama	426,500	342,900
Mississippi	295,700	309,900
Louisiana	255,500	244,800
Texas	154,000	58,100
Arkansas	162,200	47,100
Tennessee	756,700	239,500
Kentucky	761,400	211,000
Missouri	592,000	87,500

It will be seen that in five of these thirteen States there are only about *two* white men to one slave; in three of the States, the numbers are about equal; while in two (South Carolina and Mississippi) the slaves outnumber the ruling race. At the present moment we may calculate there are about 4,000,000 of slaves to 8,000,000 of whites. That is to say, *two-thirds* of the population live amidst a subjugated and hostile proportion of *one-third*, and keep those down by force for the benefit of 350,000 families only;—for no one pretends that any one except slaveowners profits by slavery.

These relative numbers disclose a state of matters evil and perilous enough, But they do not adequately represent either the evil or the peril. In many portions of these States, on the majority of cotton plantations, in a great number of isolated districts, the slaves outnumber the whites enormously—sometimes twenty, thirty, fifty even, to one,—and are kept down by terror and daily violence alone. We state the case mildly. If any one doubt it, let him read Mr Olmsted's book. Now, how can such a state of society continue, and how must it terminate? There is no progress towards improvement, either in feeling or condition: on the contrary, the hostility and fear between the two races are daily growing worse. Permanence in such a state seems impossible. Issue out of it seems equally so. Extension will not help it. A renewal of the African slave trade will manifestly make it worse. Perpetual and cruel suppression of perpetually recurring insurrections will do no good;—for who believes that the slaves, yearly becoming more disproportionately numerous, and treated as they are and must be on plantations, will ever conclusively acquiesce in tame and hopeless submission? We confess we see no daylight through this appalling picture. When the dissolution of the Union is consummated without provision being made for ultimate emancipation and abandonment of slavery, we greatly fear that security for life and property must be henceforth at an end for the South. Repeated victories—repeated ever so often, and always felt to be certainties, will avail nothing. And who will advance money on the security of estates, valuable only by slave labour, and cultivated by slaves always on the verge of insurrection?

MR LAURENCE'S EXPEDIENTS AND HOW TO PREVENT THEM.

The last examination of the partners in the firm of Messrs Streatfeild and Co. took place on Wednesday, and we may assume that we now know all that we shall ever know of the monstrous frauds—for such they were in morals if not in law—with which their names are inseparably connected. Those, indeed, who have carefully perused the voluminous proceedings in Bankruptcy will, perhaps, feel that they understand the matter pretty well. It is happily impossible to *invent a new pecuniary fraud*; generation after generation has worn the track threadbare; modern ingenuity can only combine ingeniously and manipulate extensively certain old expedients; and it was in these arts that Mr Laurence for many years showed himself to be a very great master.

Those who have any practical knowledge of the art of money-lending will scarcely echo the extravagant outcries of surprise and horror with which the failures in the leather trade were at first received. The wonder, perhaps, to some people of experience, who do not very well like to say it, is, that such things, on a smaller scale perhaps, but in principle precisely similar, do not occur much oftener. Perhaps every experienced banker has taken up a heap of bills and thought in his heart—'Now, what do I know of these things? 'If it depended on my finding out, on my acuteness in finding out deceit—if human nature were not practically honest 'on the whole,—how small an income I should have.' The mercantile credit of this country involves an amount of trust and confidence such as the world has never seen. Nor can we wonder that it should be occasionally abused. Mr Laurence was placed in the best possible position for abusing it. His firm, though it was insolvent, had an excellent standing—a respected name—an admirable commission business. The partners were known to possess 'realised pro-'perty,'—a very effective phrase. So long as the mercantile world lasts, such persons will obtain more money than they ought. But on that very account it is proper to analyse anxiously every case of remarkable deception, to point out its preventible peculiarities, and so diminish the inevitable facilities of fraud.

By far the best expedient for raising the wind is a 'good 'drawing post.' If a trader only chooses his 'post' well,—if he selects a person to whom he might have sold goods,—if he draws for business-like amounts, for different sums of money at different times, and for odd sums of money at all times,—if he understands, in a word, what he is doing, he may be sure that he will not be detected for a long time. There is nothing to excite the banker's suspicion; he has no special reason for doubting these bills more than for doubting any others.

Few people have carried the 'drawing-post' system so far as Mr Laurence. He had a whole system of subordinate firms dependent upon his—upon whose accounts he tells us that he drew "irrespectively of their indebtedness." The following figures show the results concisely. From 1st Jan., 1857, to July 2, 1860, the various transactions with the eleven failed houses:—

	£		£
Baker, John	68,597	Waring, A.	317,627
Clarke, R. and J.	464,435	Draper and Co.	408,914
Gibson, W. G.	757,082	Mundy, W. and C. M.	257,504
Hacker, H.	305,428		
Mortimore, R.	231,073		5,541,653
Mortimore, T. H.	935,349	Rider and Co.	353,536
Smith, J. H., and Co.	733,224		
Smith, Patient, and Co.	1,062,420		5,895,189

Some of these 'drawing posts' were creations of Mr Lawrence, and their success is certainly creditable to his 'financial ingenuity.'

There is, indeed, a check on the system of 'drawing posts' which in ordinary cases is tolerably efficient. If a trader is remarked as constantly drawing for about the same amount on the same person, and if one bill is put in just as another is running off or thereabouts,—the banker, if he be wise, will be cautious. He will suspect evil. He will believe that there never was any real sale of goods in the matter; he will think that the bills were only created for him to discount.

Mr Laurence had, however, a device ready to escape this means of detection. He never allowed any one banker to see an entire chain of bills. He had many channels of discount, and 'he acted accordingly.' He gave bill No. 1 to bank A, and discounted at bank B bill No. 2, the proceeds of which went to pay bill No. 1. There is nothing new in this device. It is the old familiar art of 'meeting bills;' the remarkable peculiarity is that Mr Laurence could practice it on so extensive a scale. He discounted, he tells us, "their bills with various banks, "bankers, and discount companies, including the Bank of "England, Messrs Bolitho, Messrs Bruce and Co., the City "Bank, Messrs Cobb and Co., Messrs Curtis and Co. (Rye), "Messrs Dimsdale and Co., the London Joint Stock Bank, "the London Discount Company, the National Discount "Company, the National Bank, Messrs Overend and Gurney, "Messrs Sandeman and Co., Messrs Leyland and Co. (Liver-"pool), Messrs Currie and Co. He had also discounted "with various other parties. The application in some cases "came from the banks themselves, including country bankers. "They asked for bills, and he obliged them with some." It it evident, therefore, that each bank and discount house might be kept rather under-supplied than over-supplied with 'choice paper,' and that no one of them need ever have more than a certain number of bills drawn upon any one particular acceptor. No one need ever see that continuous train of equal sums, which is a warning to the practised eye.

But the peculiar circumstances of Mr Laurence made it possible for him to get beyond these humble expedients. He was for his purposes in the unequalled position of having

an excellent excuse not only for accommodation bills, but for 'cross bills,' for drawing upon parties who also drew upon him. Those familiar with such matters know how highly prized this situation is. It enables the parties to manufacture two bills at a time, and each at maturity pays off the other. Generally speaking, no banker would endure this for a moment. He would see that it was a device to cover fraudulent intentions. But Messrs Streatfeild and Co. were hide brokers as well as leather brokers. They bought hides, sold them *to* the tanner, and drew on the tanner for the proceeds: they sold leather *for* the tanner, and *he* drew on *them* for the price. Out of purely legitimate transactions, therefore, it was possible to keep current and afloat two sets of bills at one and the same time. A good account could be given of each; a plausible explanation of each was ready on the surface to every bank and discounter. And of this invaluable advantage Mr Laurence unscrupulously availed himself.

And this remarkable financier had a supplementary expedient besides, of which he made an occasional but skilful use. He got persons—Rider at Paris and others—to draw on him, for 'goods transmitted,' as it was said, but, in fact, without consideration, and went shares with Rider in the proceeds—not, perhaps, always allowing the latter very much. As, however, it would have been a conclusive blow to his credit to have this device even suspected, an intermediate party, named "Anning and Cobb," was made use of, who discounted Rider's drafts upon Laurence, and gave Laurence a cheque for the proceeds.

Such, in the simple outline, were the main expedients by which this mass of frauds were effected. As we said, they are in substance old, familiar, hackneyed. It was impossible they should be otherwise. How far, then, can their recurrence be prevented? Some possibility of fraud there must ever be in trade, but surely we need *not of necessity* see frauds like these.

Two rules may be laid down which may be partially if not completely acted on, and which have a strong preventive efficacy. Bankers should discourage an unlimited number of channels of discount. If a trader has twenty banks—and Mr. Laurence seems at least occasionally to have 'favoured' as many—it is impossible for any one to have the least idea of his transactions, to watch the succession of his bills with the slightest accuracy, to have any ground beyond general rumour and common fame for believing that they are legitimate or fictitious. In the present state of the discount world it would be considered too romantic to contend that a merchant should have *only one* discount account, but we venture to lay down that it is very dangerous to the discounter that he should have many. Those who discount miscellaneous bills for persons who have an indefinite number of discount accounts do so at their risk. They cannot complain, or ought not to complain, if they are ultimately defrauded. This principle is at present partially recognised, and it is said that Messrs Streatfeild assured some of the parties interested that they had not as many discount accounts as they in fact had. But, though theoretically recognised in some degree, this rule is not effectively enforced. If it had been, such a case as Messrs Streatfeild's would not have been possible. So many channels of discount could not have been so long maintained, if each had been nervously anxious as to the existence of the others.

The second rule is, that money lenders should discourage trades and modes of doing business which give an excuse for the creation of 'cross bills.' So soon as paper of this sort is once reckoned as legitimate, all effectual check upon fraud becomes at once impossible. It may be manufactured to any extent, with every facility for deceit, and with no facility for detection. There is no reason why the same broker should buy hides and also should sell leather; the cross transactions of Messrs Streatfeild with the 'failed firms' arose out of this questionable peculiarity in the arrangements of their trade; and if it had not been for the facilities which that peculiarity afforded, those transactions would not have been possible. The discount houses have the power in their hands; they have the money: they have only to say 'these bills may be 'good or not good; may be *bonâ fide* or may not be *bonâ fide*; 'we do not enter into these questions; we see that they are 'cross bills, and we decline them.' If this were daily said and daily done, there would soon not be in any branch of trade any anomalous arrangements that would admit of or would excuse cross bills.

We do not hope to root fraud out of the discount market: money is a tempting thing; and credit is a great power. We fear that ill-deserved credit and ill-obtained money will be found in Lombard street as long as Lombard street may last. But we wish to diminish that which we cannot extirpate. We are certain that the two rules we have enlarged upon would lessen the amount of the inevitable evil. We know that they are now indistinctly admitted and partially acted on; we wish to see them specifically adopted, and consistently observed.

AMERICAN INFATUATION CONCERNING ENGLAND.

THERE is something truly astounding in the infatuations which seem to possess the politicians in the Southern States of America. They have not only persuaded themselves into something that has all the *strength*, if not the intellectual *weight* of a moral conviction that the cause of slavery is a holy and sacred cause in which they who suffer loss are heroes and martyrs,—but they have also fully persuaded themselves that all who differ from them are the unfortunate subjects of a mere fanciful hallucination which the slightest pressure of real self-interest will dissipate at once. They seem really to believe that England is as ready to support them, if they can but offer her sufficient interested motive for doing so, as she would be, for similar inducements, to sustain Italy against Austria or Prussia against France. 'Cotton 'is king,' they cry. 'England wants our cotton, and if we 'can give it her cheaper than she at present gets it, there is 'nothing Manchester and Liverpool would not do to attain such an 'end.' Accordingly they bestow fruitless ingenuity on plans for entrapping England into lending them the aid of her protection against the Federal Government. The leading men of South Carolina and Georgia are said to have hit on the following scheme:—'If the United States Government attempts 'to collect the revenue on foreign imports at the South by 'placing revenue cutters off the different harbours, then the 'seceding States, not deeming it expedient to declare war, 'will pronounce for direct taxation as the exclusive source 'of revenue, passing an ordinance to that effect. The 'foreign Ministers at Washington will then be informed that 'the ports of the Cotton States are thrown open for the 'entrance of foreign merchandise free of duty, and that any 'duties imposed by the United States Government are levied 'contrary to law, and without authority from the Southern 'Confederacy. The revenue question will then be transferred 'from the South to Europe. It will become a question with 'France or England, whether or not it will defend the free-'trade rights thus conferred on its manufacturers against the 'revenue duties of the Northern States. And in such an 'appeal to British or French cupidity, it is expected the 'national sympathy for free negroism, will yield to the 'national interest in favour of free trade.'

It is lamentable to see such infatuation as this. Have South Carolina and Georgia really persuaded themselves that mercantile men in England would even wish that their Government should interfere in a struggle between the Federal Union and the revolted States,—and interfere on the side of those whom they deem wilfully and fearfully in the wrong, simply for the sake of buying their cotton at a cheaper rate? We think we may safely say that there is not a commercial body in this kingdom that would endure to see the British Government so faithless to its avowed principles of action, so treacherous to its avowed sympathies, for the sake of securing a mercantile gain to this kingdom. It is true we do not wish to see the struggle between the North and the South prolonged. We believe no civil war could equal it in horrors, and we hold also that,—if indeed all classes among the people of the South are bent on separation as they seem to be, and not merely carried away by the excitement of the moment and the urgency of the meaner part of the population,—no forcible interference on the part of the North can possibly avail. But, assuredly, while the struggle is undetermined,—while the Federal Government still endeavours and hopes to enforce its authority over the whole territory rightfully subjected to its sway, no bribes, however enormous, would induce the

English people,—or any class among them, however directly interested in the result,—to lend its aid to a revolt which they believe to be utterly unprovoked, the result of the worst political passions, and likely to end in the general degradation of the Southern States.

These Southern gentlemen seem to us to have lost all the instincts of national honour, and to have lost them so entirely that they have ceased to believe in their existence elsewhere, when they calculate on any European nation taking a course that would cover it with well-deserved infamy. If there is one rule of national action more than another to which we have pledged ourselves deeply, it is the rule of non-intervention between revolted subjects and the Government to which they are supposed to owe allegiance;—nay, we do all in our power to secure the adhesion of other European Powers to the same course. Now, do these sharp Southerners really believe that England will not only break through the rule in their case, and break through it against the whole current of their political sympathies, but avow to the world that they do it for the sake of gain and gain alone? Where would England's political influence in Europe be after such an act as this? Would she not be set down, and justly set down, as unworthy to be heard again in international councils? If a private gentleman openly takes a bribe to throw his convictions to the winds, would any of these Southern gentlemen deem him fit company for them? And if not, it is not at least usual on this side of the Atlantic to regard a nation's honour as less sacred than an individual's.

The truly melancholy side of these strange calculations on the part of the Southern States, is the evidence which they give of a completely distorted standard of judgment,—on all subjects at least that touch the one great interest of their political life. They have cried out so long that all scruples about slavery are cant and affectation, that they not only believe it, and believe that *we* believe it, but they even expect us to make a sacrifice of political credit and consistency by avowing our previous insincerity, and this for considerations that would certainly never have induced us to interfere in behalf of Hungary or Italy, whom we did desire to aid with all our hearts. Such infatuation is absolutely appalling. It seems to indicate that a kind of monomania blinds the Southern States on all subjects closely connected with their cotton and their slaves. We doubt if anything *we* can say will open their eyes. But we are at least bound in the name of the mercantile classes of England to tell them that any proposal to intervene on their behalf in the struggle against the Federal Government of the Union, would be scouted nowhere with more scorn and indignation than in those districts of England which would benefit most by free trade with the United States.

THE CHARGE OF WASTEFUL EXPENDITURE AGAINST SIR C. WOOD.

A most inexplicable outcry has been raised against Sir Charles Wood for an act on the wisdom and providence of which some eminent actuary would be a far better referee than any one else. The *Times* has been unwarily misled by its Calcutta correspondent to give credence to the very foolish rumour that half a million of money is to be needlessly lavished on the representatives of Tippoo Sultan. The bare notion in the present state of our Indian finances is absurd. The truth is merely this, that whereas the descendants of Hyder Ali and Tippoo Sultan have been hitherto, and are entitled to be for evermore, provided for out of lands ceded for *this express purpose* by the treaty of Seringapatam in 1799,—the Government have arranged to buy out the reversioners by capitalising a proportion of the annuities of those at present entitled for their life. How far the transaction is a gain to the Government is rather a matter for actuaries than politicians. The first article of the treaty of Seringapatam assigned to the East India Company, Canara, Coimbatore, and Wynaad, out of which provision was to be made for the families of Hyder Ali and Tippoo Sultan. The sixth article, it is true, reserved to the Company the right to reduce the amount of its payment to the members of these families on the death of any of them, and in the event of any hostile attempt against the Company to suspend the issue of the whole or any part. And Lord Dalhousie at one time maintained that because two of the sons of Tippoo were implicated in the Vellore mutiny of 1806 (on which occasion the family was removed to Calcutta), all claim had been forfeited. But Lord Dalhousie was quite alone in this view. It was held by the Government (and apparently no other interpretation would have been consistent with good faith) that the lands ceded were held expressly on condition of maintaining the descendants of these royal families, and after the death of the sons, the annual payments, under the name of the "Mysore Family Fund," were accumulated for the benefit of the grandsons, until they reached about 500,000*l*. The annual income of the lands ceded was about 70,000*l*,—but it was not provided by the treaty and not intended that the whole should be employed solely for this purpose. It was simply that fitting provision was to be made for these families. The payments to the descendants of these families are now from 50,000*l* to 60,000*l* annually, and all that Sir Charles Wood (on the recommendation of a Committee of his Council) has done, is to make an arrangement with the heads of the different families entitled—there are now, we learn, 22 grandsons—by which, on a certain transfer to them of Government stock, created, it is said, for the purpose, they shall relinquish all claim on behalf of their descendants to any continued payments. It is, in fact, an increase of the Indian debt in consideration of a considerable future diminution of the fixed burdens on the Indian revenue, after the death of the heads of families now entitled to annual stipends (all of whom are, we understand, already over 50 years of age). The lands ceded in Mysore yielded, as we are told, some 70,000*l* a year. Of this we at present give some 50,000*l* or 60,000*l* to the Princes. We are agreeing to give them during their life not only what is now given, but to transfer to them an amount of stock which will yield perhaps 20,000*l* a year more,—on condition that at their death the payments of pensions entirely cease. The British Government will, of course, pay interest on the debt thus created until they choose to pay off the principal; but instead of paying 50,000*l* or 60,000*l* a year, we shall only be paying 20,000*l* a year, while the ceded lands will still bring us in as before 70,000*l*. So that the transaction simply amounts to this,—we agree to pay a considerable extra pension for life to each of 22 heads of families in consideration of the gain which will ensue to us after their death,—when we shall only have the burden of the debt now created, namely, about 20,000*l* a year, against the clear revenue of the lands, 70,000*l* a year. And as each of the Princes dies and his annuity falls in, the temporary increase of charge on the revenues of the country will be so much diminished, so that when one-half of the annuitants are dead we shall probably be paying no more than we do at present.

Whether the arrangement be a profitable one or not to the Government in its details, it is certainly a desirable one in its general aim. The Princes at present live in Calcutta in that way in which Oriental stipendiaries are apt to live,—when they have no professional duties and no family responsibilities. It is well known that the plan has not worked well for the characters and intellects of most of the Mysore Princes. The father of each family is aware that the children will receive annuities from Government, and he has nothing to think of but how to spend his own. A more objectionable state of things for the descendants of a numerous and princely family, raised by rank above the level of the social usage around them, can scarcely be imagined. By the present arrangement this right to perpetual annuities will be exchanged for a considerable actual property at the disposal of the heads of the different families, and thus the complete mutual independence of father and child will be broken through, and the natural dependence restored. There will again be a motive for professional exertion, and the enormous evil of successive generations of annuitants will be removed.

If the outcry in Calcutta amongst both Europeans and natives be indeed as loud as the *Times* correspondent has represented it, there never was a better illustration of the error of making a mystery where there is no reason for concealment. Had the matter been explained in the Legislative Council, no one could have objected, unless indeed they were willing to start afresh Lord Dalhousie's very sophistical views of the obligations of the Government. The refusal to explain alone lent colour to the very absurd charges which have been made.

Agriculture.

LANDLORDISM IN EAST LOTHIAN.

A CASE OF GAME-MANIA.

THE evils inflicted on agriculture by game preservation are usually of a negative character. Corn is not produced in abundance, roots are small in size and but a narrow breadth of them is attempted to be grown, winter tares are seldom attempted, or if attempted fail to produce a crop, and so forth. All or most of the indications of good farming are "conspicuous for their absence" on a game-preserved farm. So, too, the tenants are commonly spiritless and disinclined, or more frequently unable, to invest capital in the cultivation of their farms. All these things may proceed from other causes than the "large head of game" preserved by the landlord, and the landlord and his gamekeepers always protest lustily that the deficiencies which they can't ignore, arise from anything rather than game depredations. They say, the tenants complain of injury from game, whereas their poor crops come from want of capital and from neglected cultivation. They declare, the farmers "ought to farm against the game," and then they would take no harm from its preservation. Foolish as these fallacies are, they obtain currency and make-belief credit with those who are led away by a passion for battue shooting. Here and there a really good farmer gets entrapped into the occupation of a game farm, but he soon either falls into an open quarrel on the subject with his landlord, and sooner or later leaves the farm, or he quietly takes the first convenient opportunity of leaving the proprietor to stock his own land or to find some other tenant who, having little to lose, is content to occupy a game-stocked farm. But, as a rule, game-preserving prevents the development and progress of husbandry within the sphere of its influence. There never, on such farms, have been good crops, and bad crops and innumerable wild animals are assumed as the normal state of things.

Now, however, a correspondence and comments in reference to the Dirleton and Belhaven estates in East Lothian, to which we have before alluded, present a new phase of game-mania. There we get a glimpse of some of the consequences of introducing game preservation upon farms which have hitherto been cultivated up to the highest standard, and whereon tenants of world-wide celebrity have expended their capital without stint, and have led the van of commercial agriculturists. Mr Nesbit Hamilton, who was for many years an English landlord, before succeeding, in his wife's right, to these fine Scotch estates, seems to be possessed of all those unhappy suspicions of his tenants and that mania for game-preserving, which have done so much to retard the progress of agriculture in England, and to be bent on giving his Scotch tenants a taste of what has been expressively called "Landlordism," —a term which may be interpreted as a petty system of suspicious restriction and interference, always aggravated by and not seldom adopted for the sake of game-preserving. The manifestation of this spirit which gave occasion to public comments on Mr Hamilton's management as a landed proprietor in East Lothian was the reletting the farm of New-house, when offerers were presented with a printed string of stipulations which were to be embodied in the lease of that farm, and as opportunities occurred in the other leases of the estate. Of these stipulations, it will be sufficient to mention three:—

1. Restrictions on the cultivation of potatoes in particular, and the enforcement of a prescribed course of cropping in general.

2. Express renunciation of all claim to compensation for game damage, whatever may be its amount, or to whatever extent the game preserved may be increased during the currency of the lease.

3. An engagement to dismiss any workman, servant, or other person employed on the farm to whom the landlord may object.

Nothing can be more complete or galling than the state of dependence to which the tenants of the estate will be reduced when they fall under the above regulations. The restricting them to a defined rotation of crops cannot fail during the currency of a nineteen years' lease to be the source of vexation and positive loss, while the limit imposed on the growth of potatoes—a crop by which the East Lothian farmers have of late years realised large profits—seems to be dictated solely by that narrow view which presumes that where a large gain is obtained by the tenant it must be made at the landlord's expense. It is the spirit which projected and supported the Corn Laws and similar monopolies, and which seems ingrained in the landlord mind.

The absolute renunciation of compensation for damage to accrue to the tenant from an increase of game during the currency of his lease is of peculiar significancy in Scotland, where in ordinary cases the tenant can recover compensation for game damage, should the game kept on his farm increase during the lease. Mr Hamilton's regulation reduces the Scotch farmer to the level of the English tenant-farmer on a game farm. The deterioration, probably a rapid decline of cultivation, will be the inevitable consequence of this regulation.

Then the obligation to dismiss, on the landlord's requisition, any servant or workman employed by the tenant, strikes at the root of the independence and self-respect of the farmer and all his workmen. We in England well understand the meaning of this stipulation. It is begotten of game-mania. It is intended to give the landlord the power of ostracising any working man suspected of snaring a hare or disturbing a pheasant. And mark the operation of such a system, even now in its infancy, and before all the tenants of the estate have been brought under the new regulations. We learn from a correspondent of the *North British Agriculturist*, that "the most extensive and extensively known tenant-farmer in the parish of Dirleton was lately heard to say, that his shepherd had declined to remain in his service because Mr Hamilton's underlings suspected him of snaring game." Can there be a more striking illustration of the moral and economical evils of game-preserving than that incident? Yet another may be mentioned. Mr Higgins, the factor, wrote a curious defence of his employer's management—of which a word anon—to *Bell's Weekly Messenger*, in which he stated that "whenever a tenant complains of the injury done by hares, orders are given to the keepers to shoot them, and all the game that is killed, and not required for the establishment, is *divided among the tenants and labourers on the estate*." How gracious! Imagine an East Lothian farmer touching "his respectful beaver" to the landlord or the factor, or it may be to the head gamekeeper, and suggesting that there are rather *too* many hares feeding on his crops, and humbly requesting that the keeper will be good enough to shoot some of them! Note the half-incredulous air with which his complaints are received, and redress promised, if on inquiry his complaint is ascertained to be founded on fact. And then he comes in for his share of the surplus game "not required for the establishment." Surely the intelligent capitalists of Scotland will rush to compete for vacant farms on the Dirleton estate! But even these presentation hares are not without their hazards to the recipients. Another correspondent, in reference to this division of the surplus hares, says: "I have heard that one man, finding a neighbour wished hare-soup, gave or sold him a hare so bestowed. A hare skin hung at the second man's door, and down came the keeper upon him, and much trouble he got into, being accused of the illegal possession of game." What a blissful district must the Dirleton estate be under the régime of game preservation.

A word on the statement of Mr Hamilton's factor published in the *Messenger*.

It is said that the new regulations embody the terms of the late leases on the estate with some of the terms of the crown leases, and that they are less stringent than those of other landowners in Scotland. What a defence of regulations which cannot be stated to an agriculturist without instant condemnation. Then it is said the new tenant has taken New-house farm at 80 per cent. more rent than the late occupier, that 18 persons offered for the farm, and that more rent was offered than that agreed to by the accepted tenant. All that may be true enough, it all constantly occurs on the worst-managed estates in England, and yet affords not a shadow of excuse for such regulations as are now imposed on the Dirleton tenants. Then the regulation about dismissing servants was to check the bondage and bothy system, the tenants are permitted to course, and whenever a tenant complains of damage done by hares, orders are given to the keepers to shoot them. And what does all this amount to? It may satisfy game-preserving landowners, which is perhaps the only public opinion to which Mr Hamilton is inclined to bow, but to an agriculturist the statement tells an over woful tale as to the future prospects of farmers and farm labourers on the Belhaven and Dirleton estates.

Literature.

COMMERCIAL LITERATURE.

REPORT OF THE BOMBAY CHAMBER OF COMMERCE FOR THE YEAR 1859-60.

THIS report is necessarily confined to local objects, such as railway communication as it affects Bombay; and electric telegraphs, which appear to be greatly appreciated by the Indian public. No less than 170,566 private messages had been despatched in 1859-60, against 101,164 in the previous year, showing an increase of no less than 68 per cent., and the receipts from them being 4,23,991 rs, against 2,83,103 rs, an increase of very nearly 50 per cent. India is now supplied with a network of wire extending nearly 11,000 miles.

The most interesting portion of the report, and that which occupies the principal attention of the Bombay Chamber, is the cotton cultivation. It would appear that the East India Company's experiments for the purpose of introducing the cultivation of American cotton are now brought to a close. They commenced in 1788, and have hitherto resulted, notwithstanding an expenditure of 350,000*l*, in signal failure.

The main causes of failure may be summed up as follows:—

Indifference on the part of the managers and employés, or ignorance and bigoted opposition on the part of the native cultivators.

Dilatoriness in forwarding the foreign seed, by which the proper seed-time was allowed to pass over, and the seed became useless.

Wholesale destruction of promising plantations by the inroads of cattle, in most cases doubtless with the connivance of their owners, who in dry seasons were not unwilling to fatten their cattle at Government expense. And, lastly, to the continual change of collectors who took an active interest in the cultivation, for those who took no interest whatever in the matter.

The successful experiments in Dharwar fully bear out all these allegations. Nothing could have been more unpromising at times than the prospects of the cotton cultivation in that district, and but for the energy of Mr Shaw, collector of Dharwar, the experiments would have been abandoned. In 1843 only 220 acres were in cultivation; in 1846 no less than 30,000 were under American cotton; but in 1848 the amount had descended to only 3,600 acres. Since then the average has steadily increased, as will be seen by the following table:—

Years.	American Kuppas.	Native Kuppas.	Total.
In 1851	31,688	223,314	254,982
1852	42,647	221,676	264,323
1853	28,010	251,113	279,123
1854	41,405	252,006	293,411
1855	63,298	210,260	273,588
1856	50,802	191,196	241,938
1857	82,350	196,929	279,277
1858	100,813	252,843	353,653
1859	105,406	214,993	320,399
1860	156,326	230,667	386,993

The Committee seem to be of opinion that if every one had shown the same energy as Mr Shaw, a similar success would have been the result.

It is a hopeful sign for the cultivation of cotton that it is being taken up by those engaged as engineers on the railways now under construction, and many persons of great consideration in many parts of India have applied for and received American or Egyptian seed.

It seems that the Egyptian seed has turned out all that could be wished, but a remarkable circumstance has been observed regarding the American seed, viz., that although perfectly good in March when it reached Bombay, *it has been found in June to be worthless, not more than* 1 *per cent. of the seed having come up.* It is probable, therefore (says the report), that the vitality of the American seed may be limited to the period necessary for its reproduction in the United States, where the sowing is completed in April. It is by no means improbable that this simple circumstance may be one of the chief causes of the almost general failure of the American cultivation. Now, only to have made this discovery after a lapse of 78 years does not speak highly for those who have superintended the cultivation. Why not plant American seed as the Americans do, in March and April?

It appears that one great obstacle to the cultivation has been removed by the adoption of Dr Forbes's newly-invented cottage and power-churkas. Let us hope that every means will be exerted to produce as much cotton as possible in India; for with the prospects before us in America, no means should be left untried to open new sources of supply.

GENERAL LITERATURE.

NARRATIVE OF THE CANADIAN RED RIVER EXPLORING EXPEDITION OF 1857. AND OF THE ASSINNIBOINE AND SASKATCHEWAN EXPLORING EXPEDITION OF 1858. By HENRY YOULE HIND, M.A., F.R.G.S. Longman, Green, Longman, and Roberts.

THE attention of the Canadian Government has of late years been more especially drawn to its North-Western Provinces,—those wide regions of marsh and forest, lake and prairie that, for the most part unexplored, unsettled, and untrodden, except by the brigades of the Hudson's Bay Company or by tribes of wandering Indians, stretch from the great chain of lakes to the foot of the Rocky Mountains,—by the discovery of gold in British Columbia, and the steady if slow growth of this neighbouring colony. Close neighbours, however, as the two settlements may be called, where only the Rocky Mountains divide nominal British Columbia from nominal Canada, the unsettled tracts of land that separate the actual colonies offer no slight obstacle to that constant and frequent intercourse between them that would prove so beneficial to both if it could once be accomplished.

The volumes now under our notice form one among many proofs of a sincere desire on the part of Canada to open up commercial and friendly relations with its sister colony, and at the same time to ascertain the value and suitability for permanent settlement of the country lying between the Western shores of Lake Superior and the Rocky Mountains on the one hand, and on the other, between the boundary line of the United States and the head of Lake Winnipeg in about lat. 54°.

This region, known under the general name of Rupert's Land, is chiefly taken up by the valley of Lake Winnipeg, its associated lakes and tributary rivers. "The mean breadth of this great inland basin is about 380 English miles, and its mean length 920 miles; hence its area is approximately 360,000 square miles. Its shape assimilates to that of a truncated section of a circle lying in a position the reverse of that produced by the meridians and parallels distinguishing its boundaries."....." A European area similarly situated East of the tenth degree of longitude would comprehend very nearly the whole of England and Ireland, part of the German Ocean, the English Channel, the most Eastern corner of France, the whole of Belgium and Holland, and the greater part of the valley of the Rhine, together with the Kingdom of Hanover." Lake Winnipeg is 280 miles long by 57 broad.

A tract of country so extensive, situated between two flourishing colonies, and in a healthy climate, must, irrespective of its probable future importance as the highway between the Atlantic and Pacific, become extremely valuable in itself, if it were once proved to be adapted for agricultural purposes. It was to gain some definite information on this point that the second expedition, under Mr Hind, was sent out to explore the Saskatchewan, the Assinniboine, and other rivers, and the chain of lakes into which they flow. The first expedition, in which Mr Hind filled the post of geologist, was directed to the mapping out of a summer road between Superior City and the one settlement of which Rupert's Land can yet boast—Selkirk on the Red River.

The result of both expeditions is favourable to the future prospects of this more remote part of our Canadian possessions; in as far at least as soil, climate, and water communication are concerned. The slow progress of the Red River settlement, however, does not encourage us to look for any very rapid progress in the colonisation and civilisation of the country further West. The tide of emigration thither has almost ceased, and the Scotch, English, and even Canadian element in the population is fast being absorbed into the native, or half breed, to the marked degeneration of agriculture, industry, and civilised manners. Among the principal causes of this falling off are enumerated the difficulty of access to the colony from want of proper roads, its distance from markets, and the losses incurred by the spring floods to which the fertile parts of Rupert's Land are more or less universally subject, lying as they do in the midst of a network of lakes, lakelets, and rivers, stretching from Lake Superior to the sources of the Saskatchewan.

Selkirk settlement was first planned and carried out in 1811 by Lord Selkirk, who purchased a tract of land from the Hudson's Bay Company, and established on the Red River, near its junction with Lake Winnipeg, the earliest band of colonists from Scotland. These pioneers, after encountering great opposition from the Indians in the service of the rival Company—(this was before the incorporation of the North-West with the Hudson's Bay Company)—succeeded in establishing a permanent home not far from the port of Fort Pembina, and were here reinforced by a band of German, French, and Swiss, from the Meuron Regiment disbanded at the close of the American war, by several French Canadian families, and some retired servants of the Hudson's Bay Company. In 1823 the population had risen to about 600; in 1856 it amounted to 6,523. The settlement can now boast of three churches of the Established Church of England, and an Indian mission; and two Catholic churches, one of them an imposing building whose "very striking" interior decorations must "exercise a potent influence upon the large and singular congregation who worship every Sunday within its walls." Of this church, Mr Hind says: "Two or three very sweet-toned bells ring at Matins and Vespers, and to a stranger just arrived from a long journey through unpeopled wastes, no sight or sound in Red River creates such surprise and melancholy pleasure as the sweet tones of the bells of St Boniface, breaking the stillness of the morning and evening air." There is one Presbyterian church with a mission attached, chiefly self-supporting. The Church Missionary Society has expended nearly 60,000*l* upon missionary exertions in Rupert's Land, but little is contributed by the more wealthy traders or farmers of the settlements. Of schools, there are 13 with a poor attendance of children, the roving and unsettled life of their half Indian parents acting as a bar to the regular schooling of these children. The same cause acts greatly to the disadvantage of the colony in another way: hereditary tastes, and the temptations to a hunter's life, sedulously encouraged by the Hudson's Bay Company,—the slow returns of agriculture compared with the ready but insecure profits of the chace, draw the native half-breeds from their farms into the open prairies; and the summer buffalo hunt is looked forward to not only as their greatest excitement and pleasure, but as their chief reliance for winter support. Consequently, "little or no progress" is made in the cultivation of a most fertile soil. "All kinds of root crops grow well, and attain large dimensions." The fruits and vegetables that can be cultivated in Canada flourish in the richer soil of the river valley; yet gardens are neglected. "Plums grow wild in the forest, but none are seen in the settlements. Apple trees are now only beginning to be tried at the Stone Fort. No effort of manufacturing industry is visible beyond the windmills for grinding wheat." The prairies afford an abundant supply of nutritive grasses; hay is in quantity unlimited, and quality excellent; yet few of the farmers "keep more than thirty or forty head of cattle," while sheep, to the rearing of which the country is peculiarly adapted, "appear to be fast diminishing." "The Rev. Mr Black," the Presbyterian minister, "expresses a strong opinion in favour of the rearing of sheep." "You saw what a splendid country it is for sheep pasture, and were there means of making wool into cloths, blankets, &c., greater attention would be given to the rearing of sheep; great quantities of such goods are also required for the fur trade, and it would be an advantage to have them manufactured here. Among the emigrants coming up to take possession of the land, it would be a great advantage were there somebody to establish machinery for carding, fulling, dyeing, perhaps spinning and weaving also." A trade in cattle is springing up between the colony and St Paul's that promises to become important. As to the general fertility of the soil, the testimony of one of the most industrious and successful settlers, Mr Gowler, is conclusive on that head.

"Look at that prairie," he exclaimed, "with much warmth of

feeling and manner." "10,000 head of cattle might feed and fatten there for nothing. If I found it worth my while, I could enclose 50, 100, or 500 acres, and from every acre get 30 or 40 bushels of wheat year after year. I could grow Indian corn, barley, oats, flax, hemp, hops, turnips, tobacco, everything you wish, and to any amount,—but what would be the use? There are no markets, it's a chance if my wheat is taken, and my potatoes I may have to give to the pigs. If we had only a market, you'd have to travel long before you would see the like of these prairies about the Assinniboine." The construction of a summer road between Lake Superior and the colony is now under the serious consideration of the Canadian Government. Its opening would give a great spur, and one much needed, to the industry of the Red River settlers; and would bring Fort Garry, on the Red River, within six days of Lake Superior and "twenty-two of Liverpool." "The Canadian Government have placed the sum of 200,000 dollars per annum for five years at the disposal of the North-West Transit Company, on certain conditions," for the accomplishment of this purpose.

Besides and beyond the opening of a road to the first nucleus of settled life and industry in its "back woods," the aim of the expeditions recorded in this book was to explore the regions further West, and to ascertain the practicability of a transit across the continent direct with British Columbia and entirely within British territory. The present route, as traversed by the boats of the Company, is unsuitable from its hazard and difficulty for emigrants, or for the carrying on of a general traffic. The practicability of, at least, a summer road as far as Selkirk is pretty clearly demonstrated in these volumes. We will give a summary of the route in the author's own words:—

As an emigrant route, the outlay of a few thousand pounds can make it available for summer communication. An emigrant could then start from Liverpool and proceed to Quebec by steam (eleven days), from Quebec to Collingwood, Lake Huron, by rail (two days), from Collingwood to Fort William by steamer (three days), and from Fort William to Fort Garry *via* Arrow Lake and the Boundary Line (six days), or twenty-two days in all from Liverpool to Selkirk settlement.....Cattle and live stock generally will necessarily pass to and from the United States over the prairies of the Red River, where food is abundant, and can be obtained without cost, but there is no reason why heavy goods should not in process of time be shipped at Liverpool and proceed direct to Fort William on Lake Superior without transhipment, passing through the magnificent chain of Canadian canals, enumerated on page 16 of the first volume, and thence to Red River through British territory *via* Arrow Lake, Rainy River, and the North-West corner of the Lake of the Woods.

Beyond the Red River settlements a fertile belt of land passes from the prairies of the Red River along the Northern shore of the Assinniboine, and the Northern branch of the Saskatchewan, to some of the lowest passes in the mountain barrier between the two oceans. This belt is "rich in water, woods, and pasturage"; and "any line of communication, whether by waggon or railroad, passing through it, will eventually enjoy the great advantage of being fed by an agricultural population from one extremity to the other. No other part of the American continent possesses an approach even to this, singularly favourable disposition of soil and climate, which last feature, notwithstanding its rigour during the winter season, confers, on account of its humidity, inestimable value on British America south of the 54th parallel." Captain Palliser, who conducted a more recent survey of the same country in 1860, reports it as a "partially wooded country, abounding in lakes and rich natural pasturages, in some parts rivalling the finest park scenery of our own country."....."Its superficial extent embraces about 65,000 square miles, of which more than one-third may be considered as at once available for the purposes of the agriculturist. Its elevation increases from 700 to 4,000 feet as we approach the Rocky Mountains. Consequently, it is not equally adapted throughout to the cultivation of any one crop; nevertheless, at Fort Edmonton, which has an elevation of 3,000 feet, even wheat is sometimes cultivated with success."

Mr Hind remarks on the singular fact that within British territory the capabilities of settlement are thus continued up to the very feet of the mountains, while South of the Boundary Line lies an arid desert, destitute of wood, water, and all essentials for even passing caravans of travellers. On the great route from the United States to California, water has to be carried from a distance to supply the different post houses. In Rupert's Land, on the contrary, in addition to the lakes and rivers that intersect it in many places, the fall of rain in the summer months is very considerable; this, with the fact that the moist winds from the Pacific blow over the lowered range of the Rocky Mountains, accounts both for the fertility and the warm summer climate of these high Northern latitudes. The cold of winter is intense; the annual mean being under that of Kasan in Russia; but this is of comparatively little importance, since the elevated summer temperature is sufficient to ripen grain and fruits, even the melon growing in the open air, and to perfect the growth of all sorts of excellent vegetables. Locusts, of which countless myriads were seen by our author in the course of his travels, and floods arising from the rapid melting of the snow at the sources of the numerous rivers, are the great enemies of the farmer on the Red River. The second might be ameliorated by proper works, but the first is without remedy, and when the pest makes its appearance all hopes for the year's harvest is over, and too frequently those for the following year also, as the females in September cover the prairies with their eggs, and the young ones are seen "hopping over the newly-fallen snow at the latter end of April." Of these devastating insects, Mr Hind gives a most curious account. We will extract one short passage descriptive of their appearance when in flight:—

Lying on my back and looking upwards as near to the sun as the light would permit, I saw the sky continually changing colour from blue to silver grey, ash grey, and lead colour, according to the numbers in the passing clouds of insects. Opposite to the sun the prevailing hue was a silver white, perceptibly flashing. On one occasion the whole heavens towards the South-east and West appeared to radiate a soft grey tinted light with a quivering motion, and the day being calm, the hum produced by the vibration of so many millions of wings was quite indescribable, and more resembled the noise popularly termed "a singing in one's ears" than any other sound. The aspect of the heavens during the greatest flight we observed was singularly striking. It produced a feeling of awe in our minds, as if some terrible unforeseen calamity were about to happen. It recalled more vividly than words can express the devastating ravages of the Egyptian scourges, as it seemed to bring us face to face with one of the most striking exhibitions of the Almighty power, in the creation and sustenance of this infinite army of insects.

It is characteristic of the improvident carelessness of the Indian nature that the ravages of these insects are looked upon with the most perfect indifference. The prairie grass may be consumed, the herds of buffalo driven to distant pasturages, their Indian corn and tobacco destroyed, but the Indians lie on the grass amusing themselves "by jerking the intruders off their arms and legs with a thin piece of wood bent by the fingers to act as a spring," without showing the slightest concern for future scarcity and starvation. The same improvidence is displayed in the wasteful and wholesale destruction they make among the herds of animals on which they depend for their chief support. One Indian will slaughter three times as much in the course of the year as he needs for his own use or that of his family. In the annual buffalo hunts large numbers of these animals, the main dependence of the Indians, are wantonly slaughtered, and left to decay. Two hundred and forty dead buffalos were seen by our author in one pound heaped together in promiscous death, and "it was its offensive condition which led the reckless and wasteful savages to construct a new one," in which the same scene of savage butchering and waste should be acted over again. Mr Hind gives a vivid account of this second "run," at which he was present; indeed his whole contribution to our former knowledge of the Red Indian and his ways is highly interesting and valuable.

There seem but faint grounds for hoping that any permanent impression will be made by missionary or other means upon the pure Indian races. They appear indeed almost incapable of a settled life of agricultural industry. The upshot of one experiment on a band of Hurons, who, flying before their exterminating enemies, the Iroquois, took refuge at Quebec, and have since occupied the village of La Jeune Lorette, is not encouraging, and has been in great measure confirmed by later experiments. The Indians of La Lorette possess 1,657 acres of land: of this little is cultivated: their farming stock consists of fourteen cows, five horses, and nine pigs. 310 bushels of grain and fourteen tons of hay were the years' result of their labours, and they number among the 282 inhabitants of the village one harrow and sixty-three hoes or spades. "Such is their progress after ten centuries of instruction and guidance under the Jesuits."

There is much more hope of the half-breeds, or, as they wish to be called, the "natives," especially of those who are of English or Scotch parentage. Though averse to a settled life in general, there are many instances of intelligent and successful exertion among them, while their general intelligence, fidelity, and powers of endurance are shown in the course of their services as voyageurs in the Hudson's Bay Company's brigades.

Through these half-bred descendants, the Indian may yet continue to possess his native soil, but he himself is fast disappearing, and will soon disappear altogether before the advance of the white man. However desirable for the good of the whole human race it may be that this fine country should pass into hands that will make the most of its resources, and not waste them in barbarous riot and unthrift, we cannot but regret the apparently inevitable extinction of a race possessing some fine natural qualities, and sympathise with the feelings expressed in the following extract:—

Our camp fire evidently soon attracted the attention of a number of Indians..... They told us they would send for their chief, who would arrive as soon as the wind fell.....As the object of their visit was to ascertain the reasons why we wished to pass through this part of their country, a long council or "talk" was the result of the visit. The council terminated by a distinct refusal, on the part of the chief, to allow any of the tribe to guide us through the swamps which separate the Lake of the Woods from the prairie country to the West..... Chief—"The reason why we stop you is because we think you do not tell us why you want to go that way, and what you want to do with those paths. You say that all the white men we have seen belong to one party, and yet they go by three different roads: why is that? Do they want to see the Indian's land? Remember, if the white man comes to the Indian's house he must walk in through the door, and not steal in by the window. That way, the old road, is the door, and by that way you must go. You gathered corn in our gardens and put it away; did you never see corn before? Why did you not note it down in your book? Did your people want to see our corn? Would they not be satisfied with your writing it down? You cannot pass through those paths."

.....At the close of the council, the chief said to the interpreter, "Let not these men think bad of us for taking away their guides. Let them send us no presents; we do not want them. They too have no right to pass that way. We have hearts, and love our lives, and our country. If twenty men came we would not let them pass to-day. We do not want the white man; when the white man comes, he brings disease and sickness, and our people perish; we do not wish to die. Many white men would bring death to us, and our people would pass away; we wish to love and to hold the land our father's won, and the Great Spirit has given us. ●Tell these men this, and the talk is finished."

There are many other subjects connected with British North America on which much fresh light is thrown by Mr Hind's painstaking and thorough investigations. We have not space to enter upon them here, but must refer our readers to the work itself, as one which (although, from the large amount of scientific matter it contains, and the minuteness of its explorations, it is not adapted to attain general popularity,) will repay the attentive reader with much agreeable as well as solid and valuable information.

THE EDINBURGH REVIEW. No. 229. January, 1861. Longman.

THIS is an unusually good number, and will do something towards reviving the old character of the Review, and teaching the public once more to look forward to its periodical appearance with a certain measure of confiding expectation. The subjects treated in the several articles have most of them some bearing on the peculiar interests of the day, and are various enough to meet the tastes of nearly all classes of readers. Literature, travels, semi-religious matters, foreign and domestic politics, and applied science, are all touched upon—literature as usual but slightly. The paper on "Japan and the Japanese" gives us the latest information to be gathered from Parliamentary Papers and other sources as to the character and habits of this singular people and the present state of our relations to them and to their Government. Much of the matter is curious, and would go some way to modify our previous impressions; but unfortunately it is conveyed in a style so clumsy, tasteless, and pretentious that we can scarcely understand its having passed muster with an editor of any critical judgment or experience.—The construction of the "Victoria Railway Bridge" over the St Lawrence, with all the formidable difficulties to be overcome and the marvellous engineering skill and energy displayed in the contest, is described in a short paper which every one may read with pleasure.—This is followed by a more elaborate and very interesting account of the various endeavours which have been made during the last ten years to bring "Ocean Telegraphy" to perfection. We have a detailed analysis of the causes of each of our many failures and our few successes to lay down long submarine electric cables. As our knowledge increases, the obstacles to be overcome seem to multiply in number; but at the same time the subject is every year becoming better understood, and perfection in the construction and protection of the cables more nearly attained; and there seems no reason to doubt that ere long we shall have submarine telegraphic communication regularly working over the entire globe. It appears, however, contrary to the original belief, that neither wires, nor strands, nor gutta percha will last for ever; and that probably even the best constructed cables will have to be periodically renewed. One curious difficulty in the way of working the electric telegraph is mentioned, which we do not remember to have seen adverted to before:—it appears that the manipulation of the machine causes considerable nervous irritability in the clerks who work it, and that they are apt to get into a passion with each other and to send peppery unofficial ejaculations along the wires. We have heard of idle clerks at slack stations sending riddles a few hundred miles to one another:—once the clerk at Bath asked his correspondent in London, "When did Eve give Adam a walking stick?" and learned in half a minute that it was "When she presented him with a little Cain;"—but we were not aware that they ever sent sarcasms and imprecations by the magnetic current.

Literature is (inadquately) represented in the number before us by a very pleasant summary of the "Autobiography of Dr Carlyle"—an entertaining volume of reminiscences by a Scotch minister, which has just now got possession of the public ear. A review of "Motley's History of the Netherlands," the work of a well-known American writer, who appears to have brought to light a vast quantity of original and authentic materials, and greatly added to our knowledge and modified our judgments of that period of history,—is rather historical than literary. The article is chiefly devoted to the new information which Mr Motley has brought to bear upon the preparation and destruction of the Spanish Armada, and upon the efforts of the statesmen and people of Great Britain to meet the most formidable danger that probably ever threatened our independence. So far from Queen Elizabeth having had any merit in the matter, it appears that she was lax, weak, dilatory, and stingy to an unheard of degree; that she would neither believe in the danger, nor pay the soldiers and sailors who were levied to avert it; that the nation acted almost in opposition to her wishes and entirely by their own spirit, energy, and generosity; that in fact, then as now, it seemed as if the People did everything and the Government did nothing. We were prepared to believe that every fresh research into the archives of the time would increase our admiration for the courage and skill of our gallant admirals and volunteers both on sea and land; but we confess we were not prepared to learn—what, however, appears to have been the unquestionable truth—that our famous virgin Queen was a wicked old miser as well as a weak old woman.

The last paper in the number is a review of a forthcoming memoir on the "Faults of our Naval Administration," which apparently will be an able and fierce attack on the constitution of the Admiralty. The writer holds that to confide the management of our Navy to a changing and ill-assorted *Board* is to ensure nearly all the waste and inefficiency we have so long complained of;—and in all probability few will be found to differ with him. The subject will be sure to engage the attention of Parliament in the approaching session; and we trust we are on the eve of some radical change of system.

But the paper of most deep and urgent interest will probably be felt to be that on "The Kingdom of Italy." It is written in a hopeful and thoroughly liberal spirit,—and in this respect offers a welcome contrast to some that have recently appeared in the same journal. The change of tone would seem to indicate that now at least all shades of sentiment in England are in unison in relation to the Italian Question. There are several points dwelt upon in this article which are *new*, and really add to our understanding of this which has been the prominent topic of interest during the past year.—In the first place, the writer shows with most convincing clearness the *impossibility* of Austria's retaining Venetia for more than a brief period, and the inutility of attempting it if it were possible; inasmuch as neither it nor the famous Quadrilateral are needed for the defence of her German dominions,—which are menaced from the Italian side *solely because she holds these Italian possessions.* If Austria once ceased to be an Italian despot, Italy would become her surest bulwark and her most natural ally.—In the second place, the current cant about the impracticability of having a united Italy is effectually disposed of by showing that, as a fact, the populations of Italy are more homogeneous than the citizens of almost any European nation; since their language, literature, laws, and religion are identical;—and, as a matter of history, the annals of Italy for five centuries display nothing so clearly as a perpetual and irresistible tendency to aggregation;—so that the present act of unification is only the final and natural finish to a long course of amalgamation.—In the third place, after giving unanswerable reasons why Florence, rather than Rome should be the future capital of the new State,—the writer explains from authentic sources the plan devised by Minghetti, the Piedmontese Minister of the Interior, for the administration of the amalgamated Kingdom,—a plan which would seem to be a most sagacious mixture of political unity and municipal independence. The monster evil of centralisation has been successfully kept at bay.

On the whole, it is long since so valuable and readable a number of the "Edinburgh Review" has been given to the public.

THE ART-JOURNAL. January, 1861. Arthur Hall Virtue, and Co.

THE number of the "Art-Journal," with which the present year commences contains some chapters of interest and an unusual number of illustrations. There is, in fact, hardly any subject treated without the accompaniment of several wood engravings of fine quality. We recommend in particular to the perusal of our readers the first paper, entitled "An Examination into the Antiquity of the Likeness of our Blessed Lord"; it is curious and interesting. The steel engravings give us a picture from the Royal Collection; "War," by James Drummond, R.S.A.; an early production of Landseer's, called "The Friends;" and Turner's fine composition of "Caligula's Palace and Bridge."

THE ILLUSTRATED BOY'S OWN STORY BOOK. Ward and Lock, 158 Fleet street.

THE boy into whose hands this book falls as an appropriate gift of the season, will, we fancy, be not a little puzzled to make it out. He is plainly not among English children, yet the names of Brentford and Windsor sound familiar to his ears, and no hint is given that the tales are not original, and written for his especial Christmas gratification. They are in fact translations from the French, very neatly done, and illustrated by French engravings of considerable spirit and humour in themselves, but rendered irresistibly comic by their application to English scenes and people. We have farmers' wives dressed *in sabots* and the high caps of Brittany, and policemen in the cocked hats and uniforms of the gendarmerie. The small heroes and heroines of the various stories are also intensely French in their speech, and sentiments, and graceful politeness; while their fathers wring their hands, weep, and sob aloud as none but Frenchmen could do. In some of the tales the scene is laid in France; but where, as in the "Adventures of a Donkey," it is not so, the effect is irresistibly comic:—nothing could well show in a clearer light the essential difference between the two nations than the impossibility of a French story, even for children, lying concealed beneath the masquerade of an English dress. The stories were, after all, scarcely worth translating. Some are high flown and romantic, full of sacrifice and expiation; others aim only at amusement; all are moral and instructive after their kind. We must, however, assure the writer of the before-mentioned "Adventures of a Donkey" that there are no caves at present beneath the Ruins at Virginia Water; and that if he or she will pay them a visit, he may do so with perfect impunity, and without any fear of making one in that band of unfortunate

cockneys who, it seems, chained two and two together, obey the tyrannical commands of their robber masters in those gloomy recesses.

THE BOY'S OWN BOOK OF BOATS. By W. H. G. KINGSTON. Sampson Low, Son, and Co., 47 Ludgate hill.

MR KINGSTON'S name is a sufficient guarantee for the correctness of the comprehensive information contained in this Book of Boats. Every variety of vessel that floats in the British seas, from a man-of-war to the fishing boat, is here described; its build, sails, equipment, are fully explained; and even the duties of its crew, and the different ranks of its officers related. Foreign vessels are less elaborately treated; but we think Mr Kingston has fulfilled his aim, "to give under the title of the 'Boy's Book of Boats and Vessels' a sketch of the existing state of naval architecture throughout the world," and deserves to have his hope realised, that many may derive both amusement and instruction from it on a very important subject.

THE EDUCATION OF THE FEELINGS, OR AFFECTIONS. By CHARLES BRAY. Third Edition. London: Longmans. 1860.

The object of this work is thus sketched in the Preface:—

Immediately children are intrusted to us, a kind of second education commences in ourselves: all that we say, do, and even feel, is imitated—we see the reflex of ourselves in others, and startled into consciousness by the facsimile, frequently for the first time begin to inquire what we are, and what we ought to be.....The object of this present edition is not so much to assist in the direct education of children, as in this second education of ourselves; to aid self-knowledge and self-development; or, if it were not thought too ambitious, we might say, that we aim at supplying a new system of moral philosophy, based upon an analysis of the use and abuse of each faculty, and its direction to its proper and legitimate objects.

In pursuance of this aim, the author treats of "the education of each feeling considered separately," basing his analysis upon the phrenological arrangement, in the following grouping:—The Self-Protecting Feelings; The Self-Regarding Feelings; The Social Affections; The Moral Feelings; The Æsthetic Feelings; The Religious Feelings; and Feelings which give concentration, power, or permanence to the others. To this he adds supplementary remarks on Authority, Temper, Punishment, &c., and two chapters on "The Connection of Mind with Organisation," and "The Intellectual Faculties." Though often falling into too great diffuseness, the book is one of considerable merit. The observations and suggestions are healthy, genial, and practical, and show a real acquaintance with the needs and habits of children. Theories of mental and moral philosophy from which we greatly differ, crop out occasionally here and there, but the practical parts of the book are not much affected by them, and parents of whatever speculative bias may study this manual with advantage.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The treaty of "friendship, commerce, and navigation" between France and China is formally promulgated in the official *Moniteur* of this day. The commercial concessions it accords to France are considerable. The French are to be allowed to reside, travel, and trade in China; are also to profit by any modifications in the tariff, in the tonnage, export, or other duties which may be accorded to any other nation. They may hire houses or stores for depositing their goods, or build such edifices themselves. The Chinese authorities are to prevent them from being overcharged. The property of the French is to be inviolable. No privileged society of commerce is henceforth to be established in China, and no coalition for exercising a monopoly in trade is to be tolerated. A series of regulations relative to the arrival and stay of vessels in ports, and the disembarking and embarking of cargoes, are set forth, and they are very liberal. Frenchmen in China who may get into disputes are to be dealt with by French authorities, and the Chinese are not even to interfere in dissensions between the French and other foreigners; nor are the Chinese to have any power over French vessels. In case of war between China and any other country, French commerce is not to be interrupted or embarrassed. Annexed to the treaty is a tariff of the duties to be imposed on goods imported by the French; it comprises almost all sorts of articles, small and large, from assafœtida to cotton and woollen fabrics, and fixes very moderate duties. The treaty also makes important political concessions, and grants an indemnity of 2,000,000 taels for the losses sustained by French subjects at the hands of the Chinese in Canton, the indemnity to be paid in six yearly instalments.

It is affirmed that the Bank of France during the last few days has not been subjected to so much pressure, and that rather large sums have reached it from different sources,—apart from the exchange of silver for gold to the amount of 30,000,000f which it has effected with the Bank of St Petersburg. The Bank continues to maintain its rate of discount at 7 per cent., but in the market, money can be obtained considerably lower.

The stockbrokers yesterday took a decision of considerable gravity. It was to suppress the class of men called *remisiers*, that is who are allowed a commission on the business they obtained for the brokers. This class has existed for some time, and it was believed was very useful to the brokers; but the truth is that the business of the latter has of late so much declined, that they find themselves under the necessity of doing without intermediaries. One result of the measure will be to cause a further diminution of business done on the Bourse, as the *remisiers* used to go about and coax people into transactions—a thing the regular brokers cannot do. The belief is entertained that the brokers will also endeavour to get rid of the authorised clerks or deputies whom they appointed some time back on the suppression of the *coulisse* (unlicensed brokers).

The Bourse has been somewhat less desponding during the past week, and quotations present a slight improvement:—

The monthly Customs returns have just been brought out. They are more interesting than usual, inasmuch as they comprise the whole of last year, and institute a comparison between it and the two preceding years,—which comparison enables a tolerably correct idea to be formed of the practical utility of commercial reforms effected by Imperial decrees and the treaty with England. It appears from these returns that the total amount of import duties was in

1860.	1859.	1858.
f	f	f
131,385,000	189,493,180	182,614,705

The falling off last year is certainly considerable, but it will occasion no surprise when the large reductions in the duties on coffee, sugar, cocoa, indigo, cotton, wool, coal, and some other articles are remembered, Subjoined is a detail of the *quantities* of the imports in the last three years: it is on the whole more satisfactory for last year than from the depressed state of trade might have been expected, and, with the exception of sugar, testifies in particular to the value of the reductions of duty referred to. The phrase "general commerce" means, as has been explained in previous letters, *all* goods which arrive in France; and that of "special commerce" signifies the portion thereof taken out of bond for consumption.

The following is an account of the exports for the said three years. The term "general commerce" in exports means *all* articles sent out of France, foreign as well as native: "special commerce" means the portion thereof that is of French production, *or that has been made French by the payment of duty or otherwise.* It is in virtue of the latter part of this definition that such articles as cotton, cochineal, tin, and indigo figure as French.

The following is an account of the markets;—

FLOUR.—At *Paris*, yesterday, the quotation was 65f to 68f the sack of 159 kilogrammes, the same as last Wednesday. The four marks were 64f 75c to 65f for the current month, 64f 75c to 65f 50c for February.

WHEAT.—At *Paris*, yesterday, prices were 35f to 37f, and for some lots 37f 50c the cask of 120 kilogs. Offers were not large. Of the provincial markets, 72 present a rise of from 17c to 1f 30c the hectolitre, 35 a fall of from 10c to 1f 50c; 34 have remained unchanged, and 25 are reported firm.

COTTON.—Business at *Havre*, in the week ending Friday, was important, the sales having been 49,797 bales, and prices rose considerably, the closing quotations being 3f higher for the very low qualities, 2f to 3f for the low, 3f to 4f for the very ordinary, 3f for ordinary and for other sorts. Low New Orleans was consequently 99f the 50 kilogrammes (1 cwt), and very ordinary ditto, 104f. The arrivals were 16,569 bales. On Monday of the present week sales were active, but on Tuesday and yesterday were less so. Prices are very firm, low New Orleans at 99f to 100f.

SUGAR.—At *Havre*, in the week ending Friday, business was unimportant, the sole sale recorded being 27 casks French West India at 49f the 50 kilogs duty paid. The arrivals were 696 casks Havana. This week, business has been more active: Havana, 34f to 37f. At *Bordeaux*, last week, the sales were 235 casks French West India, at 48f; 2,500 bales Mauritius, at 52f 25c; 334 bales Reunion, 52f 25c; 2,643 bales Mauritius, 54f 25c, all duty paid. This week, some French West India has been sold at 48f. At *Nantes*, last week, about 350 sacks Reunion *gros grain* went at 50f to 55f 50c; a small lot of French West India "usine," 50f 51c. This week, some Reunion "gros grain" has been sold at 58f. At *Paris*, in consequence of the recent modification of duty on foreign, a decline has taken place in the price of native (beetroot).

COFFEE.—At *Havre*, last week, holders having consented to a reduction in prices, business was somewhat animated. 3,400 sacks Hayti Port-au-Prince for delivery were sold, part at 76f the 50 kilogs in bond, part at 75f; 1,000 sacks Cayes expected, 75f; 400 Cape disposable, 78f; 613 Rio not washed for delivery, 70f; 394 ditto, washed, 77f; 4,000 sacks Santos expected, 74f; and a small lot of Reunion. In addition, some lots of damaged were disposed of. The arrivals were 7,220 sacks Santos. This week, Gonaives has been at 83f; Hayti, 77f 50c; ditto Cape, 79f; Cayes, 77f; Port-au-Prince, 76f 50c to 77f 50c; Rio, 70f 50c. At *Bordeaux*, last week, business was somewhat more animated: 100 sacks Rio not washed went at 73f; some lots Ceylon, native and plantation, at prices not stated; 2,640 sacks Mysore, 110f; 241 sacks Java at 115f; a lot of Mocha at prices not stated. Various lots of damaged of different sorts were also sold. This week, a lot of Mysore has been sold at 110f; some Guiana at prices not stated; and some Ceylon plantation at 110f. At *Nantes*, last week, the sales consisted only of some small lots of Reunion. Nothing done this week. At *Marseilles*, last week, about 2,000 bales Rio were sold at 70f to 75f.

INDIGO.—At *Havre*, in the week ending Friday, business was not active; only 14 cases Bengal and 5 Java having been sold; they were, however, at 50c above the estimates. There were no arrivals. This week, 3 cases Bengal have been sold at the same premium. At *Bordeaux*, last week, 27 cases Madras, 9 Kurpah, and 4 Guatemala were sold; prices not stated. This week, some sales of Java, Kurpah, and Madras have been made, but prices are not given.

HIDES.—At *Havre*, in the week ending Friday, the business was not important: 1,250 La Plata dry at 125f to 137f 50c the 50 kilogs; some salted at prices not stated; 665 Rio Grande salted oxen, 73f 50c; 300 Maragnan drysalted, 87f 50c; Pernambuco salted for delivery, 62f 50c; 1,006 horse, dry La Plata, 10f 75c each duty paid. The arrivals were about 3,000. This week, Buenos Ayres dry have been at 119f to 129f; New Orleans salted, 50f 50c.

WOOL.—At *Havre*, in the week ending Friday, business was rather active: 52 bales La Plata unwashed went at 1f 22½c to 2f 10c the kilog; 7 bales Rio Grande unwashed, 1f 15c; 20 bales Chili unwashed, 1f 60c. The arrivals were only 27 bales. This week, a small lot of Buenos Ayres has been sold at prices kept secret.

TALLOW.—There were no sales at *Havre* last week, and the arrivals were 25 casks from New York. No sales have been made this week. At Paris, yesterday, the 100 kilogs began at 131f, but soon fell to 130f 50c, and for some lots to 130f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg. first quality was 106f the hectolitre; Montpellier of 89 deg., 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c; beetroot, first quality, 108f.

BRUSSELS, Jan. 23.

An official return shows that the amount of indirect taxes (State-railways and telegraphs included) received for the year ending 31st December last was 111,794,534f, which was about 6,500,000f more than the estimates, but about 400,000f less than in 1859.

Correspondence.

RESULTS OF FREE TRADE WITH THE SOUTHERN STATES.

TO THE EDITOR OF THE ECONOMIST.

SIR,—At the close of the article in last week's ECONOMIST on the "Dissolution of the Union, &c.," it is stated:—"It is possible that the Northern States will raise their tariff as much as the Southern States lower theirs;" but I think it very doubtful that such a result can follow. On the contrary, I hold that free imports in the South of the United States will *compel* free imports in the North—aye, and in Canada, too, in self-defence, and as the only possible preventive of an organised system of smuggling on a scale which has never yet been seen.

What "cordon of douaniers," even in a European State, with

its army of Government employés, could keep the line of an inland frontier so extended as that between the North and South? The Americans themselves will be the first to take advantage of so anomalous a condition of things as free trade in the South and protective duties in the North, and will *run* the European goods landed at ports in the South all through the North and West and into Canada! Free trade will be the only *protection* for the honest in the North. But free trade introduced suddenly and without any time for preparation into a highly protected State, means ruin to the manufacturers (who will especially suffer in Pennsylvania and Massachusetts) and heavy losses to the merchants to whom they are indebted.

This is a phase of events which it seems to me has hardly been taken into account hitherto sufficiently in considering the consequences of a dissolution of the American Union. I should like to see some observations on this point in an early number of the ECONOMIST, and remain, Sir, your obedient servant, H. T. L.

COTTON-GROWING IN SYRIA.

TO THE EDITOR OF THE ECONOMIST.

SIR,—In the last number of the ECONOMIST, under the head of "Commercial Literature," and referring to a paper by Mr Moore, the British Consul in Syria, directing attention to the waste lands in that country, which in his opinion might easily be converted into a most valuable field for the cultivation of cotton, I find the following observations:—

"Now we do not hesitate to say that, if such localities exist, and the Sultan, in lieu of letting the lands lie unproductive, were to make a grant of them at the present time to a company directed by men of known business habits, we have no doubt that the capital would be found in this country to cultivate them."

That the existence of these localities should still remain to be proved is a strange fact in these days of universal travelling and superabundant authorship; and observing that a company has been recently formed in Manchester, having as its head the President of the Chamber of Commerce, for the encouragement of the growth of cotton in India, I have long had it on my mind to direct the attention of these gentlemen to a country much nearer home, where, under proper management and protection, their exertions are certain to be much more amply rewarded. The wide circulation of your journal gives me the assurance that the subject cannot fail to be brought under their notice, should you, in consideration of its importance, admit this letter to your columns.

The field for the production of fine cotton in India is of necessity limited by the very nature of the plant, which, containing an enormous percentage of salt, deteriorates in quality as it is removed from the sea, unless it can gather from the soil the substance which it absolutely requires. Thus, the finest *natural* cottons of India are those grown in the peninsula of Guzerat, everywhere within influence of the sea air.

Look at Palestine on the map—a narrow strip of land, with the sea on its western border, over which for nine months out of the twelve a westerly wind is constantly blowing. Can any situation be more favourable? And, from personal observation, I am enabled to affirm that there are in that country miles upon miles of land of unequalled fertility now lying waste and uncultivated. It has been generally assumed that Palestine is a desert: there never was a greater error. The great plains which formerly supported so large a population, and made that land the "wonder of the earth" for its fertility, still exist, but centuries have rolled by since the ploughshare called forth their buried riches. The whole valley of Jordan, the plains of Merone, of Esdraelon, and of the Bekoa, and numerous other localities, are in every way fitted for the production of almost boundless crops, and at the present moment they are either utterly waste, and the haunts of prowling Bedouin, or support only a scant population with indifferent success.

I shall refer to only two of those plains—that of Esdraelon and of the Bekoa.

The first is the great valley which separates the land of Judah from Galilee, having on one side the chain of mountains terminating in Mount Carmel on the sea, and on the other the hills of Galilee, between which runs "that ancient river" Kishon, draining it to the westward. Of this plain Mr Porter writes, in his admirable Handbook for Syria:—

"Two things strike us forcibly in looking over the plain of Esdraelon. 1st, its wonderful richness. After the grey hills of Judah and the rocky mountains of Ephraim, the traveller looks with admiration over this unbroken expanse of verdure. The gigantic thistles, the luxuriant grass, and the exuberance of the crops on the few spots where it is cultivated, amply prove the fertility of the soil. 2nd, its desolation," &c.

I crossed that wonderful plain in the early spring, and it was then one wide waving sea of green—the wild artichokes growing so high as to be on a level with our heads as we rode through them. The soil is that rich red crumbling earth which is the delight of all gardeners in the South of Europe and the East, and which is everywhere considered to be of the most exuberant fertility.

The second plain to which I wish to direct attention, is that of the Bukoa or Bakaa, otherwise the great plain of Baalbek, situated between the two ranges of Lebanon,—which possesses, in some respects, even greater advantages than the plain of Esdraelon for the cultivation of cotton. The village of Tachlah, rendered notorious by the recent dreadful massacre, abuts upon this plain, which is at a higher elevation, much more populous, and I should think within a more accessible distance of a port of shipment than the other. In his description of it Mr Porter writes:—

"If the English Government were only alive to their own interest, they would take steps to encourage the growth of cotton on this splendid plain. The whole extent of it, from Baalbek southward, containing nearly 200 square miles, appears adapted to that plant. Why do not Manchester merchants turn their attention to the resources of Syria? It is surely more accessible than Central Africa. These plains might be made to yield a large supply of cotton to the English market; the people would be tractable and industrious *if only* saved from the rapacity of local sheikhs and Turkish pashas. The climate, too, is salubrious, and English residents, if officially protected, would have nothing to fear from Bedouin or outlaws. And, while the plains would thus be converted into vast cotton fields, every upland vale and every hill side might be filled with mulberry plantations for the production of silk."

It is unnecessary to add anything to the statements of so undoubted an authority, but, if it were required, I could bring the testimony of hundreds of writers, ancient and modern, besides my own personal observation, to vouch for the accuracy of the above descriptions. That a rich reward awaits those who shall first, under proper advice and management, awake the long-slumbering fertility of that favoured region I am thoroughly convinced; and in the present crisis of the Southern States of America, I feel that I am doing a good service to the most important interests of our country in drawing the attention of manufacturers thereto.

Apologising for the unavoidable length to which this letter has extended, I remain, Sir, your obedient servant, A TRAVELLER.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following commercial report is dated Calcutta, Dec. 18:—Produce Market.—A fair business has been doing since our last report, chiefly in sugar, rice, saltpetre, and linseed, and rates have increased with the demand. Little inquiry is made for other exports. Import Market.—Few large transactions are reported, but generally more activity prevails. Acting under the influence of an advance in the English market and a cessation of shipments, holders are firm at previous rates. Metals have improved slightly in value. Government Securities.—There is very little to report as regards Government stocks; prices are barely supported, and the transactions are of the most limited character. The Five-and-a-Half per Cents. have sold at 4 annas discount, but a few speculative purchases have placed the sellers' rate at par; the Five per Cents. are to be freely obtained at 94-8, and the Four per Cents. at 79-8 to 80. The Bank of Bengal has slightly increased their margin for loans. Money Market.—There is no very preceptible advance in the value of money, the Bank of Bengal balances are not diminished, and their rates continue the same: any demand can be freely met by the banks and the native shroffs. Exchange.—Since our last report there has been very little fluctuation in the rates on London. A moderate business has been transacted in bank bills at 2-1⅛, in credits at from 2-1¼ to 2-1⅜, and documentary at 2-1½. The market closes weak. On France there have been no transactions of importance, and rates are as last quoted. Sales on China have been made at 219 to 220 per 100 dols. On Mauritius the rate is 53 for 30 days' sight, and 53½ for 60 days' sight. Freights.—We have very little to record in freights generally. There has been a little dulness, and rates have been drooping for other quarters, though for London rates keep up—3*l* 15s to 3*l* 17s 6d, and Liverpool 3*l* 7s 6d.

We have received the annexed report from Bombay, under date the 27th Dec:—The late combination among the native dealers has given way, and business was resumed on the 17th instant. Immediately on the re-opening of the bazaar, extensive transactions were effected in piece goods at advanced prices. The export market is active, owing to the firm state of the cotton market at Liverpool. Cotton.—Owing to the less favourable advices received from the home market prices here suffered a corresponding decline in the early part of the fortnight. The low prices induced buyers to come forward, and latterly the market assumed a firm tone. The closing prices, however, are still 4 to 5 rs below our last quotations. There is very little doing for China. New cotton is arriving slowly from the interior, and there is a moderate stock of staple at market. Money Market and Exchange.—The money market is tighter. The Bank of Bombay, it is expected, will soon further raise its rates of discount. Shares and Government securities are in little inquiry, and the latter are quoted lower—Four per Cents., 80 rs; Five per Cents., 94¼ rs; and Five-and-a-Half per Cents., 100⅛ to 103¾ rs. Exchange on London has undergone considerable fluctuations during the fortnight. The rates opened at 2s 1¾d for six months' sight bank bills, but soon fell to 2s 1d, and has again gradually advanced to 2s 1 3-16d, which is our closing quotation. Documents have changed hands at 2s 1 5-16d to 2s 1 9-16d.

The official list of the shipments of wine from Oporto during the past year shows a total of 27,860 pipes, of which 22,416 were to Great Britain. The largest exporters were Sandeman and Co., 2,730 pipes; Cockburn and Co., 1,681; T. G. Sandeman, 1,626; Offley and Co., 1,504; Martinez, Gassiot, and Co., 1,397; Hunt, Roope, and Co., 1,114; and W. J. Graham and Co., 1,042. All others were under 1,000 pipes.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 12th day of January, 1861:—

Name and Title.	Authorised Circulation	Average Circulation.	Average Amount of Coin held.
	£	£	£
Bank of Scotland	300485	466356	286457
Royal Bank of Scotland	183000	464476	388878
British Linen Company	438024	516887	324269

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 23rd day of January, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,263,430	Government Debt	11,015 100
		Other Securities	3 459,900
		Gold Coin and Bullion	9,343 644
		Silver Bullion	1,444,786
	25,263,430		25,263,430

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	8,447,430
Rest	3,360,261	Other Securities	20,236.060
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	2 948,437	Notes	5,228,300
		Gold and Silver Coin	733,150
Other Deposits	13,130,293		
Seven Day and other Bills	652,949		
	34,644,940		34,644,540

Dated the 24th January, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,688,079	Securities	28,605,490
Public Deposits	2,948,437	Coin and Bullion	11,521,580
Private Deposits	13,130,293		
	36,766,809		40,127,070

The balance of Assets above Liabilities being 3,360,261*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£401,127
An INCREASE of Public Deposits of	202,118
A DECREASE of Other Deposits of	1,303,663
A DECREASE of Government Securities of	336,291
A DECREASE of Other Securities of	887,518
A DECREASE of Bullion of	253,783
An INCREASE of Rest of	25,080
An INCREASE of Reserve of	109,307

The present Bank return is the most favourable we have seen for some time past. There is a decrease in the circulation of 401,127*l*, and in other deposits of 1,303,663*l*; in Government securities of 336,291*l*, and in other securities, which is the most favourable feature, of 887,518*l*.

The decrease of bullion still continues, being 253,783*l*; but there is an increase in the reserve of 109,307*l*—and 202,118*l* in the public deposits. It will be observed that the position of the Bank is much strengthened, the reserve bearing a much greater proportion to the deposits than for some time past.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,657,072	£ 26,530 197	£ 21 578,155	£ 22,487,646	£ 20,688,079
Public deposits	5,756,995	3,248,893	6,520,053	5,529,726	2,948,437
Other deposits	10,721,309	18,175,558	15,037,304	14,079,747	13,130,293
Government securities	14,145,156	9,287 580	10,698,867	10,411,403	8,447,430
Other securities	12,339 494	21,047,480	16,595,620	13,499,757	20,236,060
Reserve of notes & coin	8,938,366	10,209,014	12,942,069	8,407,216	5,961,450
Coin and bullion	14,430,566	15,398,724	19,177,854	15,559,096	11,521,580
Bank rate of discount	3 p. c.	4 p. c.	2½ p. c.	3 p. c.	7 p. c.
Price of Consols	96¼	95½	95¼	94½	91⅛
Average price of wheat	38s 0d	48s 9d	41s 9d	43s 11d	57s 3d
Exchange on Paris (shrt)	24 95 97½	25 15 27	25 7½ 12½	25 2½ 10	25 17½ 25
— Amsterdam ditto	11 16 16½	11 14 15	11 14⅜ 15½	11 12⅜ 13⅛	11 16 16½
— Hamburg (3 months)	13 6½	13 6½	13 6 6½	13 4⅛ 4⅜	13 7½ 8

In 1858, the rodomontade of the French colonels attracted attention. The Bank rate of discount had been reduced from 5 to 4 per cent., the reserve having again increased 1,320,000*l*, and the bullion nearly 1,000,000*l* within the week. An Indian loan was anticipated.

In 1859, the meeting of Parliament was looked forward to with impatience as likely to relieve the injurious and painful suspense under which the commercial world laboured in respect to the tendency of foreign politics. At a recent interview with the Directors of the National Bank, the Emperor of Austria had expressed his confidence that the pending difficulties with France would be soon adjusted. Money was cheap.

In 1860, the drain of bullion was considerable, occasioned by the demand to pay for silver purchased on the Continent for transmission to the East, principally for Government rupee paper. The Bank of England were selling stock, but very little pressure for money was observable.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 1,618,185*l*; in 1858, a deficiency of 2,871,822*l*; in 1859, a deficiency of 1,558,316*l*; and in 1860, a deficiency of 5,420,010*l*. In 1861, the deficiency is 7,105,767*l*.

DISCOUNT AND MONEY MARKET.—The discount market has remained steady at 6¾ to 7 per cent. Some exceptional cases may be recorded where bills have been negotiated under those rates. The demand for discount has been moderately active, both at the Bank of England and in Lombard street. The Bank of England has been borrowing largely in the Stock Exchange, where the rate has been from 5 to 6 per cent. To-day the demand has increased, and the rate from day to day is 6½ to 7 per cent. The public, however, have been purchasing stock, which sustains the market, and enables large loans to be effected on Government securities without any depreciation of the market.

If we may judge from the opinions of the most experienced, the discount market is likely to be easier. The exchange at New York has risen for first-class acceptances to 105½, and as the stream of gold arrives out it is fair to presume that the exchange will improve, the more especially as some orders have been transmitted to realise the profits made in purchases of American securities, to which purpose a considerable amount of the bullion that has been transmitted has been devoted.

We look for great relief to the money market to the circumstance of our farmers being now enabled to thrash out their corn, and repay their advances to the country bankers. We speak advisedly when we say that the country balances have never been so low with the London bankers and the discount houses as at the present time, and this is in a great measure attributed to the advances made to the farmers until such time as they were enabled to bring their corn to market.

The position of the Bank of France is stated to be strengthened, and money is abundant in Paris at 5½ per cent., while the Bank retains the rate of discount at 7 per cent.; consequently their securities are likely to diminish.

The drain of gold has evidently received a check, for about 20,000*l* bar gold has been sold to the Bank to-day; and evidently the export to America has received a great check.

The only thing to be feared is a speculation arising in cotton, from the fear that the supply will fall off; but as the moneyed world will throw every obstacle in the way of discounting bills having the slightest taint of speculation connected with them, it is to be hoped that any speculation arising in cotton will be strangled in its birth. For these reasons, apart from any political catastrophe arising, we believe we perceive, for the first time for many weeks past, a prospect of greater ease in the discount market.

The following are the rates of discount at

	Bank Rate. Per cent.	Open Market. Per cent.
London	7	6¾ to 7
Paris	7	5½
Brussels	5	5
Amsterdam	3	3
Hamburg	3	3
Turin	7	7
Cadiz	6½	6½

The demand for money is greater in Hamburg, but the rate still continues at 3 per cent.

ENGLISH FUNDS.—Consols have fluctuated during the week, being 91¼ and 91⅜. The last price this afternoon being 91¼ ⅜ for money, and 91½ ⅝ for the account. Large amounts of stock has been given on by the Bank of England, and the rate of money on stock has varied from 5 to 7½ per cent. from day to day. Exchequer Bills have been well supported at 6 to 1 discount. It is evident that they have received some extraneous support, as it is not reasonable to suppose that, bearing less than 3 per cent. interest, they could be maintained near par without it. Possibly the Savings Bank money may have something to do with it, although it must not be forgotten that a large portion of them may be paid in at par in March next.

A new Indian loan for 3,000,000*l* is stated to be on the eve of negotiation, and next Monday is the day fixed. It is said it will be an open loan, and will be offered to the public through the medium of the Bank of England at par.

and that the rate of discount to be allowed will reduce the price to about 98½.

It would appear that the Indian Council have taken advantage of the power conferred on them by Act of Parliament to exchange 3,079,000*l* Debentures and Bonds for a similar amount of Indian 5 per Cent. stock; so that the amount of Indian 5 per Cents. is now 8,079,000*l*, in lieu of 5,000,000*l*.

The jobbers and brokers in the Stock Exchange feel aggrieved that this operation should have been effected clandestinely; and it is to be regretted that all operations for Government account are not transacted with the utmost publicity, whether they relate to savings banks or Indian loans.

Foreign Funds.—The reported entire defeat of Miramon, and the occupation of Mexico by the constitutional forces, has caused considerable firmness in Mexican Bonds. Whenever a constitutional Government is constituted, our Government will endeavour to obtain redress for the many wrongs the bondholders and indeed all British subjects resident in Mexico have been subjected to. It is well known that the Custom House revenues hypothecated for the payment of Mexican dividends are ample for the purpose; but it has been the habit of most Mexican Governments to unlawfully seize on them. This misappropriation we believe it is the determination of the British Government to prevent in future, by making the ports on which Custom House revenues have liens amenable for any misappropriation of the bondholders' fund. Turkish Bonds have been flat—possibly in connection with the failures in the Levant trade. There is no doubt, however, that M. Mirés' Loan, and the uncertainty connected with it, is the great cause of Turkish Bonds being heavier this week, as we are informed the Turkish Government is, partly from the pressure of some of its firmest supporters being involved almost in ruin from its not punctually performing its engagements, at length determined to reform its financial system, and place it on a better and more substantial basis.

The French Rentes close this afternoon 68.45.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

Consols

	Money Lowest.	Money Highest.	Account. Lowest.	Account. Highest	Exchequer Bills.

Railways.—Railways have fluctuated considerably during the week, under the apprehension that their traffic would fall off in consequence of a diminution of our trade. We mentioned about a fortnight since that it was probable loans would be called in which would bring to stock market, and to this cause more than to any other we attribute the fall that has occurred.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

Railways.

	Closing prices last Friday.	Closing prices this day.
Bristol and Exeter	99 101	99 101
Caledonian	96 ½	95⅝ 6⅝

Great India Peninsular	95 6	94½ 5
Great Western of Canada	10½ ½	10½ ½

Bullion.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes:—

Gold.—During the past week the export of gold to the United States has continued, the Bohemian having taken 4,000*l*, the Arabia 226,177*l*, the Kedar 9,750*l*, and the Vigo 59,000*l*; and the Canada, to sail on Saturday, will take a further amount. The Oneida has taken 14,000*l* to the Brazils, and the Ceylon, 76,166*l* to the East Indies; and about 80,000*l* in sovereigns have been withdrawn from the Bank. The Indus has brought 29,121*l*, the Roxburgh Castle, 167,000*l*, and the Wellesley 131,500*l*, from Melbourne. The two first amounts have been sold for refining purposes. The gold per Wellesley was delivered on Friday.

Silver.—The Oneida has brought 65,000*l* in silver, and this has been sold at 61¼d per oz standard for the Bombay mail, and a considerable amount will be forwarded by that opportunity. The Ceylon took 138,440*l* to China and the East Indies.

Mexican Dollars.—We quote the price as 60¼d per oz, with a quiet market. The next shipping day for China and the Straits will be 2nd February, and until the letters from the East are delivered we do not expect much demand.

Exchange on India is 2s to 2s 0⅛d for bank's 60 days' sight drafts on Bombay and Calcutta. Bills with documents, 1s 11⅜d to ½d. Drafts on Madras by banks at 60 days' sight, 1s 11⅝d to 2s.

India Government Loan Notes.—We have very little to report about these securities, which remain inactive, at about par for the 5½ per Cents., and 94 to 95 for the 5 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 10d per oz std; bar gold, refinable, 77s 11d per oz std. Silver—Bar silver, 5s 1¼d per oz std; bar silver, containing 5 grs gold, 5s 1½d per oz std; fine cake silver, 5s 5⅞d per oz; Mexican dollars, 5s 0¼d per oz; Spanish dollars (Carolus), 6s 2d per oz, last price.

Failures.—A large failure in the Levant trade—that of Messrs Francis Ede, Son, and Co.—was announced early in the week. Their liabilities at the time of their stoppage amounted to about a million, but a number of these have now run off, the Greek houses having at once withdrawn the bills for which they were liable or lodged security for the amount, and an old established Smyrna house of great respectability will, it is said, be able to redeem its liabilities with Messrs Ede and Co. if time is granted, which we have no doubt will be the case. It was thought at one time that Messrs Ede and Co. would have been able to surmount their difficulties, but an inspection of their affairs turns out far from satisfactory. A telegram from Constantinople since received, states that part of the bills of Messrs Ede and Co. will be retired by parties there, which will still further reduce the liabilities, and it is therefore expected that the estate will finally wind up better than has recently been represented. The suspension has caused great uneasiness at Smyrna, from whence the accounts read unsatisfactorily.

The failure of Messrs Ede and Co. caused the suspension, which we trust is only temporary, of Messrs Leone Rodoconachi and Co. There has since been a meeting of their creditors, when it was resolved that the liquidation of the estate should be left in the hands of the firm. The liabilities are 100,750*l*, and the assets which can be depended upon 133,000*l*, and therefore sufficient to pay every one in full, and leave a surplus of 33,000*l* in favour of the firm.

The failure is announced to-day of Messrs Edward Waekerbarth and Co., sugar refiners, of Ratcliff, with liabilities of 30,000*l*.

At an adjourned meeting of Messrs Whistler, Dawson, and King, wholesale grocers, their failure was ascribed to the junior partner, Mr King, having drawn out moneys without the knowledge of the partners. After a long dis-

cussion, a proposal was made on behalf of the firm to pay 10s in the pound—namely, 1s 6d in cash, and the remainder in two, four, and six months, the last two payments to be secured. It was decided that as one creditor threatened bankruptcy proceedings, a deed of inspection should be executed, with a covenant for the assignment of all the estate and effects to two of the principal creditors.

At a meeting of the creditors of Messrs Holdsworth and Co., sugar refiners, it was suggested that a composition should be offered, and the meeting was adjourned for the matter to be taken into consideration.

The failure has also been announced of Messrs Henry Smith and Son, railway contractors, of Springhill works, Birmingham. The amount of liabilities is not stated, but according to some reports it is 20,000*l*, with assets estimated at 8,000*l*. The books are in the hands of Messrs Quilter and Co.

MISCELLANEOUS.—At the annual general meeting of the North British Australasian Company, Mr Eustace Anderson in the chair, a dividend was declared for the past year at the increased rate of 7 per cent., free of income tax. The result of the operations of the year has been a net profit of 13,601*l*, exclusive of 367*l* brought from the last account, while the stock has augmented in value by 2,972*l*. The clip of wool at the principal station of Rosenthal has been 103,000 lbs, and has realised good prices. For the best as much as 3s 3d per lb has been obtained, while the general average is 2s 3d, and for superior quality 2s 8d. The Ruth station has also yielded a good profit, while most of the other smaller properties show less favourable results. Some more rams have been sent out with the view of improving the breed of the sheep. Since the last meeting the district in which the Company's property is situated has been made a separate Government, called Queensland, and the first Parliament has passed Acts by which the Company will be able to renew the leases of their most valuable property, expiring in 1866, for five years.

The advices from Rio de Janeiro by the French mail steamer state that the Home 6 per Cent. Brazilian stock, into which the holders of Brazilian railway investments have the option of converting their shares, was still steadily maintained at par.

A useful and elaborate table has just been issued by Mr Samuel Mendel, of Manchester, showing the amounts of bullion in the Banks of England and France during each month of the past eight years, together with the fluctuations in the Bank of England rate of discount, Consols, cotton, yarn, and cloth. From this it appears that the average of bullion in the Bank of England was 14,220,983*l*, which is 2,445,620*l* in excess of the total in the last return. Our stock, therefore, is now about 17 per cent. below the average from 1853 to 1860. The amount held by the Bank of France, on the contrary, is not below the average of that period. The average was about 13,800,000*l*, and the last return was 13,980,000*l*. The difficulty which that establishment has to meet evidently consists almost entirely in changing its silver for gold. The average price of Consols has been a fraction under 94 (93 15-16), and the market is now 2¾ per cent. below that point. The average rate of discount was 4 9-16, and the average price of cotton (middling fair Orleans) was 7d. The highest year for the latter was 1857, when 9½d was touched, and the lowest 1855, when it went to 5¼d.

Some considerable remittances of gold have lately been received at Paris from Constantinople, and it is now said that several amounts are on their way to London.

At a meeting of the National Discount Company, the Directors' report, proposing a dividend at the rate of 5 per cent. per annum, free of income tax, was agreed to. The Chairman (Mr. F. W. Russell, M.P.) stated that the amount of loss sustained throught Messrs Streatfeild and Co. is but little—namely, 3,000*l*—above the amount originally mentioned. He reiterated the assurance that 26,000*l* is believed to be amply sufficient, and expressed his belief that the Company will soon be in a position to add to the reserve fund, the value of which has been clearly demonstrated.

The report of the Directors of the Australian Agricultural Company, issued in anticipation of the half-yearly meeting, which is fixed for the 29th inst., states the amount of the funds in London at 31,322*l*., viz., 11,326*l* in cash and 19,996*l* in bills not yet due; but as the proportion derived from ordinary sources of revenue does not exceed 22,325*l* the Directors recommend that the dividend be limited to 20s per share.

At a meeting of the Mercantile Discount Company, the report and accounts were adopted. A resolution was passed to wind up under a voluntary liquidation. Three Directors and Mr Erck, the second manager, were appointed liquidators, and are to be remunerated by a commission of 1 per cent. on the amount of assets realised and distributed amongst the shareholders. In addition to the liabilities comprised in the balance sheet, are claims under the deed constituting the Company, for compensation to the managers and secretary, which, it is estimated, will be settled at about 6,000*l*, being less than the letter of the contract would give by about 4,500*l*. The cause of the winding-up is the serious reduction of the Company's small capital, occasioned by recent severe losses. The Directors express a hope that the ultimate return to the shareholders will amount to 15*l* per share out of the 20*l* paid, but Mr Ball, the accountant, estimates the loss on realising the outstanding assets at about 32,000*l*, which would show a smaller return. It was stated that about 5*l* per share of the capital will probably be returned within the next three months.

The whole of the 12,500 shares constituting the first issue of the Trust and Agency Company of Australasia have been subscribed for, and the letters of allotment issued to-day.

THE INDIAN COTTON COMPANY.—At length there seems a prospect of a serious effort being made to grow cotton in our own colonies, so that we should not be at the mercy of the United States. A most respectable Company has been formed with a capital of 250,000*l*, to procure by a system of direct dealings with the cotton growers in India an increase in the importation of Indian cotton into this country, an improvement in its quality, and a greater freedom from adulteration. The high standing and respectability of the directors of this Company are a guarantee that its funds will be carefully administered, and that alone is wanting to open up a very large and profitable business; and when it is considered that between 4 and 5 millions of people are dependent on the supply of cotton, the objects of the Company are truly national, and deserve support.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about the same price in London and Paris.

By advices from Hamburg the price of gold is 424 per mark, and the short exchange on London is 13.5¼ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 3-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is about 104½ to 105½ per cent., which, as compared with the Mint par between the two countries, shows that the exchange is against England. The loss of interest occasioned by the delay in receiving back gold from the American mints leaves little, if any, profit now on the transmission of gold to the United States.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The quantity of English wheat on offer at Mark lane, to-day, was somewhat on the increase; but, owing to the bad condition in which it arrived, very little business was transacted in it, and, to force sales, further depressed rates must have been submitted to. Foreign wheat moved off slowly, at about last week's currency. Barley, oats, beans, peas, and flour commanded very little attention. The imports from abroad, this week, amount to 18,790 quarters of wheat, and 27,660 barrels of flour.

At Liverpool this morning wheat, flour, and all other produce were drooping in price. "It is very difficult to estimate the extent of the deficiency of the last crop in the country at large," write Messrs Sturge and Co., of Birmingham. "In our own district, for instance, we think that it was nearly an average, as there were some cases of a large yield as well as many very poor ones; but in many counties it was doubtless much worse. The summer was colder and more rain fell than in any year since 1816; but owing to the improved system of drainage or some other less obvious cause, the effect on the growth of wheat was far less prejudicial than in that year. The total importation of grain, meal and flour, in the last twelve months, has exceeded that of any previous year by about three million quarters—not excepting 1847, the year of the Irish famine: that of wheat and flour in the last five months being nearly equal to the importation of these articles in the whole year 1853, the largest which we had previously had, and in each of the two last months the quantity was nearly one-fourth of what we receive in ordinary years. In this and the following month it may be expected to be quite as large; eight hundred corn-laden vessels, carrying probably at least 1,250,000 quarters, are said to be on the way to the United Kingdom from the Mediterranean, a great part over-due, many having been detained one or even two months in the Straits of Gibraltar. Since above one thousand vessels are reported as having recently passed that place, with a change of wind we may soon expect large arrivals on the coast; but after this fleet comes in there will doubtless be a considerable falling off. Our present stock of foreign wheat at Gloucester materially exceeds that held at a similar period for many years back, and the same appears to be the case to a less extent in Liverpool, Glasgow, &c., whilst in London, as far as can be ascertained, it is one-third more than in the previous year. In London and Liverpool the stocks foreign flour is reported to be more than double what it was twelve months ago. On the whole, we do not think that the produce of the last crop can be more deficient than that of 1853, and if so, this enormous supply of foreign will be more than is required to make up this deficiency, great as that may have been compared with the produce of 1858 and '59. Though the past year's receipts from America were very large, they have not been equal to those from Russia, and but little in excess of the Prussian supplies."

Messrs Briggs and Co., of Alexandria, report the state of the grain trade to the 11th inst. as follows:—

The inquiry for all descriptions of breadstuffs has again been very active, and prices have undergone fresh advances of from 9d to 1s 6d per quarter free on board. Supplies from the interior are generally small, but Indian corn has come to market in greater abundance. Receipts of barley continue excessively light. The following are the sales since our last, with present value quoted per quarter free on board:—Wheat, Saide, Pacha's produce, 700 qrs, 40s 6d to 41s; ditto, private

trade produce, 10,780 qrs, 39s to 39s 6d; Beheireh, Pacha's produce, 1,160 qrs, 38s to 39s 6d; ditto, private trade produce, 1,270 qrs, 37s to 37s 6d: beans, Saide, 4,210 qrs, 30s 6d to 30s 10d; Beheireh, 145 qrs, 28s 28s 8d; Indian corn, 11,500 qrs, 28s 6d to 29s; barley, 620 qrs, 22s to 22s 6d; lentils, 330 qrs, 25s to 25s 6d. Freights continue very dull, and may be quoted for beans to the United Kingdom for orders 4s to 4s 3d per quarter; for other grain and seed in proportion; to a direct port, 3s 6d to 4s; grain ballasts to Liverpool by steamer, 6s 6d; by sailing vessel, 4s.

There has been rather less activity in the Liverpool cotton market during the past week, nevertheless the total sales amount to 87,500 bales, and include 67,500 bales to spinners, 3,000 bales on speculation, and 17,000 bales for export. To-day's sales are only 8,000 bales, the market closing quieter. The week commenced with a very lively demand, and on Monday an advance of $\frac{1}{8}$d per lb upon last Friday's rates was established. Since then, however, partly on account of the fear of a dearer money market, and partly also in consequence of reduced operations on the part of the trade (who can now afford to diminish their purchases for a time), the demand has fallen off, and the advance of Monday has been quite lost; still cotton is not pressed for sale, except by a few needy holders. In the London market a good business was transacted at the commencement of the week at higher prices; but during the last few days the inquiry has slackened, and the market closes without animation. Sales, 4,000 bales.

"The crop is again attracting more attention," observe Messrs Neill and Co., of New York, "and it is not surprising to find that in some quarters the large falling off in receipts lately is regarded as confirmatory of short crop views. The deliveries up to this date for the past two years have comprised half the crop. This year, however, the course of receipts has been interrupted by long-continued political and financial disturbances, threatening at one time to shorten supply. Prices fell to a panic point, and planters held back their cotton. Thus, instead of the bulk of the crop being already delivered, we have yet to receive it; while, should the four million estimate prove correct, we should have nearly as much cotton to receive as last year after this date. The recent advance in price leaves no room to expect that cotton will now be held back. The whole crop will doubtless come forward, and the result be limited only by the quantity grown. The reaction in our market has been carried to an extreme. The large deficiency in receipts, an easier money market, favourable European advices, and threatening politics in this country, have started a speculative excitement and carried prices $\frac{1}{4}$ to $\frac{3}{8}$c above the highest point of the season at the Gulf ports. Freights have also advanced, and middling at New Orleans now costs 7.31d f.o.b. with freight, requiring nearly 8d to sell in Liverpool. Indeed, the advance has been based chiefly on the expectation of that figure being reached under the fear of a short supply, and in the event of hostilities between North and South it would probably be realised. But, in the absence of any interruption to receipts or exports, present prices are considered extreme, and lower rates are looked for either in the event of a compromise being effected at Washington, or with free deliveries at the ports and dull news from Liverpool."

The public sales of tea held since our last have gone off steadily, and prices have been well supported. In the private market, however, the transactions have been trifling, at about previous rates.

The sugar market has shown rather more firmness; but the amount of business doing has been wholly confined to immediate wants. Refined goods are steady, at 50s 6d to 51s per cwt for common brown lumps.

Plantation coffees have been in improved request, at very full prices. Most other kinds have changed hands slowly, on former terms.

Rice, though in short supply, is very dull, and late rates are barely supported.

Writing from Dantzic, Messrs Pohl and Co. thus refer to the timber trade:—

Of full-sized timber the supply has been good, both as to quality and assortment, and all the parcels which came down found ready buyers at high prices, as, independently of the demand for Great Britain, there is now likewise an active demand from other countries, and which did not take their supplies in former years from hence. Of undersized timber we have likewise received a larger supply than in the previous year, but the demand from England was very good for the larger dimensions, whilst the smaller kinds were shipped off to France and Belgium. Of whitewood timber the supplies again increased, and the demand fo this article also revived, but owing to the inferiority of part of the sup plies, the average prices have advanced but little. Of round wood for the manufacture of deals and railway sleepers, the supply is larger than that of the previous year. The demand for deals has been very active, and particularly for the best crown qualities.

There has been more doing in saltpetre, at extreme rates; but English tin has further declined 4*l* per ton.

The demand for rum has been tolerably active, at full prices. Brandy, too, has realised extreme rates; but grain spirits have commanded very little attention.

Oils, generally, have ruled very flat. Linseed oil has sold at 28*l* 10s per ton.

Although very little is doing in tallow, prices are well supported. To-day, P.Y.C., on the spot, has sold at 60s; January to March, 59s 9d; March only, 60s to 60s 3d; April to June, 59s; October to December, 57s 6d. Town tallow is 59s 6d net cash.

COTTON.

NEW YORK, January 8.

The following is a statement of the week's sales here and at the chief Southern ports, at latest telegraphic dates, with the closing prices f.o.b., with freight in sterling at current exchange:—

		Sales.	Closing.		Middling.		Freight.		F.o.b.
New Orleans...Jan.	5	76000	$\frac{1}{8}$c higher	...	12$\frac{1}{2}$c	...	11-16d equal to		7.31d
Mobile	6	22000	$\frac{1}{4}$c —	...	11$\frac{1}{4}$c	...	11-16d	—	6.82d
Charleston	4	3000	$\frac{1}{8}$c —	...	10$\frac{3}{8}$c	...	9-16d	—	6.28d
Savannah	4	8000	$\frac{1}{8}$c —	...	10$\frac{3}{8}$c	...	$\frac{1}{2}$d	—	6.20d
New York	8	25000	1$\frac{1}{2}$c —	... Upl.	12$\frac{3}{4}$c	...	$\frac{3}{4}$d	—	7.12d
Total		134000 bales					Average		6.75d

There is now a decrease in receipts of 572,000 bales from last year, when the crop reached 4,675,000, and of 202,000 bales from 1858-9 (crop 3,851,000).

New York Market.—An active business has been done during the past week, and, with favourable advices from Europe and advancing markets at the South, the greatest excitement has prevailed here. The sales have been large, and prices carried to a high point, to-day's quotations showing an advance of 1$\frac{1}{4}$c on the week. The business has been chiefly in transit cotton from the Gulf ports, of which there has been a moderate supply offering, and the closing quotations for which are on the basis of 12$\frac{1}{2}$c for middling New Orleans, with $\frac{1}{8}$d freight. The home trade have also been buying freely, and middling Uplands on the spot is worth 12$\frac{3}{4}$c to 13c. The week's sales amount to 25,000 bales, of which 14,000 in cotton-afloat.

The following is a statement of the movements of cotton for the last week, and since 1st September last, compared with the five preceding years:—

	Receipts Week's Receipts. bales	Receipts Since 1st Sept. bales	Exports for the Week. To Great Britain. bales	To France. bales	To other For. Pts bales
1860-61	108000	1729000	60000	11000	4000
1859-60	158000	2301000	78000	31000	13000
1858-59	150000	1931000	49000	15000	23000
1857-58	94000	1145000	26000	20000	9000
1856-57	125000	1611000	30000	14000	7000
1855-56	100000	1626000	29000	12000	11000

	Exports since First September. To Great Britain. bales	To France. bales	To other For. Pts. bales	Total. bales	Stock. bales
1860-61	750000	188000	104000	1032000	614000
1859-60	902000	225000	104000	1231000	990000
1858-59	586000	264000	155000	1005000	770000
1857-58	360000	131000	93000	584000	567000
1856-57	342000	155000	105000	602000	760000
1855-56	529000	189000	134000	852000	681000

Thus the receipts show a decrease of 572,000 bales from those of last year, and a decrease of 202,000 from 1858-9, and the exports exhibit the following results:—

	To G. Britain.	To France.	To other F.P.	Total.	Stock.
Compared with last year	Dec. 152000	Dec. 37000	Inc. 1000	Dec. 209000	Dec. 376000
Compared with 1858-9	Inc. 164000	Dec. 76000	Dec. 51000	Inc. 27000	Dec. 156000

Southern Markets, by Telegraph.—In the Gulf markets great excitement has also prevailed during most of the week, and, with a limited supply offering, holders have gradually advanced their rates. The week's sales at New Orleans amount to 76,000 bales, and prices at the close show an advance of $\frac{1}{2}$c to $\frac{3}{4}$c, middling being quoted 12c to 12$\frac{1}{4}$c, while the better grades are held at disproportionately high rates. At Mobile, 24,000 bales have changed hands, and prices close $\frac{1}{4}$c higher on the week, the quotations for middling being 11$\frac{1}{4}$c. The Atlantic markets have shared in the advance, though little business has been done there. Sterling exchange has improved this week, while freights have advanced at the Gulf ports.

Receipts.—There is no change to note in receipts. The deliveries this week amount to 108,000 bales, against 158,000 and 150,000 in the two preceding years, and thus the falling off continues; the present deficiency being 572,000 bales and 202,000 respectively.

Exports.—The clearances to all ports this week amount to 74,000 bales, of which 60,000 bales are for Great Britain, 11,000 for France, and 4,000 for other foreign ports. The total to Great Britain is now 750,000 bales, against 902,000 last year and 586,000 the year before. By telegraph, the clearances for the succeeding week have been 32,000 bales from the Gulf ports, against 45,000 last year. To France the total is 188,000 bales, against 225,000 and 264,000 in the two preceding years—a deficiency of 37,000 and 76,000 bales respectively. The total to other foreign ports is 104,000 bales, against 103,000 and 155,000 bales. Freights at the Gulf have advanced this week, the current quotations at New Orleans and Mobile being 11-16d to Liverpool, and 1$\frac{3}{8}$c to Havre. The number of vessels now loading at the South is 98 for Great Britain, against 129 last year; 34 to France, against 49; and 34 to other ports, against 55.—*From Messrs Neill Bros. and Co.'s Circular, forwarded by Mr Ollerenshaw, of Manchester.*

NEW YORK, Jan. 15.—The cotton market is heavy. Middling upland, 12$\frac{1}{2}$c to 12$\frac{5}{8}$c.

LIVERPOOL MARKET.—JANUARY 25.

246016	409838	186740	239510	9220	24940	595740	587100

PRICES CURRENT.

	Ord.	Mid.	Fair.	Good Fair.	Good.	Fine.	Same period 1860 Ord.	Same period 1860 Mid.	Same period 1860 Fair.
	per lb	per lb	per lb	per lb	per lb	per lb	per lb	per lb	per lb
Upland	6⅞	7¼	7⅞	7⅞	7⅞	8	5¼	6¼	7
New Orleans	6¾	7¼	8	8⅜	8⅝	9	5¼	6⅞	7⅛
Pernambuco	...	8⅞	9⅛	9⅛	9⅜	...	7⅛	7⅝	8¼
Egyptian	7⅝	8¼	8⅛	9⅛	9⅜	11	7	7⅛	8¼
Surat and Madras	4¼	4⅞	5⅛	5⅛	5⅜	6	3⅞	4¼	4⅛

A very considerable business has again been transacted in the cotton market during the past week, but chiefly by speculators and exporters. Towards the close, much less animation has been apparent. Holders early obtained an advance of 1-16d to ⅛d per lb, but this has been wholly lost in the middling and better grades, and our quotations are no higher than last week. In the ordinary qualities the advance has been fully maintained. Egyptian have been in good demand, and in the early part of the week commanded higher rates. Yesterday, however, some concession was made. Brazil are unaltered. East India have moved with American, and are now on the level of this day week. The sales to-day are 8,000 bales. The market is quiet. The reported export amounts to 16,860 bales, consisting of 7,640 American, 250 Brazil, and 8,970 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

Notwithstanding that the business doing in the manufacturing markets generally, both for home use and export, has been unusually small, holders of goods have, for the most part, been firm, and prices have been supported. The iron trade has continued in a depressed state, at the late decline in quotations. Coals, owing to the return of mild weather, have given way in price.

MANCHESTER, Jan. 24.—The market has been very inanimate this week, and telegrams to-day from Calcutta to 28th December, have confirmed this impression. From China, also, no improvement is reported to-day in the prices of either goods or yarns. And as there has been diminished buoyancy in the cotton market, less confidence has begun to be shown in even the present unprofitable rates for our staples. At a meeting of spinners and manufacturers in the the Blackburn district yesterday, it was proposed to reduce wages for weaving 5 per cent., and some reduction in the amount of weaving carried on seems likely to be forced on masters erelong.

BRADFORD,—Wool—The extreme languor noticed for the last week or two still continues without any change for the better. Though prices have been sustained with remarkable firmness, still some staplers manifest to-day a willingness to make slight concessions in the price of some sorts of wool rather than hold longer; nevertheless buyers are seldom tempted to purchase what they do not immediately require. We cannot report any improvement either in the demand for yarns for export or home consumption. There is no appreciable change in price. There is again very little doing in goods; fancy and plain fabrics are alike dull for the time of year, and the production is greatly diminished. Among the home merchants there is a little more inquiry for spring goods.

ROCHDALE.—The local wool trade is dull, the demand being scarcely perceptible, so small is it. Staplers, however, refuse to lower their quotations in the face of the difficulty of replacing stocks. Altogether the wool market is fully as gloomy as the flannel trade.

LEEDS.—We have had a flat market. There was an indifferent attendance of buyers in the halls, and the business was limited.

LEICESTER.—There is not so much doing in the hosiery trade as is usual at this time of the year, but more is expected to be done shortly. In the adjacent country districts business is also very flat, and many of the town and country operatives are in distress. The wool market is hardly so firm, but previous prices are maintained. There is very little change in the price of yarn.

NOTTINGHAM.—If anything, there has been a shade more doing in the lace trade this week; business, however, generally speaking, remains in a very inanimate state. The demand for silk goods remains extremely dull.

BELFAST.—There has not been any favourable turn in the market for white goods, at least in those lines which form the principal styles sent over the Atlantic. Home markets continue dull, though not more so than is usually the case in the first month of the season. This week, the quantities of brown linens offered at markets were much above the average of the last few months. Sales, however, were so languid that, in some cases, a great proportion of the whole was left in the hands of holders. Stocks are, consequently, on the increase.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End All Mine No. 1 and 2 melters, made with Lord Ward's thick coal warm air, 4*l*; Old Windmill End All Mine forge pig iron, made with Lord Ward's thick coal, 3*l* 12*s* 6*d*; best native hydrate pigs, 3*l* 10*s* to 4*l*; first-class All Mine forge pigs, 3*l* 5*s* to 3*l* 10*s*; good mine pigs, with a modicum of flue cinder, 2*l* 12*s* 6*d* to 2*l* 17*s* 6*d*; mine pigs, deteriorated by cinder, 2*l* 7*s* 6*d* to 2*l* 12*s* 6*d*; Cleator Moor hæmatites, 3*l* 7*s* 6*d* to 3*l* 10*s*; Barrow hæmatites, 3*l* 7*s* 6*d* to 3*l* 10*s*; Workington hæmatites, 3*l* 5*s* to 3*l* 7*s* 6*d*; Kirkless Hall hæmatites, 3*l* 5*s* to 3*l* 6*s* 3*d*; grey forge cinder pig iron, 2*l* 5*s* to 2*l* 10*s*; white forge cinder pigs, 2*l* 2*s* to 2*l* 7*s* 6*d*; ordinary melters, Nos. 1, 2, and 3, 2*l* 12*s* 6*d* to 2*l* 17*s* 6*d*; superior makes of mine melting iron, 3*l* 2*s* 6*d* to 3*l* 15*s*, according to make and quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKET.

NEW YORK, Jan. 8.—FLOUR AND MEAL.—There has been a fair though not very active business done in State and Western flour since our last report, and with very light arrivals and favourable advices from Europe, prices have again risen 15c to 20c per bbl, and close strong at the advance. The transactions for the four days aggregate 42,500 bbls, closing at 5.30 dols to 5.40 dols for superfine State; 5.55 dols to 5.70 dols for extra State; 5.30 dols to 5.40 dols for common to good Western, 5.55 dols to 6.95 for extra Iowa, Michigan, Indiana, Ohio, &c.; 5.80 dols to 5.90 dols for extra round hoop Ohio shipping brands; 5.50 dols to 7.50 dols for extra Tennessee, and 5.30 dols to 7 dols for extra St Louis. Canadian flour is scarce and higher, with a moderate business. Sales 1,070 bbls, closing at 5.70 dols to 7.25 dols for the range of extra brands. With a small stock and light arrivals, Southern flour has further improved, but the advance has checked operations somewhat. Sales 4,150 bbls, closing at 5.60 dols to 5.75 dols for superfine Baltimore; 4.75 dols to 6.10 dols for extra ditto; 5.70 dols to 5.80 dols for Brandywine; 5.70 dols to 6.75 dols for Georgetown; 6 dols to 7.25 dols for Petersburg City, and 6 dols to 7.25 dols for Richmond City.

GRAIN.—More favourable advices from Europe, and no receipts to speak of, has further strengthened the views of holders of wheat to the extent of say 3c to 5c per bushel. The sales aggregate 220,900 bushels, including 19,000 bushels red Western, at 1.35 dol to 1.36 dol; 1,000 white Michigan, 1.50 dol; 21,200 bushels Chicago spring, 1.18 dol to 1.22 dol; 20,500 North-Western Club, 1.23 dol to 1.25 dol; 38,800 Milwaukee Club, and amber Iowa, 1.27 dol to 1.28 dol; 5,700 Canada Club 1.28 dol.; 3,500 white Western, 1.40 dol to 1.50 dol; 15,300 bushels Chicago spring, 1.18 dol to 1.23 dol; 8,500 North-Western Club, 1.26 dol; 26,500 Milwaukee Club and amber Wisconsin, 1.28 dol to 1.30 dol; 12,500 Milwaukie Club, 1.30 dol on shipboard for Liverpool, with freight at 10d to 10¼d; 19,900 winter red Western, 1.35 dol to 1.38 dol; 3,000 Canada Club, 1.30 dol; 1,600 red State, on private terms; 9,500 white Western, 1.47 dol to 1.50 dol; 3,500 white Canada, 1.50 dol; and 1,500 handsome red Long Island, 1.45 dol. For corn there has been a pretty good demand for export and home consumption, and, with favourable advices from abroad and small receipts, prices have advanced 2c to 3c per bushel, and close firm. Sales, 235,000 bushels, closing at 71c to 72c for Western mixed, in store and delivered; 72c to 72¼c for Southern yellow; and 72c to 74c for round yellow.

NEW YORK, Jan. 15.—Breadstuffs are less active, and the turn lower.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Somewhat increased supplies of English wheat have been on offer in most of the leading country markets held this week, and the samples have shown some improvement in quality. The continued heaviness in the trade at Liverpool, arising from heavy stocks, and very large importations from the United States has produced much heaviness in the demand for all kinds of English wheat, at a decline in the quotations at from 1s to 2s per quarter. In our market, the fall, on Monday, was 2s. There has been only a limited sale for barley, and most descriptions have had a drooping tendency. The malt trade has been in a depressed state, at almost nominal currencies. Oats have moved off slowly, though in very moderate supply, and beans have given way 2s per quarter. Peas have commanded full currencies; but country and foreign flour has gone rather cheaper.

Messrs Horne and Watney have issued their usual annual statistical tables, showing the imports of produce into London

in the past year. From them, we extract the following comparative figures:—

SUPPLIES of WHEAT, BARLEY, and OATS to LONDON, in the undermentioned Years, of which Supplies the Centesimal Proportions were:—

WHEAT.

	Qrs.	English.	Scotch.	Irish.	Foreign.	
1855	952,686	40·59	0·39	...	...	59·02 = 100
1856	1,281,357	30·15	0·03	0·05	...	69·77 = 100
1857	955,086	31·44	2·62	...	...	65·94 = 100
1858	937,596	29·46	0·39	...	...	70·15 = 100
1859	1,030,715	33·04	0·14	...	...	66·82 = 100
1860	1,437,606	17·60	0·02	...	...	82·38 = 100

BARLEY.

1855	374,079	65·67	1·88	0·15	...	32·30 = 100
1856	414,420	45·61	1·81	1·22	...	51·36 = 100
1857	702,644	14·86	1·64	0 06	...	83·43 = 100
1858	713,263	12·83	2·22	0·43	...	84·51 = 100
1859	677,804	15·28	8·46	0·20	...	76·06 = 100
1860	650,509	16·99	9 31	0·08	...	73 62 = 100

OATS.

1855	1,449,690	8·74	2·86	22·86	...	65·54 = 100
1856	1,409,785	6·84	1·54	20·93	...	70·69 = 100
1857	1,690,081	2·62	1·72	9·16	...	86·50 = 100
1858	2,027,601	2·01	3·68	6·09	...	88·22 = 100
1859	1,777,937	3·21	4·85	7·00	...	84·94 = 100
1860	1,893,889	7·17	1·55	3·39	...	87·89 = 100

The continental markets have been very inactive for wheat, and, in some instances, prices have ruled in favour of buyers. All spring corn, however, has commanded extreme rates. At New York, on the 11th inst., breadstuffs were firm in price.

In Scotland, most of the markets were well supplied with wheat in excellent condition; but the demand has fallen off. Barley has sold slowly; but oats, for immediate shipment, have commanded extreme rates.

The Irish markets, almost generally, have been in a most inactive state, and prices have shown a tendency to give way.

The show of English wheat on offer in to-day's market was very moderate, and in bad condition. Fine dry samples changed hands at Monday's currency; otherwise the trade was in a sluggish state, and sales might have been effected at rather lower prices. Foreign wheat was in good supply and heavy request, at barely late rates. Barley ruled dull at drooping currencies. Oats were firm in value, but the demand for them was far from active. Beans and peas moved off heavily at Monday's quotations. The flour trade was dull, and American barrels—owing to the large arrival—were rather lower to purchase.

Mr Rainford thus reports the state of the floating trade:—

Floating Cargoes.—The long-expected fleet is now rapidly arriving, and since the 14th 104 vessels are reported as arrived off coast, consisting of 66 cargoes of wheat, 1 rye, 14 maize, 18 barley, and 6 beans, viz.:—Wheat, 3 cargoes from Santander, 3 Galatz, 12 Odessa, 15 Taganrog, 8 Alexandria, 3 New York, 1 Salonica, 2 Berdianski, 4 Constantinople, 3 San Francisco, 1 Eupatoria, 2 Venice, 2 Trieste, 3 Ibraila, 1 Ancona, 1 Sulina, 1 Bourgos, 1 Marseilles; rye, 1 Odessa; maize, 1 Marseilles, 3 Ibraila, 3 Terceira, 2 Vianna, 1 Galatz, 2 Sulina, 1 Philadelphia, 1 Constantinople; barley, 2 Ibraila, 1 Salonica, 1 Taganrog, 2 Ismail, 3 Constantinople, 3 Odessa, 1 Alexandria, 3 Sulina, 1 Catania, 1 Malta; beans, 5 Alexandria.

The London averages announced this week are:—

	qrs	s	d
Wheat	1766	at 57	
Barley	256	37	2
Oats	910	22	2
Beans	84	33	6
Peas	30	37	9

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market was rather unsettled at the opening, and prices occasionally experienced a slight decline, refining kinds showing the greatest depression. Yesterday, however, public sales went off with more spirit. Only 1,200 casks West India had sold to yesterday (Thursday) evening, some of the brown and grey working sugars being 6d cheaper; also Jamaica, by auction, at 37s to 41s. 318 casks Barbadoes partially sold upon former terms: low middling to fine yellow, 40s to 44s. Grainy Demerara went at 39s 6d to 43s 6d; one lot, very fine, at 46s 6d per cwt. The deliveries have not at present shown any improvement, and are much smaller than at same date last year, the contrast showing a total deficiency this season of 4,350 tons. There was some addition to the stock during the past week, but it is still 5,250 tons less than in 1860.

Mauritius.—5,800 bags were partly sold at about last week's quotations: grainy, 38s to 43s 6d; white, 47s; soft brown, 33s to 37s 6d; grey and yellow, 37s 6d to 40s. Three floating cargoes have sold for the United Kingdom: No. 11 and 11½, at 27s and 27s 9d; 11½, 41s landed. Yesterday, another cargo, No. 7½ to 11, brought 24s 6d per cwt.

Bengal.—By auction, 1,530 bags about half met with purchasers: fine Bally, 44s 6d to 45s: other grainy, 42s 6d to 43s 6d; good Gurpatta date, 41s to 41s 6d. Privately, 2,100 bags low foxy brown have realised 31s 9d per cwt.

Siam.—2,520 bags at public sale chiefly found buyers: good greyish white, 43s; rather soft, yellow and grey, 41s to 42s; heavy brown, 35s 6d to 36s.

Java.—1,200 baskets white have sold at 44s 9d per cwt.

Other Foreign.—1,703 bags Guatemala brought 34s 6d to 38s for brown to low grey muscovado kind. 833 boxes Cuba partly found purchasers: good to fine white, 51s to 52s 6d; fine strong yellow, 46s to 46s 6d; a portion, consisting of washed, brought 39s to 46s. 203 baskets low brown China sold at 31s to 31s 6d. 604 casks 217 barrels Cuba chiefly sold at 38s to 43s per cwt for low to fine yellow. 57 cases 13 barrels 2,950 bags Bahia were withdrawn at 36s to 39s. Privately, 3,900 boxes Havana, No. 8 to 14, brought 37s 9d to 43s; white in bond, 33s. A floating cargo, No. 7½ to 8, sold at 24s 9d per cwt for the United Kingdom.

Refined.—The transactions are still upon rather a limited scale, but owing to the diminished supplies common dry goods cannot be obtained under 51s per cwt. Crushed and pieces have, however, recently sold on easier terms, influenced by the moderate value of grainy raw sugars.

RUM.—Very few sales have been made, but quotations remain steady since last week. The total stock of rum amounts to 23,050 puns 3,850 hhds, against 26,400 puns 5,900 hhds last year.

COCOA.—873 bags Guayaquil, offered by auction yesterday, sold at 65s 6d to 66s per cwt.

TEA.—Moderate purchases have been made by the dealers privately, owing to the public sales, which commenced yesterday. The catalogues contained 28,260 packages. 18,200 passed, leaving 6,910 packages sold. There was a steady demand, and full prices generally obtained.

COFFEE.—Plantation Ceylon has met with steady buyers at full prices to a slight advance upon desirable sorts, and the market remains very firm. By auction, 455 casks 509 barrels and bags went as follows: fine ordinary to low middling, 46s 6d to 69s; middling to fine, 69s 6d to 80s. 153 casks 41 barrels 536 bags native: good, 62s 6d to 64s; pickings, 56s to 58s; blacks, 35s. 350 cases East India partly sold at 66s to 68s 6d per cwt for Tellicherry, &c. A few more contracts have been made in native Ceylon, by private contract, at full prices.

RICE.—Soft grain descriptions find steady buyers, but other kinds are quiet. About 10,000 bags have sold privately: good Necrancie Arracan and Rangoon, 10s 4½d to 10s 6d; Rangoon and Bassein, 11s to 11s 1½d per cwt. A delivery of 712 tons last week has reduced the stock to 31,750 tons, against 69,450 tons in 1860, and 85,750 tons in 1859, at the same period.

SAGO.—473 boxes partly sold on moderate terms: low middling to good small, 16s 6d to 17s; small medium to common bold grain bought in at 16s. 806 bags sago flour were taken in at 17s to 17s 6d per cwt, the market being quiet.

METALS.—Business continues to be unfavourably affected by the uncertain state of the money market, and most descriptions are dull. The smelters have again lowered their prices of British tin 4s, which entirely unsettles the foreign, and good Straits may be quoted 124s to 124s 6d. Nearly all kinds of manufactured iron are depressed. Scotch pig iron was at one period sold as low as 48s 3d, but since touched 49s per ton. Copper remains dull. A sale of spelter is reported at 18*l* 15s per ton for spring shipment.

HEMP.—Manilla is steady, and 400 bales good roping by auction partly sold at 25*l* 10s to 26*l*. Nothing of interest has been reported by private contract. Jute is firmer, with more inquiry: 2,667 bales offered on Wednesday realised 13*l* to 20*l* for common to fine marks, and some other business has also been done. Fair Bombay hemp sold at 22*l* per ton.

HIDES.—The sales of East India yesterday went off without material alteration, and about half of 128,000 hides submitted met with purchasers. Low to middling qualities were dull, and occasionally rather cheaper.

OILS.—Olive is firm at the quotations, but with small sales on the spot. Fish oils remain steady. Sperm has advanced to 105*l* to 106 Pale seal scarce at 40*l* per tun. There has been a better demand for lin. seed oil, partly by exporters, and it could not be obtained under 28s 6d per cwt yesterday. Further sales of rape oil have been forced by speculators, resulting in lower prices: foreign refined, 43s 6d; brown, 39s 6d. Cocoanut has been quiet: Ceylon, 52s 6d to 53s; Cochin, 54s 6d. Palm oil is still dull at 46s 6d to 47s per cwt for fine.

TURPENTINE.—A small sale of rough is reported at 10s. Over 1,000 barrels American drawn spirits sold during the week at 32s to 32s 6d, and 33s per cwt is the price required this morning.

LINSEED.—East India is rather lower: Calcutta, 56s to 56s 6d; Bombay scarce at 60s to 60s 6d. A small cargo of Berdjanski has sold at 56s 6d per quarter for the Continent.

TALLOW.—The inquiry has been rather limited within the past few days, especially on the spot, and quotations are easier. This morning, Y. C. rules at 59s 6d to 60s on the spot; 59s 9d March only. A moderate business has been transacted for April to June delivery at 58s 6d to 59s, and October to December at 57s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, January 21.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is again quiet, and prices were occasionally rather easier. 1,400 casks West India have sold for the week. 11,470 bags Mauritius, 3,440 bags Bengal, 1,568 bags Madras, and 248 casks Porto Rico were partly disposed of upon former terms. 1,700 boxes Havana sold privately on former terms.

COFFEE.—No public sales were held to-day.

TEA.—The sales concluded to-day, and 5,425 packages sold without further alteration in prices.

RICE.—538 bags Bengal were taken in at 12s for middling white 217 bags low broken pinky Madras at 11s per cwt.

SPICES.—1,819 bags Singapore black pepper sold at 3⅞d to 4d. 40 cases nutmegs, 1s 1d to 1s 11d for brown sorts. 16 cases mace, 8d to 9d per lb.

SAGO.—800 boxes were bought in at 18s 6d to 19s per cwt.

SAFFLOWER declined 5s per cwt to day.

RUBBER.—Para partly sold at 1s 7½d to 1s 11½d per lb.

PALM OIL.—350 casks were bought in at 42s to 47s per cwt.

TALLOW.—At auction to-day, 422 casks Odessa were taken in at 58s 3d to 59s 6d. 52 casks 100 cases East India at 57s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—No change in the home market for refined sugar; tendency downwards. Nothing doing in Dutch crushed; prices nominally the same as last week.

GREEN FRUIT.—The favourable change of weather caused a better demand for all kinds. Some cargoes of oranges from St Michael, Valencia, and Sicily, sold by Keeling and Hunt at public sale, went at an improvement in price. Lemons sustain their value. More inquiry for nuts. Barcelona reduced to a limited stock; black Spanish sell freely, the price being moderate; Para scarce.

DRY FRUIT.—The market continues inactive; clearances continue on the average ratio for this month.

COLONIAL WOOL.—No change to report in the wool market.

FLAX unaltered.

HEMP.—Market very quiet, and but few transactions this week.

COTTON.—Sales of cotton wool from Friday, 18th January, to Thursday, 24th, inclusive:—3,300 bales Surat, at 4¾d to 5¼d for ordinary to middling fair Oomrawattee; 5d for fully fair Compta; 5½d to 5⅝d for middling fair to fully fair Dhollera; 5⅞d for good fair Broach; 5⅞d to 6d for good fair sawginned; 500 bales Tinnivelly, at 5⅝d to 6¼d for fair to good; 200 bales Western Madras, at 5d for fully fair. The market opened with a very good demand, and up to Tuesday last a fair amount of business was transacted, chiefly in Dhollera, at an advance of ⅛d to ¼d per lb on last week's prices, and about ⅛d per lb on other descriptions. Within the last few days there has been less doing, and the market closes quietly, and the extreme quotations cannot be obtained.

SILK.—No alteration in the silk market. Trade very dull, with a downward tendency.

TOBACCO.—Considerable sales have been effected of Western strips during the last three or four days, and the market has assumed a very firm appearance. Some parcels have been withdrawn from sale.

LEATHER AND HIDES.—During the past week there has been a fair general demand for leather, more particularly for good English butts, 24lbs and upwards, and for best foreign butts. Light butts have not met much inquiry. The supply at Leadenhall on Tuesday was moderate, but there was also a small attendance of buyers. Prices in general are unaltered.

METALS.—Business in metals is almost wholly unchanged. Copper keeps steady, although still in small demand. Iron is a shade easier to buy. Tin is 4*l* per ton lower, with still a flat market. Spelter is inactive, the prices of last week's close being maintained. Lead unchanged. Tin plates, if possible, still more depressed.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	61	9
Fat by ditto	3	2½
Yellow Russian	61	6
Melted stuff	42	0
Rough ditto	25	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market active at last week's rates. Stock short. Friesland butter, quality inferior, made 116s. Jersey and French, owing to large arrivals, fell to 112s. Irish butter that moved off rapidly during the late frost is inactive, though the stock is much diminished.

METROPOLITAN CATTLE MARKET.

THURSDAY, Jan. 24.—To-day's market was seasonably well supplied with beasts, both as to number and quality. All breeds moved off slowly, and, in most instances, prices were a shade lower than on Monday—the extreme value of the best Scots being 5s per 8lbs. We have to report a fair, but by no means active, inquiry for sheep at full prices. The supply was moderate. The few calves in the market were disposed of freely, at fully previous rates. Pigs were a slow sale, but not cheaper. In milch cows very little was doing.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	2	3	6	Prime Southdown sheep	5	10	6	0
Second quality ditto	3	8	4	2	Large coarse calves	4	4	4	10
Prime large oxen	4	4	4	8	Prime small ditto	5	0	5	4
Prime Scots, &c	4	10	5	0	Large hogs	4	0	4	6
Coarse and inferior sheep	3	8	4	0	Small porkers	4	8	5	2
Second quality ditto	4	2	4	6	Suckling calves.....each	19	0	22	0
Prime coarse-woolled do.	4	10	5	8	Quarter old store pigs	23	0	30	0

Total supply—Beasts, 1,160; sheep and lambs, 3,120; calves, 150; pigs, 220.

Foriegn supply.—Beasts, 190; Sheep, 300: Calves, 95.

HOP MARKET

FRIDAY, Jan. 25.—The demand for fine yearlings and old hops continues active at late prices. There is also more inquiry after the new growth.

COAL MARKET.

FRIDAY, Jan. 25.—Walls-end Lambton 21s—Walls-end Hartlepool 21s 9d—Walls-end Eden Main 20s—Walls-end Thorpe 18s 6d—Walls-end Harton 20s—Gordon 17s 6d—Walls-end Hedley 20s—Powell's Duffryn Steam 22s—Merthyr Dare 22s—Bebside Hartley 17s—Davidson's Hartley 17s—Hastings Hartley 17s—Lambert's Hartley 16s 9d. 117 ships at market.

POTATO MARKET.

WATERSIDE, Thursday, Jan. 24.—Increased supplies of home-grown potatoes have come to hand at this market, coastwise and by rail, since Monday, but no foreign produce are reported. There is a general decline in prices in consequence, with a fair demand; annexed are the present rates:—York Flukes, 130s to 160s; Scotch Regents, 120s to 140s; ditto Cups, 110s to 120s; ditto Rocks, 110s to 120s; Dunbars, 160s to 180s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 10s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 18s per load. A dull trade.

CUMBERLAND.—Meadow hay, 2*l* 10s to 5*l* 12s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 10s to 2*l* 0s per load. A slow sale.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 10s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 18s per load. Trade heavy.

LIVERPOOL MARKETS.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 25.—Market well attended. Wheat and flour slow sale, at declining prices. Beans and Indian corn move off slowly; prices of both giving way. Other articles remain unchanged.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 25.—The market for manufactured iron remains without change, with a continuance of only a limited demand generally. Scotch pig iron has been very dull throughout the past week, influenced much by the unfavourable accounts from America. Copper is still comparatively quite neglected at previous rates. Very little doing in other metals.

The Gazette.

TUESDAY, Jan. 22.

BANKRUPTS.

C. Watson, Great Yarmouth, grocer.
J. Risley, Lombard street, dealer in shares.
T. G. Tomkins, Strand, bookseller.
J. Rogers, Merthyr Tydfil, draper.
W. Elliott, Bedminster, grocer.
R. Laing, Forest Farm, near Scorton, Yorkshire, farmer.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 12th of January amounted to 445,900*l*, and for the corresponding week of last year to 448,050*l*, showing a decrease of 2,150*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 191,712*l*, and for the corresponding week of 1860 to 197,276*l*, showing a decrease of 5,564*l*.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Jan. 21.—The railway market experienced another severe decline this morning owing to a pressure of sales, chiefly speculative. Midland, Lancashire and Yorkshire, and South-Eastern were especially affected, the prices of these stocks having been for some time past raised by withdrawals on borrowed money. Towards the close a rally occurred, but principally from purchases to cover previous operations for a fall. The closing quotations of London and North-Western, Great Western, South-Western, North British, Caledonian, Great Northern, South-Eastern, and Eastern Counties showed a decline of ½ to 1 per cent., while other stocks remained nearly the same as on Saturday. American securities fluctuated considerably, but closed with little alteration. The last price of Illinois Central was 35 to 34½ dis., and of New York and Erie, 27½ to 28½. Mines were inactive, and occasionally heavy. Joint stock banks were fairly supported at previous prices. In miscellaneous descriptions there was a decline in Berlin Waterworks and South Australian Land, and an improvement in Van Diemen's Land.

TUESDAY, Jan. 22.—The railway market opened about the same as yesterday, but subsequently improved, partly on further purchases, and partly on the advance in Consols. A partial relapse, however, took place towards the close, which continued after official hours, and the market left off with a sensitive and unsettled appearance. All the leading stocks showed a rise on the day of ¼ to 1¼ per cent., York and North Midland, Great Western, and South-Western being the highest. Colonial descriptions experienced no material change except Canadian, which were a shade firmer. Great Western were last quoted 10⅛ to ⅜; Grand Trunk, 21½ to 22; the ordinary bonds, 45 to 47; and the preference, 70 to 72. In the foreign market, South Austrian and Lombardo-Venetian recovered to 1⅜ dis. Great Luxembourg were also higher. American railway securities presented a better tendency, Illinois Central leaving off at 34½ to 34 dis., and New York and Erie, 28 to ¼. Mines were quiet, at about previous prices. Joint stock banks were rather dull, and in some cases showed a decline. Oriental shares, however, improved. In miscellaneous descriptions, Peninsular and Oriental Steam were quoted at a reduction. There was a renewed demand for the new marine insurance shares, especially the Thames and Mersey.

WEDNESDAY, Jan. 23.—The railway market improved in the earlier part of the day, but subsequently declined on the fall of the funds and the receipt of an unfavourable traffic return from the London and North-Western. Compared with yesterday, the final quotations were only about ¼ per cent. lower, except Sheffield, which receded 1½. The tendency at the close was rather dull. Colonial stocks were generally steady. East Indian left off at 97¾ to 98¼; Great Western of Canada, 10⅛ to ¼; Grand Trunk, 21½ to 22; ordinary bonds, 45 to 47; and preference, 71 to 73. In foreign descriptions, Lombardo-Venetian shares were flatter at 1½ to ⅝ dis. American railway securities were heavy, especially the shares of the Illinois and New York and Erie. Mines were inactive, and occasionally lower. Joint stock banks and miscellaneous descriptions closed about the same as yesterday. The new marine insurance shares continued in fair demand.

THURSDAY, Jan. 24.—The railway market opened firmly this morning, notwithstanding that the proposed dividend of the Lancashire and Yorkshire was slightly lower than had been expected, and a general improvement took place, chiefly on purchases to cover previous operations for a fall. Nearly all the leading stocks advanced ½ to 1¼ per cent. Foreign descriptions were generally neglected, and the only movement of importance was a fractional rise in Bahia.

FRIDAY, Jan. 25.—The railway share market to-day was decidedly firm. An improvement of ¼ to ⅝ per cent. took place in several of the principal stocks. Berwick, South-Eastern, Great Western, and Midland were in chief request. Mining shares ruled dull, but no material change took place in the quotations.

BIRTH.— On the 10th Dec., 1860, at Trichinopoly, the wife of Barnard Hughes Preston, Esq., of Her Majesty's 2nd European (Madras) Light Infantry, of a daughter.

RIMMEL'S PERFUMED VALENTINE of the LANGUAGE of FLOWERS, beautifully illustrated, price 1s; by post for 14 stamps. Rimmel's new Perfume for the ball-room, the Magenta, price 2s 6d. Sold by all the trade.—Rimmel, Perfumer to Her Majesty, 96 Strand, and Cornhill, London; and at 17 Boulevard des Italiens, Paris.

THROUGH 500 AGENTS Mr THORLEY is giving a circulation to "Thorley's Agricultural Gleaner," unsurpassed by all the other agricultural papers of the day.—77 Newgate street, City.

FORD'S EUREKA SHIRTS.—Patterns (post free) of the New Fancy Flannel, including the various mixtures in the new colour called MAGENTA, a perfectly fast colour, although so brilliant, and may be had woven with Black, Drab, or Grey, suit various tastes.
RICHARD FORD, 38 Poultry, London.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Dr Lankester, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."
Sir Henry March, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure oil, not likely to create disgust, and a therapeutic agent of great value."
Dr Lawrance, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."
Dr Stavely King, Physician to the Metropolitan Free Hospital.—"I have employed Dr de Jongh's Oil with great advantage in cases of mesenteric and pulmonary tubercle, and in the atrophic diseases of children."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.
SOLE AGENTS,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

AT HAMBLY HOUSE ACADEMY Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
London: John Churchill; and may be had of al booksellers,

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DR ROBERT ROWE ON INDIGESTION.
This day is published, price 2s 6d, the fifteenth edition,
NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.
By G. ROBERT ROWE, M.D.
"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.
"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.
"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills"—TIMES.
Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.
London: J. Churchill. and to be had of all booksellers.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.
The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.
Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either from the publisher, J. Allen, 20 Warwick-lane; or from the author's address, 17, Harley street, Cavendish-square, London.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.
DR LA'MERT ON SPERMATORRHŒA; an Original Essay on the Treatment and Cure of Nervous and Physical Debility, resulting from pernicious habits contracted in youth, excesses in manhood, or residence in tropical climates. With cases and engravings from life, representing the various organs in health and disease.
CONTENTS.
SECTION I.—The Physiology of the Generative Organs.
SECTION II.—Puberty — Manhood — The Morale of Generative Physiology—True and False Morality.
SECTION III.—Marriage in its Moral and Physical Relations—Happy and Unhappy Unions—How to secure Healthy Offspring.
SECTION IV.—Youthful Abuse—The Secret Causes of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.
SECTION V.—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences—The Sterility of Age,
Dr LA'MERT, Honorary Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., is the only legally qualified practitioner who, for 20 years, has devoted his attention to the treatment of these disorders, which are so frequently aggravated by the unskilfulness of ignorant empirics, either self-styled physicians or surgeons, sometimes assuming names of eminent medical men, &c. At home for consultation daily, from Ten till Two, and from Six till Eight.
37 Bedford square, London.

TO THE NERVOUS AND DEBILITATED.
Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,
MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London.
CONTENTS.
INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.
CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.
CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.
CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.
CHAPTERS V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.
The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion.
Mr CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.
Sold by J. Allen, 20 Warwick lane, Paternoster row, and Mann, 39 Cornhill, London.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

DR BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates, Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; R. Howden, 78 Gracechurch street; Prout, 229 Strand, &c., &c.
Just published, gratis, or post free for one stamp, to be had of all agents, and at 22 Newman street, Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton cresent, Tavistock square, London, W.C.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.
ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.
No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.
No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.
Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London. W.C.

CHUBB'S PATENT SAFES

—the most secure again Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON

and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

KEATING'S COD LIVER OIL.

Just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within he reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

HEALTH AND HAPPINESS

for the NERVOUS and DEBILITATED.—The proprietors of the Birmingham Institute of Anatomy desire to make known an infallible means of self-cure for the nervous, debilitated, &c., and will forward the same gratuitously on receipt of a stamped directed envelope.—Address "To the Secretary, Institute of Anatomy, Birmingham."

HOLLOWAY'S OINTMENT AND

PILLS.—Acute Rheumatism.—In all severe pains in the joints or muscles, after due fomentation with warm water, the soothing action of this Ointment is most remarkable: it seems at once to lessen inflammation, ease pain, reduce the swelling, restore the free circulation, and expel the disease. In these complaints, indeed, Holloway's Ointment and Pills are an infallible specific. The Ointment should be rubbed as near the part in pain as the patient can bear; it is absorbed and directly conveyed to the diseased textures, where, acting on nerves, vessels, and guiders, it will arrest disease and again establish healthy action. The aperient quality of these Pills have the happiest effect in assisting the Ointment.

STRENGTH AND HEALTH

WITHOUT MEDICINE.

One of the most delicious preparations of the present day, and warmly recommended by all the first physicians, is the

LENTILLA PURA,

obtained from the celebrated vegetable Pulse called 'Ervalens' (or Lentils), and combined with other pure ingredients so as to form a delicious, feeding, and strengthening compound. It is a food fitted for all persons, whether in health or sickness, and is admirably adapted for infants and young children. Constipation, and its numerous maladies, including indigestion, debility, coughs, &c., &c., are wholly averted by the use of the LENTILLA PURA. Testimonials from patients, and the first physicians and surgeons of the day. This celebrated food is sold in canisters, viz.: 1 lb at 2s; 2 lbs at 4s. All is super-refined in purity.

Sent on receipt of P. O. Order, by Theodore Pliny, Brooksby street, Barnsbury, N.

Sold by grocers and chemists.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

NO MORE PILLS OR ANY

other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurzer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies. ——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Ridlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

FREE ISSUE.

Notice.—The following invaluable works have just been published, and are now being issued gratis to all who enclose two stamps for postage, to No. 27 Alfred place, Bedford square, London.

ESSAYS on Nervous and Physical Debility, with their easy Detection and Self Cure. Lately discovered and now made public by the author, with cases and diagrams, showing the connection between the brain and other organs. Also prescriptions and other appropriate remedies for the self-treatment and cure of those special diseases, and whether acquired in youth, manhood, or old age. By Dr Watson, F.R.A.S., London, Member of the Medical Society of Rouen, the National Academy of Sciences, Paris, and Fellow of the Imperial Institute of France, &c., &c. (vide Diplomas and Medical Directory).

MEDITERRANEAN EXTENSION

TELEGRAPH COMPANY (Limited), Gresham House, Old Broad street, London, January 18, 1861.

Notice is hereby given, that the next Ordinary Half-yearly General Meeting of this Company will be held at the London Tavern, Bishopsgate street, within the City of London, on Thursday, the Seventh day of February next, at One o'clock, for the purpose of the genera business of the Company.—By order,

HENRY C. ORTON, Secretary.

SALE OF LAMPS, CHANDELIERS,

AND GAS FITTINGS.

TUCKER and SON having purchased of Messrs Pearce and Son (of Ludgate hill) their entire stock of Lamps, Gas Chandeliers, &c., (on their relinquishing that branch of their business to devote exclusive attention to the China and Glass Trade) have distributed it among their three Show Rooms as under; and being good of first-rate quality, and offered to the public at a reduction of one-third from their usual price, to insure their immediate realisation, they must command the attention of purchasers.

City Show Rooms, 36 King William street (4 doors from London Bridge); Central do., 190 Strand (opposite St Clement's church, and near Temple Bar).

TUCKER and SON—Established 43 years.

Manufactory, Essex Works, W.C.—November, 1860.

DUTY OFF MODERATOR LAMPS.

—J. Schlossmacher's celebrated Manufacture. Burner of every Lamp stamped J. S. The duty being now off, and J. S. being enabled by machinery to reduce the prices of his Lamps to the charges of other makers for their commonest qualities, the full benefit of both reductions is given to the public through his London Agents, TUCKER and SON, at their Establishments, as under:—

Central Show Rooms, 190 Strand (near Temple Bar); City Show Rooms, 36 King William street (4 doors from London Bridge). Established 43 years.

Engravings free by Post.

EXTRACTS FROM THE PRESS

referring to the new Branch establishment of E. MOSES and SON, at the corner of Tottenham Court road and Euston road.

"Upon each floor there are several apartments called the 'trying on rooms,' affording customers an opportunity of avoiding the guess-work which has hitherto prevailed in ready-made emporiums, and everywhere immense mirrors are placed in which the buyer may satisfy himself with the fit and shape of the garment which he proposes to purchase."—STANDARD.

"On the whole, the new establishment of Messrs E. Moses and Son is decidedly the most complete of its class in the metropolis."—MORNING HERALD.

"The whole exterior of the building presents a noble aspect. It combines an appearance of lightness and solidity, grace, and strength."—ILLUSTRATED NEWS OF THE WORLD.

"The interior arrangements are in a corresponding scale of elegance, whilst convenience and comfort have not been lost sight of.....Nothing, in fact, that goes to constitute the completeness of an organised whole can be said to be omitted."—DAILY NEWS.

"Like skilful logicians, they laid down the solid premises of their trade syllogism in the Minories; they next constructed their middle term in Oxford street; they have just now brought out their conclusion to Tottenham Court road."—EXPRESS.

KEATING'S COUGH LOZENGES.—

Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

£4,000 REQUIRED, FOR WHICH

15 per cent. will be amply secured.—Apply to Mr S. T. Jones, 3 Copthall buildings, London E.C.

15S TO 30s PER WEEK MAY BE

gained by any lady or gentleman in a private way by sending 13 postage stamps for particulars to M. Kurton, Redhill, Surrey.

TRUSTEES, SOLICITORS, AND

OTHERS desiring to meet with a well-secured Investment for Money, yielding a liberal Rate of Interest, the principal sum being withdrawable on short notice, may do so by communicating with THOMAS H. BAYLIS, 429 Strand, London.

DELIVERY ORDERS.—

TO DOCK COMPANIES, WHARFINGERS, WAREHOUSE-KEEPERS, CARRIERS, MERCHANTS, and OTHERS.

There being reason for believing that the practice still extensively prevails of evading the Stamp Duties on Delivery Orders, by the device of directing the delivery of the goods to be made, nominally, to the sellers themselves, and issuing the orders without stamps,—

The Commissioners of Inland Revenue take this mode of bringing to the attention of all persons whom it concerns, the enactment contained in the 23rd and 24th Victoria, cap. 111, passed with the view to suppress such fraudulent evasions.

The provisions of the Act are shortly as follows, viz.:—

Every Delivery Order shall be deemed to be made and given upon a sale or transfer, unless the contrary be expressly stated in it.

Any person who shall untruly state or signify in an order that it is not made or given upon a sale or transfer, shall forfeit £20.

Any person who shall by himself, or his servant, or any other person procure, or require the delivery of the goods specified in an order, knowing that it contains such untrue statement, shall forfeit £20.

The Commissioners desire it to be particularly noticed, that not only the giver of an order of this kind, and the purchaser of the goods or his agent who acts upon it, but any Public Carrier or any other person who receives the goods for delivery at any other place than the Shop or Warehouse of the person who issues the order, subjects himself to this penalty, as he cannot be ignorant of the fact of the transfer.—By order of the Board,

T. SARGANT, Secretary.

Inland Revenue, Somerset House, January, 1861.

PERUVIAN FOUR AND A HALF

PER CENT. EXTERNAL DEBT, proceeding from the Six per Cent. Internal.

JULLIEN FUND.

Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same ime afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchel	Mr W. Duncan Davison
Mr W. R. Sams	Mr Jules Benedict
Mr Thomas Chappell	Mr A. Blumenthal

HONORARY TREASURERS.

TRADE B/P MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th. Supplied by BROWN and POLSON, to Her Majesty the Queen, by order from Buckingham Palace. It is in great favour wherever it has been made known, for Puddings, Blancmange, &c., preferred to the best arrow root, and especially suited to the delicacy of Children and Invalids.—BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

OVERLAND ROUTE.—

COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

NOTICE.—The Steamers call at Cork Harbour, on both outward and homeward passages, to land and receive Mails.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS,

appointed by the Admiralty to sail between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX to land and receive passengers and Her Majesty's mails. The following, or other vessels, are appointed to sail from Liverpool:—

AFRICA, for NEW YORK direct, Saturday, Feb. 2.
AMERICA, for BOSTON, Saturday, Feb. 9.
*AUSTRALASIAN, for NEW YORK direct, Saturday, Feb. 16.

*Taking Passengers and Goods for Nassau and Havana, to be transferred at New York on board the R.M.S.S Karnak.

Passage money, including steward's fee and provisions, but without wines or liquors, which can be obtained on board:—To Halifax and Boston, chief cabin, Twenty-two Pounds; second cabin, Sixteen Pounds. To New York, chief cabin, Twenty-six Pounds; second cabin, Eighteen Pounds. Freight to Halifax, Boston, and New York, £3 per ton and 5 per cent. primage. Small parcels, 5s each and upwards. These steam ships have accommodation for a limited number of second cabin passengers.

For passage or other information, apply to J. B. Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. M'Iver, Queenstown; or D. and C. M'Iver, 8 Water street, Liverpool.

During the present severe weather, application should be made at the chief office for the precise departure of the Company's vessels, owing to the accumulation of ice in the river.

STEAM SHIPS.—

The General Steam Navigation Company's powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

This Company is established to procure, by a system of direct dealings with the cotton growers in India, an increase in the importation of Indian Cotton into this country, an improvement in its quality, and greater freedom from adulteration.

The necessity for obtaining increased supplies of cotton is everywhere recognised, and becomes daily more pressing. Statesmen and manufacturers alike feel the danger which threatens the nation, obliged, as it is, to depend upon a single country for five-sixths of the raw material of a manufacture worth more than seventy millions sterling, and on the success of which from three to four millions of persons in the United Kingdom are dependent. Apart from the possibility of a failure of the existing supply from the United States, it is a matter of the first importance to the growth of English manufacturing industry to get more cotton than is at present grown.

Only in America are the three great requisites for the growth of tropical produce—soil, labour, and capital—found combined; none but Slave Labour can there be employed, and the limit of productiveness in the Slave States is perhaps already reached. The West Indies and our Colonies in Australia and South Africa are suited for the culture of cotton, and the parent country can supply any amount of capital, but labour is universally wanting. In the East Indies, we have the cotton soil, and the men whose forefathers have been accustomed to till it from time immemorial.

The Blue Book on East India Cotton, published by order of the House of Commons in February, 1858, contains the result of queries, addressed by the Court of Directors to all their Boards of Revenue and Collectors throughout India, with regard to the growth and price of the article, and the means of extending its cultivation. It establishes, beyond doubt, that over immense tracts of country where the culture can be pushed to an almost indefinite extent, the ryot receives less than 2d per pound for clean cotton, and that, with care and encouragement, the yield per acre, as well as the breadth under tillage, might be largely increased.

Many thousand pounds worth of cotton are annually wasted and lost in the course of transmission from the fields to the seaboard; and adulteration is practised to such an extent as to affect most seriously the reputation and consequent value of Indian cotton.

The Company's agents being resident in the localities where it shall be decided to commence the Company's operations, and in immediate communication with the ryots, will purchase the cotton direct, while using every endeavour to improve the process of picking and cleaning the cotton, and employing the best machinery. Particular attention will be paid to the pressing and baling of the article, so that it may leave the port of shipment without the original packages being disturbed, thus excluding the opportunity for the present adulteration.

The average quotation of good Broach and Dhollera cotton the 31st December, 1860, was 5¼d, and there is every reason to conclude that the carefully prepared shipments of the Company, wholly free from adulteration, would obtain enhanced rates. The well-known statistics of the cotton trade give reasonable expectations that a profit of 15 or 20 per cent. may be realised.

It is intended to commence the operations of the Company in Guzerat. To command the cotton supplies of this extensive territory, including Kattywar, it is proposed to place the head quarters at Broach on the Nerbudda river, with agencies at Gogo, a fine sea-port on the West coast of the Gulf of Cambay; at Dhollera, a sea-port creek; and at Dhundooka, 45 miles inland, a large town and a central point for numerous cotton districts.

The aim of the proposed Company is to improve the cultivation of cotton in India, and to endeavour to raise its value in the market in comparison with American descriptions. The Directors have therefore avoided entering into calculations as to the precise prospects of success, great as they are acknowledged to be. They content themselves with stating their belief that profitable results are to be obtained in the present state of the trade in Indian Cotton, by the establishment of an organised system of agency, such as is proposed by this Company. Its operations need not be confined exclusively to India, should a favourable field hereafter present itself in the South African or any other Colony.

Through the agency of this Company the English manufacturer will obtain a better supply of cotton than at present, and in the success which the Directors believe awaits their efforts, the public will discern a path towards the extinction of Slavery, and an increase of the common prosperity of England and India.

Applications for shares, addressed in the annexed form to the Directors, may be sent to the Secretary, at 33 Throgmorton street, London, E.C.; or to Messrs Towgood and Strachan, Brokers to the Company; but no application will be considered unless a deposit of 10s for each share applied for, shall have been previously made with the Bankers of the Company.

FORM OF APPLICATION FOR SHARES.

To the Directors of the India Cotton Company.

GENTLEMEN,—I have this day paid to Messrs Dimsdale and Co., the sum of £ and I hereby request that you will allot me shares in the India Cotton Company; and I hereby agree to accept such shares, or any smaller number that may be allotted to me, and to pay the remainder of the deposit of £1 10s per share on the shares allotted, and to execute the articles of association when required.—I am, Gentlemen,

Name in full.....
Address in full.....
Date .....

Received the day of 1861, on account of the Directors of the India Cotton Company, from the sum of being the deposit made in accordance with the terms of the prospectus, on an application for an allotment of shares in the undertaking.

£ Bankers.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par for the remainder (£990,000) of the sum of £1,500,000, required to complete the total amount which the Company has the power to borrow on Debentures not convertible into shares.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years from the 15th December inst., transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice, the bonds will be paid off at the expiration of the first five years on presentation at the Bank of England.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.

No scrip receipt or bond will be issued for a less sum than £50.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's Walk, New Broad street, London, Jan. 22, 1861.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are now prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by indorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest, upon notice being given by him twelve months previous to the expiry of the first term. Failing such notice, the Debentures will be paid off at the expiration of the first five years.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the limited amount, £194,000, which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into the Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, upon giving notice at any time before the Debenture becomes payable, of converting it into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London,
1st January, 1861.

GOAD, RIGG, and CO., Brokers, 17 Mark lane.

MANUFACTURING PREMISES and TRADE for SALE.—To be Disposed of, in consequence of the advanced age of one partner and the desire of the other to retire, a first-class and very old-established Soap and Candle Manufacturing Business in the West of England.
The premises (which are freehold) are intrinsically valuable for their situation and completeness, and the trade is of the very highest character and connection.
For further particulars, and to treat, apply by letter to Mr Wm. Barham, Accountant, St Leonard's chambers, Bristol.

PARTNER WANTED.—Wanted, a Partner in an old-established Business, in the Midland Counties. The business has been carried on for nearly twenty years by the Advertiser, during which time large profits have been realised, which have been invested in first-rate freehold premises, and otherwise in increasing the plant and stock. The demand has however become so extensive, that the present capital invested is unequal to supply it, and a Partner is wanted who can add a capital to the business equal to that already employed therein. No one need apply who cannot command from £8,000 to £10,000. First-rate references to City Houses, and an investigation of the books by a Professional Accountant offered. —Apply to Messrs Austen and De Gex, Solicitors, 4 Raymond buildings, Gray's inn.

PROFESSOR OWEN, Superintendent of the Natural History Department, British Museum, will commence a course of Six Lectures on FOSSIL REPTILIA, at the Museum of Practical Geology, Jermyn street, on Friday, 8th February, at 3 o'clock; to be continued on each succeeding Friday, at the same hour. Tickets for the Course, price 5s, may be had at the Museum.

UNITED STATES, CANADAS, &c.
S. E. DARLING and CO., 6 Pine street, New York, formerly with Messrs Duncan, Sherman, and Co., Bankers, to whom they have permission to refer, also the Broadway Bank, Peoples' Bank, Bank of the Commonwealth, &c., make Collections of Drafts, Notes, Bonds, Coupons, Dividends, Legacies, &c., in all parts of America, with prompt returns in remittances on London and Westminster Bank. Commissions, one-eighth per cent.
American Stocks and Bonds bought and sold in New York, Philadelphia, Boston, &c. Commissions, one-eighth per cent.
Interest allowed on current accounts.

THE CITY TURKISH BATHS,
5 SOUTH STREET, FINSBURY.
Open daily, Sundays excepted.
The bath, in addition to being a great curative agent is the greatest physical luxury in the world.

ACCIDENTS OF ALL KINDS, and from Any Cause, may be provided against by an Annual payment of £3 to the RAILWAY PASSENGERS ASSURANCE COMPANY, which secures £1,000 at death by Accident, or £6 weekly for Injury.

No Extra Premium for Volunteers.

One Person in every Twelve insured is injured yearly by Accident.

£75,000 has been already paid as Compensation.

For further information apply to the Provincial Agents, the Railway Stations, or at the Head office, 64 Cornhill (late 3 Old Broad street).

Annual Income, £40,000.
Capital, One Million.
W. J. VIAN, Secretary.

64 Cornhill, E.C., January, 1860.

ARGUS LIFE ASSURANCE COMPANY, 39 Throgmorton street, Bank.

CHAIRMAN—William Leaf, Esq.

DEPUTY CHAIRMAN—John Humphery, Esq., Alderman.

Advances on policies when their value exceeds £50.

Half or one-third credit allowed on whole life policies.

Residence in time of peace in any part of Europe.

No extra charge for the Militia, Volunteer Rifle, or Artillery Corps, on home service.

Claims paid one month after proof of death has been admitted.

Medical attendants remunerated for their reports.

The medical officers attend every day at a quarter before 2 o'clock. E. BATES, Resident Director.

INDIA OFFICE, Victoria street, Westminster, January 28, 1861.

THE SECRETARY OF STATE FOR INDIA in COUNCIL gives notice, that he will be prepared to receive, on Friday, the 8th February, at or before One o'clock, TENDERS for a LOAN of £3,000 000, on security of stock to be created under the provisions of an Act of the last Session of Parliament, and to bear interest at the rate of five per cent. per annum, payable half-yearly at the Bank of England, on the 5th January and the 5th July in each year.

The stock not to be redeemable until 5th July, 1870, but to be redeemable at par on or after that day, upon one year's previous notice having been given in the "London Gazette" by the Secretary of State for India in Council.

The books of the stock will be kept at the Bank of England, where all assignments and tranfers will be made. No stamp duties whatsoever will be charged on the transfers.

The tenders to be for the whole or any part of such loan, but not for sums of less than £500 stock, and to state what amount of money will be given for every £100 of the said stock. The tenders are to be delivered in, sealed, at the Accountant-General's Department, at this office.

A deposit of two per cent., upon the amount of stock tendered for, must, at the same time, be paid at the Accountant-General's Department, to be returned in the event of the tenders not being accepted; and parties tendering must be careful not to enclose the deposit in the sealed tender.

So much of the amount tendered and accepted to be paid at the Bank of England, on account of the Secretary of State for India in Council, on Friday, the 15th of February, 1861, as when added to to the deposit paid, on the tenders being delivered, will leave eighty pounds for each hundred pounds of stock, to be paid as under, viz.:—

£20 per cent. on Tuesday, the 12th of March, 1861;
£30 per cent. on Tuesday, the 9th of April, 1861;
£30 per cent. on Friday, the 10th of May, 1861;

but parties who so desire may pay up in full, and will be allowed a discount at the rate of five per cent. per annum upon the anticipated payments.

The dividend payable on the 5th of July, 1861, to be a six months' dividend upon the capital amount of stock contracted for on the said 8th February.

In the event of the receipt of tenders (at or above the *minimum* price to be fixed by the Secretary of State for India in Council on the 8th February) for a larger amount than that proposed to be raised, the tenders, at the lowest price accepted, will be subject to a pro rata diminution.

Due notice will be given when the scrip receipts are ready, and these will be delivered only to the parties entitled, or to their order, at the Chief Cashier's office at the Bank of England, in exchange for the receipt for the first instalment.

For each instalment after the payment of the first, which is due on the 15th of February, 1861, a proportional amount of stock will be created for the contributors. The stock for the first instalment, including the deposit, to be created at the *same* time with that which will be due on the last.

No tender will be received after One o'clock on the said 8th day of February, nor unless upon a printed form, which must not be enclosed in an envelope.

This form may be obtained at the Accountant-General's Department of this office, or of Mr Henry Scott, the broker to the Secretary of State for India in Council, 16 Throgmorton street, London, E.C.

J. COSMO MELVILL.

NOTICE.—OAK BARK FOR SALE, comprising about 1,614 tons of capital Timber Bark, all flawed in 1859 and got in good condition, well stacked and protected from the weather, very desirably situate at Kenilworth, Dursley, Charfield, Craven Arms, Bromfield, and Kington, and within five minutes' walk of the respective railway stations at each of the above places, and thus exceedingly easy of transit.

Messrs DRIVER have been instructed to Sell by Auction, at the Mart, Bartholomew lane, London, on Friday, 22nd February, at 12 for 1 o'clock precisely, in 30 lots, about 1,614 tons of capital Timber Bark, viz.:—

758 tons at Kenilworth, in Warwickshire, in 15 lots.
126 tons at Dursley, in Gloucestershire, in 2 lots.
80 tons at Charfield, in Gloucestershire, in 1 lot.
357 tons at Craven Arms, Shropshire, in 7 lots.
137 tons at Bromfield, in Shropshire, in 2 lots.
156 tons at Kington, in Herefordshire, in 3 lots.

The above Bark can be recommended to the attention of Tanners and Bark Dealers. It is mostly of excellent quality, and some very superior; and, with very small exceptions, has been got in capital condition. All the bark is stacked, and well thatched and protected from the weather, and each rick is situate within five minutes' walk of the railway station at each place, and thus exceedingly well situate for transit.

Samples on view at the Auction Mart on the day of Sale.

Further particulars will appear in future advertisements; in the meantime, information may be had of Messrs Driver, surveyors, land agents, and auctioneers, 5 Whitehall, London, S.W.

THE INDIA COTTON COMPANY,
To be Incorporated with Limited Liability.
Capital £250,000, in 25,000 Shares of £10 each,
(With power to increase by vote of a General Meeting.)
Deposit 10s per share, and £1 10s on allotment.

It is not intended to call up during the first Twelve Months more than the £2 per share to be paid on allotment.

GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

A GENTLEMAN OF SOME YEARS' Banking experience in the East, is desirous of an engagement as MANAGER, SECRETARY, or ACCOUNTANT of a Colonial Joint Stock Bank. No objection to go abroad. The most satisfactory references in every respect.—Address C. O. J., care of Mr Smith, Stationer, 4 Hungerford street, Strand.

A GENTLEMAN, MANY YEARS resident in Manchester, and thoroughly acquainted with the Shipping Trade and Manchester and Yorkshire goods, and having a fair knowledge of several languages, is desirous of representing in Manchester a first-class house, or to take the management of the dry goods branch of a London or Liverpool firm.—Address C. R., Box F 36, Post Office, Manchester.

A GENTLEMAN, thoroughly conversant with the West Indian and Spanish American Trades, and long resident in the West Indies, desires an engagement. He could undertake French and Spanish correspondence. First-class references.—Address J. G., care of Mr G. Street, Advertising offices, 30 Cornhill, E.C.

A FRENCH GENTLEMAN, 28 years of age, knowing perfectly the Wine Trade of the South of France, seeks a situation as French Correspondent in a London commercial house. Can give the best references.—Address E. B., 24 Merrick square, Trinity street, Borough, S.

BANKING AGENCY.—A Gentleman of long experience in monetary affairs, having an extensive and influential connection in the money market, wishes to undertake the London Agency of a Country or Foreign Banking Firm, or incorporated Company. The highest references can be given as to competency and respectability.—Address X. X., Mr H. Good's, Stationer, 60 Moorgate street, E.C.

TO INVESTORS.—Five per cent. interest allowed on Money, withdrawable at Short notice. Undoubted Security. Particulars furnished on application to THOMAS H. BAYLIS, 429 Strand, London.

THE ADVERTISER WITH influence and experience in the Manchester market, wishes an agent who could introduce respectable connections, exporters of Manchester goods. To a party, capable and suitable, after a fair trial, a partnership if wished would be arranged.—Address H. B. Wheeler, Esq., Exchange Arcade, Manchester.

TO BREWERS.—The Advertiser, having a good London and Export Trade, with extensive premises centrally situate and well adapted for carrying a largely increasing business, would enter into arrangement with a large Brewing Firm desirous of thus extending their connection, and capable of well supporting a London agency. Unexceptionable references can be given if required.—Address by letter only, to G. L., or Mr Black, 9 Catherine court, Tower hill, E.C.

TO GENTLEMEN AND MEN OF BUSINESS.—A person of experience in business and of mature age, who has been during the last seven years, and is at the present time, engaged in managing the accounts, correspondence, and other confidential affairs of a large landed proprietor,—a wealthy capitalist and merchant,—is desirous of finding a situation of a similar kind, or any other for which he is competent, either in town or country, where other duties besides those attaching to strict business are recognised, and where liberal and gentlemanly treatment would be accorded. He would engage wholly or partially; but if the former, would wish some liberty as to his time and other trifling privileges, extravagant remuneration not being required.—Address X. M., Hebert's Library, Cheapside.

PRIVATE ACTS OF PARLIAMENT.—ORIGINAL PUBLIC ACTS OF CHARLES II., AND ROYAL PROCLAMATIONS.

Mr WILLIAM SALT having bestowed much time and attention in tracing out and arranging the printed copies of Private Acts of King George I., and previous reigns, will be thankful to any person who can, before 1st March, refer him to any collection of such Private Acts, so as to enable him to improve his List. He will also be glad to hear of any sets of the Private Acts dated before 1814, or of the Original Public Acts, black letter folio, 18th to 20th Charles II., or of any collections that have been formed of Royal Proclamations.

Letters to be addressed to William Salt, Esq., 23 Park square, Regent's park, London, N.W.

1st February, 1861.

S. W. SILVER AND CO., OUTFITTING WAREHOUSES, 66 and 67 CORNHILL, E.C.

Special Outfits for Australia, India, and China, for Naval and Military Officers, Cadets, Midshipmen, and Civilians. Clothing for Gentlemen's Home Use,—viz., Naval and Military Uniforms and Civilian Dress of the best Materials and Workmanship. Shirts, Hosiery, Gloves, &c. Ladies' Outfits. Furniture for Camp, Barrack, Cabin and Colonial use, embracing every variety of Cabinet Work, Canteens, Trunks, Portmanteaus, &c., portable and suited to all climates.

Manufactory, Silvertown, opposite H.M. Dockyards Woolwich.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

The Political Economist.

The Editor of the ECONOMIST *intends to publish a Supplement half-yearly, giving* IN A COMPACT FORM *the Balance Sheets and Directors' Reports of* ALL *the Joint Stock Banks in the United Kingdom, as far as the same are made public, with some account of the most important Meetings of Shareholders.*

THE OBSTACLES TO THE SECESSION MOVEMENT, AND THE EFFECTS ON THE COURSE OF TRADE.

THE recent details of American news seem to prove that the present movement will for a long time smoulder in a chronic form, without leading to a decisive result on either side. Nothing can be more astonishing and full of apparent contradictions than the state of politics in the American Union. At a casual glance the secession mania would seem to have spread with marvellous rapidity—with the power of a conflagration. Five States have declared their secession, and two which have not yet taken that final step have seized United States forts and property (namely, Louisiana and North Carolina). The record of but sixteen days' revolutionary work contains more than the same number of military achievements.

1860.—Dec. 27—Fort Moultrie and Castle Pinckney occupied by the rebel forces.

Dec. 30—The Arsenal at Charleston seized.

1861.—Jan. 2—Forts Pulaski and Jackson, and the Savannah Arsenal captured by the militia of Georgia.

Fort Mason and the Arsenal at Fayetteville seized by order of the Governor of North Carolina.

Jan. 4—Fort Morgan and the Mount Vernon Arsenal, near Mobile, captured by troops of Alabama.

Jan. 8—Forts Caswell and Johnson taken by North Carolina militia.

Jan. 9—The insurgent batteries at Charleston fire into the Star of the West, drive her out to sea, and prevent the reception of reinforcements at Fort Sumter.

Jan. 10—Fort McRae, at Pensacola, occupied by Florida.

Jan. 11—The National Arsenal at Baton Rouge, with Forts Jackson, Pike, and St Philip, taken possession of by Louisiana.

Jan. 12—The Navy Yard, with Fort Barrancas, at Pensacola, taken by Florida and Alabama troops.

To this must be added the desertion of the revenue cutter Aiken to South Carolina and the capture of the Fulton by the people of Florida. The quantity of guns and small arms seized has been very large. The amount of United States property thus appropriated is estimated at more than a million and a half sterling. Major Anderson is regarded as exceedingly unsafe in Fort Sumter, and the attempts to send him reinforcements have failed.

Thus far one could scarcely expect the revolution to have spread faster. But there are unmistakeable signs of a hitch. In Georgia, though secession has been declared for, a strong minority of 130 to 165 in the Convention voted against it. In North Carolina, though the forts have been seized, the measures for summoning a Convention are proceeding very languidly, and Unionist meetings all over the State protest against extreme measures. Moreover, in all the Slave States, if we may trust the accounts that reach us on many sides, the men of property are getting thoroughly alarmed at the very summary mode in which the revolutionists impose taxes, or rather fines, on the rich, and are sending away their families and not seldom escaping themselves from a state of society so menacing. We see it stated by a contemporary, but apparently on very doubtful authority, that a tax of 16 dollars per slave has been imposed on all slave-owners in South Carolina by a secret ordinance which the papers are not permitted to publish. But it is admitted on all hands that direct taxation is exceedingly heavy, and the sole resource of the seceding States. Even the municipal city councils are taxing directly nearly all real and personal estate, including slaves, and imposing enormous taxes on free negroes, with a view, no doubt, of driving them away. There is an utter want of resources in all these States, especially in South Carolina, and the authorities hesitate helplessly between rapacious appropriation of Government and private property, and their dislike to identify themselves irretrievably with that dangerous and fatal policy. Colonel Hayne,—the Commissioner appointed to negotiate with the President for the surrender of Fort Sumter,—at the last advices still lingered irresolute at Washington, delaying his final interview with Mr Buchanan. The authorities at Charleston resemble hesitating and reluctant thieves, new at their trade. They seized the other day on a private steamer, the *Marion*, carrying freight and passengers between Charleston and New York,—considered her capabilities as a war steamer, had her deck half-sawed through for the proposed changes, and then suddenly changed their mind, ordered all the injuries to be carefully repaired, and restored her to the owners for the return voyage to New York. Everything indicates that even the leading State of the movement is embarrassed as to its course of action, has not the means to defray the expense of a regular war policy, and is even yet reluctant to put the finishing stroke to its own work.

And well may the revolutionary leaders be reluctant. The truth is, that small as is the power of the Union for aggressive purposes, its power for putting the most serious obstacles in the way of secession is almost unlimited. The Government cannot venture to march troops into the rebellious States, but it is bound to collect the revenue duties on every ship which enters a Southern port. Its revenue cutters can and will hover out of reach of the shore guns round the mouth of the ports, and compel the payment

of the federal tribute. And in doing this it is supported by the whole public opinion not merely of the North, but of every non-seceding State. Nor can one of the seceding States hope to organise a navy competent to resist this enforcement of the federal authority. They are absolutely helpless in the matter, and in the meantime their citizens are paying taxes *both* to the United States authorities and the far heavier revolutionary taxes to their own provisional Government, while half their trade, and much of their agricultural production, are absolutely suspended.

Nor does there seem any limit to this embarrassment. The Southern Federation, when formed, will be as helpless in the matter as the States in detail. They can indeed retaliate by levying tribute from the ships descending the Mississippi, but the chief result would be to rob their own Confederation,—for the North-West even now sends but little of its products to the Atlantic by way of the Mississippi and the Gulf,—its grain going almost entirely by the great lines of railroad (the Illinois Central, the Grand Trunk line, and the Baltimore and Ohio,) which are in conjunction either with the Erie Canal and the Lakes, or directly with the great rivers. "The cost of transportation, per mile," says the *New York Times*, "over the Erie Canal and the "Lakes is considerably *less* than on the Mississippi and its "tributaries. We have consequently swept the trade of all "the North-Western States. The increase of tonnage of the "Western States, delivered at the port of New York, has been "from 54,000 in 1836 to 2,200,000 in 1860." And the present movement stimulates greatly, of course, this transfer in the channels of trade. Already have both cotton and pork,—both of them products of the South-Western Slave States,—been sent up the Mississippi instead of down, in order to avoid passing through the revolutionised districts. Cotton has been carried up the Mississippi to Cairo, and thence by the Ohio and the Ohio and Baltimore line (now complete) to the Atlantic. Cotton for England, on the other hand, if this crisis lasts, may probably be taken from Cairo by the Illinois Central Railway and the Grand Trunk to the St Lawrence. The Superintendent of the Michigan Central Railroad has already reported that the Northern and Western railroads are reaping great profits from the recent diversion in the course of trade.

It is clear, therefore, that the Slave States must neither beset the Gulf of Mexico and the mouth of the Mississippi, nor even exact tribute at that outlet of trade, if they do not wish to lose it altogether. And hence their only means of throwing off the yoke of the Union would be, either the creation of a navy, for which we believe they have really not the wealth, whatever sacrifice they might be disposed to make for this purpose,—or to *persuade* the Government of the Union voluntarily to relinquish their hold. It is clear that they still hope most from the latter expedient. The senators and representatives of seceded and rebellious States remain still in the places in Congress which they have in fact professed to vacate, protesting against coercion and exhorting to peace. And there is notoriously a large party of mediators who would be glad to see some compromise. But we believe that all compromise will be, at present at least, indignantly repudiated both by the North and the North-West. The cry for preserving the Union strengthens rather than diminishes in intensity. If, indeed, there were no alternative but open civil war, there might be some chance of a compromise. But the North feels that, with the power of blockading every Southern port by revenue cutters still lodged in the hands of the Government, and so indirectly extracting the tribute from the South, the game is for a long time at least in their own hands; while the stagnation of trade, the expenses of a quadruple taxation, the fears of open hostilities, the dread of slave insurrections, will in time swell the party of submission in the South, and render it necessary for the rebellious States to retrace their steps. Even if successful in this policy, the great question will remain as unsolved as ever. The South will return to the Union in a spirit even more rebellious than it *left* it, and the struggle must soon be renewed. Still, delay is hope. And States which attach,—somewhat blindly, as we think,—so much value to an external Union as do those of the North, are not likely to acquiesce in disunion sooner than is absolutely needful, while they have the power of indefinite delay in their own hands.

THE POSITION OF INDIAN SECURITIES.

THE issue of the new Indian loan of 3,000,000*l* affords a suitable opportunity for reviewing the present aspect of the various political and financial circumstances which may affect the value of Indian securities, and of this we mean to avail ourselves.

The first inquiry is the political one. Is our Indian Empire safe? Are we likely to retain in the East the complete but anomalous mastery which we at present possess there? Does the experience of the last few years justify an increased confidence in the stability of our rule there, or ought we to think, as for a moment we did think during the crisis of the mutiny, that this stability was shaken and impaired? Unless we have a clear opinion on this fundamental point, all our other notions must be fluctuating and confused.

Few persons can have watched closely the events of the last three years in India without forming a distinct opinion that our rule there is rather strengthened than weakened by all which has happened. It is quite true that India may not and will not be so comfortable a residence to Englishmen as it was formerly, and that the difference to English *women* between the present and the past will be greater still. It is impossible that there can be again that undoubting, unsuspecting confidence in the fidelity of the native servants which was so remarkable in former times; it is not possible that the feeling of individual security, especially in lonely and distant stations, can be ever again what it was before. Such a mutiny with such massacres must leave great traces in the retentive minds of the civilised masters, even if it fade rapidly away from the oblivious memories of the uncivilised subjects. But though the *feeling* of confidence among the actual residents in the East must be impaired, a reasonable person who can coolly measure facts will certainly think that our rational grounds of confidence are augmented rather than diminished.

The great event which careful observers of our Anglo-Indian Empire dreaded, has happened. It used to be said, and it used to be *thought* by many who scarcely dared to say it: 'We are in a position unexampled in the history of the 'world. We are holding a nation of enemies by means of an 'army of enemies. All our great military posts—all our stores 'of artillery—all the keys of our Empire are really and truly 'in the hands of the natives. We are using a part of a 'hostile population as the *sole* instrument by which we 'keep down the rest. What, then, will happen if that fails 'us?' It was impossible that there should not be much foreboding of this vague and half-unconscious nature in the minds of thoughtful and anxious men: it was the inability to shake himself free from it which made Sir Charles Metcalfe 'ever nervously alive to the instability of our Indian Empire.' The dreaded event has happened in the worst way,—in the most extreme and calamitous form in which it could be anticipated, and yet *we hold India still.* We are still there,—not on sufferance, not in any fear, not in any position of military difficulty, but as the undisputed masters, the bold and firm rulers of the most remarkable dependency which now exists in any part of the world. For many years at least it is not possible to doubt that India is politically safe.

Nor is it possible to doubt that India is financially wealthy. The evidence on this point is consistent and clear, though it comes from very various sources. The present riches of the country are admitted to be great, and the resources of the future—if that future be a happy one—are overflowing and unbounded. The most remarkable witness on this subject is Sir Charles Trevelyan. He was peculiarly likely to give a contrary testimony if he veraciously could. As he was inculcating the pressing necessity of reducing the expenditure, and the extreme danger of augmenting the taxation, he must have been tempted to state the pecuniary resources as low as it was possible to state them truthfully. He says, however, "I will not consider this part of the sub-"ject in detail in reference to the great Bengal Presidency, "although I know it better than either of the others; but

" will content myself with expressing my cordial concurrence " with Mr Wilson in his admiration of its wonderful re- " sources. If real protection of life and property were esta- " blished there by the formation of an efficient police, and " the people were ruled quietly and prudently with all our " power, the magnificent valley of the Ganges alone would " yield more than the present revenue of the whole of British " India." No observations on this point could be more striking or more valuable.

All this, however, though very satisfactory as far as it goes, is not complete. These resources must not only exist in India, but must be made available for the Imperial expenditure by the Indian Government. And, as yet, they have certainly not been made sufficiently available. There is a deficit, of which various conflicting estimates have been made, but which it is admitted is over seven millions, and which may be as much as eight. Mr Wilson hoped by additional taxation to raise 3½ millions, and by a careful revision to reduce the expenditure, principally in the military department, by 3½ millions, and thus hoped, in the course of time, to 'make 'both ends meet.' But it is evident how difficult both these undertakings are. The taxation of such a country as India is undeniably difficult. The mass of the population is poor; the most visible kind of property is taxed already as much as it can bear; taxes on consumable commodities yield little, for a parsimonious population will meet such taxes by a diminution in their consumption; the wealth of the moneyed classes will try to escape the tax-gatherer by every resource which Asiatic cunning and fraud can invent and carry out. But great as these difficulties are, the difficulty of very greatly reducing the expenditure seems greater still,—so at least a careful observer not misled by sanguine anticipations will be apt to think. The true answer to all such proposals is in the imperative mood. '*Do it.* Save the money 'if you can: we will aid you in every way; support you to 'the utmost of our power, but do not ask us to be too confident 'beforehand. We have heard 'all that' before. Many a 'sanguine mind has fancied it could cut off at once large 'portions of former expenditure, and when it came to the 'task has been overcome with detail and failed in accomplish- 'ing anything.' When we consider the unwieldy bulk of the Indian Empire, our position as unacclimatised foreigners, the necessity of exporting the rulers from this country, the necessity of supplementing the work of those rulers by an incalculable amount of subordinate native agency, the necessity of a large English army, the necessity in such a climate of a legion of natives to attend upon that army;—when we consider all these pressing obstacles taken together and looked at as a whole, we cannot be buoyantly hopeful of enormous reductions in our Indian expenditure; we hope for some considerable reductions; we shall be thankful for any; but we shrink from too great expectations.

We cannot pretend to be impartial on the subject, but it is admitted that the late Mr Wilson had very peculiar qualifications for meeting these difficulties. His financial knowledge was very great; his power of labour immense; his *elasticity* of mind, both in devising schemes and in dealing with life and men, very remarkable. He was committed to a great scheme for the augmentation of the revenue, and no quantity or difficulty of detail in the reduction of expenditure would have puzzled or disheartened him; he had the *spirit* to attack such details, however many. His successors are less known, and must be judged, as he would have been, by the event. But it is the difficulty of Indian securities that, *as yet*, we do not see our way to the equalisation of income and of expenditure; that a great deficit stares us in the face; that it will need the courage of statesmen and the ingenuity of financiers for many years to meet and vanquish it.

At the same time,—assuming India to be, as we have shown, politically safe,—the difficulty is not so pressing as might at first appear. The Indian debt—both here and in India—is less than three times the income of the Government,—a very small proportion in comparison with the debts of European States. It is true that there are large contingent liabilities on the guarantees given by the Indian Government to encourage the construction of railways in India, but in themselves, and independently of political casualties, these undertakings will certainly be very prosperous. If we can rely on the security of the income of India, the present charge on it is not very great; and we may, to some extent, trust to time and events to improve the financial situation, and to bring us near to an equality between expenditure and revenue.

The form in which the Indian debt has been presented to the London market affords an instructive example how false the most plausible *à priori* theory may prove when applied to the complicated facts of actual life. It is certain that there are several descriptions of lenders each of whom would prefer to make a different stipulation as to the mode in which he would be repaid. One person would like to be sure of his money at a certain fixed day; another would like to have it after a certain notice that he may give at any time; a third does not care as to the repayment of his advance at all, so long as his interest is good, and his stock is saleable in the money market.

The rational plan would seem to be to create a different kind of security to suit the wants of each of these classes of persons, especially of the two first, who seem the most thoughtful and cautious,—the most likely persons to have ready money. The Indian Government have adopted this plan. They have created India Debentures payable at fixed dates; India Bonds payable after a year's notice which the bondholders may give at any time; Indian Five per Cent. Stock, which (like Consols) is not a repayable debt, but a perpetual annuity, transferable from hand to hand in the market, but which the holder can never ask the Government to refund. The Indian Government, whether on theoretical grounds or by a series of coincidences, have done precisely what an *a priori* theorist would have recommended them to do. In practice, however, the result has not been fortunate. Indian securities, practical men are agreed, are not by any means in the shape most available in the market. The truth is that *saleability*—ready, easy, satisfactory saleability—is the great quality which a good security should possess: if it possesses this, it will be in favour; if it does not possess this, every other excellence is secondary, and is, in comparison, of inferior importance. And it is obvious that the more securities are varied, the more they are split up into various sorts, the more unsaleable they become Government debts are articles of daily dealing: they are marketable commodities in the strictest sense of the word. A wholesale dealer in any market does not like to deal in 'sundries'; he prefers a homogeneous article of which he can hold a large amount, and for which he may hope a large sale. This is the cause of the great partiality in the money market for Consols. The dealers hold them much more largely than they hold anything else. Accordingly, it is half a proverb that 'you can sell Consols 'on a Sunday.' There is less difficulty in selling them than in selling any other security; and at all times they bear a greater proportionate value. Indian securities are exactly in the reverse position. Being split up into *three* kinds of securities in London (without taking into account the Calcutta loans, or the *two* kinds of enfaced paper, which are now, however, largely dealt in in this market), the trade in them is unduly restricted, and the dealers do not like them. A single homogeneous stock would be far better than the present composite aggregate of stocks, bonds, and debentures.

This conviction pressed practically on the Indian Government, and they raised the 5 per Cent. stock from 5,000,000*l*, which was understood to be its limit, to 8,079,000*l*, by the conversion of Debentures under powers which were perfectly legal, though in the money market perfectly forgotten. It is certainly to be regretted that any portion of the public should have been in the least in error, for immediate publicity is the best aid to financial credit; but the act of the Indian Government was in itself most wise. It is their duty to borrow the money they require in the form in which they can borrow it best, and that is the most homogeneous form.

On the whole, therefore, it may be said that the first element in Indian finance—the safety of our Indian Empire—is more satisfactory than it ever was; that the taxable wealth is very great, even by the admission of those whom we might expect to be most inclined to depreciate it; that our Indian securities in London are being reduced into a simple and popular form, and that the loan now asked for is in that form. The only questionable point is the financial energy and ability of the Government at Calcutta, which can be determined only by the actual trial.

THE ENDANGERED SUPPLY OF COTTON.

The danger supposed to threaten our supply of cotton from the events now occurring or likely to occur in America, and the various means by which it is fancied that this danger may be mitigated or averted, continue to occupy many pens and many minds. Pamphlets, leading articles, and letters to the principal newspapers on the engrossing subject appear in all directions. At Manchester, a new fortnightly journal, called the *Cotton Supply Reporter*, has been established. But it seems to us that in the prevalent excitement sufficient pains has not been taken by the writers of these productions thoroughly to ascertain the facts of the case, or accurately to measure either the menaced evil or its offered antidotes.

In the first place, the probability of a serious interruption of the cotton cultivation in the States has, as was natural, been greatly overestimated. The danger no doubt is not chimerical, but it has been suffered to assume exaggerated dimensions. The impression in many minds seems to be that the negroes on the cotton plantations are not only in a chronic state of suffering, coercion, and distrust—which is true in the main; but are also constantly on the verge of insurrection, and are only kept under by a consciousness of the hopelessness of any outbreak so long as the Union subsists—which is altogether false. The accounts which appear from day to day in the various public journals—one set representing the whole black population of the South as ripe for rebellion and needing only a leader and a summons—another set declaring them contented and even zealous for their masters' success in the anticipated conflict—are all incorrect because all partial and one-sided. The fact we believe to be that as a rule the *family* slaves, those resident in the towns and in the more peopled districts, are on the whole comfortable, placid, and not anxious for a change. They are naturally acquiescent and are usually treated with indulgence. This description will apply with more or less accuracy to the Carolinas, Georgia, Virginia, Maryland, and Kentucky—of course making large exceptions for the case of individual slaves, who have been worse treated or are more aspiring than the generality of their fellows. The real wretchedness, the brutal treatment, the excessive toil, which render the condition of slavery so dreadful to the slaves themselves and so hideous and detestable to all beholders—are to be found chiefly, if not almost exclusively, in the Planting States (Alabama, Mississippi, Florida, and Louisiana)—and in the more scantily populated and more isolated districts even there. Thus, where the slaves are most exposed to the contagion of free labour and free ideas, they are least rebelliously inclined, and are moreover kept in control by a larger preponderance of the master race;—while, again, where they are most brutally treated and most hostile to their white oppressors, and moreover most superior to them in numbers, they are at the same time most degraded, most helpless, and most carefully guarded from all abolition influences. On the remote cotton plantations, while it is difficult to exaggerate their misery or their wrongs, it is almost equally difficult to exaggerate their terror, their submissiveness, or their incapacity for organised revolt. It is precisely here, where slavery assumes its most infamous and frightful forms, that slave insurrection seems most improbable. It is just where even sober and peaceful men would almost welcome the advent of the abolitionist preacher, that the abolitionist preacher can scarcely ever penetrate,—or can penetrate only at the risk of a terrible and torturing death. It is precisely where rebellion would be quite righteous and almost a blessing that it will be most unlikely to occur. It is precisely here, too, *where it would most jeopardise the cotton crop*, that it is least easy and least probable.

Many persons, again, taking their impression from Anti-Slavery publications, have an idea that a great proportion of the Northern citizens of the United States are earnest lovers of the blacks, and are in fact Abolitionists at heart; that hitherto they have been withheld only by federal obligations and respect for guaranteed rights from joining the propagandism of negro liberty; and that as soon as the Union is dissolved, they will become as ardent and pertinacious enemies of slavery and advocates of slaves as Garrison or John Brown. There is no truth whatever in these pleasing pictures. The *Missionary* Abolitionists (whose zeal and courage we cannot but respect, whatever may be our opinion as to the judiciousness of their proceedings and the accuracy of their statements) are comparatively few in number; and we do not see what fresh facilities will be afforded them, or what old difficulties will be removed out of their path, by the dissolution of the Union. They will still be unable to instruct or to excite the slaves, to distribute inflammatory tracts among them, or to penetrate in any way into their territories, except on the same terms as now—that is, with the certainty of being hung by Lynch law, tarred and feathered, pulled in pieces, or burnt alive at a slow fire. On the contrary, we may be sure that the negroes will be guarded from all contact with them more sedulously and jealously than ever. The great majority of the people in the Northern States detest the coloured population even more than do the Southern whites; they see the augmentation of this race in their districts by natural means or by the influx of fugitive slaves with irritation and annoyance; and though wishing to be free from the reproach of slavery and from the bullying of slaveowners, are as little disposed as the French to undertake a crusade in the cause of emancipation. Many of them dread the confusion, the destruction of property, the interruption of trade, which would be consequent on extensive slave insurrections, as much as the Southern planters themselves;—and, so far from wishing to stir up rebellion or to force on emancipation, one of their chief reasons for deprecating a dissolution of the Union (especially a violent one) is derived from its tendency to produce these disturbing results. We may hold it to be quite certain that the Northerners (with few exceptions) have no desire to arouse the slaves against their masters, and no desire that they should be victorious in the internecine conflict, if such conflict should at any time break out:—and that nothing would ever drive them to embrace the negro cause or to stimulate the negro passions, except a civil war between the North and South, in which the North were in danger of being worsted, and saw no other and less desperate resource against defeat.

From these considerations we conclude with great confidence that the increased danger of negro insurrection—the increased jeopardy of slave property and slave production in the South—consequent on a disruption of the Union is confined to this:—that fugitive slaves will be more numerous than heretofore, and will not be surrendered; that when from time to time men qualified to be leaders rise up among the negroes and organise them for rebellion, they will be able to assure their followers that they have only to deal with eight millions instead of twenty-seven millions of oppressors;—and that, if the disruption be accompanied by a civil war of any obstinacy and prolongation, the slaves in certain districts may become excited and encouraged, and make a diversion in favour of the Free States by partial outbreaks. If these outbreaks be few and feeble, they will produce little effect of any kind: if frequent and formidable, they will drive the Southerners to make peace, and will then be ferociously put down. If the severance of the Union be carried out by peaceable arrangement, then we see no reason why, for an indefinite period, slave labour and cotton production should not remain *in statu quo*—as far at least as political considerations are concerned.

And now, with regard to the measures suggested for meeting or mitigating the deficiency, of which such exaggerated apprehensions are entertained, we must observe that several of our leading contemporaries, as well as their alarmist correspondents, are speaking rather "off-book"—to use a colloquial, but expressive phrase. They are enumerating all the parts of the world where cotton might be grown, and wondering, from the height of their superior wisdom, at the Lancashire manufacturers for not having long since taken measures for procuring it from these quarters, in anticipation of such a crisis as the present. It may calm the anxieties of these writers to be assured that the Lancashire gentlemen have by no means been as apathetic as is represented, and that they understand the details and bearings of the matter in hand much better than their critics. It is quite true, as stated, that cotton may be grown in nearly every country in the world, where the proper soil and the available labour can be found, and that this suitable soil is anything but rare;—but whether it can be grown there so cheaply, and

of so good a quality as to be worth while encountering much preliminary outlay and very elaborate arrangements in order to promote the cultivation, is the real practical question.

For example, we used to obtain the chief proportion of our cotton from the West Indies. In 1786, out of a total importation of 20,000,000 lbs, Barbadoes and Demerara sent us about 5,000,000 lbs. They still send us some. But the quality produced in the West Indies is *not* similar to that grown in the United States: it is much more of the character of the Brazilian cotton, being very harsh and long though irregular in fibre (or *staple*). South America might send us more than she does, and so might Egypt; but all these descriptions of cotton, like the West Indian, are wholly dissimilar from that of Alabama and New Orleans; being, we believe, from a distinct plant, and being only applicable to the same purposes to a very limited extent. They are used, and probably can only be advantageously used, for the *warp* or longitudinal threads of the cloth; whereas the Orleans cotton is used chiefly, though not exclusively, for the *weft* or tranvserse threads. Smyrna again, in 1786, sent us 5,000,000 lbs, but now sends scarcely 50 bales a year:—but this cotton again is of a peculiar character, being soft and short, and chiefly available for candle-wicks. Sicily, too, grows some cotton, both white and coloured (of the kind called formerly *nankeen*); and we have ourselves seen cotton growing at one side of a factory on the plain of Salerno, and turned out in the form of calico on the other side. This, too, was similar to the North American in quality; the soil was well enough adapted for its growth;—but whether it would *pay* to grow it by Italian labour, in a populous district, and on a highly-rented land, so as to compete with or supplement America—is a very different and a very doubtful matter. India, as we have more than once explained, can and does grow vast quantities;—*but here too are difficulties* and complications in the question. Land is valuable in India, and can be applied to many other crops besides that of cotton: to increase the acreage under cotton, you must make cotton pay better than other crops; and for this end you must have a permanently high price of cotton (which our spinners do not wish for) and you must greatly mend the means of transport (which is already being done, perhaps as fast as adverse circumstances will allow). Moreover, the native cotton is the produce of a distinct plant from the American description; and the American seed, though repeatedly introduced and carefully cultivated, has never fairly taken root there, probably from not being so well adapted for the soil and climate as the indigenous article. The Indian cotton, therefore, though it admits of being used largely as a substitute for the American, is decidedly inferior in quality, as well as different. Lastly, the West Coast of Africa grows very fair cotton, *and of the requisite sort*;—last year we received from Lagos 1,600 bales (about 180,000 lbs); but we have no data as yet to tell us at what price large quantities could be furnished. As to Australia, no one doubts its capacity of producing admirable cotton; but labour there is very high; and what we want is not small quantities of superb *Sea Island* quality at 2s or 3s per lb, but vast quantities of common *Orleans* quality at 6d per lb.

Now, we apprehend that it is a knowledge and appreciation of these points that has caused that comparative languor which theorists charge upon the Lancashire manufacturers. The case, as we intimated casually in the last sentence, is this. For a long period America has supplied us with the particular sort of cotton we want, in nearly unlimited quantities, at an average price of from 4d to 6d per lb. Even at the lower price (fourpence) cotton pays the American planter better than any other crop, as long as he has hands (slave or free) to cultivate his plantation. His soil is marvellously fertile and costs him nothing; his labour has hitherto been abundant, unremitting, and on the increase; the arrangements and mercantile organisations for cleaning and forwarding the cotton *are all there*:—what probability is there, then, that any of the other quarters of the globe we have been reviewing *will be able to compete with him in supplying us cheaply, abundantly, and suitably*? Obviously little or none. As long as there were negroes in the Southern States, and those negroes could be kept to work, it would have been *venturesome*, not enterprising—it would in fact have been foolish and risky—for the Lancashire spinner to spend money in urging or undertaking the production of cotton elsewhere, unless he found it could be produced elsewhere at from 4d to 6d per lb. But, it is said, the spinner ought to have expected the time when slavery would come to an end, and with it the growth of cotton on the Mississippi and Alabama plantations. Why should he? What prospect of this catastrophe has there ever been—except as a most distant and indefinite possibility? What very serious probability is there of it even now? None, we think, great enough to justify the English consumer in any very adventurous or costly schemes,—though enough no doubt to induce him to look about him searchingly, and see where the elements of cheap labour and virgin soil promise him *permanent* success. For we must remember, what our critics seem to have forgotten,—that even if insurrection, anarchy, civil war, and social disorganisation should for a time so curtail and imperil the cotton crop of America, as to induce us, and make it worth our while, to found establishments, and send out agents, and prepare machinery, and organise a supply of labour, for the production of cotton on an extensive scale in Australia, or at Lagos, or at Port Natal; yet, as the American disturbance and confusion, however sad and serious, can with such an energetic and shifty people be only temporary, as soon as order was restored and work resumed on the plantations (however the organisation of labour might have been modified) all our artificially fostered establishments *might probably have to be abandoned*, because they could not produce cotton so cheaply or so bountifully as the virgin soil of the Gulf States;—because, in a word, Alabama *can*, and Australia and Africa probably *cannot*, send us "fair Orleans" at sixpence per lb in any quantities,—and can make a profit by doing so.

Such at least as far as we can see is the case, and herein lies the obstacle to any energetic and extensive practical action. We by no means wish to discourage enterprise and active inquiry,—far from it. Nothing would rejoice us more heartily than to see reasonable hope of raising up in Africa or elsewhere a competition in the cotton supply that should be really formidable to the Slave States of America. We wish only to discourage panic. In the meantime it is satisfactory to know that the stock of cotton in our ports has never been so large as now, and that our spinners (as it is believed) hold nearly 200,000 bales more than usual. The consumption will not equal that of last year; so that we may calculate that we have about six months' supply in hand to meet casualties and to gain time.

THE RECORD OFFICE AND THE PROTESTANT ALLIANCE.

WHY is it that magnanimity is a thing almost unknown to the Councils of Associations for the propagation of religious opinions? Why do these voluntary bodies which take upon themselves to resist Papal influence in England, almost always succeed in becoming in all their moral and intellectual features little counterparts of the Pope and his Cardinals,—inquisitorial while denouncing the inquisition,—tyrannical while defending freedom,—cruel while declaiming against uncharitableness,—sacerdotal while raging against the priesthood,—in one word, *emasculated* while contending for the manly principle of Protestantism? The answer is far from easy to give; but of one thing we are sure, that if we want to find the best English analogy for the singularly petty and cruel interferences of the Roman Church with private and secular life, we must look for it in the acts of men of the religious associations (miscalled evangelical) with which England unfortunately abounds. If we wish for the nearest approach to the scolding "allocutions" of the Pope, we may find it in the tart religious circulars which too often have the signature of Shaftesbury. If we want an English *pendant* to the meddling policy which makes priests snatch away the little Mortara from his parents for a sacerdotal education, we may best find it in the grand endeavour of the Protestant Alliance which has just succeeded in driving an eminently useful public servant from the Record Office.

Mr Turnbull is a man of extensive historical acquirements, who has, we believe, large special knowledge of the Elizabethan period of our history, a thorough knowledge

of the principal continental tongues, and an intimate aquaintance with the most important libraries and librarians in the chief capitals of Europe. These qualifications marked him out as especially fit for the duty of calendaring the Foreign Papers in the State Paper Office from the time of Edward VI. to the Revolution of 1688. The duty of calendaring is simply that of preparing a clear and copious index which will serve to guide the historical student to the sources of information of which he is in search. The qualifications for such a work are rare, and probably scarce any man in England possesses them so fully as Mr Turnbull. But Mr Turnbull is a convert to Roman Catholicism. He has in some publication apparently ventured to say that he holds the Jesuits "in the highest honour, veneration, and "esteem," and that—not very singular surely in a Roman Catholic—he regards the Reformation itself as "a mis-"chievous event." On the strength of his faith, and fortified by his honest avowal of these opinions, the Protestant Alliance rallied its energies for a crusade against him. From the autumn of 1859, when Sir John Romilly, the Master of the Rolls, gave him the appointment, up to the present time, they have not relaxed their efforts to make his patron regret his appointment, and to sicken Mr Turnbull of his post. They have got the ear of the principal newspapers favoured by the clique; they have presented a petition to Lord Palmerston, "signed by 2,500 persons of the "educated classes of society, of whom 10 were peers, 19 "members of Parliament, 10 baronets, 85 magistrates, 518 "clergymen, 553 dissenting ministers, besides several "generals, admirals, and other officers in the army and "navy, heads of colleges, literary and other gentlemen." They have privately canvassed influential persons to get the appointment cancelled, and they have threatened to bring the subject before Parliament, which we sincerely wish they had done. But they have, we regret to say, at length succeeded, as we see by the following letter which appeared in the *Times* of Wednesday:—

Public Record Office, Calendaring Department, Jan. 21, 1861.

Sir,—I am at a loss to express the pain which I feel at finding myself still the cause of a religious controversy which seems to be becoming more embittered day by day. Strong though my religious convictions may be considered by some, I am not the less conscious of my own rectitude, and I feel that I am the innocent object of a persecution which consistently with the precepts of our common Christianity cannot be justified. This state of things, however, must be now brought to an end; for I cannot, for my own individual advantage, allow the public mind to be disturbed by an acrimonious discussion of my merits or demerits, from which no commensurate beneficial results can by any possibility arise. I, therefore, with many thanks for your kind patronage, and with deep gratitude for the kind protection which you have so feelingly afforded me, beg to resign into your hands the Calendarship of the Foreign State Papers with which you honoured me in the month of August, 1859.—I have the honour to be, Sir, your most obedient and most obliged servant, W. B. TURNBULL.

Right Hon. Sir John Romilly, M.R.

Sir John Romilly, while accepting his resignation, administers a sharp rebuke to the "religious" society which had thus literally worried Mr Turnbull into resigning. "I "cannot conclude," he says, "without expressing the high "esteem I entertain for yourself personally, and the pain I "feel that any society of English gentlemen, professedly "founded on religious principles, should have been found to "exist in this country who have considered it consistent "with the charity on which those principles are based, to "endeavour by *ex parte* statements, and confidential canvassing, to remove from an employment for which he is "peculiarly fitted a gentleman so honourable and trustworthy as I consider you to be."

The *Protestant Alliance* evidently conceive that they are doing a great national work in accomplishing these great ends. The next "monthly letter" will probably contain expressions of the most sanctimonious joy,—"gratitude to God" they may probably call it,—for the success of this little piece of petty inquisitorial spite. We should have thought it quite beneath the dignity of a religious purpose to assume that no Roman Catholic gentleman, however high his private character for probity and honour, having once expressed a respect for the Order of Jesuits, can be trusted to index State Papers faithfully, merely because they might possibly tell against the credit of his Church. These are the malignant kind of assumptions which only so-called "religious associations" seem to make. They are apparently founded on that quality of the mind which "*dis*believeth all things, *dis*trusteth all things." And we are quite sure that if they should ever succeed, as we trust they never will, in infecting the State with their spirit, all true equity as well as tolerance would be at an end; and we should have to smart under the paltry tyrannies of an Inquisition far too mean to generate that fortitude and heroism in its victims, which was the only redeeming result of its great Romanist prototype.

THE INAPTITUDE OF PARLIAMENT FOR LEGISLATION.

TO THE EDITOR OF THE ECONOMIST.

SIR,—In an early stage of civilisation the work of legislation is comparatively simple: the legislating body does little more than embody a feeling or express an opinion, and it is left to the administrators of justice to give effect to this feeling or opinion in all the manifold relations of actual life. Hence early statutes which have wrought silent revolutions in our history are comprised in a few lines.

Again, in a despotic Government even in a high state of civilisation, legislation is attended with no great difficulties. There is no need that the simple and comprehensive forms of early times should obtain, for the legislative acts, however long, can be enacted in their entirety by the Imperial will. Under such a Government the labours of a learned few can be at once transferred to the statute book; and consistency and order are compatible with the fulness and minuteness of detail which a high civilisation demands. Hence have arisen the codes of Justinian and Napoleon.

But in a free Government and a high and complicated civilisation, legislation presents problems of great practical difficulty. The exigencies of society, the jealousy which a free people has of judge-made law, and the necessity of framing every statute with a due regard to existing law and existing rights, public and private, render the old simple forms insufficient and unsatisfactory. It is no longer enough briefly to enunciate the main desire of the legislative body; and yet this is all that such a body is fit to decide on or to declare. An assembly of six hundred men of all grades of education and aptitude and inaptitude for their work, and from all vocations in life, may be very fit to give utterance to the general mind of the nation on any given subject, but it is totally unfit to reduce that mind into elaborate expression with a due regard to existing law and the complicated circumstances of society. In this country, moreover, the forms of the Houses, admirable as they are for the purposes of debate, make no provision for the expansion and elaboration of its determinations into lucid and consistent legislative acts. It is true that private and partial efforts are made to remedy this evil by bringing before the House carefully prepared bills; but all the symmetry and consistency of any such bill is generally lost by amendments hastily introduced in its passage through the Houses, without any regard to their effect on other parts of the composition.

The result of this is most lamentable: our statute book is in every respect, but that of the principles which it strives to embody, a disgrace to our country: the acts of the Supreme Legislature are the laughing stock of the Courts of Justice: and thousands of pounds are every year expended in litigation caused solely by the impossibility of construing nonsense into sense. The only acts of Parliament which are tolerable are those which have been carefully prepared before their introduction, and treat of subjects of which the House is not only profoundly, but consciously ignorant, such as the act for the abolition of fines and recoveries, which expressed the mind not of the Legislature, but of the late Mr Brodie.

Other evils which flow from the present state of things in our legislation are the great difficulty of passing consolidating statutes on subjects of any general importance,—and the waste of public time which often arises from the House proceeding through many clauses of a bill which is ultimately lost on some principle involved in a later portion of it. The Bankruptcy Bill of last session might be adduced as an instance on both these points.

Here is, then, a problem of great practical importance which may be stated thus:—How can we reconcile the freedom of a popular assembly with the unity of plan and the mature deliberation essential to good legislation?

The answer is, in my opinion, to be found in a proper divi-

sion of the different parts of the legislative process. Let the Houses of Parliament proceed by resolutions embodying the main points of the required enactment, let these resolutions be intrusted to a board of competent men to be by them reduced into a formal and elaborate expression, and let the statute thus framed be again submitted to the Legislature for its approval (the main principles of the measure as embodied in the orginal resolutions being no longer open to debate),—and we cannot doubt but that the legislative work of the country would be far better done than now it is. Provisions would no doubt be needful for enabling the board of skilled draftsmen to communicate by way of report to the Houses of Parliament; and it might be necessary, in order to allow time for their labours, to permit proceedings on a bill to be continued from one session to another. But these are matters of detail presenting no insuperable difficulties, if the principle of the proposed change were once acceded to.

By such a scheme of procedure I believe that not only the character of our statute law would be vastly improved to the great relief of Her Majesty's subjects, but the time of Parliament would be greatly saved. To recur to the instance already cited: if, instead of spending evening after evening in Committee on the details of the Bankruptcy Bill, Sir Richard Bethell had proceeded by resolutions, one of which must have raised the question of non-traders being liable to bankruptcy, the sense of the House on the point which led to the withdrawal of the bill would have been at once apparent, and the public time would have been greatly economised.

The mode of proceeding which I propose would be little more than extending to the whole business of Parliament the present practice of the House of Commons in many important cases. For it will be remembered that by the standing orders of that House, no bill can be brought in relating either to religion or to trade until the proposition has been considered in Committee of the whole House; and in many important cases the House has proceeded to determine the main points of a question by resolution, and has directed a bill embodying its determination to be thereupon brought in. The case of the last East India Bill will occur as a recent instance showing the propriety of the mode of action I am insisting on.

If we go back to ancient times, the precedents for my suggestions are yet more clear. It is well known that down to about the reign of Henry the Sixth the Parliament proceeded by petition to the King, embodying only the general statement of their wishes, and that when the King's answer was one of assent, this petition and answer were at the conclusion of the Parliament handed over to the judges, who thence framed the statute which was entered on the rolls. The fact that the judges were, in the fulfilment of this duty, under no obligation to Parliament, opened a door to great abuses, which led to the discontinuance of the system. But no such objection could exist where the skilled hands charged with the elaboration of the law were responsible to the Houses, and when the result of their labours itself required the sanction of Parliament.—I am, Sir, yours obediently,

Φ.

Agriculture.

THE FARMER'S PROSPECTS.

A NEW IMPEDIMENT TO IMPROVEMENT.

During the long and severe frost from which we have just escaped, large quantities of grain have been thrashed in all parts of the country. Beyond carting manure and thrashing no farm-work could be done, and all accounts agree that both have been largely performed. There is no little manure to be carried out, while the stack-yards begin to look shrunk and vacant. Some of the wheat sold during the hard frost has produced a better result than was expected from the state it was in at the time of stacking; but since the thaw, the condition of the sample and the price have both gone back. Instances have come under our observation where wheat sold during the frost at 51s and 52s per quarter, which confessedly would not now fetch so much by 5s a quarter. But the test of the machine has revealed the fact that our worst anticipations of the yield and quality of last year's crop have not gone beyond the truth. In wide districts twenty bushels to the acre form the best crops, while on many farms from twelve to sixteen bushels per acre only were grown. Then the weight is as deficient as the quality, 60 lbs per bushel being seldom exceeded, and 54 lbs to the bushel represent no small portion of last year's wheat. The proportion of flour to the actual weight of the wheat is also said to be nearly fifty per cent. under the average. The foreign imports have supplied an unusually large proportion of the bread made in this country. The range of prices, too, has been unusual; fine and dry wheat, either foreign or English, has been sold at 75s per quarter, while inferior or damp English samples have realised no more than 30s the quarter. Barley has also been generally inferior, and comparatively little of it fit for malting; and as to new beans, they are scarcely saleable at any price, so soft and damp are they found to be. Nothing but a fine dry spring can enable the English farmer to obtain even moderate prices for his remaining grain and pulse. The breadth of wheat sown is very small,—the late harvest, followed by such severe and long-continued frost, and the foul condition of much of the land, present a combination of circumstances most adverse to wheat planting. Some of the wheats sown are reported to have suffered greatly from the frost, but at present it is too early to give any accurate opinion on this point. One thing is in our favour, the frost has gone off without much rain, so that as soon as the land settles a little it will be in good working order. A crop may be expected from Talavera wheat sown during the present month. The generality of farmers, however, prefer to take oats or beans when, as now, they have missed the wheat season.

If the farmer's prospects as regards grain are but indifferent, those in reference to live stock are still worse. Roots are unusually deficient, and already we hear of numerous deaths amongst the flocks. The hay is bad, and much of the straw is nearly useless for feeding purposes. Provender of all sorts, moreover, has had extreme demands made upon it during the severe weather, and with three months of winter feeding before us, we are beginning to look with apprehension at the rapid disappearance of our haystacks. The number of sheep and bullocks which are now feeding is said to be everywhere below those of ordinary years, and high prices for both beef and mutton are regarded as inevitable during the spring. There can be no doubt that much energy will be needed to carry many farmers through the current year. In some cases nothing but consideration and forbearance on the part of their landlords will enable them to weather the storm the wretched year 1860 has created in their affairs.

We have been accustomed to regard the directors and managers of railways as belonging to a class whose mercantile energy would be found equal to new and untried emergencies, but some facts which have been stated to the Botley Farmers' Club, in reference to the Salisbury and Bishopstoke branch of the South-Western Railway, indicate that the benumbing effect of officialism is operating upon the directors of that Company. It seems that under a recent act of Parliament, chalking is an improvement which may be performed on a settled estate under the several "Lands Improvement Acts," the cost being defrayed by a preference rent-charge of 6*l* per cent. on the cost, which pays off the whole in twenty-one years. Mr Pink, of Wood End, near Fareham, having been appointed agent of the estate of Mr Chamberlayne, at Baddesley in Hampshire, "found a large tract of enclosed land of a good description, but requiring chalk. The tenants, alive to the advantages of chalking, had, when opportunities offered, brought back now and then a few loads, and where put the land is worth at least 50 per cent. more money." There are also 700 acres of common in Baddesley, of which a great deal would be excellent land if broken up and chalked. The Salisbury and Bishopstoke Railway which goes through Baddesley parish, also passes through large beds of chalk which, if a siding were made, could be loaded on the railway trucks at a small expense. Mr Pink being an improving agent, naturally set himself to work to bring, through the agency of the railway, the chalk which was useless in *situ* to the land on which it would effect so great an improvement. The matter, however, was not quite so easy as he imagined. He had calculated and could deal well enough with the physical and material difficulties of his contemplated improvement, but he had not calculated on and could not overcome the moral *inertia* of the railway directors. This is his account of the matter as stated to the Botley Farmers' Club:—"Our tenants would pay the whole 6*l* per cent. rather than not have it done. I was offered, a few weeks ago, 6s per acre, or 30 per cent. increased rent of a farm, if I would chalk. The Salisbury and Bishopstoke Railway passing through Baddesley, and also through the chalk stratum of West Dean, and seeing a notice at Chandler's Ford station that applications for chalk should be addressed, I believe, to Mr Scott, the traffic manager, I at once made application. I ought to inform you that prior to this I arranged a meeting with the Company's engineer, to ascertain if there was any difficulty as to a siding at the spot where the chalk would be required. Having obtained his opinion in favour of my scheme, I applied to Mr Scott for 20,000 tons of chalk, to be delivered in two years, at such times most convenient to the Company, offering to pay any fair rate for delivering the chalk, the whole of the expense of the siding; and I will pay the pointsman, if necessary, and erect a temporary dwelling for him if required. I did not offer the two last items, because I received a reply from Mr Scott that the Company declined the matter. I then applied (by Mr Chamberlayne) to the Hon. Mr Dutton, who caused the subject to be brought again before the board, and I only received a similar reply. The point selected for the siding is almost midway between Romsey and Chandler's Ford, and equally convenient for

Sir William Heathcote's estate as Mr Chamberlayne's. I had seen Sir William's agent, who was pleased at the project, and no doubt would take another 20,000 tons. Besides these gentlemen, there are other landowners who would, no doubt, avail themselves of the privilege."

What can be the meaning of such conduct on the part of the railway directors? Do they bear malice? Do they remember how in the early days of railways they were punished and imposed upon by the landed gentry, and are they now determined that their railway shall not be rendered available for the improvement of landed property? The proposed arrangement would seem to be conducive to the interests of both parties, and the obstructiveness of the railway directors seems to be wholly without excuse.

Literature.

COMMERCIAL LITERATURE.

THE CANADIAN ALMANAC FOR 1861. George Street, 30 Cornhill. THIS almanac contains all that is useful for Canadians to know, and for those who wish to know anything about Canada, being replete with general information. We give a condensed summary of some valuable statistical tables it contains, for particulars of which we must refer our readers to the almanac. We subjoin a

STATEMENT of the LIABILITIES and ASSETS of the PROVINCE of CANADA for the YEAR 1859.

LIABILITIES.	dols	c

THE ASSURANCE MAGAZINE. C. and E. Layton, Fleet street.

THIS magazine is more calculated for the Institute of Actuaries and for mathematicians than for the general public, the contents being much too profound for them to understand. The present number has a paper on "Newton's Table of Leases," by Professor De Morgan, and also another paper by the same author on "Gompertz's Law of Mortality"; also a most elaborate paper "On the Construction of Life Tables," illustrated by a new life table of the healthy districts of England, by Dr Farr; and a very able paper "On the Stability of Results based upon Average Calculations," by Robert Campbell.

GENERAL LITERATURE.

SLAVERY DOOMED; or the Contest between Free and Slave Labour in the United States. By FREDERICK MILNES EDGE. Smith and Elder.

A MEMOIR OF ABRAHAM LINCOLN, PRESIDENT ELECT OF THE UNITED STATES OF AMERICA; to which is appended an Historical Sketch of Slavery. Reprinted by permission from the *Times*. Sampson Low.

THE ephemeral works which great political crises tend to produce are generally of more use in gauging the immediate social feeling of the moment, or in giving detailed evidence of the course of events in the past, than in casting any fresh light on the future. It requires something more than the discernment or insight of an ordinary pamphleteer to compute the *tendency* of complicated events, or even to analyse with much effect the various classes of causes at work in moulding the future. Of the two little volumes which we have placed at the head of this article, the first contains the more important materials, and is altogether the more useful work.

The life of Mr Lincoln is, indeed, a mere fugitive production, eked out with a good deal of rather commonplace stuffing, and even so rather insignificant. But, no doubt, while President Lincoln is still the subject of all kinds of speculation,—the great unknown cause whose official appearance on the scene is to be the 'beginning of the end,'—it will have its eager readers. It does not tell us much about him that has not been in all the newspapers. We have all heard how Mr Lincoln's father found success desert him in Kentucky; how he emigrated with his family when the President elect was seven years old to Indiana, and then to Illinois, and how Abraham Lincoln was brought up after the hardiest fashion as an agricultural labourer; how he grew to be six feet four; how he was great in "splitting rails" and navigating flat-bottomed boats; how twice in his youth he took a flat down the Mississippi to New Orleans and back again; how at the age of 23 he was a candidate for the State Legislature in Illinois, and at the age of 25 was elected; how he gained his bread by surveying, and studied law in his leisure hours, until at last he was able to devote himself entirely to the bar, so far as his duty as a frequent representative of the State in Congress would permit him; how, at last, he became the recognised head of the Republican party in Illinois, and at the Republican Caucus last year in Chicago was chosen as the nominee of that party, which choice was ratified by the voice of the American people in November last. To these well-known particulars the author of this small life adds very little that is worth knowing. All he does add, however, seems to indicate that Mr Lincoln is self-possessed and firm—less likely to compromise with opponents than his rival, Mr Seward—less of a diplomatist, and evincing more of the raw material of a statesman. We trust these prognostics may be fulfilled. Mr Edge, the author of "Slavery Doomed," the first book named at the head of this article,—writing *before* the result of the Presidential election in November was known,—assures us that Mr Lincoln's success at Chicago was owing to his reputation for this very superiority in moral strength and pertinacity. "It was at first supposed," he says, "that Senator Seward, of New York, would be the choice of the Convention," and, in fact, at both the first two ballots Mr Seward *had* considerably more votes than Mr Lincoln. "Mr Seward has long been recognised as the mouthpiece of the Republicans in the United States Senate; *but his friends were rather the chiefs of the party than the party itself.* The real cause of his non-selection lay in the fact that he was looked upon as too conservative, and deficient in the 'backbone,' or determination to resist the secessionist efforts of the South." Assuredly, Mr Seward's recent conduct has verified the fears of his followers as here expressed; and we trust that Mr Lincoln's conduct as President may verify its warmest hopes.

Passing from the *personal* to the political subject of these books, we may remark that it is no *accident*, but rather a most important sign of the times that the Republican party has looked to the North-West for its chosen leader. Indeed, that these States in the North-West will practically determine the policy of the North, there can be little doubt. With all the energy and sagacity of the New England States, the new North-Western States have far greater fertility, far wider territory, far richer capacity for rapid development,—in short they combine the advantages of the South-West in its fertile land and convenient water-carriage, with the advantages of the North in its sagacious intellect, its free labour, and its general solidity of character.

If we compare the five principal new States of the North-West with the States of New England in population, according to the returns of the last and of the new census, this increasing importance of the great North-West will be immediately seen. The newly-settled State of Minnesota alone, if we took that into the account, would show an *area* twice and a half times as great as the whole area of New England.

North-Western States.	Census of 1850.		Census of 1860.
Michigan	397,654		749,969
Wisconsin	305,391		777,771
Iowa	192,214		676,435
Indiana	988,416		1,347,000
Illinois	851,470		1,789,496
Total	2,735,145		5,340,671

In 1850, the little States of New England had as near as possible the same population as this enormous North-Western area,—viz., 2,728,099. But in the census of 1860 they have, of course, fallen far behind the great North-West, which has doubled its population, while New England has at most increased her's 50 per cent. Even in 1850 the North West had a larger acreage actually under cultivation than New England,—namely, about 14,000,000 acres, to New England's 11,000,000. Now the advantage is still more marked, the area cultivated in the five great North-Western States being at least 28,000,000 of acres, while that in New England is probably about 14,000,000. And, in the nature of things, as the fertile prairies of the North West are more and more fully settled, their political importance must gain rapidly on that of the more highly civilised, but in magnitude comparatively insignificant, States of New England.

This growing importance of the North-West has of course the most vital bearing on the present controversy which agitates the Union. The South have had the folly to suppose that they could carry with them the Western and North-Western States,—partly because they command the mouth of the Mississippi —partly because it would, they thought, be to the advantage of these grain-producing States to be free of the protectionist laws imposed by the manufacturing Eastern States. They have, however, reckoned with the most amazing presumption, for it is now clear not only that the North-West has precipitated the struggle, but that it has the power to cope on almost if not qeite equal terms with the South unassisted, and, if assisted by the Eastern States, to overpower it, should a struggle take place. The free population of the South in 1850 was but 6,400,000. It is now at most seven millions and a-half, and though superior in free population to the North-West, it is embarrassed instead of assisted by its slaves. Its population is immeasurably less intelligent and hardy; its moral *weight* in the Union in short far less. Under these circumstances, if it comes to a definite struggle between the South and North-West whether the former shall command the Mississippi in the interests of Slavery, or the latter in the interests of Freedom, we cannot doubt which would conquer. The candidate chosen by the Republicans and accepted by the Union as President elect, all the facts which led to his election, and the discussions which are arising out of it, all point to a definite conflict between the South and North-West as the turning point of this struggle, and it is only as supplying materials for this conclusion that the books we have reviewed have much interest. The work of Mr Edge, while it has a good deal of useful information in it, is ill-arranged and rambling. It has no definite purpose, and passes from one phase to another of the Slavery conflict without any clear reason. It is, however, worth reading to any one who has a clear idea of the main points to be minutely studied.

Turkish Life and Character. By Walter Thornbury. Smith, Elder, and Co., 65 Cornhill.

A short time since Mr Thornbury published a book upon Spain; he has now produced one on Turkey; in the next vacation he will probably put some other country into print. Indeed, except from exhaustion of his physical powers, we do not see any bounds to his contributions to our literature. He may probably rival, in a different line, the voluminous, studious, and sedentary traveller, Josiah Conder, in the extent of his geographical researches. His recipe for book-making is happily far too simple for us to apprehend any danger of a premature close to his literary career from overwork of the brain. He may confidently attack the Empire of all the Russias, and enclose it in two volumes of large type with ample margins, without fear of straining his mental faculties. A good share of activity of body, ordinary powers of observation, a confident temper, and a by no means uncommon amount of off-hand cleverness with the pen, is all that is requisite to furnish forth a dozen such volumes as those now before us. They are undoubtedly clever—with that cleverness so common just now—superficial, and showy, and always ready for immediate use. They are amusing in parts: in others wearisome from their very determination to be amusing; and from their continual repetition of certain pet phrases, as for instance that of the "sick man;" and a too frequent use of what Mr Thornbury himself calls "the jargon of the age."

Much of the aspect of Constantinople and its neighbourhood, its vast and dreary cemeteries, its busy and noisy streets, may be gathered from Mr Thornbury's descriptions; but of the real character and life of the Turks, little or nothing. Mrs Hornby, in her less pretentious book, "In and around Stamboul," tells us far more of both, without the questionable taste, the bluster, and love of effect that are so disagreeably prominent in Mr Thornbury's volumes.

In his preface, our author congratulates himself on the "good fortune that enabled me to be a witness of two great historical events. The first, the transportation of the Circassian nation from its last home in the Caucasus, to its new and free settlement in Anatolia. The second, the discovery and crushing at Stamboul of a great conspiracy that menaced the Sultan's life, and threatened to shake the whole Empire to its very foundation."

It is a fair exemplification of the superficial way in which Mr Thornbury treats the most important subjects that come before him, that of the first he gives us nothing but a vague idea that the Circassians were not over-hospitably treated by the Turks, and also a few graphic sketches of the houseless and hungry wanderers he sometimes met with in the streets of Constantinople;—while of the second, out of many chapters of fine writing, we only gather a misty notion that there was a wide-spread conspiracy; that the Sultan was frightened, and so were the Europeans at Misseris' Hotel; that Mr Thornbury was confident that no massacre of the Christians was even thought of; and that the "object of those men (the conspirators) was the object for which our own fathers fought so well and so bravely at Naseby, and at Culloden, against John and against Richard, against Charles and against James;" and, since in his preface he rescinds these two last convictions, we are left finally without any definite conclusions at all, and without any more light upon these "two great historical events" than if we had not followed our author to Stamboul.

Decidedly the best parts of this book are those which, leaving aside all political or general questions, are given up to pure description. Some of the "street scenes in Constantinople" are very happily touched off,—the photographs taken on the spot, and well engraved, adding vividness to the descriptions. We will give our readers a short sample of one of his pictures of Turkish life, that they may form from it their own estimate of Mr Thornbury's last volume of travels:—

I used to enjoy sitting down on one of the four-legged, low rush chairs, without backs, that are always piled up for customers round a kibab stall, which, though more pretentious, because more patronised, correspond pretty nearly to the London hot potato tin, or rather to the quiet old woman near the Angel and Fiddle, who sits with a basket of sheep's trotters spread open on a clean white cloth resting on her knees. There, rejoicing in the scented smoke, and the breath of frizzle and burn, I used to sit down and call out grandly to the obsequious bare-armed Turk.....

All this time the whole market-place becomes anxious about my open-air dinner, my late lunch, or whatever you like to call it. One or two dervishes stand with paternal interest near me, saying silent graces and thanksgivings, and telling their sandal-wood beads. Some Turkish soldiers engaged in cheapening a pumpkin as yellow as a toad's belly, wait, with the curiosity of schoolboys, to see the infidel begin his meal; a moollah, who has been bargaining for quinces, and amusing himself at various turns of the discussion, by beating the helpless Greek salesman about the head with his bathing clogs, draws near; five Persian senna merchants, with their high retreating black caps, order kibabs too, that they may have an excuse for watching the fun. I am going to dine like Henry VIII. in public. One would think that infidels ate with the back of the head, or dined like herons on one leg, there is such a crowd of Mussulmen round the unbeliever.

Now the alchemic moment of ripeness and perfection has come; the fritter refuses to imbibe any more oil; the kibabs on the Lark skewers are frothy and done through. There is a great sensation as the waiter places a clean round brass tray with a rim to it upon a stool before me, and, upon that, a bowl of kibab, piled with oily cake, and sauced with pickled cucumbers stuffed with rice. Knife and fork there is none. Red sherbet, like raspberry vinegar, is brought me from a neighbouring stall. Grapes, turned here and there to blue raisins, await me. I dine like Diver, though my linen is not so fine.....

There are yonder three Circassian boys: the eldest about seventeen, the youngest may be ten; sons of that exile chieftain whom I lately met at the fountain—at least, so I suppose, for I see him watching them wistfully from a distance, like Hagar, as I beckon them near, and they come in a shy, wild, untamed way. Djemnal is the eldest I find; Labazon the second; Machmat is the Benjamin. The father, Hadjo, is a Checknian, and from Schamyl's favourite fortress at Dargi Vedanno. Their high Circassian caps of cream-coloured wool have top coverings of red. The eldest, a broad-faced, Tartar-looking, fierce boy, carrying a tremendous dagger, seizes the food I give him ravenously, and devours it without thanks. After fourpence a month, and melon rinds, with stray snatches of the bones of sword-fish, and buffalo milk cheese, this roasted meat rejoices the Circassian stomach, so that in a few minutes they all grow quite greasy and tame, and father and three sons squat near me, grinning satisfaction with mouths full, I may say swollen, with dripping sections of oozy cake. How few paras this charity cost me after all I am ashamed to tell, but I trust kindness is not necessarily estimated by its expensiveness, or else woe be to him who gives but a cup of cold water and wishes the poor wayfarer a mere God's blessing!"

The Quarterly Review. January.

This is a very heavy and uninteresting number. The most readable article is the one entitled "The Dogs of History and Romance," in which the characteristics of the canine race are discussed from the antiquarian point of view with an elaborateness of research which is unusual in these days in articles on much deeper subjects. The principal dogs of traditionary and romantic celebrity are here duly chronicled in a pleasant gossipping style. We miss, however, from the number Prince Rupert's dog "Boy," famous in the newspapers of that day, who attended his master through his campaigns, and was as well known as Rupert himself to the Roundhead soldiers, with whom he passed as something

uncanny; being, on that score, ultimately slain by one of them. A picture representing his death still adorns the titlepage of a doggrel fly-sheet of that period. "Canada and the North-West" and "The Iron Manufacture" are articles of average calibre, which we suppose will command a certain class of readers, though in the latter case it is not likely to be a very large, nor in the former a very deeply-interested circle. "The Welsh and their Literature" is a loosely-strung-together and very ill-proportioned paper on a subject which should have been discussed more adequately and at greater length, or left entirely alone. The article on "Italy" is very inferior in grasp and vivacity to those in the contemporary numbers of the "Edinburgh" and "National" Reviews. It is also marked by some of the narrow political philosophy from which the former of those reviews has in the present number emancipated itself. Its constrained tone of sympathy with Italian hopes scarcely covers its anti-Sardinian prejudices. "The Income Tax and its Rivals" is a comparison of direct and indirect taxation, and a criticism on the national expenditure generally, in which the best point is the greater stress laid on the *application* rather than the *amount* of the military and naval estimates. The paper is of course written in accordance with the party endorsement "Please abuse Mr Gladstone." The concluding article is a slashing attack on the much-abused volume of "Essays and Reviews" in the old Quarterly ecclesiastical tone.

THE PEERAGE, BARONETAGE, AND KNIGHTAGE OF GREAT BRITAIN AND IRELAND FOR 1861, including all Titled Classes. Twenty-first Year. By ROBERT P. DOD, Esq. Whittaker and Co.

THE principal and most troublesome change in the new edition of this manual,—exclusive of course of those which have arisen from death and new creations of title,—is the following:—"Inasmuch as it has always been one of the peculiarities of the book to state under each name every commission, office, or place, so when the volunteer system attained its present dimensions it was found that almost every person of title, in his capacity as a country gentleman, was to be recorded as an officer of some local corps of rifle volunteers. As it behoved every loyal subject to pay due respect to a movement so thoroughly national, an effort has been made in the new volume for 1861 to record all gazetted appointments in the volunteer service under the name of each titled person. This has occupied much time, and given rise to considerable expense; but the intention and the results will, it is hoped, be appreciated by the public at large, as well as by every volunteer." As in the case of Mr Dod's other manual, it is not easy to overestimate the practical value of his "Peerage," &c., as a work of reference, in saving time and trouble.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The statement made by some of the London journals, that the St Petersburg Bank has refused to give the Bank of France 30,000,000f of gold in exchange for the same amount of silver, in compliance with its solicitation, is not credited here. Some difficulties have, it is true, arisen in the affair, but the belief is that they will be removed. Even if they should not, it will, it is said, be of no great consequence, as the bullion of the Bank has largely increased within the last few days; it even amounts, it is alleged, to 440,000,000f.

A painful sensation has been caused by accounts of extensive failures in England. That some will take place in this country also is apprehended; indeed, two at Marseilles of, it is said, a certain importance are already reported to have occurred.

The Bourse has been somewhat more animated during the past week than for a long time previously. Yesterday there was a rather serious fall, caused by a report that Garibaldi had landed in Montenegro, but the rumour not having been confirmed, a recovery has taken place to-day. The following are the quotations of the week:—

M. Mirès called the other day a meeting of the shareholders of his Caisse Generale des Chemins de Fer, to give them an account of its operations during the past year. Owing to the manner in which this gentleman's name has lately been before the public, the meeting excited great interest, not only among persons directly concerned, but in the whole financial world. A report on the proceedings of the year having been read, a dividend of 25f per share was proposed. A shareholder asked if the situation of the Company was such as to justify such a dividend. M. Avond, who is one of the principal managers of the Company, answered positively in the affirmative, and to prove his assertion said that he and his fellow directors were willing to allow a committee of the shareholders to be appointed by the meeting to examine the securities held by the Company. "It was only," he added, "for the fear that injury might be done to the Company if he made public what those securities were, but he requested the nomination of a committee to examine them instead of detailing them to the meeting." Explanations were solicited respecting the de Pontalba affair, which made so much noise a few weeks back; and the answer was, that there would be inconvenience in giving any publicly, but that if the shareholders would appoint a committee of three persons, M. Mirès would undertake to prove to their satisfaction that he had acted in accordance with the interests of the Company in coming to an arrangement to give M. de Pontalba a certain sum in payment of certain claims; and that if by chance the committee should think he had done wrong, he would pay the money out of his own purse. With these declarations the shareholders were satisfied, and they accepted the proposed dividend, passed a vote of confidence in the directors, and named a committee to examine the Pontalba affair. In the course of the meeting it was mentioned incidentally that, in consequence of the attacks made on him, M. Mirès had been under the necessity of raising the sum of 30,000,000f in a very short time, and that he had obtained it. On the whole, the result of the meeting is regarded in the financial world as a success for that gentleman.

The crisis in America cannot fail to produce grave consequences in this country, by the shock it will occasion in trade. After England, it is with the United States that France does the greatest business both in imports and exports. In 1859, the "real value" of the importations made from the States and actually consumed in France was 198,500,000f, and the "real value" of articles of French production exported to the States was 308,300,000f. From England the imports for consumption in France were 278,200,000f, and the exports to her of French productions were 591,300,000f; but a large portion of the latter was really destined for the States, being only sent to England to be shipped. In the importations from the States cotton figured for 142,562,164f, and tobacco for 24,910,033f: in the declared exports, silk fabrics figured for upwards of 138,000,000f, wines for more than 31,000,000f, woollen fabrics for upwards of 34,000,000f, brandies and liqueurs for 22,000,000f, prepared skins and articles in skins and leather more than 20,000,000f, and so on. Returns of *the value* of imports and exports from and to the United States for last year have not yet been made up; but the Customs tables published last week show that of 1,256,988 quintals (the quintal is nearly 2 cwts) of cotton consumed in this country, 1,158,264 came from the States; whilst of the exports of French productions, out of 1,941,632 hectolitres (the hectolitre is upwards of 22 gallons) of ordinary wines, the States took 178,776, of 148,375 hectolitres of brandies from wine 34,092, and of millinery out of a total of 5,161,364f they received 573,568f. Evidently, then, any check to such a vast trade as this, either in imports or exports, cannot fail to be seriously felt in France.

It is known that the sliding scale on the import and export of grain has for some time past been suspended in France, owing to the last harvest not having been a good one. An agricultural journal of fair authority, the *Echo Agricole*, affirms that the Government intends in the approaching session of the Legislative Body to present a bill for abolishing this scale altogether, and for establishing in place of it a moderate fixed duty of not more than 50c the quintal (about 2 cwts) on imports, and not exceeding 25c for exports. The bill, it is added, will do away with the system of "zones," under which the sliding scale itself varies according to different districts into which the entire country is divided. It is to be hoped that this news is true; for the sliding scale in France is even more vicious than was that in England,—rendering corn

dearer than need be to consumers when prices rule high, preventing producers from seeking at opportune moments a market abroad, and making the most absurd differences between one part of the country and another.

The Ministry of Commerce has just communicated to all the Chambers of Commerce and the Consultative Chambers an account of the operations of a society formed some time back in Glasgow for putting down an extensive system of fraud at the expense of the Continent, which was carried on by swindlers living, or pretending to live, in that city. In the opinion of the Ministry, the Association has done great good.

The Discount Bank (Comptoir d'Escompte) of Paris announces that the dividend for the first half of the year 1860-61 has been fixed at 22f per share, and is to be paid from the 1st February next.

An official return shows that up to the end of December last the quantity of beetroot sugar manufactured in this country was 80,395 tons, and that it was 26,450 tons less than at the corresponding date of last year. This decline in the production will of course tend to increase the demand for foreign, a slight modification in the import duties on which was lately decreed.

Subjoined is an account of the markets :—

FLOUR.—Business at *Paris* during the last week has been calm, and yesterday the sack of 159 kilogs was 64f to 67f. Four marks for February were 64f; March and April were in demand at the same price; for later periods they were nominally 64f 50c to 65f.

WHEAT.—At *Paris*, the quotation was 34f to 37f the sack of 120 kilogs. Of the country markets, 22 present a rise of from 10c to 1f the hectolitre, 89 a fall of 13c to 1f 50c, 16 are reported firm, 26 without variation.

COTTON.—Business at *Havre*, in the week ending Friday, was active, especially in the early part of it: the sales were 21,571 bales, and the arrivals 30,014. Closing prices for low and very low qualities remained unchanged, but for very ordinary and all other sorts they rose 1f. Low New Orleans was consequently 99f the 50 kilogrammes, and very ordinary ditto, 105f. This week, business has been extremely calm, and prices have a downward tendency.

SUGAR.—At *Havre*, in the week ending Friday, the sales of French West India were 52 casks, at 48f 50c the 50 kilogs duty paid; 1,100 casks Havana, at 34f to 37f in bond. The arrivals exceeded 3,000 casks and 17,000 sacks. This week, some Havana "gros grain" has been taken at 35f to 38f; some Domingo, 38f 50c to 40f; some French West India (choice), 50f. At *Nantes*, last week, 100 sacks Reunion "gros grain" went at 58f the 50 kilogs, and 83 at 56f. This week, two large lots of Reunion have been sold at 52f 75c to 56f 50c. At *Bordeaux*, last week, business was unimportant: 142 casks French West India, at 48f; 500 bales Reunion, 52f 50c. This week, some French West India has been disposed of at 47f 50c.

COFFEE.—At *Havre*, in the week ending Friday, business was rather active, and on account of unfavourable news of the crop in Hayti, prices rose. The sales were 175 sacks Hayti Port-au-Prince disposable, 77f 50c the 50 kilogs in bond; 2,300 sacks ditto for delivery, 76f 50c to 78f; 567 sacks Cape disposable or in the port, 69f 50c to 71f; and 800 sacks for delivery, 70f. Some sales of damaged were also made. The arrivals exceeded 3,000 sacks. This week, a fair amount of business has been done: Hayti, 77f to 77f 50c; Rio, 68f 50c to 71f; ditto, washed, 78c. At *Bordeaux*, last week, business was not active: 800 sacks Rio washed went at 80f; 378 ditto, 85f; 700 Guayra, 110f; 197 Mysore, 110f; 11 Ceylon plantation, 119f; and some lots of Rio and Ceylon plantation at prices not stated. This week, some Rio washed have been taken at 85f; a small lot of Ceylon plantation at 120f. At *Nantes*, last week, 100 sacks Manilla went at 110f; 400 Port-au-Prince, 79f in bond. Nothing done this week.

INDIGO.—The sales at *Havre*, in the week ending Friday, were 33 cases Bengal and 5 Java; prices firm. The arrivals were 21 cases. This week, some Kurpah and Bengal have been sold; prices not stated. At *Bordeaux*, last week, 25 cases Java, 10 Madras, 9 Kurpah were sold: prices unchanged. This week, only 5 cases Madras have been sold: prices not given.

HIDES.—At *Havre*, in the week ending Friday, 1,550 dry La Plata went at 119f to 129f the 50 kilogs duty paid; 645 ditto salted duty paid, 75f; 800 Minas dry, 115f; 1,173 New Orleans salted, 50f 50c. A public auction took place on Friday, but it was but thinly attended, and was dull. Out of 52,382 hides and 7,376 skins offered, only 9,901 of the former and 5,175 of the latter were disposed of. Among those sold, Buenos Ayres dry went 100f to 125f the 50 kilogs; ditto salted, 65f 50c; Monte Video salted, 53f to 60c; Valparaiso salted, 54f to 68f. Of the skins, calf went at 37f to 40f; horse, 3f 25c to 10f each; also 70f to 94f 50c the 100 kilogs. The arrivals exceeded 20,000. This week, business has not been active: Valparaiso salted, 63f; Buenos Ayres salted, 75f to 77f 50c; horse, 92f the 100 kilogs duty paid.

WOOL.—At *Havre*, in the week ending Friday, business was rather active: 165 bales La Plata unwashed went at 1f 50c to 2f 50c the 50 kilogs; and 14 bales Donskoy (Russia), 2f 25c. The arrivals were about 450 bales. This week, Buenos Ayres washed has been at 4f 50c.

TALLOW.—At *Havre*, last week, there were no sales, but 270 casks were received. No sales have been made this week. At *Paris*, yesterday, the 100 kilogs were 130f 50c—a slight fall on last week's quotations.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, was 100f to 101f the hectolitre; Montpellier of 89 deg. 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c; beetroot, first quality, 106f.

COMMERCIAL AND MISCELLANEOUS NEWS.

We have received the following from Calcutta under date the 22nd Dec.:—Produce Market—The inquiry for all kinds of produce has subsided considerably during the last few days. Last mail advices from England are not sufficiently satisfactory to shippers to induce them to purchase at the extreme rates which have lately been ruling for nearly all kinds of exports. Import Market—After our last report a general dulness prevailed in our market, and consequently prices assumed a downward tendency, particularly of piece goods; but, owing to the great firmness of importers, no material reduction has taken place, although sales cannot be effected without some reduction in prices. The consumption has been very limited, and the accounts from the upper provinces report a rise again in the price of grain, which affects this market Yarns are also very quiet, and prices somewhat lower. Metals as before. Government Securities—The business in Government securities has again been of a limited character; the Five-and-Half per Cents. having been sold at 99-12, and the Five per Cents., 94-8; local speculators came into the market, and the former were run up to 100-2 to 100-4, but the rate is barely maintained, and any attempt to force sales would again bring it below par. The Five per Cents. may be quoted at 94-8 to 95, and the Four per Cents. at 80. Freights—Rates have declined since last mail viâ Bombay. For London we make the average now 3*l* 12*s* 6*d* to 3*l* 15*s*, and to Liverpool at 3*l* 5*s*.

The usual yearly statistics of the passenger traffic between France and this country have just been published by the French Custom House. It appears that the number of passengers arriving at or leaving the French ports, taking arrivals and departures together, were as follows in the year 1860:—Boulogne, 102,829 passengers; Calais, 74,875; other ports, 55,833; total, 233,537 passengers. In the year 1859 the numbers had been, at Boulogne, 86,579 passengers; Calais, 67,311; other ports, 51,566; total, 205,456 passengers. There is thus an increase at Boulogne of 16,250 passengers, or 18½ per cent.; at Calais, of 7,564 passengers, or 11 per cent.; at the other ports, of 4,267 passengers, or 8 per cent.; giving a total increase of 28,081 passengers, or 13 per cent. The total number of passengers between British and Belgian ports amounted to 27,722 in 1860.

The following return shows the state of the note circulation of the United Kingdom during the four weeks ending December 15, 1860, compared with the previous month:—

	Nov. 17, 1860.	Dec. 15, 1860.	Increase.	Decrease.
	£	£	£	£
Bank of England	21203959	20106690	...	1097269
Private Banks	3501808	3339084	...	162724
Joint Stock Banks	3048128	2974091	...	74037
Total in England	27753895	26419865	...	1334030
Scotland	4574077	4688839	114762	...
Ireland	7148779	7047600	...	101179
United Kingdom	39476751	38156304	...	1320447

And, as compared with the month ending the 17th of December, 1859, the above return shows a decrease of 1,155,433*l* in the circulation of notes in England, and a decrease of 1,413,843*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,065,851*l*, the English joint stock banks are below their fixed issue 328,266*l*,—total below fixed issue in England 1,394,117*l*; the Scotch banks are above their fixed issue 1,939,568*l*, the Irish banks are above their fixed issue 693,106*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 12th of December was 13,582,570*l*, being a decrease of 361,191*l* as compared with the previous month, and a decrease of 3,402,648*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 15th of Dec.:—Gold and silver held by the Scotch banks, 2,623,013*l*; gold and silver held by the Irish banks, 2,544,263*l*; total, 5,167,276*l*; being an increase of 137,035*l* as compared with the previous return, and a decrease of 76,005*l* when compared with the corresponding period last year.

The market has ruled exceedingly quiet since our last, and sales are making at $\frac{1}{8}$c to $\frac{1}{4}$c decline. Transactions for the three days foot up 3,600 bales, the market closing yesterday with a further downward tendency. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c

Good middling...	13¼	13⅜	13⅜	14⅛
Middling fair.....	13½	13⅝	13⅝	14⅜

NEW YORK, Jan. 19.—The demand continues light, and prices have further declined $\frac{1}{4}$c to $\frac{1}{2}$c per lb, to which we conform our quotations. The advices from Europe were unfavourable, but were without essential influence on the market. The sales foot up 6,000 bales, closing steady. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.

The cotton market has been much depressed this week, and prices have shown much irregularity. The buyer has had a decided advantage, purchases having been made $\frac{1}{8}$d to $\frac{1}{4}$d per lb below last week's quotations, and in some cases even lower. We reduce our quotations accordingly. Egyptians have maintained their value, and lower qualities, which are scarce, have commanded full prices. Brazil are less saleable, but without quotable change in value. Surat are partially $\frac{1}{8}$d per lb lower. The sales to-day are 10,000 bales. The market is less heavy. The reported export amounts to 10,930 bales, consisting of 6,390 American, 430 Brazil, and 4,110 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand, this week, from the whole of the manufacturing districts are to the effect that a very limited amount of business has been transacted in manufactured goods, both for home use and export; hence, in numerous instances, stocks have increased to some extent. The iron trade still continues in a most inactive state, and the demand for coals, owing to the return of mild weather, has fallen off.

MANCHESTER, Jan. 31.—The market has been dull, without much depression. Shirtings of 8 lbs 4 oz quality, which had been comparatively high, have fallen about 3d per piece, and a considerable business has been done at the reduction for China and other markets. A moderate business in water twist has also occurred. Some numbers of cop twist and weft having specially given way, a few buyers have bought somewhat freely, but in general this department has been neglected. The prospects for manufacturing have been overcast for the time, so long as India is taking off so much less than its usual supply. But other markets, in particular America, are looked to as being about to resume purchasing at an early date.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—There seems to be a few more inquiries about for wool, but not many transactions result, and such as are effected are at prices in favour of the buyer. The demand for yarns for export is still very limited, and the consumption by the manufacturers is even diminishing. The unfavourable news from the Continent tends to check business in pieces. The home buyers are looking after spring goods a little more, but the American market is still closed. We have noticed several foreign buyers in the market, but their purchases have not been large. Prices are maintained with firmness, particularly for orleans, lustre makes, and goods suitable for China.

ROCHDALE.—The local wool trade still wears that languid aspect which has characterised it through the month. Hitherto prices have been maintained with remarkable firmness, but staplers exhibit a disposition to concede a point or two on fine qualities, though their quotations remain nominally unaltered. Their evident easinesss, however, does not tempt users to exceed their immediate requirements, consequently but little business has been done.

LEEDS.—Our market is heavy, but without change in price.

LEICESTER.—The hosiery trade remains quiet, manufacturers being indisposed to anticipate demand. There is, however, very little doubt that matters will before long look brighter. At Loughborough and the other framework knitting districts trade is dull. Wools keep up in price; and for good sorts high rates must be given. There is no material change in prices of yarns.

NOTTINGHAM.—A great deal of depression exists in many departments of the lace trade; but upon the whole there is a shade more doing, and there is reason to believe that business will soon take a favourable turn. Orders are being received for fancy goods, this branch being in a more healthy state than for some time past. Plain nets are yet hard to sell. There are a few buyers from the Continent in the market, but their operations are by no means large. Many of the workpeople are yet out of employ, and very little lace is finishing, except to order. The hosiery trade continues dull; much machinery is yet standing; and the buyers who visit the market purchase very sparingly. Yarns firm.

BELFAST, Jan. 30.—In the markets of the County Armagh district, demand and prices for flax ruled generally as in previous week. In Derry and Strabane, the attendance of buyers was large, which had an exciting effect on the demand. All flax offered was bought up, and an advance of 2*l* per ton realised, as compared with prices on preceding week. The demand for yarns for home consumption still keeps very moderate, and manufacturers purchase with great caution; the export demand is likewise of a limited character. Stocks continue to increase, but, on the whole, cannot be reported as heavy. No change in prices.

WOLVERHAMPTON.—The official list of prices of Staffordshire finished iron is as follows:—Common Staffordshire bars, 7*l* 10s at the works; best bars, 8*l* 10s; sheets, 9*l*; doubles, 10*l* 10s; nail sheets, 8*l* 10s; latten, 12*l*; boiler plates, 9*l*; best and best best in proportion; common rods, 7*l* 10s; hoops, 8*l* 10s; gas strip, 8*l*; Canada plates, 12*l*, and all other sorts in proportion. Of course inferior iron can be bought lower—say, from 10s to 15s per ton. Welsh bars, 5*l* 7s 6d to 5*l* 10s. The nominal price of rails in Wales is 5*l* 10s. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, No. 1, 2, and 3 melters, made with Lord Ward's thick coal warm air, 4*l*; Old Windmill End Mine forge pig iron, made with Lord Ward's thick coal, 3*l* 12s 6d; best native hydrate pigs, 3*l* 10s to 4*l*; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 10s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 7s 6d to 3*l* 10s; Barrow hæmatites, 3*l* 7s 6d to 3*l* 10s; Workington hæmatites, 3*l* 7s 6d to 3*l* 8s 9d; Kirkless Hall hæmatites, 3*l* 5s to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An Account, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 30th day of January, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,317,660	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	9,560,297
		Silver Bullion	1,282,363
	25,317,660		25,317,660

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	8,447,430
Rest	3,370,828	Other Securities	20,171,156
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	3 581,447	Notes	5,332,200
		Gold and Silver Coin	774,956
Other Deposits	12,587,039		
Seven Day and other Bills	633,428		
	34,725,742		34,725,742

Dated the 31st January, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,618,888	Securities	28,540,586
Public Deposits	3,581,447	Coin and Bullion	11,617,616
Private Deposits	12,587,039		
	36,787,374		40,158,202

The balance of Assets above Liabilities being 3,370,828*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£69,191
An INCREASE of Public Deposits of	633,010
A DECREASE of Other Deposits of	543,254
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	64,904
An INCREASE of Bullion of	96,036
An INCREASE of Rest of	10,567
An INCREASE of Reserve of	145,706

The present Bank return offers but little feature for comment, but on the whole is rather favourable than otherwise, inasmuch as the other securities show a decrease, although only to the extent of 64,904*l*, and the bullion an increase of 96,036*l*.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,812,657	£ 26,945,627	£ 21,806,490	£ 22,690,459	£ 20,618,888
Public deposits	6,051,128	3,651,586	7,026,233	5,369,759	3,581,447
Other deposits	9,787,615	17,030,175	14,582,157	14,484,676	12,587,039
Government securities	14,145,696	9,559 161	10,696,147	10,171,190	8,447,430
Other securities	11,946,360	20,073,740	16,785,549	20,773,681	20,171,156

Price of Consols	96¼	95½	95	94½	92½
Average price of wheat	37s 10d	47s 6d	41s 7d	43s 10d	56s 7d
Exchange on Paris (shrt)	24 95 97½	25 12½ 20	25 7½ 12½	25 5 10	25 20 30
— Amsterdam ditto	11 15 15½	11 14 14½	11 15½ 16	11 13 14	11 16½ 17
— Hamburg (3months)	13 6½ 6¾	13 6 6½	13 6¼ 6½	13 5 5¼	13 7½ 7¾

In 1851, the rate of money was 2½ to 3 per cent. The continued increase of the remittances of gold from California was beginning to tell on the expansion of trade, and on the revival of railway traffic and property.

In 1858, the Bank of England had just lowered their rate of discount from 4 to 3½ per cent. An Indian loan was upon the eve of issue. The political feature of immediate interest was the appearance in the Paris *Moniteur* of military addresses almost menacing England with invasion for harbouring assassins.

In 1859, the rate of discount for the best bills was only 2½ per cent. Messrs Rothschild had announced their unsuccessful Austrian loan of 6,000,000*l* in a 5 per cent. stock at 80. In Paris, a pamphlet, supposed to be inspired by authority and breathing hostility to Austria, had just appeared.

In 1860, there was a great drain of bullion from the Bank, and the rate of discount was raised from 3 to 4 per cent. An immense pressure for discount arose in consequence of the Bank of England carrying out the rule they had laid down not to discount for the discount houses. The Budget was looked forward to with great interest.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,158,755*l*; in 1858, a deficiency of 3,043,565*l*; in 1859, a deficiency of 2,203,392*l*; and in 1860, a deficiency of 6,289,005*l*. In 1861, the deficiency is 7,584,117.

DISCOUNT AND MONEY MARKET.—We last week intimated that for the first time for some weeks past we thought we perceived symptoms of a gradual improvement in the money market and a mitigation of the present pressure, and we grounded our hope on an improvement in the American exchanges and a gradual falling off of the drain of bullion to New York, and also from the circumstance of our farmers being enabled from the improvement in the weather to thrash out their corn and repay their advances to the country bankers. Both of these events have been fully realised. The American exchanges have risen to 106 to ½, which will virtually put a stop to the export of bullion, and are likely to be still higher; and we have every reason to believe that in the course of a packet or two gold will be returned from the United States to this country. This, coupled with the arrivals from Australia going into the Bank, will soon tend to tell favourably on the money market. That the farmers have availed themselves of the fine weather to bring their produce to market is evidenced by the fall in the money market, and by larger sums of money flowing into the London market from the country bankers. We hope to see greater ease from both the above causes.

The rate of discount throughout the week has been fully maintained at 6¾ to 7 per cent., and a very fair demand at those rates has existed both at the Bank of England and in Lombard street. To-day, there has been an active demand at the Bank, owing principally to provision being made for bills falling due on the 3d and 4th.

Several failures occurred early in the week among the Greek houses, and the mail from Constantinople due to-morrow is looked forward to with much anxiety. The Greek houses have for the most part shown great alacrity and power in taking up the bills for which they were liable through the failure of Messrs F. Ede and Co.

Money has been in great demand on the Stock Exchange, principally from the Bank of England being a borrower on stock. The rate has been from 5 to 6½ per cent.

Altogether, however, the prospects of the money market are brighter, but the pressure has been very severe, and it takes some time before the market recovers its proper tone, especially after so many failures have occurred.

Money continues abundant in Paris, the rate in the open market there being from 5 to 5½ per cent. The position of the Bank of France is improving. The negotiation for the exchange of 1,200,000*l* silver for gold with the Bank of St Petersburg is stated to have failed. Large sums of gold, however, have arrived at Paris from Constantinople.

THE FLUCTUATIONS IN THE BANK RATE OF DISCOUNT IN 1860.—On the 4th of February, 1860, the bullion in the Bank of England stood at 14,277,710*l*, and the Bank rate of discount was 4 per cent.; by the last return it was 11,521,580*l*, and the rate of discount is 7 per cent., consequently the loss of 2,756,130*l* gold has occasioned a rise of 75 per cent. in the value of money. In Jan., 1860, the Bank raised the rate of discount from 2½ per cent. to 3; in February, to 4; in April, to 5; in May, it was lowered to 4½, and then to 4; in November, it again was raised to 4½, 5, and 6; in December, it was lowered to 5, then raised to 6, and then to 7. Such fluctuations as these are trying to the commercial interests, and dissatisfaction is freely expressed. On the 20th January, 1860, the rate of discount was 2½ per cent. and the bullion was 15,559,096*l*; on the 23rd January, 1861, it was 11,521,580*l*, and the rate of discount 7 per cent., making 130 per cent. difference. We here see that the loss of four millions of gold has apparently made

a difference of 130 per cent. in the rate of discount. It is impossible to calculate the effect of the rise in the rate of discount on prices, but the funds are 3 per cent. lower, which is a difference of 24,000,000*l* in the funds alone, taking the debt at 800,000,000*l*.

ENGLISH FUNDS.—The market in English funds has improved; a good deal of stock has been taken off the market, although the rate of continuation from account to account is 5 per cent. The Bank of England and other banks are stated to be large borrowers at that rate. Some preparations have also been made for the Indian loan, and it is stated that our own Government will probably be in the market as borrowers, especially if the market for Exchequer bills remains so much below par. The Government will have to raise the rate of discount, or be prepared to pay off a large amount in March next.

FOREIGN FUNDS.—Mexican Bonds have advanced considerably in consequence of the overthrow of Miramon and, it is hoped, on the establishment of a Constitutional Government which will in future keep better faith with the bondholders. We subjoin an extract of a communication we have received from the Committee of Mexican Bondholders, by which it will be seen that the New Government have commenced well so far as the interests of the bondholders are concerned. We hope in future that the Committee of Mexican Bondholders will insist on the funds of the bondholders being remitted by every packet and not retained in Mexico. Had they adopted this rule, the bondholders would not now have to deplore so serious a loss.

The Committee have received advices from Mr Whitehead, dated Mexico, the 28th ult. Miramon had marched out of Mexico on the 14th of December with 8,000 men and 30 or 40 pieces of cannon, was utterly routed on the 22d by the forces of General Ortega near San Miguelese, a village 20 leagues off, and arrived as a fugitive at the palace early on the 23d. General Ortega, with about 4,000 men, entered the capital in the course of the day, the occupation of the city being effected without the least disorder. Mr. Mathew was expected in the capital after the packet, and Juarez about the 1st inst. Captain Aldham had arranged that the payment of the assignments in Vera Cruz and Tampico should be resumed on the 1st of January, and that to make up the arrears at Vera Cruz and Tampico during the last year, an additional 5 per cent. at those two custom houses has been placed at the disposal of the bondholders, which is confirmed by a letter from the agents in Vera Cruz of the 2d inst."

Turkish Bonds are rather firmer; but it is impossible that any marked improvement can take place in them so long as M. Mirès' loan remains in its present uncertain state. The public ought to be informed how it really stands.

There is no other feature in the foreign market. Russia and Austria are both contracting loans at home. French funds are tolerably steady.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day:—

RAILWAYS.—The railway market has altogether been tolerably well sustained, notwithstanding the fears that the traffic may fall off. The market presents no feature for comment. Lombardo-Venetian shares have improved, which is looked on as a favourable feature in a political point of view.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

THE NEW INDIAN LOAN AND INDIAN FINANCE.—We refer to our advertising columns for the particulars of the New Indian loan for 3,000,000*l*, which is to be raised in a 5 per Cent. stock, redeemable on and after July, 1870, upon one year's previous notice being given by the Secretary of State for India. 5 per cent. discount will be allowed on payment of instalments in anticipation. The day for receiving tenders is Friday, the 8th February.

The total amount of India 5 per Cent. stock created in this country up to the present date is—

	£
Indian, 5 per Cent. loan, 1859	5,000,000
Since created by virtue of Acts of Parliament, sec. 10 of 22 and 23 Vic., cap. 39, and 23 Vic., cap. 5, in lieu of £1,958,000 Debentures not subscribed for when the loan was contracted	1,953,000
Ditto to pay off £1,126,200 Bonds	1,126,200
	8,079,200

Consequently, the Debenture debt now stands at 13,047,000*l*, and the Bond debt, which was 7,000,000*l*, at 5,873,800*l*.

We are happy to state that the double income tax on the enfaced paper which Mr Gladstone so precipitately laid his hands on is to be abandoned, the opinion of the law officers of the Crown being that it could not be legally enforced. Those who have had the tax deducted will receive back the amount.

Altogether brighter prospects seem in store for Indian finance. The estimates for the year ending 30th April, 1861, are as follow:—

		£
Revenues 39,140,779*l*, or exclusive of 371,160*l* net receipt from railway traffic, which properly forms a deduction from guaranteed interest		38,769,619
Charges in India	£38,399,296	
Charges in England exclusive of interest on railway capital guaranteed	5,357,993	
Interest on railway capital guaranteed	£1,657,640	
Less, net traffic receipts in India	371,160	
	1,286,480	
		45,043,769
Estimated deficit in the year ending April 30, 1861		6,274,150

The above deficit includes among the charges a sum of about 700,000*l*, estimated to be paid for compensation for losses in the mutiny. After deducting that compensation, which is not likely again to occur, the estimated deficit would be 5,574,150*l*.

The above deficit also includes 1,286,480*l*, and also a possible loss of 500,000*l*, in consequence of the disbursements in India for railways being made at the exchange of 1s 10d the rupee. These sums, as railways prosper, will be hereafter repaid to the State, but at present they swell the deficit to the extent of 1,786,480*l*.

It is to be observed that the receipt from income tax is only estimated for 1860-61 at one million. The Government of India in June last estimated that the income tax, license tax, and tobacco tax would yield in a full year 3½ millions. There is consequently 2½ millions more to be anticipated under those heads which would reduce the deficit to about 3 millions, which ought to be met, and most likely will be met, by a reduction of expenditure in 1861-2.

FAILURES.—Since our last several failures in the Greek trade have been announced. D. Navone, with liabilities of about 50,000*l*; Salvago and Co., also with rather large engagements; and S. P. Zizinia, for about 65,000*l*. Messrs D. E. Rodocanachi, of Manchester, are likewise stated to have stopped, but, it is hoped, only temporarily. With reference to the latter house and that of Zizinia, it must be understood that they are in no way connected with other firms of the same name. In all cases a favourable liquidation is expected, and the difficulties appear attributable more to the distrust originating out of the chaotic condition of Turkish finances than to deficiency of capital, or reckless trading. The books of Messrs Ede, whose stoppage has been announced, have been placed in the hands of Mr C. F. Kemp, the accountant. A meeting of the creditors of Messrs Ede and Co. is convened for Tuesday the 5th February. Messrs Demetrio, Pappa, and Co., of Manchester and Smyrna, have also suspended.

To show the extent of the exertions which have been made of late by the Greek and Levant houses to sustain themselves, it may be mentioned that about 400,000*l* in gold is computed to have reached Marseilles from Turkey and the Levant since the commencement of the present month, and that an additional sum of 300,000*l* is looked for within the next few days. The Marseilles houses do not remit any of this gold to London, but, in its place, short bills, which answer equally well. The telegrams from Constantinople do not mention any failures in that city, but the effect of the full advices sent from this side has yet to be seen.

At the adjourned meeting of the creditors of Messrs Holdsworth and Co., sugar refiners, a resolution was passed, with one dissentient, who threatens bankruptcy proceedings, in favour of winding up the estate under inspection. Provided it be kept out of the court, the dividend is expected to be from 4s to 4s 6d in the pound.

At the Edinburgh Court of Session on Friday se'nnight a a decision was arrived at as to the form in which the action on the part of the shareholders of the Western Bank of Scotland against the Directors is to be conducted. There is to be a separate issue against each, as each has to answer for his own alleged fraud only, and the questions to be decided will be as to whether the plaintiffs were led to purchase their shares "by false representations as to the affairs of the bank fraudulently made and promulgated."

Advices from Lyons mention the stoppage of Mr G. Armand, silk merchant, with liabilities to the amount of about 60,000*l*. This failure, which will not affect houses here, has occurred through heavy losses, principally in Italian silk, in which a considerable fall has taken place lately.

It is announced that the outstanding liabilities at Messrs Hoare, Buxton, and Co., who suspended on the 17th Nov., 1857, are to be paid in full. The assets of the firm being insufficient for the purpose, the partners have made an arrangement apart from the estate, which enables them to pay the whole of the remaining balance.

BULLION.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes:—

Gold.—The transactions this week have not been extensive, and the shipments to the United States have been materially diminished, the only amounts forwarded being—per Canada, 53,130*l*, and City of Baltimore, 24,000*l*. The exchange at New York on England has now risen to a point which precludes further remittances, except for special purposes. About 260,000*l* of the recent arrivals of gold, having been refined, has been sent to the Bank of England. The Delta, Peninsular and Oriental Company's steamer, which sailed on the 27th inst., took 8,925*l* for Bombay. The Tasmanian, from the West Indies, arrived this morning with 21,195*l*. The Strathedon, from Melbourne, which sailed on 14th November with 196,000*l*, may be expected very shortly.

Silver.—Our market has been inactive since our last report, but the price still remains as before quoted, viz, 5s 1¼d per ounce standard. The Delta had 229,745*l* on board for Bombay, and the West India steamer Tasmanian, reported this morning, brings 233,000*l*. The shipments to India and China, on 4th February, are not expected to be extensive.

Mexican dollars remain as last quoted, viz., 5s 0¼d per ounce, but the demand is limited.

Exchange on India remains about the same. Bank drafts on Bombay, 60 days' sight, 2s to 2s 0⅛d; on Calcutta, 1s 11½d to 2s 0⅛d. Bills with documents, 1s 11⅝d to 1s 11½d. Madras, 1s 11¾d to 2s, for Bank 60 days' sight bills.

India Government Loan Notes are rather weaker, and may be quoted 99½ to 100⅛ for 5½ per Cents., and 93½ to 94½ for 5 per Cents., with very little doing.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, fine, 77s 10d per oz std; bar gold, refinable, 77s 11d per oz std. Silver—Bar silver, 5s 1¼d per oz std; bar silver, containing 5 grs gold, 5s 1½d per oz std; fine cake silver, 5s 5⅞d per oz; Mexican dollars, 5s 0¼d per oz; Spanish dollars (Carolus), 5s 5d to 6s 6d per oz, last price.

MISCELLANEOUS.—At the half-yearly meeting of the Bank of Manchester a dividend has been declared of 5 per cent. for the six months with a bonus of 1 per cent. The business of the establishment continues to show a steady augmentation, and there is every sign that the adoption of the plan of limited liability has caused the bank to be regarded by the public with increased instead of diminished confidence.

It appears that of the funds belonging to the Mexican bondholders at Mexico a sum of about 45,000*l* was saved, owing to that amount being represented by bills of exchange which had not fully matured. These have since been collected, and the proceeds are believed to be secure. Upon their arrival on this side they would, with the 16,000*l* already in the Bank of England, make a total sufficient to meet the 12s remanet of the last distribution in the shape of dividend.

The Lords Justices have reversed the decision of the Commissioner in Bankruptcy, in the case of Mr Mortimore, tanner, of Andover. The winding up will therefore take place under the Private Arrangement Act, instead of in the open court. Although the former course had met with the concurrence of nine-tenths of the creditors, who signified their acceptance of a composition of 10s in the pound, the Commissioner had ruled that it could not be permitted, his belief being that Mr Mortimore was aware of his own insolvency as far back as 1857.

The following is the decision come to by Her Majesty's Treasury relative to the Red Sea Telegraph Company:—

1. That they are not prepared to authorise the issue of money for a dividend, which they are advised by the law officers of the Crown that they have no authority to pay.

2. That they, nevertheless, consider that, according to the view held in common by Parliament and by all the parties, the liability to pay the guaranteed interest was not to be absolutely dependent upon the continued working of the line, and that they intend upon the opening of the session to submit a Bill to Parliament to give effect to the understanding with which the Act was passed, and after the second reading of such Bill to propose that it should be referred to a Select Committee. Under these circumstances, my Lords can give no directions at present with regard to the payment of a dividend.

The value of the money coined in the United States last year was:—Gold, 23,447,283 dols; silver, 3,250,636 dols; copper, 342,000 dols; making a total of 27,039,919 dols. Of the total money coined Philadelphia, turned out 5,553,633 dols; New Orleans, 1,767,422 dols; San Francisco, 12,461,911 dols; Dahlonega, Ga., 69,477 dols; Charlotte, N.C., 133,697 dols; New York Assay Office, 7,053,758 dols. The total of 27,039,919 dols is below the average of the last few years. The coinage since 1792 has been as follows:—Philadelphia, 423,425,504 dols; New Orleans, 69,201,833 dols; San Francisco, 118,029,225 dols; Dahlonega, 6,060,973 dols; Charlotte, N.C., 4,978,061 dols; New York Assay Office, 94,532,996 dols; making a total of 716,229,594 dols.

The Mercantile Law Amendment Society have issued a very clear and useful report of their proceedings during the past year, especially in relation to the proposed Bankruptcy Bill. They state that they have the most implicit confidence both in the desire of the Attorney-General to satisfy commercial requirements, and in his ability to frame such a Bankruptcy Bill as will rank amongst the highest legal reforms, and they publish a copy of a petition in support of the measure which is now receiving the signatures of the great majority of influential firms throughout the country.

The Submarine Telegraph Company have made the fol-

lowing announcement of a general reduction in their charges for messages to the Continent:—

Submarine Telegraph Company, Jan. 31, 1861.

Sir,—I have the pleasure of announcing to you, for the information of the public, that the Directors of this Company, from their desire to facilitate commercial intelligence with the Continent, have made a considerable reduction, which will take effect from the 1st of February, upon all messages to France, Belgium, Spain, Portugal, Switzerland, Sardinia, Italy, Austria, Prussia, Russia, Turkey, Greece, Holland, &c., passing over their lines *via* Calais, Boulogne, and Ostend.

As instances of the reduction, I may mention that a twenty-word message between London and Paris, Havre, &c., will now be 5s; Brussels, Antwerp, and all Belgium, 4s 3d; Calais and Boulogne, 2s 6d; Bordeaux, Lyons, Nantes, and Geneva, 7s 3d; Marseilles, 8s 6d; Barcelona, Leghorn, and Genoa, 9s 6d; Madrid, 10s 6d; Lisbon, 14s; Naples, 12s; Malta, 17s 6d; Dantsic, Vienna, and Trieste, 11s; Berlin and Stettin, 10s; Memel and Königsberg, 12s 6d; St Petersburg and Odessa, 18s 6d; Constantinople, 19s 6d; Athens, 32s; Smyrna, 26s 6d; Hague and Rotterdam, 5s; and to all places in the above countries in like proportion. For all other stations in Great Britain and Ireland 1s in addition to the above rates will be charged.—I am, Sir, your obedient servant,

L. Walter Courtenay, Secretary.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.20 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about the same price in London and Paris.

By advices from Hamburg the price of gold is 424 per mark, and the short exchange on London is 13.5⅜ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 4-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 105½ to 106 per cent., which, as compared with the Mint par between the two countries, shows that the exchange is against England. But the loss of interest occasioned by the delay in receiving back gold from the American mints leaves no profit now on the transmission of gold to the United States.

Imports of the week ..... 179,898 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The show of English wheat at Mark lane, to-day, was moderate, and all kinds were a heavy inquiry, at Monday's reduction in value. Foreign wheat was very inactive, and all other produce moved off slowly, at late rates. The imports from abroad are 12,370 quarters of wheat; 5,340 barley; 150 sacks and 10,570 barrels of flour.

At Liverpool, this morning, wheat was 1d to 2d dearer.

Messrs Briggs and Co., of Alexandria, whose communication is dated January 18, says:—

We have little or no alteration to report in the position of our grain market, but for two days of the week business has been at almost a complete stand-still, owing to the prevalence of heavy rains. Both wheat and beans have been in fair demand at our previous quotations. Indian corn continues to come forward more freely, notwithstanding which prices are firmly maintained. Barley is excessively scarce, and transactions altogether insignificant. The following are present prices quoted free on board, to which we add the usual note of operations since our last:—Wheat—Saide, 3,675 qrs, 39s to 39s 6d; ditto, Beheireh, 235 qrs, 37s to 38s; beans—Saide, 2,450 qrs, 30s 6d to 31s; ditto, Beheireh, 280 qrs, 28s 6d to 29s; Indian corn, 6,190 qrs, 28s to 28s 8d; barley, 32 qrs, 22s to 22s 6d per qr. Linseed—Two small lots have come to market during the past week, the value of which, screened, may be quoted at about 47s to 47s 6d per qr free on board. Freights may be quoted for beans to the United Kingdom for orders, 3s 10d to 4s 2d per qr; other grain and seed in proportion; to a direct port, 3s 6d to 3s 9d; grain ballasts to Liverpool, by steamer, 6s 6d to 7s; by sailing vessel, 3s to 3s 6d.

The transactions during the past week in the Liverpool cotton market have been on a very reduced scale, as compared with those of the last few weeks; the total sales reach only 33,000 bales, and include 20,000 bales to the trade, 2,000 on speculation, and 11,000 bales for export. The quotations are about ⅛d per lb lower than this day week. At the commencement of the week, under the influence of heavy arrivals, which were freely offered, the market was very depressed, and prices gave way to the extent of ¼d per lb upon the late highest rates. During the last few day's a better demand has sprung up, and a part of the decline has been recovered. To-day the market closes steady; sales, 10,000 bales. An opinion appears to prevail that the crop in America will not reach four millions, and thus prove quite inadequate to the present requirements. This feeling will maintain prices at least to their present standing.

SHIPMENTS of COTTON from ALEXANDRIA from 3rd Oct. to 16th Jan.

	Great Britain. bales.	France. bales.	Austria. bales.	Total. bales.
1856—1857	15,605	3,853	3,549	23,007

We have to report a steady, though not to say active, demand for most kinds of tea, at prices fully equal to those current in the previous week. The show of samples has somewhat fallen off.

The annexed commercial intelligence is dated Hong Kong, December 15:—

Canton Silk—Settlements are only 50 piculs for India, and 300 boxes for America. Quotations:—Loongkong, 455 dols; Mahtow, 190 dols to 215 dols; Kumchuck, 435 dols; re-reeled Kumchuck, 485 dols; Kowkong, 415 dols. Tea—During the early part of the fortnight little was done in congous, owing to the firmness of holders, but within the last few days settlements have taken place at about previous rates. A large business has been done in scented teas, principally low-scented capers, at rather easier rates. Canton gunpowders have also been in some request. Some further musters of country greens have been received, and about 2,000 packages are expected to arrive shortly. The following are the sales reported:—Congou, 10 chops, and 2 on native account; Oonams, 22½ to 26 taels; Oopacks, 26½ to 32 taels. Souchong—No sales; prices nominal. Scented Orange Pekoes—Sales, 1,300 boxes—a great portion spurious: prices, 13½ to 24 taels. Canton Greens—Gunpowders, 10,000 boxes, at 13½ to 25 taels; young hyson, 500 half-chests, at 18 taels. Canton-packed Oolongs—2,000 half-chests, at 23 to 27 taels. Foochow.—Advices are to the 7th inst. Tea—In the early part of the fortnight settlements were checked owing to the depressed accounts of the home market, but, the teamen having yielded somewhat in their demands, some very extensive purchases were made, and, though at very irregular prices, yet establishing a decline on rates previously current. Of the sales reported a good proportion is for Australia. Arrivals have fallen off the last few days. Supplies recently received consist chiefly of low and inferior kinds. Oolongs—Demand has been limited, and solely for America. Souchongs—No sales. Pekoes—Transactions very trifling; and in scented teas nothing has been done. It is reported that some 10,000 or 12,000 packages of Tychau green teas, diverted from their route to Shanghai, will find their way to this market. On comparing the prices with those current on the 22nd ult., congou shows a decline of 5 mace to 1 tael; Oolongs easier; other kinds unaltered. Sales from the 22nd of November to the 6th inst. are:—Congou, 36,150 chests, from 9 taels for low to dusty to 21 taels short for Kaisow kinds; included are two chops Ningchow, at 22½ taels. Oolong, 3,950 half-chests, at 14-5 taels for low Foochow packed to 23 taels for good cargo; pekoe, 150 chests, at 34 taels to 55½ taels. Stocks on the 7th of December, 1860:—Congou, 87,000 chests; souchong, 600 chests; pekoe, 2,000 chests; Oolong, 8,000 half-chests; scented teas, 6,000 boxes. Shanghai.—Advices are to the 6th inst. Silk—Settlements for the fortnight amount to 4,000 bales, making a total for the season of 55,000 bales. Good Tsatlees have advanced 5 taels; inferior qualities, as also Nos. 1 and 2 Taysaams, are 10 taels higher; other kinds unaltered. Stocks have somewhat decreased, and are now between 7,000 and 8,000 bales, consisting chiefly of common qualities of all descriptions, good silk being still scarce. Quotations are:—Tsatlee, Nos. 1 and 2, none; No. 3, 410 taels; No. 4, 390 taels; inferior, 340 taels to 380 taels. Total export of silk from China to Europe 51,335 bales, against 36,838 bales last year, or an increase for this season of 14,497 bales. Tea—Only a very limited business has been done in black. Holders are firm, and prices show no decline. The arrivals at Ningpo have been very moderate. Sales reported are as follows, prices are almost nominal:—Congou—Ningchow and Oopack, 2,300 chests, common to good, 27 taels to 30 taels, duty paid; ditto, 1,700 chests, contract; Sunchunki and Hohow 6,100 chests, ditto; Shanghai packed, 600 chests, dusty and low, 15 taels; Souchong, 400 chests, contract; Pekoe, 500 chests, 40 taels—11,600 chests. Green Teas—The few that have arrived have been bought for America, principally at rather higher rates. Settlements amount to 12,300 half-chests, 8,000 of which consist of the new Tychau teas. Proportion of rates paid show an advance of 20 per cent. over those of last season at the same period. The next arrivals may realise a further advance. No country-packed remain on the market, but, as the route to Ningpo is said to be open, supplies may be expected shortly, though in moderate quantities. Stocks are estimated at—Black, 5,400 chests, against last season 30,000 chests: green, 3,000 half-chests, against last season 80,000 half-chests. Total export of tea from China to Great Britain is 50,463,300 lbs, against 43,651,000 lbs last year, or an increase for this season of 6,812,200 lbs. To the United States the export is 15,994,100 lbs, against 19,083,900 lbs last year, or a decrease for the season of 3,089,800 lbs.

The supplies of raw sugar on offer have somewhat increased. Even the finest samples have moved off heavily, and the currencies have further given way 6d to 1s per cwt. Refined goods are very dull, and rather cheaper.

The following statement shows the consumption, &c., of sugar in the United States during the past year:—

	tons.
Arrived at New York direct	224,215
— Boston direct	44,927
— Philadelphia direct	28,215
— Baltimore direct	28,619
— New Orleans direct	6,682
— Other ports direct	8,874
Total receipts	341,532
Add stock at all the ports, Jan. 1, 1860	22,947
Total supply	364,479
Deduct exports and shipments inland to Canada, from all the ports in 1860	13,234
	351,245
Deduct stock at all the ports, Jan. 1, 1861	54,295
Total consumption of foreign	296,950
Consumption of foreign in 1860 as above	296,950
Consumption of foreign in 1859	239,034
Increase in 1860	57,916
Consumption of foreign in 1860	296,950
Add crop of 1859-60 of Louisiana, Texas, Florida, &c., the bulk of which was distributed in 1860, and assuming the stock 1st Jan. each year to be equal	119,046
Less shipped to California, &c., not included in foregoing statement of exports	715—118,331
Would make the total consumption of cane sugar in United States in 1860	415,281
Total consumption of foreign and domestic cane sugar in 1859	431,184
Decrease in 1860	15,903

Plantation coffees have been in steady request, at very full prices. All other kinds, however, have changed hands slowly, at late quotations.

Messrs Volkart, of Ceylon, have forwarded the annexed statement of the coffee trade, to the 29th Dec.:—

The exports of the present season's crop to date are as follows:—

PLANTATION COFFEE.

To Great Britain .....cwts	68,726	against last year, cwts		68,922
Foreign Ports	3,256	—	—	1,262
Australia and India.....	4,467	—	—	4,418
	76,449			74,602

NATIVE COFFEE.

To Great Britain.....	cwts 20,965	against last year,	cwts	36,820
Foreign Ports.....	3,928	—	—	7,162
Australia and India.....	3,441	—	—	493
	28,334			44,475

The receipts of plantation coffee since our last have been unusually small, owing chiefly to heavy rains in the interior, which have prevented the drying and despatch of crops. The gatherings are now far advanced, with the exception of the very high estates. The holidays and unfavourable weather have prevented any transactions in native coffee except to a very moderate extent. Buyers have been less anxious to operate at late prices, and a decline of a shilling in the value of this description took place, which has since been recovered. Plantation coffee, low, nominal; ditto, mountain, 11s 3d to 11s 6d per bhl: native coffee, unpicked, 43s; ditto, picked and dried, 45s 6d per cwt. Cinnamon, plantation, 9d to 9½d; ditto, inferior, 6d to 7½d per lb.

Cocoa has met a dull inquiry, and most of the parcels offered at public sale have been withdrawn.

Owing to the continued fall in the value of wheat, the rice market has been in a most inactive state; nevertheless, no quotable change has taken place in prices, owing to the comparatively small stock on hand.

Saltpetre has further advanced quite 6d per cwt, with a decided improvement in the demand.

"The indigo sales have progressed as fast as arrivals from the factories have permitted," write Messrs Moran and Co. of Calcutta, to the 22nd December, "and fully 30,000 maunds have been sold out of the new crop; fine sound indigo has continued to command very high prices, whilst other kinds have occasionally sold at rather easier rates. The Arabs have taken a few lots at the public sales, and the Americans have also commenced on a small scale, but there has been but little hitherto brought forward suitable to their orders. The low qualities of consuming indigo which suffered so great a depression in the London October sales are eagerly bid for at a corresponding decline, but as they are equally suitable to the American and English markets the competition prevents the execution of orders for such descriptions based on the October sales. Exports of indigo from the 1st November, 1860, to the evening of the 21st current:—To Great Britain, 3,181 chests; Havre and Bordeaux, 1,640 chests; America, 21 chests; Gulf, &c., 3 chests; total, 4,845 chests."

All kinds of wools are still a dull inquiry; but as only about 44,000 bales colonial will, it is expected, be offered at the approaching public sales, importers have become somewhat firm in their demands.

Messrs Ronald and Son thus allude to the last public sales held at Liverpool:—

East India wools have, as hitherto, formed the bulk;—18,937 bales were brought forward, being even more than were offered at our September series. Buyers on the first day exhibited great caution, thinking that, from the large quantity offered, together with the high rate of discount and the exciting news from America, prices would be rather lower; in this however they were disappointed, as—stocks having been very much exhausted in consumers' and dealers' hands—the eagerness to get a supply for immediate wants soon showed that, so far from prices receding, all sorts were realising fully last sales' rates, with the exception of low and middling yellow and grays, which did suffer a decline of from ½d to 1d per lb. Of Egyptians a considerable quantity was brought forward, but, the demand being rather languid and holders not inclined to give way in price, hey were principally withdrawn.

Several parcels of rum have found buyers, at quite last week's quotations. Brandy is very firm in price; but the transactions in raw spirit are on a very moderate scale.

The cinnamon sales have been held this week. Fine parcels commanded full prices; but inferior kinds went rather cheaper.

There is very little business doing in the fruit market, and prices have a drooping tendency.

Metals, generally, have changed hands slowly, and Scotch pig iron has sold as low as 49s cash mixed numbers.

Oils have met a dull inquiry, and prices have had a drooping tendency. Linseed oil has changed hands at 28*l* 5*s*; and rape has been pressed at 38*l* to 40*l*. Spirits of turpentine 31s to 32s per cwt, with a slow market.

The amount of business doing in the tallow market has been only moderate; nevertheless very little change has taken place in the quotations. To-day, P.Y.C. on the spot has changed hands at 59s 9d; February to March, 59s 6d; March, 60s; April to June, 58s 6d; October to December, 57s to 56s 6d per cwt.

"Money matters have presented no new feature of interest since our last review," observes the New York *Shipping List* of the 16th January. "The market is very quiet; the offerings for discount are extremely moderate at the banks, while private lenders are not overburdened with applications. First-class paper is scarce among the outside dealers, and all that is offered is readily taken at the quotations below. On call, the supply is largely in excess of the requirements of borrowers. We quote:—

	Per cent. per annum.	
Loans on call, stock securities	5	to 6
Do. other good securities	6	7
Prime endorsed bills, 60 to 90 days	7	8
Do. 4 to 6 months	8	9
First class single signatures	8	10
Other good bills	12	15
Names less known	18	24

The advance of the rate of discount by the Bank of England from 5 to 6 per cent. being fully anticipated, is not calculated to have any immediate influence on our market. The weekly Bank returns reflect the easy condition of the market, coupled with the absence of any special activity in general trade. The specie reserves are now greater than at any time since September, 1853. The average in the footings below do not indicate the actual amount in Bank, several large amounts having been received per steamers since the account was made up:—

	Jan. 5. dols		Jan. 12. dols		dols
Loans.....	129,625,645	...	129,125,515	...	Dec. 500,130
Specie	24,839,475	...	26,460,988	...	Inc. 1,621,513
Circulation	3,698,228	...	3,357,103	...	Dec. 341,125
Deposits	86,454,430	...	88,148,883	...	Inc. 1,694,453

There are indications of an active competition for the new issue of Treasury notes. The City Banks are preparing to bid freely, and so are private capitalists. The whole 5,000,000 dols will probably be taken at 3 or 4 per cent. better than the preceding loan. The domestic and foreign exchanges are gradually working round to the ante-panic points. The foreign trade of the port continues to work very satisfactorily. The export movement shows a handsome increase upon previous seasons, while the imports are so materially in excess of those of the beginning of January in 1859-60, as to weaken the impression that the importers anticipate a prolongation in dull times. We append the usual Custom House statements:—

IMPORTS.

For the week—	1860. dols		1861. dols

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Jan. 16.—FLOUR AND MEAL.—Notwithstanding the continued favourable character of the European advices received since our last, the market for State and Western flour has lost the buoyancy which it obtained at the date of our previous writing, and holders have scarcely been able to obtain late rates. The stock is fair, and the receipts by railroad moderate, and in the absence of a large demand for export, there is no probability of a scarcity between this and the period of the resumption of canal navigation in the spring. The demand from the local and Eastern trade has also been moderate, and the aggregate sales for the three days are therefore to only a moderate extent, comprising 25,000 bbls, the market closing dull, and prices about 5 cents per bbl lower. Canada flour is dull, but unchanged: the sales comprise 1,000 bbls, including 300 yesterday. The demand for Southern flour has been fair, and the stock being light, prices have advanced considerably on all kinds; the sales for the three days foot up 5,700 bbls, including 1,000 yesterday, the market closing quiet at 6.15 dols to 6.25 dols for Brandywine, 6 dols to 7.10 dols for Georgetown, 6.50 dols to 7.50 dols for Petersburg and Richmond, and 5.15 dols to 7 dols for Baltimore.

EXPORT, from 1st to 15th January.

	1861. barrels.		1860. barrels.
Wheat Flour	67,857	.....	13,071

GRAIN.—The market for wheat has been dull and heavy during the three days, though prices are without material alteration. Transactions comprise 180,000 bushels, including 14,300 Milwaukee Club, at 1.28 dol to 1.30 dol; 13,100 winter red Western, 1.36 dol to 1.37 dol; 800 red Genessee, 1.37 dol; 5,700 white Indiana, 1.52 dol; and 6,000 Chicago spring, 1.22½ dol, the market closing dull. The corn market has also been dull, and prices may be written one cent. lower; transactions are to a fair extent, however, comprising 146,000 bushels, at 71 to 72 cents for round yellow, 70 to 71½ for mixed Western, and 69 to 70 for unsound.

EXPORT, from 1st to 15th January.

	1861 bushels.		1860 bushels.
Wheat	455,075	.....	5,134
Corn	297,503	.....	2,348

NEW YORK, Jan. 19.—FLOUR AND MEAL.—The market for State and Western flour has been characterised by increased buoyancy during the past three days, but the demand has been moderate, and prices are without material alteration. Canada flour has been in moderate request, and all grades are somewhat lower. Southern flour remains without essential change.

GRAIN.—Dulness and depression continue to constitute the chief features in the market for wheat, and transactions within the last three days have accordingly been on a limited scale. The inquiry has been confined chiefly to the wants of the local millers. Corn has met with moderate request, but transactions have mostly been effected at previous rates.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND, since September 1, 1860.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that only moderate supplies of English wheat have been on offer, this week, both here and in the provincial markets, the demand for all kinds has been in a most depressed state, at a further decline in the quotations of from 1s to, in some instances, 3s per quarter. Fine foreign wheats have mostly supported previous rates; but inferior samples have ruled lower. There has been very little passing in barley, the value of which has given way 1s to 2s per quarter. Malt has commanded very little attention; but oats, beans, and peas have sold on quite former terms. The flour trade has continued heavy, and the quotations have had a drooping tendency.

The following return, furnished by Messrs Horne and Watney, shows the sources from whence we imported wheat into London in 1860:—

From	Total, 12 months. qrs	From	Total, 12 months. qrs
America, B. Possessions	7497	Morocco	854
— United States	164710	Norway	97
Belgium	120	Oldenburg	740

Malta	8599		
Mecklenburg	58399	Weekly average arrivals	22773

The continental markets have become heavy for wheat on easier terms. Spring corn is, in some instances, offering on lower terms. In the United States, the export demand has become less active.

In Scotland, wheat has met a dull sale at drooping prices. Other kinds of produce have realised previous rates. The export inquiry has not improved.

The Irish markets have been in a most inactive state for wheat and all other articles. Prices generally have ruled in favour of buyers.

The show of English wheat at Mark lane, to-day, was, for the most part, comprised of samples left over from Monday. Owing to its bad condition, scarcely any business was transacted either in red or white qualities, and prices must be considered nominal. For foreign, there was a fair retail demand, at fully previous rates. All kinds of barley were a slow sale, yet no further change can be noticed in its value. Malt being in better supply, was very dull, and sales could only be effected by yielding to considerably reduced rates. The oat trade was firm, but the inquiry for all qualities was much restricted, notwithstanding that there have been no imports from abroad. Beans and peas moved off slowly at Monday's currency. Flour continues dull, yet we have no material change no notice in its value. Previous rates, however, are with difficulty obtained for county marks and American barrels.

Mr Ed. Rainford thus reports the state of the floating trade:—A very large number of vessels have arrived off coast for orders since the 25th ult., amounting to 212, consisting of 134 cargoes of wheat, 4 rye, 36 maize, 1 maize and wheat, 33 barley, 1 oats, 2 beans, and 1 locust beans. The wheat is principally from the Sea of Azof, the Black Sea, and the Danube; and the maize and barley from the Danube. Of these, about one-fifth had found buyers previous to arrival. There is considerably more activity in the demand for cargoes afloat, and a good business has been done, wheat selling at better prices than might have been expected, considering the very numerous arrivals. The prices paid range as follows, according to quality and condition:—Wheat, arrived, Marianople, at 56s and 56s 9d; Berdianski, 56s; new Odessa Ghirka, at 54s and 55s; Odessa Ghirka, 52s 6d to 53s; Taganrog Ghirka, 51s to 54s; hard Taganrog, 50s 9d to 52s, all per 492 lbs; Sandomirka, 62s 6d; Polish Odessa at 53s to 56s per 480 lbs, and 1 cargo at 57s 3d per imperial quarter; Reni Ghirka, at 50s; Galatz, at 47s to 49s 6d; and Ibraila, at 43s to 45s per 480 lbs; Saide, a cargo at 43s 9d, and another at 43s 3d; Egyptian, 42s 9d; and Behara, 42s 6d per imperial quarter; Milwaukee (American), good report, at 56s per 480 lbs. Rye, arrived, Odessa, at 34s per 480 lbs. Maize, arrived, Galatz, 40s 6d and 41s; and Odessa 41s per 492 lbs; Ibraila, 39s; Salonica, 39s 6d; American, 37s, all per 480 lbs; on passage, Barbary at equal to 39s 7d, and Galatz at 40s 6d per 492 lbs. Barley, arrived, Danubian, at 28s 3d and 29s; Ibraila, 27s 6d to 29s; Ismail, 27s; Varna, 27s 9d; Wallachian, 27s 9d; Salonica, 28s; Volo, 27s 10½d, all per 400 lbs. Beans, arrived, Sicilian, 40s per 480 lbs.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has continued flat, prices being again lower by 6d to 1s per cwt in many cases, with liberal supplies offering, and with heavy arrivals of Mauritius close at hand. At the above decline, the trade have bought to a very moderate extent, and the refiners still restrict their operations, consequently only 752 casks West India sold in the three days. 217 casks Barbadoes partly found buyers at 41s to 44s. 350 casks grainy Demerara, 39s to 44s per cwt. The week's delivery amounted to 3,860 tons, leaving the stock at the close 49,050 tons, against 54,550 tons last year at the corresponding date. There will be an increase in the stock when the next returns are made up.

Mauritius.—18,600 bags were only partly sold, and latterly at 6d to 1s decline: grainy sorts, 37s to 43s 6d for brown to good yellow; soft grey, 37s to 39s; black and brown, 31s to 36s 6d. A floating cargo has been disposed of for the Mediterranean, No. 12, at 27s per cwt.

Bengal.—3,000 bags, offered by auction, about half met with purchasers: Gurpatta date, 36s 6d to 43s; moist grainy yellow, fine, 43s to 43s 6d; low soft brown, 35s 6d per cwt.

Madras.—1,800 bags native brought 31s to 34s for brown to low yellow, and 33s 6d per cwt for soft yellow date sort.

Penang.—7,070 bags all met with purchasers: soft low grey to fine yellow, 36s 6d to 43s; brown, 34s to 36s.

Foreign.—273 casks 76 barrels Porto Rico partly sold from 37s to 43s 6d for heavy brown to good yellow. 157 casks Cuba were taken in at 36s to 41s 6d; and 3,800 bags Pernambuco at 34s 6d to 36s 6d for brown to low middling soft grey. 4,500 boxes Havana were only partly disposed of: brown and yellow, 36s 6d to 41s 6d; fine, 45s. A floating cargo of Havana has been sold at 25s 6d for the United Kingdom, and one, No. 11½, at 26s 9d per cwt for a near port.

Refined.—The market has been unsettled, and prices are rather lower. Common to middling goods may be quoted 50s to 51s 6d; crushed, 47s 6d to 49s. Considerable contracts have recently been made in Dutch crushed for delivery this month and next.

Molasses.—A parcel of Barbadoes has sold at 20s per cwt.

Rum.—Moderate transactions have taken place this week, at fully previous rates, including Demerara at 1s 11d to 2s for common to good; Leewards, 1s 9d to 1s 10d; and Mauritius, 1s 8½d per proof gallon. The total stock is 22,250 puns 4,030 hhds, against 27,340 puns 5,920 hhds last year.

Cocoa.—The sales have gone off flatly. 250 bags Grenada partly sold at rather lower rates, from 58s to 62s for grey to good red. 627 bags Trinidad were chiefly bought in, at 66s to 78s per cwt, a few lots being sold at, and afterwards, within the range of the above quotations.

Tea.—Since last Friday there has not been any alteration in prices, and the trade have made few purchases by private contract. Further numerous arrivals have taken place.

Coffee.—At the sales of plantation Ceylon held on Wednesday, extreme rates were paid, and the market is steady. 290 casks 125 barrels and bags found buyers at 66s to 71s 6d for fine ordinary to middling coloury. 11 casks Jamaica, middling to fine, 75s to 100s. Of 670 cases 18 cases East India, a few lots Naidoobatam sold from 74s to 84s 6d; pale Madras being taken in at 68s. 3,500 bags Rio sold readily from 53s 6d to 61s 6d per cwt for low to good.

Rice.—Transactions to a fair extent have taken place this week at barely the former value: Necrancie Arracan, 11s 3d; pinky Madras, 11s to 11s 3d; white Bengal, 11s 9d to 12s 6d; Ballam, now landing, at 10s 6d. The sound portion of 5,450 bags fair Necrancie Arracan offered by auction was sold at 11s 3d.

Imports and Deliveries of Rice to January 26, with Stocks on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	1600	1120	2530	11120
Deliveries for home use	3910	3650	1400	2150
Exported	*	1800	1700	1250
Stock	30900	68450	84640	70960

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

Sago.—740 boxes sold at 17s to 17s 6d per cwt for fair to good small grain. About 500 bags sago flour sold privately at 17s per cwt, being rather cheaper in both instances.

Spices.—At public sale, 910 bags pimento sold with spirit, and realised ⅛d advance; from 2⅞d to 3⅛d per lb. Pepper is quiet, owing to further arrivals. 111 cases brown nutmegs occasionally sold at easier rates: low small to fine, 1s to 3s 11d. 37 cases mace, 8d to 1s 5d for low and mouldy to good bright; one lot fine, 1s 11d per lb. 271 cases Cochin ginger: middling to good, 55s to 79s; wormy and chip, 44s to 48s. A few lots of 200 barrels Jamaica sold from 65s to 78s. 709 cases cassia lignea went rather dearer: third to first pile, 89s to 93s per cwt.

The quarterly cinnamon sales on Monday, consisting of 1,920 bales, passed off without spirit, but prices showed little alteration, and not more than half the above quantity sold in the room. There was not much competition for the middling qualities, which comprised the bulk of the quantity submitted: importers bought these in freely, the portion sold ruling from previous rates to 1d per lb decline. Good to fine, owing to the small assortment offering, fully maintained last sale's rates. Good middling to fine 1st sort Ceylon, 1s 9d to 2s 1d; a few lots very fine and superior, 2s 5d to 3s 3d; low middling to middling ditto, 1s 5d to 1s 7d; good to fine 2nd sort, 1s 6d to 1s 9d; middling to good middling ditto, 1s 2d to 1s 5d; middling to fine 3rd sort, 11d to 1s 3d; low and coarse to fine 4th sort, 7d to 10d per lb.

Saltpetre.—An active demand has sprung up, partly speculative, the last sales being quite 1s 6d above the lowest effected last week, and the market is now very firm, with few sellers. Many parcels Bengal have changed hands, refraction 13 to 3½ ranging from 36s to 40s per cwt.

Imports and Deliveries of Saltpetre to January 26, with Stocks on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	1150	1400	1700	1000
Delivered	615	1200	1120	1240
Stock	4350	4060	3500	6300

Deliveries last week 260 tons.

Cochineal.—Business has been confined to Teneriffe, of which 177 bags, by auction, partly sold upon rather lower terms: silver, 2s 6d to 2s 10d; black, 3s to 3s 3d per lb. The market is still very flat, and there has been another large arrival.

Lac Dye.—A limited quantity has sold at 10d to 1s 2½d per lb for middling to fine quality.

Other Dyestuffs.—Gambier is dearer, sales of dark and heated to good being reported at 16s 9d to 17s 6d. Cutch has been rather firmer, fair quality selling from 23s 6d to 24s per cwt. Turmeric and safflower remain inactive.

Shellac.—A few sales have been effected at 10s to 20s lower rates, notwithstanding the reduced stock: reddish livery orange, 10*l*; good garnet, 10*l* 10s per cwt.

Rubber.—East India and Para are quiet: the former at 1s 5½d to 1s 6d, the latter at 1s 8d to 1s 10d per lb for good to fine.

Metals.—There has not been any change for the better to notice in this market. All kinds of manufactured iron sell slowly at the quotations. The last sales effected in Scotch pig were at 49s 3d to 49s 6d per ton for mixed numbers. Spelter remains the same as last week, but there is very little business doing, either on the spot or for shipment Foreign tin has again declined: Straits, 121s to 122s; Bancs, 126s pe. cwt, which is even lower in proportion than English. No alteration or importance has occurred in copper.

Hemp.—The nominal quotations of Petersburg is still 33*l*, and the market keeps flat. 2,230 bales Manilla offered by auction this week were bought in at 24*l* 10s to 26*l* 10s, but there are buyers of roping sorts at about previous rates. Jute keeps firm, although the recent Calcutta vessels have brought considerable supplies. On Wednesday, 2,773 bales by auction, went at 14*l* 15s to 20*l* 15s per ton for common to good.

Linseed.—Extensive arrivals have taken place, and there are many cargoes off the coast. Calcutta has declined, 54s to 54s 6d being the quotation, and 57s to 58s per quarter for Bombay. Floating cargoes of Taganrog offer at 54s per quarter.

Oils.—There is a large supply of linseed, and the export demand has been steady at 28s 3d. Many parcels of foreign rape have been pressed for sale, and the price receded to 40s and 38s for refined and brown respectively. Cocoa-nut dull: Cochin, 54s; Ceylon, 52s. Palm sells very slowly at 46s to 47s per cwt. Sperm and other fish oils have been inactive at the quotations.

Turpentine.—Owing to large arrivals, there were sellers at lower rates: rough, 9s 6d; spirits, 31s 6d to 32s per cwt.

Tallow.—The market has been quiet: Y. C., 59s 6d; March only, 60s; April to June, 58s; and for delivery in October to December, 57s per cwt. The speculative holders do not seem anxious sellers, although the trade contract their operations as far as possible.

Particulars of Tallow.—Monday, January 28.

POSTSCRIPT. Friday Evening.

Sugar.—The market was quiet to-day. 1,456 bags Mauritius and 750 bags Bengal, offered by auction, went off at about former prices. A few lots of white Benares sold at 46s to 47s 6d. The transactions in West India for the week amount to 870 casks 100 tons clayed Manilla, 35s per cwt.

Coffee.—306 cases 115 casks East India brought 71s to 76s. 30 casks plantation Ceylon realised the previous value.

Spices.—162 bags Singapore and Penang white pepper realised 5⅝d to 5⅞d. 2,721 bags pepper: ordinary greyish, 3¾d to 3⅞d; dusty, 3⅝d to 3¾d per lb.

Rice.—5,000 bags pinky Madras sold at 11s to 11s 6d per cwt.

Lac Dye.—107 chests chiefly sold: good to fine, 1s 4d to 2s 5d; low to fair, 3½d to 11d per lb.

Safflower.—271 bales Bengal realised 3*l* to 4*l* 10s per cwt for ordinary to middling.

Cutch.—1,700 bags Pegue sold at 24s per cwt.

Shellac continues to decline. 103 cases orange were bought in at 9*l* 5s to 9*l* 15s per cwt.

Metals.—Scotch pig iron, 49s 6d to 50s per cwt.

Tallow dull: Y. C., 59s 6d; 58s April to June; 57s the last three months. Town reduced to 60s 3d per cwt.

ADDITIONAL NOTICES.

Refined Sugar.—The home market for refined sugar continues neglected. Treacle rather lower. Nothing to report as respects Dutch crushed.

Green Fruit.—Arrivals are of an extensive character, and prices are depressed. Some cargoes oranges from St. Michael, Valencia, Palermo, and Seville, sold by Keeling and Hunt at public sale, went at a further reduction in price, the severe weather of late having checked consumption, and, with a heavy accumulating stock, will account for the present position of the market. Nuts of all kinds fairly supported. Seville sours lower.

Dry Fruit.—No new feature in this market, with the exception of some sales "without reserve" of fine new Chesme raisins, when 32s was taken for barrels. This has rather weakened the raisin market. Sultanas have sold in fair quantities at 50s to 51s; Valentias neglected. Currants firm, but no demand, except for low at 25s, which is scarce. Figs lower, and large quantities clearing off.

English Wool.—Where sales are made, prices are in favour of buyers.

Flax unaltered.

Hemp very quiet, but few transactions.

Cotton.—Sales of cotton wool from Friday, 25th January, to Thursday, 31st, inclusive:—750 bales Surat, at 5½d for fair Dhollera; 5d for middling Oomrawattee; 4⅞d for good fair Compta; 4⅝d for middling Mangarole; 120 bales Tinnivelly, at 5½d for fair; 170 bales Western Madras, at 4¾d, 4 15-16d for middling to good fair. The market has been dull, and the transactions limited, at a decline generally of about ⅛d per lb on last week's prices. Yesterday, 157 Surat and 62 bales damaged and all faults cotton were offered at public sale: the Surats were mostly bought in above the market value; the damaged were sold at 4⅜d to 5⅛d per lb. 152 bales damaged Surat are advertised for public sale on Thursday, 7th inst.

Silk.—Market continues extremely quiet.

Tobacco.—The market has continued extremely active, and the sales during last month were upwards of 3,200 hhds, consisting principally of home trade descriptions. These extensive purchases were entirely confined to the trade; there was no apparent inclination to enter into any speculative transactions.

Leather and Hides.—The demand for leather during the past week has been scarcely so active as in the earlier part of the month. The

fresh supplies are still limited. At Leadenhall, on Tuesday, prime heavy English butts were again scarce, and there is also a small supply of good heavy foreign butts. No alteration can be quoted in prices.

METALS.—Business is little changed in metals. The American accounts coming better is favourable, but as yet no improvement is developed. Copper is fairly maintained, but the foreign, which is accumulating in stock, must shortly find an outlet, to the detriment of the market it is to be feared. Iron continues to be sadly depressed in demand for manufactured, whilst Scotch pig is rather improving. Tin is still heavy on the market. Spelter keeps steady. Lead unchanged. Tin plates extremely depressed.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	39	3
Fat by ditto	3	1½
Yellow Russian	41	0
Melted stuff	42	0
Rough ditto	25	6
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

MONDAY, Jan. 28.—The total imports of foreign stock into London, last week, amounted to 589 head. In the corresponding period in 1860, we received 2,424; in 1859, 1,837; in 1858, 650; in 1857, 1,044; in 1856, 710; and in 1855, 1,407 head.

There was a very limited supply of foreign stock on sale here this morning, and the demand for it ruled steady, at very full prices. The arrivals of beasts fresh up from our own grazing districts were seasonably good as to number, and for the most part in fair saleable condition, especially those from Norfolk. For all breeds we had a steady demand, at prices fully equal to those of Monday last. The general top figure was 5s per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire we received 1,500 Scots, crosses, and Shorthorns; from other parts of England, 1,000 various breeds; from Scotland, 170 Scots and crosses. No stock reached us from Ireland. We were again scantily supplied with nearly all breeds of sheep; but they reached us in more saleable condition. The mutton trade was firm, at fully last week's currency. The best old Downs were worth quite 6s per 8 lbs. Calves—the supply of which was limited—sold readily at extreme rates—a very superior calf being worth 5s 6d per 8 lbs.

SUPPLIES.

	Jan. 30, 1860.	Jan. 28, 1861.
Beasts	3900	3250
Sheep	18390	13200
Calves	168	75
Pigs	250	380

THURSDAY, Jan. 31.—Our market, to-day, was well supplied with beasts, which moved off heavily, at a decline in the quotations of 2d per 8 lbs. The best Scots, &c., realised 4s 10d per 8 lbs. Sheep—the show of which was moderate—were in steady request, at very full prices. The supply of calves was limited, and the veal trade was somewhat active at 2d per 8 lbs more money. The best calves were worth 5s 8d per 8 lbs. We have to report a slow sale for pigs and milch cows, at last currencies.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	0	3	4	Prime Southdown sheep	5	10	6	0

Total supply—Beasts, 1,280; sheep and lambs, 3,120; calves, 115; pigs, 240.
Foreign supply—Beasts, 250; sheep, 410; calves, 63.

HOP MARKET.

BOROUGH, Monday, Jan. 28.—We continue to experience a steady trade for yearlings and good samples of earlier date, but for the new growth the demand is very limited. Mid and East Kents, 100s, 160s, 240s; Weald of Kents, 60s, 140s, 200s; Sussex, 60s, 120s, 160s; Yearlings, 100s, 147s, 190s.

FRIDAY, Feb. 1.—The demand for hops continues active, and prices are fully maintained.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Jan. 28.—During the past week the arrivals, both coastwise and by rail, have been numerous, in consequence of which prices have undergone a further reduction. The following are this day's quotations:—Yorkshire Flukes, 155s to 165s; Lincolnshire Regents, 115s to 120s; Dunbar red soil ditto, 160s to 170s; North Berwick ditto, 120s to 130s; Perth, Forfar, and Fife ditto, 110s to 120s; ditto, ditto, ditto Reds and Rocks, 105s to 115s; French whites, 90s to 100s; Belgian ditto, 85s to 90s; Dutch ditto, 80s to 85s per ton.

WATERSIDE, Thursday, Jan. 31.—There has been a considerable increase in the arrivals of home produce at this market since our last report, which have generally come to hand in fair condition. The market, however, being well supplied, has caused trade to become less active at the following rates:—York Flukes, 120s to 140s; Scotch Regents, 110s to 130s; ditto Cups, 110s to 120s; ditto Rocks, 110s to 120s; Dunbars, 140s to 160s per ton.

HAY MARKETS.—THURSDAY.

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 12s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 8s to 1*l* 18s per load. A dull trade.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 12s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 2*l* 0s per load. A heavy demand.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 12s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 10s to 2*l* 0s per load. A heavy sale.

COAL MARKET.

FRIDAY, Feb. 1.—Walls End Hetton 21s 3d—Walls End Lambton 20s 9d—Walls End Stewart's 21s 3d—Walls End South Hetton 21s 3d—Walls End Braddyls Hetton 20s 6d—Walls End Russell Hettons 20s 6d—Walls End Heugh Hall 19s 3d—Walls End Cassop 19s 9d—Walls End Kelloe 20s 3d—Walls End Harton 18s 9d—Bell's Primrose 15s—Craghead Steam 16s 3d—Merthyr Dare 22s—Bebside Hartley 17s—Davidson's Hartley 17s—Howard's Hartley 17s. 80 ships at market.

LIVERPOOL MARKETS.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 1.—There was a fair attendance at to-day's market. Wheat, fine sorts rather better inquiry. Prices 1d to 2d dearer than on Tuesday. Other sorts unchanged. Flour firm. Indian corn steady, at 37s 9d for mixed, and 39s 6d for Galatz. Beans without change. Oats and oatmeal slow of sale.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 1.—The business in manufactured iron, during the past week, has been on a limited scale without much change to note in prices. In Scotch pig iron, there has been rather more animation, and the tendency to further decline has been arrested. Little export inquiry for copper, the price of which is nominally without change. Lead also continues inactive. The market for metals generally is very quiet.

The Gazette.

TUESDAY, Jan. 29.

BANKRUPTCIES ANNULLED.

J. Fell, New Compton street, Soho, currier.
F. Sage and P. Panter, Hatton garden and Liquorpond street, builders.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 19th of January amounted to 454,410*l*, and for the corresponding week of last year to 455,330*l*, showing a decrease of 920*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 192,487*l*, and for the corresponding week of 1860 to 200,302*l*, showing a decrease of 7,815*l*.

NORTH-EASTERN.—The directors of this company have decided on recommending the declaration of the following dividends for the half-year ending the 31st of December last—namely, on the Berwick stock at the rate of 5¼ per cent. per annum; on the York stock at the rate of 5 per cent. per annum; and on the Leeds stock at the rate of 3 per cent per annum.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Jan. 28.—The railway market was firm during the greater part of the day, but after official hours showed a tendency to reaction. Several stocks, however, left off slightly higher than on Saturday, especially North-Eastern descriptions, and Lancashire and Yorkshire. Sheffield also improved 1 per cent. Great Northern and South-Eastern were flat, particularly the former. In the colonial market the announcement of the new loan caused increased depression in Indian guaranteed stocks. Great Western of Canada were again higher, at 11 to ¼. Grand Trunk stock closed at 22 to ½; the ordinary bonds, 45 to 47; and the preference, 72 to 74. Foreign descriptions were generally inactive. In miscellaneous descriptions, Madras Irrigation were quoted lower. Ocean Marine Insurance shares were very heavy in the morning, and receded to 3 to ¼ premium, but afterwards recovered to 3½ to ¾.

TUESDAY, Jan. 29.—The railway market opened heavily this morning, but improved on the advance in Consols. There was, however, little animation in this department, owing to the uncertainty respecting future traffic, and the transactions of the day were mostly in connection with the fortnightly settlement now in progress. The stock chiefly supplied was Midland, while Great Northern was scarce and in demand for transfer. Compared with yesterday, several descriptions showed an advance, especially Caledonian, Great Northern, and Lancashire and Yorkshire; Berwick was also better on the announcement of the dividend. In the colonial market there was a rise in Atlantic and St Lawrence, other stocks being steady. Foreign railways showed a stronger tendency, particularly French. South Austrian and Lombardo-Venetian also improved, the final price being 1 to ¼ dis. American securities were firm. Illinois Central shares advanced to 29½ to 28½ dis., and New York and Erie to 29½ to 30½. Mines were quiet, but occasionally higher. Joint stock banks were rather dull.

WEDNESDAY, Jan. 30.—The railway market opened firmly; Lancashire and Yorkshire improved on a more favourable traffic return than had been expected, but towards the close a partial relapse took place. Great Northern continued scarce for transfer, and advanced 1 per cent. Caledonian was also 1¼ per cent. higher; Sheffield, Midland, Lancashire and Yorkshire, Great Western, and Berwick, ½ to ¾; and London and North-Western and York and North Midland, ¼. The quotations, however, were for the new account. The further progress of the settlement showed an increased supply of Midland stock. Colonial descriptions were fairly supported, and a further rise was established in Atlantic and St Lawrence. Great Western of Canada shares were dull, at 10⅞ to 11¼. In the foreign market there was a reaction in Lombardo-Venetian to 1¼ to 1 dis. The bargains in American railway securities were confined to the shares in the Illinois Central and New York and Erie, which at one period had experienced an improvement, the former touching 28 dis. The closing prices, however, were respectively 30 to 29 dis. and 29½ to 30½, showing heaviness. Mines were in little demand, and occasionally exhibited a decline. St John del Rey, however, and United Mexican advanced. Joint stock banks closed without change.

THURSDAY, Jan. 31.—The railway market improved in the morning, the published traffic returns being more favourable than had been expected, and after a slight relapse closed with a steady tendency. Great Northern and Midland were the firmest, leaving off about 1 per cent. higher. London and North-Western, Lancashire and Yorkshire, Great Western, South-Eastern, Caledonian and Sheffield, also advanced ¼ to ⅝ per cent. In the colonial market, Indian guaranteed stocks were firmer. Great Western of Canada shares and Grand Trunk also improved, the latter leaving off at 22¼ to ¾. Foreign descriptions were in rather better demand, and Lombardo-Venetian recovered to 1 to ⅝ dis. In American railway securities, Illinois Central shares advanced 2 dols to 3 dols, and New York and Erie 1 dol. Mines were again rather flat.

FRIDAY, Feb. 1.—The market for British railway stocks continued to improve. Midland advanced ⅝ per cent.; Lancashire and Yorkshire ½ per cent.; and many other descriptions about ½ per cent. The amount of business was moderate. London and North-Western stock was quoted 100¼ to ¾; Great Western, 73 to ½; Midland, 133½ to 134; Lancashire and Yorkshire, 115¾ to 116½; Caledonian, 98 to ½; South-Eastern, 86½ to ⅝; and Great Northern 113 to 114. Grand Trunk of Canada Railway stock improved. In the mining share market, the principal feature has a less active demand for United Mexican, at 3⅜.

FORD'S EUREKA SHIRTS.—Patterns (post free) of the New Fancy Flannel, including the various mixtures in the new colour called MAGENTA, a perfectly fast colour, although so brilliant, and may be had woven with Black, Drab, or Grey, suit various tastes.

RICHARD FORD, 38 Poultry, London.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

SOCIETE FRANCAISE DE BIENFAISANCE.—The Twentieth Annual Grand Ball for the benefit of this Institution, will take place at the Hanover Square Rooms, on Monday, the 11th February. Tickets for Gentlemen, 14s; and for Ladies, 7s (including refreshments), to be had of all music-sellers, and at the Society's office, 32 Sackville street, Piccadilly; where donations and subscriptions will be thankfully received.

CHUBB'S PATENT SAFES —the most secure again Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

CHIMNEY-PIECES, TOMBS, MONUMENTS, FONTS, &c.—EDWARDES BROTHERS and BURKE, 17 Newman street, Oxford street, London, W., beg to inform the nobility and gentry that they manufacture at their own establishments, in Italy and Belgium, as well as at the above address, every description of marble work, at the lowest possible prices. Their galleries contain specimens of all foreign and British marble quarried, in Chimney Pieces, from 25s to 300 guineas each; Monuments and Tablets, from £5; Head and Foot Stones, from 30s each.—Sole agents to the Invernottie Granite Company.

TRADE 8/8 MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark, and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

SAUCES.—CONNOISEURS have Pronounced LEA and PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea and Perrins' name on Bottle, Label, and Stopper.

Sold by Crosse and Blackwell, London, and all respectable Oilmen and Grocers. Sole manufacturers—Lea and Perrins, Worcester.

HEAL AND SON'S EIDER-DOWN QUILTS, from One Guinea to Ten Guineas. Also GOOSE DOWN QUILTS, from 8s 6d to 24s. List of prices and sizes sent free by post. Heal and Son's Illustrated Catalogue of Bedsteads and Priced List of Bedding, also sent post free.

196 Tottenham Court Road, W.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Dr Lankester, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Sir Henry March, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure oil, not likely to create disgust, and a therapeutic agent of great value."

Dr Lawrance, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed"

Dr Stavely King, Physician to the Metropolitan Free Hospital.—"I have employed Dr de Jongh's Oil with great advantage in cases of mesonteric and pulmonary tubercle, and in the atrophic diseases of children."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE AGENTS,

ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition, NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills"—TIMES.

Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.

London: J. Churchill, and to be had of all booksellers.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either from the publisher, J. Allen, 20 Warwick-lane; or from the author's address, 17, Harley street, Cavendish-square, London.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.

DR LA'MERT ON SPERMATORRHŒA; an Original Essay on the Treatment and Cure of Nervous and Physical Debility, resulting from pernicious habits contracted in youth, excesses in manhood, or residence in tropical climates. With cases and engravings from life, representing the various organs in health and disease.

CONTENTS.

SECTION I.—The Physiology of the Generative Organs.

SECTION II.—Puberty — Manhood — The Morals of Generative Physiology—True and False Morality.

SECTION III.—Marriage in its Moral and Physical Relations—Happy and Unhappy Unions—How to secure Healthy Offspring.

SECTION IV.—Youthful Abuse—The Secret Causes of Nervous Debility, Impotence in Man, and Sterility in Man and Woman.

SECTION V.—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences—The Sterility of Age,

Dr LA'MERT, Honorary Member of the London Hospital Medical Society, Registered Licentiate of the Royal Society of Apothecaries, &c., is the only legally qualified practitioner who, for 20 years, has devoted his attention to the treatment of these disorders, which are so frequently aggravated by the unskilfulness of ignorant empirics, either self-styled physicians or surgeons, sometimes assuming names of eminent medical men, &c. At home for consultation daily, from Ten till Two, and from Six till Eight.

37 Bedford square, London.

TO THE NERVOUS AND DEBILITATED.

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.

CHAPTERS V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion.

Mr CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by J. Allen, 20 Warwick lane, Paternoster row, and Mann, 39 Cornhill, London.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

DR BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Billous and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates, Sold by Buchan and Co., Patentees, 22 Newman street, Oxford street, London, W., and all chemists in town and country. Prices:—Pills, per box, 1s 1½d, 2s 9d, and 11s; Ointment, per pot, 1s 1½d and 2s 9d; Essence, per bottle, 11s, or family bottle containing four times that quantity, 33s. Agents:—Barclay, 75 Farringdon street; J. Sanger, 150 Oxford street; Hannay, 63 Oxford street; Butler, 4 Cheapside; Hooper, 43 King William street, London Bridge; B. Howden, 78 Gracechurch street; Prout, 229 Strand, &c., &c.

Just published, gratis, or post free for one stamp, to be had of all agents, and at 22 Newman street, Extracts from Dr Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton cresent, Tavistock square, London, W.C.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24½ LIME STREET.

PIANOFORTES.—CRAMER, BEALE, and CO. Every description on sale or hire, New and Second-hand. Lists gratis, post free.—201 Regent street.

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d each, at most of the respectable retail houses in London; by the appointed agents in the principal towns in England; or wholesale at 8 Great Windmill street, Haymarket.—Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

RIMMEL'S PERFUMED VALENTINE of the LANGUAGE of FLOWERS, beautifully illustrated, price 1s; by post for 14 stamps. Rimmel's new Perfume for the ball-room, the Magenta, price 2s 6d. Sold by all the trade.—Rimmel, Perfumer to Her Majesty, 96 Strand, and Cornhill, London; and at 17 Boulevard des Italiens, Paris.

VOLUNTEER PIPE.—RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

---

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

KEATING'S COD LIVER OIL. Just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within he reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

HEALTH AND HAPPINESS for the NERVOUS and DEBILITATED.—The proprietors of the Birmingham Institute of Anatomy desire to make known an infallible means of self-cure for the nervous, debilitated, &c., and will forward the same gratuitously on receipt of a stamped directed envelope.—Address "To the Secretary, Institute of Anatomy, Birmingham."

FREEDOM FROM COUGH IN TEN MINUTES is insured by DR LOCOCK'S PULMONIC WAFERS. "Sir,—Will you be so good as send by David Miller one 11s box of Locock's Pulmonic Wafers. You need not send any smaller ones, for many spoons in one dish soon consume the contents. God bless Dr Locock for his invaluable medicine." The above true copy from J. Staley, a collier in Greenburn, was sent to me J. Freeland, Druggist, Bathgate. DR LOCOCK'S PULMONIC WAFERS give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists.

Second Edition, price 2s 6d, post free for 30 stamps,

TOOTH-ACHE: ITS CAUSES, and a New Painless Method of Cure (with as much certainty as water quenches thirst). Teeth cured by this Method will never ache again, and thus prevent the necessity of the painful operation of extraction. By THOMAS HOWARD, Surgeon Dentist to His Grace the Archbishop of Canterbury, 17 George street, Hanover square, London.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par for the remainder (£990,000) of the sum of £1,500,000, required to complete the total amount which the Company has the power to borrow on Debentures not convertible into shares.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years, from the 15th December inst., transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice, the bonds will be paid off at the expiration of the first five years on presentation at the Bank of England.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.

No scrip receipt or bond will be issued for a less sum than £50.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's Walk, New Broad street, London, Jan. 22, 1861.

CEYLON RAILWAY COMPANY.

—The Legislative Council of Ceylon having, on the 8th December last, adopted resolutions on the railway question, the third of which resolutions is as follows:—"That the Council are of opinion that it would be expedient, with a view to the termination of the engagements with the Ceylon Railway Company, that the said Company should be repaid the whole of its paid-up capital with the interest due thereon, the Ceylon Governments assuming all the property, rights, and liabilities of the Company as proposed by the Directors;" and Her Majesty's Secretary of State for the Colonies having, by a letter of the 23rd instant, requested the Directors to "ascertain and inform him, with as little delay as possible, whether the Company are prepared to accept the offer of the Ceylon Government to annul the contract and pay off the shareholders, as conveyed by the third of the Council's resolutions:"

Notice is hereby given, that an Extraordinary General Meeting of the Shareholders of the Ceylon Railway Company will be held at the Company's offices, 9 Broad street buildings, London, on Thursday, the 14th day of February next, at 2 o'clock in the afternoon precisely, for the purpose of taking into consideration the said resolutions of the Legislative Council and the said letter of the Secretary of State, and of passing such resolutions, and giving such instructions and powers in relation thereto as the meeting shall think fit.

The Transfer Books will be closed from Feb. 7 inclusive, until immediately after the meeting.—By order of the Board, G. E. COOPER, Secretary.

9 Broad street buildings, London, Jan. 24, 1861.

ROBERT COCKS AND CO.'S LIST OF NEW MUSIC.

Mason, "Lord of all power and might" (Collect for the seventh Sunday after Trinity); 2, Naumann, The City of Perfection, "Glorious Things;" 3, Harwood, The Dying Christian to his soul, "Vital Spark;" 4, Dr Arne, "The Hymn of Eve;" 5, Mr P. King, Eve's Lamentation, from the oratorio, "The Intercession;" 6, Maden, "Before Jehovah's awful throne." N.B.—Contents of books 2 and 3 gratis and postage free. The three books (solo arr.), in one Vol., bound in limp cloth, 12s.

London: Robert Cocks and Co., 6 New Burlington street, Regent street, and all musicsellers.

KEATING'S COUGH LOZENGES.

—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

MADRAS RAILWAY COMPANY.—

Fourth Extension Shares, £15 per share paid.—Notice is hereby given, that in pursuance of a resolution of the Board of Directors, the proprietors of Fourth Extension Shares (£15 paid) in the Madras Railway Company are required to pay the Final Call of £5 per share on each of their respective shares, on or before the 26th day of February instant, at the Union Bank of London, 2 Princes street, in the City of London.

Notice is hereby further given, that interest at the rate of £5 per cent. per annum will be charged on all Calls remaining unpaid after the day above mentioned; that the proprietor whose calls are not paid on or before the day named will further incur a loss of interest on the amount called upon each Share, for the period intervening between the 26th day of February aforesaid and the date at which the Company are entitled, under the contract, to make the next payment into the treasury at the India Office on account of the Capital; and that if default be made in the payment of this Call for one calendar month after the 26th day of February aforesaid, the Shares in respect of which default is made will become liable to forfeiture under the Company's deed of settlement.—By Order of the Board,

JAMES WALKER, Managing Director.

33 New Broad street, E.C., 1st Feb., 1861.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are now prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest, upon notice being given by him twelve months previous to the expiry of the first term. Failing such notice, the Debentures will be paid off at the expiration of the first five years.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the limited amount, £194,000, which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into the Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, upon giving notice at any time before the Debenture becomes payable, of converting it into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London, 1st January, 1861.

Wheatstone and Co., 20 Conduit street, Regent street, W.

JULLIEN FUND.

Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same time afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchel	Mr W. Duncan Davison
Mr W. R. Sams	Mr Jules Benedict
Mr Thomas Chappell	Mr A. Blumenthal

HONORARY TREASURERS.

Mr John Mitchell, 33 Old Bond street
Mr T. Chappell, 50 New Bond street
Mr W. R. Sams, 1 St James's street

North and South Carolina. 12. Kentucky, &c. 13. Missouri, &c. 14. Georgia, &c. 15. Alabama, &c. 16. Mississippi, &c. 17. Texas, &c. 18. The Western States, California, &c. 19. Central America and West Indies. 20. Map showing the communication between Europe, North America, and the Pacific. And an Extra Map of the United States, showing the Free and Slave States, and Unorganised Territories.

"Complete as any Englishman can need."—EXAMINER.

"The best Atlas of North America extant."—NORTH AMERICAN REVIEW.

Edinburgh: A. and C. Black. London: Longman and Co.

Recently published, price 25s,

AN ATLAS OF THE UNITED STATES, BRITISH and CENTRAL AMERICA,

from the most Recent State Documents, Marine Surveys, and Unpublished Materials, with Plans of the Principal Cities and Sea Ports, and an Introductory Essay on the Physical Geography, Products, and Resources of North America. By Professor H. D. ROGERS, of Boston, U.S., and A. KEITH JOHNSTON, F.R.S.E., Geographer to the Queen, Edinburgh. On Twenty-nine Plates, Engraved in the Best Style, and fully Coloured.

The scale of the Maps—54½ miles to an inch—is uniform throughout, and a great amount of New Matter, not found in other Maps, has been placed at the disposal of the Authors by the American Government. The Map of the Free and the Slave-holding States of the Union, with the Tables in the Introduction, will, it is hoped, convey a clear understanding of the great question of Slavery in its Geographical and Statistical Aspects; and the Plans of Cities and Sea Ports will be by many considered a welcome addition to the Topographical Maps.

London: Edward Stanford, 6 Charing cross, S.W.

Now ready, price 1s, the February number of

20,000 Mink	And Sundry Furs.

GOAD, RIGG, and CO., Brokers, 17 Mark lane.

A GENTLEMAN, 36 years of age, having considerable experience as Bookkeeper and in the general duties of a Counting House, wishes for a Situation. Is well acquainted with the German language, and can give first-class references. —Address A. B., care of Messrs Bowles and Sons, George street, Mansion House.

MANUFACTURING BUSINESS.—An Excellent Investment.—For Disposal, in consequence of the proprietor retiring from the trade, a very desirable Manufacturing Business in London, established about 16 years, and yielding a net profit of a £1,000 a year. No previous knowledge required, and a capital of £2,500 to £3,000 will purchase and amply conduct the business.—Particulars of Messrs Salter and Rossiter, 17 Abchurch lane, E.C.

TO BANKERS, MERCHANTS, MANUFACTURERS, &c.—Wanted by a thorough man of business, aged 30, in whom the most implicit confidence may be placed, a Situation of trust and responsibility. He is fully competent to assume the management of a Counting House or to take charge of a set of books. The most unexceptionable references, extending over a period of fourteen years, can be given.—Address A. Z., care of Mr. Burnaby, Mitre Court, Milk street, Cheapside.

TO SMALL CAPITALISTS.—ADVANTAGEOUS OPPORTUNITY.—A compact London Brewery to be disposed of, offering great advantages to a Gentleman of energy and business habits, commanding from £2,000 to £4,000. These premises are altogether most complete, and conveniently situated, and adapted for carrying on a snug and profitable business. Principals only will be treated with.—Address Mr John Lilwall, Mercantile Agency, 6 Old Fish street, Doctor's Commons, E.C.

TO CAPITALISTS.—A GOOD opening now offers for any one wishing to enter the wholesale Provision Trade. Good premises, with bacon stove and every convenience. Any one with from £2,000 to £3,000 would find this an excellent opportunity of employing it to advantage. The advertiser (for want of capital) is unable to carry it on, but, having a thorough knowledge of the business, would be willing to enter into an arrangement with the purchaser as manager.—Address to A. B., 10 Telegraph street, Moorgate street, E. C.

A GENTLEMAN, FULLY competent to undertake the Correspondence, and Financial or General Superintendence of a Mercantile House, is desirous of an Engagement as Partner or otherwise; if as a partner, he could contribute a small capital; and having been connected for many years with a house of the highest importance, he is well acquainted with the various descriptions of textile fabrics required in the home trade, the American and other foreign markets, and with the mercantile customs and usages there prevalent.—Apply, by letter only, to A. Z., care of Messrs Martin, Thomas, and Hollams, Commercial chambers, Mincing lane, E.C.

PARTNERSHIP.—A Gentleman, under 40 years of age, and accustomed to Mercantile Business, desires a Partnership in the City.—Apply to Edwards and James, 18 King street, Cheapside.

PARTNERSHIP WANTED.—A Gentleman with a capital of £6,000 to £8,000, wishes to meet with a Partnership in a business where his time and capital could be profitably employed. A business of a manufacturing nature would be preferred. —Apply to No. 5 X. M. Y., Post Office, Aberdeen, N.B.

PARTNERSHIP.—A GENTLEMAN who perfectly understands the management of a lucrative Manufacturing Business, in which quick returns yielding a profit of 20 to 25 per cent. can be made with safety, is desirous of meeting with a Partner who can command a capital of £5,000. The business is one in which any Gentleman might engage with profit and comfort. The highest references given and required. —Address A. Z., care of Messrs Lowe and Oliphant, 47 Threadneedle street, E.C.

PARTNER WANTED.—Wanted, a Partner in an old-established Business, in the Midland Counties. The business has been carried on for nearly twenty years by the Advertiser, during which time large profits have been realised, which have been invested in first-rate freehold premises, and otherwise in increasing the plant and stock. The demand has however become so extensive, that the present capital invested is unequal to supply it, and a Partner is wanted who can add a capital to the business equal to that already employed therein. No one need apply who cannot command from £8,000 to £10,000. First-rate references to City Houses, and an investigation of the books by a Professional Accountant offered. —Apply to Messrs Austen and De Gex, Solicitors, 4 Raymond buildings, Gray's inn.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

No. 8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, Esq., DEPUTY-CHAIRMAN.
FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December 1861, should, in order to enjoy the same, make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without imparting to the recipients the risk of copartnership, as is the case in mutual societies.

To show more clearly what these bonuses amount to, the three following cases are put forth as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security for the payment of the policy when death arises; in addition to which advantages, one-half of the annual premium may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit the policy.

The Assets of the Company at the 31st December, 1859, amounted to £690,140 19s, all of which has been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

Immediate application should be made to the Resident Director, 8 Waterloo place, Pall Mall.

By order, P. MACINTYRE, Secretary.

THE STANDARD LIFE ASSURANCE COMPANY.—Established 1825.

The first Division of Profits took place in 1835, and subsequent Divisions have been made in 1840, 1845, 1850, and 1855.

The next Division will be declared in 1861, when the amount can be added to each Policy, its value taken in Cash, or applied to the reduction of future Premiums at the option of the Assured.

Accumulated Fund ..... £1,800,000.
Annual Revenue ..... £300,000.

The Company purchases its Policies on equitable terms, and grants Loans to the extent of their value at a moderate Rate of Interest.

Forfeited Policies can be revived within Thirteen Months of lapsing, on certain conditions.

Policies of Five Years' duration are eligible for admission to Select class of Assurance, which includes Free Residence in any part of the world.

One of the Medical Officers attends at the London Office daily at half-past One o'Clock.

WILL. THOS. THOMSON, Manager,
H. JONES WILLIAMS, Resident Secretary.

LONDON: 82 King William street, City.
EDINBURGH: 3 George street—(Head Office.)
DUBLIN: 66 Upper Sackville street.

THE IMPORTANT FREEHOLD and COPYHOLD PREMISES known as the WHITECHAPEL DISTILLERY.

MESSRS FULLER AND HORSEY

are instructed to SELL by AUCTION (unless previously disposed of by private contract), on MONDAY, March 18, at 11 for 12 precisely, on the Premises, in Two Lots, the highly important FREEHOLD and COPYHOLD PROPERTY well known as the WHITECHAPEL DISTILLERY, the property of Messrs Smith and Co. The site occupied is about three acres, covered with buildings of the most substantial character, arranged in the most perfect manner for the purposes of the distillery business, and capable of producing 1,500,000 gallons of spirit per annum. The premises are readily convertible to the purposes of a brewery, or any large manufacturing establishment. The property is situate in Buck's row, a wide thoroughfare in Whitechapel, within a few paces of the London Hospital. The buildings are entirely and securely enclosed by lofty walls. There is a most commodious residence for a principal, finished in the best taste. The manufacturing premises consist of a block of buildings of great extent, occupying the central portion of the yard, accessible by carts or waggons on all sides, and comprising—1. The Brewhouse: a substantial, lofty, ground-floor building, with basement, brewer's room, men's room, sitting room for revenue officers, and store rooms. 2. The Cooler-house: a lofty building of three floors, strongly timbered on iron columns, with lantern lights in the roof, and folding shutters. 3. The Back Rooms, two in number. 4. Yeast-house. 5. A deep Artesian Well, affording a nearly inexhaustible supply of pure liquor. 6. The Mill, substantially built of brick, of four floors. 7. The Old Mill, a brick building of three floors. 8. Steam-engine House, Boiler-house. 9. The Still-house. Surrounding the main building are various accessory erections, including the spirit store, of one lofty ground floor, with dry basement, loop-hole doors, offices for clerk, &c. A most substantial brick building of three floors, strongly timbered on iron columns, used as a joiners' shop and stores, a steam-engine house, boiler house, bricklayers' shed, piggeries, fire-engine house, and surface well steened; an extensive range of brick-built workshops for carpenter, blacksmith, millwright, and cooper, beer-cellar, small brew house or scalding house, and grain shed. The large and commodious yards are paved throughout with granite. Approached from a separate entrance are the duty-free spirit warehouse, a lofty ground-floor building, store for methylated spirit, a brick building adjoining, of two floors; a paved yard enclosed, containing warehouse of two floors, next Buck's row, and sundry other conveniences: also a very superior range of counting-houses, of two floors and basement, partly fitted as a dwelling-house. —May be viewed, by cards only, which may be had of the Auctioneers. Printed particulars are in course of preparation, and, with plans, may be obtained in due time of Messrs M'Leod, Stenning, and Watney, solicitors, London street, E.C.; of Messrs. Tennant and Darley, solicitors, 4 Raymond buildings, W.C.; of Messrs Bockett, Son, and Barton, solicitors, 60 Lincoln's inn fields; of S. Lowell Price, Esq., accountant, 5. Gresham street, E.C.; and of Messrs Fuller and Horsey, Billiter street, E.C.

TO INVESTORS.—

Five per cent. interest allowed on Money, withdrawable at Short notice. Undoubted Security. Particulars furnished on application to THOMAS H. BAYLIS, 429 Strand, London.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.
Paid-up capital, £1,260,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.

Threadneedle street, London, March 23, 1860.

The Political Economist.

The Editor of the ECONOMIST *intends to publish a Supplement half-yearly, giving* IN A COMPACT FORM *the Balance Sheets and Directors' Reports of* ALL *the Joint Stock Banks in the United Kingdom, as far as the same are made public, with some account of the most important Meetings of Shareholders.*

THE UNSEEN WORK OF PARLIAMENT.

SOME persons, and even some important organs of liberal opinion, have censured the Programme of the Session as uninviting. It has seemed to them that there is not enough of promise in it. It has seemed to them that so elaborate, and in some respects so cumbrous, an apparatus as the English Parliament should this year do more than pass a few laws of unattractive usefulness. They have wished for something more exciting, and as the subject is very important, it may be as well to examine whether such wishes are reasonable.

We believe that, when all the necessary circumstances are duly taken account of, they are in an extreme degree unreasonable. We believe that the true working of the representative Government very much depends on the fact that the nation is not inclined to require excitement from it. We are confident that if, as has been the case in some foreign countries where the representative experiment has been tried unsuccessfully, the country should ever look on the proceedings of Parliament as an intellectual and theatrical exhibition, no merit in our laws, no excellence in our national character, could save our institutions from very serious danger.

The reason of this is, in truth, plain and familiar. It is not possible that every year should be a constitutional era; and, even if it were possible, it would not be desirable. Large changes in our fundamental institutions are grave tasks: they can only be proposed when the public mind has been thoroughly familiarised with their necessity; when the evil to be remedied is keenly experienced; when the preliminary discussion has been sufficient and effectual. These conditions can rarely be satisfied. Great evils are rare: effectual discussion is slow: the public mind does not readily apprehend anything new. Moreover, a constitution is but a means to an end; it is only important in so far as it is an instrument of good government. No machine can work well if subjected to incessant alteration, and if we impair the efficiency of an institution by the frequency of our innovations, we are sacrificing the end to the means. We are purchasing a satisfactory constitution at the price of a satisfactory government.

The public mind of England is sufficiently familiar with these arguments. We feel from our long experience and from our practical habits that we must not make changes for the sake of a change—that we must know what we are doing when we do so change—that we must regard the Imperial Parliament not as a theatrical exhibition or an intellectual stimulant, but as a practical machine. Perhaps, however, we do not sufficiently bear in mind how much Parliament really does. We have had for many years a vast number of important legislative measures which have occupied exclusive attention. We have not, perhaps, sufficiently thought of the *unseen work* of Parliament, nor adequately considered how needful it is to prevent that work from being impaired by pompous suggestions and by unnecessary attempts at showy legislation.

The first part of the duty of Parliament is the choice of the Cabinet who are to administer the affairs of the country. It is upon the Cabinet, as we all know, that everything which is important in our public business rests and must rest. They are the Executive Committee—the Board of Directors of the English nation: if they administer well, our affairs will be well; and if they administer badly, all our affairs will go wrong. And with the increasing complexity of the world, the difficulty of administration, as well as its importance, is rapidly on the increase. All this is easily comprehended. But on certain occasions it is for the most part overlooked. Because the choice of a Ministry is an occasional act, done once and not repeated for a considerable interval, it is not counted as one of the habitual functions of Parliament, it is not taken account of in reckoning the results of each session. No error, however, could be more complete on this subject. The constant proximity of Parliament is the real force which makes Ministers what they are—which prevents their being arbitary—which prevents their being negligent—which prevents their being eccentric—which ensures their attending to public opinion—which enforces a substantial probity throughout the administration. It may sound like a rhetorical illustration, but it is literally true, that it would be a sufficient account of the laborious sittings of a long session if it were found that by those labours a good Ministry had been kept in for the whole time. Burke said that the end of the British constitution was to bring twelve men into the jury box; it would be truer to say that it was to bring fifteen good men into a dingy room in Downing street.

Again, Parliament has a function of its own which is distinct from legislation, but which in the present state of the world is at least as important. It has an *expressive* function. An immense and most miscellaneous mass of topics are brought before the English nation every year; the stupendous growth of our trade, the extension of our empire, the increase of our philanthropy, the refinement of our public spirit, and an augmented national intelligence, increase these subjects year by year. On all these it has an opinion, and it needs an organ for expressing it. Parliament is that organ. Whatever be the defects in its constitution (and a theorist will find many), it thoroughly expresses the substantial opinion of the average Englishman. Its voice is not the voice of Lord John Russell, nor the voice of Mr Disraeli, nor of Lord Palmerston—nor the expression of any casual individual or of any eccentric idiosyncracy, but of the English nation. It is this which gives it such a singular

efficiency in foreign countries. England *thinks aloud*, and her voice is heard in all the world Nor is it a paradox to say that Parliament performs this expressive function better in consequence of what might at first seem to be its principal defects. We grieve over the commonplace loquacity of ordinary members, and certainly some of it performs no useful purpose and might well be immediately dispensed with, but much of this loquacity is really useful. It shows by the best evidence that opinions so expressed are not the solitary judgments of great statesmen, nor the long-sighted anticipations of forecasting minds, but the average judgments of ordinary men. And for this purpose bad speaking is more effectual than the very best. Mr Gladstone is the greatest orator in Parliament, but there is something which Mr Gladstone is less able to express than any one else, and that is the simple opinion of ordinary men. His reputation for originality is an insuperable obstacle: whatever he says is suspected of being his own. On all occasions if he is cited as a witness to public opinion, the answer is ready, 'Oh, '*that* is Mr Gladstone.' At any rate, no one will impute excessive originality to ordinary members of Parliament: what they say is a nearly perfect test of the average English opinion, for they are themselves excellent specimens of the average Englishman.

It is not, of course, our object to depreciate or to speak lightly of the legislative duties of Parliament. They are so well understood and so obvious, that we are apt to think of them as its only duties. We should expect from Parliament every year, *not* indeed astonishing reforms, *not* statutes that will be an era in the history of our legislation, but an adequate supply of moderately useful measures;—we should expect some business either of actual legislation, or of inquiries that may result in legislation from each session;—but then we must remember that *this* business will have the qualities of *all* business. It will look dull and uninviting; it will administer no excitement; every part of it will be entirely untheatrical. "Tedious usefulness" is said to be "the acme of civilisation;" it certainly is one of the most important functions of Parliament.

THE EFFECT OF THE REDUCTION IN GOVERNMENT SECURITIES HELD BY THE BANK OF ENGLAND.

ALL those who compare attentively the returns of the Bank of England from week to week must have been struck by the diminution in the Government securities held by the Bank during the present year.

	£
On Dec. 26 the Government securities in the Banking Department were	9,540,273
This week they are	8,444,776
Making a difference of	1,095,497

The effect of this remarkable decrease is very well worth noticing. In the first place, it has produced no effect on the active circulation whatever.

	£
On Dec. 26 that circulation was	20,254,689
This week that circulation is	20,534,616

So far, therefore, from these reductions in Government securities by the Bank of England having diminished the active circulation, they have augmented during their progress.

This will not surprise those of our readers who have carefully attended to the principles which regulate the currency. The notes in the hands of the public are regulated by the wants of the public. People keep only as much money in their hands as they estimate to be sufficient to satisfy impending claims upon them; and, except in an indirect mode, which we shall notice presently, the reduction in Government securities by the Bank of England has no effect upon that estimate. On the whole, and speaking broadly, the requirements of the public are scarcely affected by the reduction in the Government securities of the Bank. It is true the Bank may receive notes in lieu of these securities, whether they are sold or pledged; but these notes are in reality taken from its own reserve. The lender or a purchaser draws a cheque on his account with some banker; that banker only keeps such notes in his own till as he finds to be necessary for the working of his daily business; when, as in this case, an extra demand is made upon him, he replenishes his reserve from his own account at the Bank of England. In consequence, the reserve of Bank notes is drawn upon whenever the Bank disposes of its Government securities, and the funds which it receives with one hand, it pays out with the other.

It would be a great mistake, however, to conclude that these operations of the Bank of England are unimportant, or that they have not a sensible and immediate influence on the money market. They have, in truth, two effects deserving of careful attention. In the first place, they reduce the liabilities of the Bank of England, and thereby render the reserve proportionately more efficient, though they do not directly augment its absolute amount. The bankers' balances are one of the most important parts of the private deposits of the Bank of England. When the lender on Consols or the purchaser draws a cheque on his banker, the balance of such banker will be, if all other things remain the same, less by that amount, and in this manner the liabilities of the Bank are reduced rapidly and seriously. The accounts of the last few weeks show this:—

	£
On the 26th December the private deposits were	11,972,295
On the 26th December the public deposits were	7,361,356
	19,333,651

Early in January the dividends were paid, which necessarily causes a large transfer from the account of the State to the accounts of private persons.

This week,

	£
The private deposits are	11,927,130
The public deposits are	4,186,479
	16,113,609

showing a reduction of 3,220,942*l* in the aggregate deposits since the last account in December. This great reduction in the liabilities of the Bank, of course makes their reserve in the Banking Department, which this week is 6,428,601*l*, much more efficient than it otherwise would be.

Secondly, if the Bank of England borrow largely on stock, as has recently been the case, the effect necessarily is to tighten the money market external to the Bank, and thereby keep up the rate of interest there. A new borrower comes into the market, and the demand for money is, therefore, in a corresponding degree increased. Moreover, when the Bank of England has received the money, the means of the banker from whose balance that money has been abstracted are diminished, and the funds, therefore, in the external money market of Lombard street are less than they otherwise would have been. It is probable, indeed, that the banker's balance itself may not bear reduction, but in that case he must call in money from some discount house, or obtain it from some other source, and in consequence the means of "that other source" are in an equal degree diminished.

It is true that the rate of interest will make all persons who have money in the Bank of England anxious to lend it, and thereby the tendency of the operation to raise the rate of interest is to a certain extent counteracted; but in any case this requires time, and in certain critical periods of the money market people are indisposed to withdraw their money from the Bank; and, therefore, on the whole, the immediate effect of the Bank of England's borrowing in the Stock Exchange is a tendency towards a rise in the rate of interest in the Lombard street money market.

There can, we should apprehend, be no doubt that the Bank of England are perfectly right in strengthening their reserve in this way—strengthening it, as we have already explained, not in absolute amount, but in relative proportion. Their duty to the nation is *a duty to their reserve*, and whatever is at any moment the best expedient of protecting that reserve, that expedient it is at that moment their duty to adopt.

We have said that indirectly the sale of Government securities by the Bank has a slight tendency to reduce the amount of notes in the hands of the public. Everything which raises the rate of interest has that tendency. People *review* their estimate of their wants. They content themselves with the absolute minimum which is really necessary, though in ordinary times they allow themselves "a margin" for ease or from negligence. How powerful this force is we learn from the comparative table of the Bank of England

returns which we publish weekly elsewhere. The active circulation for corresponding periods was in—

	£
1859	21,412,098
1860	22,104,875
1861	20,534,616

and the explanation of the great diminution is that

In 1859 the rate of interest was			2½	per cent.
1860	—	—	4	—
1861	—	—	7	—

FOREIGN POLICY OF THE GOVERNMENT AND THE OPPOSITION.

The American crisis has for two or three weeks almost hidden Italy from the public; eye but the debates of Tuesday and Wednesday have once more recalled attention to European questions. Lord John Russell, as was anticipated, has been sharply attacked on the ground of his two celebrated despatches of August 31 and October 27; and has defended himself as he best might. We commented upon them freely enough at the time of their first publication, and we need not repeat our criticism now. Our readers, however, may remember that our animadversions were directed less to the practical conclusions maintained, than to the arguments on which they were based and the language in which they were put forth; and we are glad to see that Lord John Russell defends them now on much safer grounds—on those very grounds, in fact, on which alone, as we then pointed out, they were fairly tenable. It was quite right that he should warn Count Cavour of the danger of encouraging or permitting an attack upon Venetia, and should strongly dissuade him from so rash and questionable a proceeding:—the error was in conveying this warning in such haughty language, and in referring to "English interests in the Adriatic," as if these would be menaced by an attempt to liberate Venetia, and in plainly hinting that such an attempt might oblige England to throw her weight into the Austrian scale. It was quite right that he should announce the conviction of this country that on the whole Victor Emanuel, when he invaded Umbria and Naples, only did what, under the circumstances, was justifiable and necessary:—the error lay in weakening this justification by basing it on grounds far wider than were called for and open to much controversy; by arguing the case upon general rather than on special pleas; and by laying down, in order to cover this one case, principles which would cover a hundred other cases far less clear; and among them, and foremost of them, that very invasion of Venetia which two months before he had so dictatorially and harshly deprecated.

But whatever may be our opinion of the incompleteness of the views on foreign policy entertained by Lord John Russell, and whatever our objection to the manner in which he sometimes gives utterance to those views, there is assuredly enough both in the debates and the despatches given to the world this week, to occasion hearty congratulations that the present Ministers, and not their opponents, are in power. It is not very easy to gather from the speeches of Lord Derby, Mr Disraeli, and Mr Fitzgerald what they would have done or said had they presided over the policy of England; but it is abundantly evident that they would not have urged both upon France and Austria the duty of non-intervention as strongly or as pertinaciously as Lord John has done, and that their moral influence would have been exercised rather against Victor Emanuel than for him. It is evident that amid all his shortcomings Lord John is heartily in favour of Italian liberation and independence, and that his antagonists are not; and this alone would suffice to make us anxious that he, rather than they, should continue to hold the seals of the Foreign Office, and uphold the cause of constitutional freedom and self-government wherever it may come in question. But we confess that several expressions he has used, and the tone which occasionally manifests itself, give us considerable uneasiness as to the downrightness, consistency, and wide statemanship of his possible course in dealing with the complications that are most imminent and most serious. Why—knowing that Italy can only be powerful by being united, and that as *long as she is not powerful*, Austria and France will quarrel for her management and give battle on her plains—he should have preferred to have two Kingdoms in the Peninsula instead of one, is a problem that we cannot solve. Why, too—knowing what the Neapolitan Bourbons are, and describing them so mercilessly and so well as he has done—he should have wished to keep Francis II. on his throne, or dream that he could be kept there permanently, we can only adduce as a marvellous specimen of discrepancy between premises and conclusions. But, perhaps, the most curious thing is that—when all Italy is bent upon unity with all the fervour of passion and all the earnestness of deliberate conviction, and when Lord John himself has done so much on one remarkable occasion to promote this unity—and when this unity has become a *fait accompli*—he, a diplomatist, should think it necessary to inform the world that he regretted it and wished it otherwise. All this leads us to fear that our Foreign Secretary does not see his way as clearly and is not so determined on his future course as, in an impending crisis like the present, would befit the Minister of England.

The case before us may be plainly stated thus:—In a very few weeks the question will be practically asked of Europe—"Shall the Empire of Austria be upheld as it is by external assistance, or shall it be left to its fate, whatever that fate may be?" The Spring, it is certain, cannot pass without *either* Hungary being united to Austria under her old Constitution by free agreement, with all those additional guarantees for the maintenance of that Constitution which past experience has shown to be indispensable;—*or* a general rising of all the Magyar, Croat, and Sclave population, which, however it may go at first, will be an obstinate and terrible civil war; *or*, finally, without a pacific acknowledgment, on such terms as may be fixed, of the complete independence of Hungary. Now, in the first of these cases Hungary will be virtually independent; and in no case, we well know, will she permit a single Hungarian soldier or a single Hungarian ducat to be employed in coercing or retaining Venetia. On the second supposition of an insurrection in Hungary, it is certain that the Venetians will seize that occasion of throwing off the Austrian yoke, and will call in the Italians to their aid—under the sheltering authorisation of Lord John Russell's second despatch. How such a strife would ultimately terminate, if left to the parties immediately concerned, we will not pretend to foretell. But since this formidable crisis can only be averted by a timely sale of Venetia and a concession of all the Hungarian demands (which we can scarcely venture to anticipate), what England wishes to know, and what it most behoves her to decide, is *what, in such crisis, will be the course of the British Government?* Will they take the bold, manly, and consistent line which the whole nation would back them in maintaining, and say:—'Austria twelve years ago trampled out the constitutional liberties of Hungary by the aid of a brother despot. Austria for three times twelve years has done all she could to make her dominion utterly intolerable to Venetia. She must reap as she has sown; she must defend herself as she can; we may not, we ought not, we will not, raise a finger to save her from what she has brought upon herself; nor, as far as our remonstrances and protests can avail, shall any other Power. The struggle must be fought out between herself and her victims. Non-intervention is our principle: we shall preach it as well as practise it in the most earnest and energetic manner, let the consequences be what they may; but if Russia chooses to interfere on the one side, we shall not attempt to dissuade France from interfering on the other—much as we should deprecate such a result.' If they held this language boldly, steadily, and *at once*, we believe there would be no foreign intervention, and probably no civil war. Austria, knowing exactly what lay before her, would be able to calculate her own interests and her own resources, would make the best arrangement she could with Italy and Hungary, and *might* make such an arrangement as would leave her still open to pursue a wise internal policy, and to become a really rich and powerful German State.

But if our Ministers should still cling to the old tradition which proclaimed Austria to be a European necessity; and, in defiance of all arguments and shutting their eyes to all facts, should still fancy that Austria can, *by any artificial and external aid*, be again enabled to recover that power and to exercise those functions which alone saved her from being a European nuisance,—they will be tempted to embark in a line of action in which the nation will not follow them, and in which *success* is simply and obviously hopeless, what-

ever temporary victory may be won. The matter lies in a nutshell. European statesmen want Austria, because they want in that locality a *powerful* Empire, which shall be a check upon France on the one side and upon Russia on the other;—and they fear that if shorn of Hungary and Venetia, she will not be powerful enough for those functions which are her *raison d'être*. True unquestionably:—but we ask, has she been powerful enough to discharge these functions any time during these last twelve years? Is she powerful enough now? Will she be one whit more powerful when she has been propped up by some external aid proffered her by Russia, or granted her by the four great Powers acting in concert? Will she be less strong when Venetia has been surrendered, and when Hungary is independent or quasi-independent than now, when the one is in fury and in chains and the other is in virtual insurrection? In fine, has either Province been a source of strength to Austria since 1848? and can all the Powers of Europe combined devise any plan by which her continued dominion over them shall be made a source of strength? If not, is it not self-evident that to endeavour to keep these Provinces under her yoke, under the idea of making her thereby that powerful Austria we need, is a mere vain and despotic effort to grasp a shadow of which the substance is irrecoverably lost?

THE COURT AND PARLIAMENT OF PRUSSIA.

RECENT events have done much to throw light on the spirit both of the Royal policy and of the popular policy in Prussia,—to throw light upon, and also apparently to develop them in very opposite directions. The communications made both to the English and French Parliament have shown us the Prussian Cabinet withdrawing more and more from that frank reliance on the party of movement which the first acts of the Prince Regent seemed to promise us. And now, at last, notwithstanding the urgent remonstrance of Baron Schleinitz—notwithstanding his assurance that Prussia would not meddle in Italy so long as the Italian movement remained "national, and did not acquire such an extension "as might render active interference necessary by reason "more especially of its reaching, or expressly claiming, any "portion of German Federal Territory"—notwithstanding his assurances that Venetia was too important to Austria, and indirectly to Germany, to allow of its cession being advised by Prussia,—the Chamber of Deputies has succeeded, by a vote of 159 to 146, in carrying as an amendment on the address, that they "do not consider it to be for the "interests either of Prussia or of Germany to place ob-"stacles in the way of the consolidation of the unity of "Italy." A more important step towards the solution of the Venetian difficulty has not been taken since the peace of Villafranca. The stock argument with which all proposals for the Austrian surrender of Venice have been met, has been that the interests of Germany rendered it necessary for Austria to retain this Italian outpost of her Empire. The menacing attitude of Prussia was the excuse of Louis Napoleon for the sudden peace of Villafranca itself. And even English Liberals have not been found wanting to maintain that Austria would be mad and Prussia foolish and short-sighted, if they did not arrest the Italian movement on the Mincio. We have now the authority of the leading nation of Germany for repudiating this position, and for saying that it is the prejudices of the Courts not the interests of the people of Germany, which cause obstructions to be placed in the way of the consolidation of Italian unity. We may remark, in passing, that it is with sincere regret we observe the very different tone of popular sentiment in France. There the ruler is probably less fundamentally opposed to the Italian cause than either his Ministers or his people. No passage in the Emperor's speech was received with so much favour as that expressing his sympathy with the King of Gaeta, and in this respect the sentiments of the French Deputies appear to be shared by all the Liberal party.

But while the feeling of the Prussian people has found out more and more distinctly the natural affinity between the liberal cause in Germany and the liberal cause in Italy, we regret to observe that the Prussian Court appears to have found out more and more distinctly the affinity between the interests of the royal prerogative in Prussia and the imperial or royal prerogatives of the other European Courts. The protest addressed to Sardinia on her entrance into the Roman and Neapolitan States was perhaps to be expected. So conservative a Power as Prussia could not but stigmatize so bold an act as dangerous to the peace of Europe. But we were not prepared to expect that on the annexation of Savoy to France, and the question thence arising as to the mode of preserving the neutrality of Chablais and Faucigny, Prussia would have allowed her old grudge against the Swiss Federation concerning Neufchatel to render her blind to the duties of her position and reluctant to support the strong remonstrances of England. Lord John Russell, we may remember, complained at the time that the other Powers of Europe looked coldly on Switzerland, and were not inclined to sustain England in her demands that France should give some guarantee for the neutrality of Savoy that would be as satisfactory to the Swiss Federation as the arrangement with Piedmont. And the explanations on foreign affairs just laid before the French *Corps Legislatif* prove that Prussia did thus desert England, and, in fact, weakened instead of strengthening our representations on behalf of Switzerland. "While Switzerland," says this document, "whose mode of viewing the matter was shared by "the Government of Her Britannic Majesty, demanded that "the question [of some fresh guarantee for neutrality] "should be discussed in a Conference, the Courts of Austria, "of Spain, and of Prussia judged it desirable that previous "to any meeting of plenipotentiaries, some preparatory con-"ferences between Switzerland and us should have deter-"mined the elements of an understanding." In other words, Prussia voted for leaving Switzerland to fight out the main battle alone with France, without giving that poor little State any aid from the European Powers. But this was not all. Prussia not only wished to leave Switzerland unsupported in the diplomatic contest, but intimated with profound *insouciance* that she thought a matter of so little importance might wait. "The Cabinet of Berlin," the French explanation goes on to say, "even thought—and on this "point it was in agreement with that of Russia—that France "having recognised by official declarations as well as by "the treaty of Turin, the principle of the neutrality of the "Helvetic Confederation, there did not exist any very urgent "(*impérieuses*) reasons for obtaining an immediate agreement. "The new explanations which have taken place not having "had for their result to harmonise the different views, the "question remains open between the Powers;"—and will so remain, doubtless, if "open" means virtually closed, France having absorbed her prey without giving any kind of guarantee for the neutrality of Chablais and Faucigny, and the other European Powers (England alone excepted), with Prussia at their head, having ostentatiously declined to interfere, and even played directly into the hands of France.

We cannot imagine a blinder policy than this of Prussia's. It is her interest to strengthen all the counterweights to French ambition, and here we have her directly weakening one of at least considerable importance. It is still more to her interest to sustain the English foreign policy wherever it is strongly at issue with that of France,—for on England chiefly she must rely for aid if France and Prussia quarrel. And in this instance she has not only thwarted our policy, but gone out of her way to do so. It is evident that popular sympathies in Prussia and England are drawing closer and closer together; but it is also, we fear, evident from the recent disclosures, that the *Government* of France takes more pains to conciliate England, wherever it can do so without a direct sacrifice of aggrandisement, than the present Government of Prussia.

THE BANK OF ENGLAND AND THE CHANCELLOR OF THE EXCHEQUER.

WE give below the correspondence between the Chancellor of the Exchequer and the Bank of England on the subject of the proposed reduction in the charge to be made by the Bank for the management of the National Debt. On the whole, there is little which will require from the public comment or observation. On the one hand, the public are anxious—in the present state of many men's minds very anxious—to save money. On the other hand, the public are anxious to deal with their bankers in a liberal and generous spirit. The matter is one for fair arrangement and equitable bargaining; and such is the nature of the

present arrangement. The country, therefore, will doubtless be satisfied with it.

The sum to be received of Government for the management of the National Debt for the years 1860-61 will be—

	£	s	d
On 600,000,000*l* at 340*l* per 1,000,000*l*	204,000	0	0
On 136,278,362*l* at 300*l* per 1,000,000*l*	40,883	10	2
Total	244,883	10	2
The sum to be hereafter received will be—			
On 600,000,000*l* at 300*l* per 1,000,000*l* £180,000			
On 136,278,362*l* at 150*l* per 1,000,000 20,441	200,441	0	0
	44,442	0	0
Add house-money £4,000			
Management of South Sea Stock 1,579	5,579	0	0
Total sum to be given up	£50,021	0	0

The house-money, it should be stated, was a charge originally made in the year 1694, which has long since merged in the general sum paid for management; and that paid for the South Sea stock was transferred to the Bank on the dissolution of that Company.

The advantages which the Bank and the Government derive from the connection between them are too obvious to need mention or even allusion. The Government are doubtless most troublesome customers, but then they are likewise very good customers. The only question is as to the terms of that relation, and the degree of its remuneration; and as to this in a broad and general view, there does not seem any reason for either to complain.

The following is the account presented in 1857 by Mr Weguelin to the House of Commons, which is in some respects better, at least more likely to be unbiassed, than any calculations made during the present bargain:—

	£
Gross profit on circulation	420,000
Profit on bullion and foreign coin between 20,000 and ...	40,000
Charge for managing the public debt	247,000
	707,000
Less—Expense of circulation £160,000	
Sum paid to Government for the circulation 120,000	
Stamp duty 60,000	
Expense of managing the debt 124,000	464,000
	243,000

Such a charge, in addition to which the Bank has the profit of the Government account, will perhaps be thought by most men of business not under the circumstances extravagant, after the diminution which Mr Gladstone has now made in it.

The Chancellor of the Exchequer is about to make the additional improvement of charging the payments made to the Bank in gross in the public accounts, and taking credit for the receipts from the Bank on the other side as annual revenue. This is too obvious a reform to need remark, and is only carrying out the general principles now adopted in the public accounts—of showing the gross income of the country on one side, and its gross expenditure on the other.

The public are likewise to have some additional facilities in reference to the public debt, as soon as the necessary arrangements can be made.

The following is the correspondence to which we have referred:—

Downing-street, Jan. 31.

GENTLEMEN,—Her Majesty's Government having had under their consideration the following report of Sir Alexander Spearman, Mr Arbuthnot, and Mr Anderson, dated November 1860, on the expenses incurred by the Bank of England in conducting certain duties on behalf of the public in connection with the issue of notes, the care of the public balances, and the management of the National Debt, Government considers that this report should be submitted to Parliament; and it is to be desired that on producing it they should be prepared at once to state and to act upon the view which they take of its contents.

I accordingly proceed to lay that view before you, following herein the precedent furnished by the conduct of my predecessors in office at former periods, and the course most agreeable to the intimate relations which have ever prevailed between the Government and the Bank, and to the character of the weighty duties performed by the Bank on behalf of the State.

I commence by adverting to the two former of the three important subjects opened in this report—namely, the expenses and profits connected with the issue of notes, and with the custody and use of the public balances.

On neither of these subjects do Her Majesty's Government deem it their duty to submit any proposal to Parliament. The profits connected with issue they do not regard as upon the whole a desirable subject for legislation, otherwise than in connection with issue itself. They were so treated in 1844, and they were left upon a footing with respect to any renewal of the question which Her Majesty's Government see no reason to disturb.

In like manner with regard to the advantages connected with the use of the balances. This point was fully considered in the correspondence of 1844, between the Government and the Bank.

Mr Goulburn stated the views of the advisers of the Crown, and reserved the discretion of the State as to a participation in the profits of the public deposits, should they from any circumstances undergo material increase, or reach an extraordinary amount, while the Bank reserves its freedom to consider what its own rights might be in the event of their reduction. The subject was, we think, judiciously handled on both sides. The case contemplated by Mr Goulburn has not arisen, and we propose to leave it in this point also as it was left by the correspondence presented to Parliament in 1844.

I have, however, to subjoin to what I have now stated a qualification of limited extent. The Committee of the House of Commons on Public Moneys, which reported in 1858, recommended the abolition of deficiency bills, and the substitution, in cases of deficiency, of advances in a different and simpler form, together with a change in the basis on which such deficiency was to be calculated.

It is the intention of Her Majesty's Government to propose, in the coming Session, legislation in general conformity with the tenour of these recommendations; but I have mentioned the subject in this place rather with a view to strict accuracy than because it is of any great moment in the adjustment of the pecuniary relations between the Government and the Bank.

With respect to the third and remaining subject, the management of the National Debt, the Government conceive that the time has come when they may justly call upon Parliament to reconsider the rates of charges fixed by the Act of 1808, and still substantially in force, although, as matter of account, reduced by the payments which the Bank makes to the State to the extent of 188,078*l* per annum in respect of composition for stamp duties and of profit on the issue of notes.

The Act of 1808 assigned to the Bank, as a remuneration for its charges and its responsibilities in the management of the National Debt, an annual sum of 340*l* per million up to the limited 600,000,000*l*, and an annual sum of 300*l* per million beyond that *limit*, with a proviso for a rate of payment of 450*l* per million, in case the debt should at any time stand less than 400,000,000*l*. It is also provided that Terminable Annuities should be reckoned at 25 years' purchase.

Referring to the several communications which I have had the honour of holding with you, I shall waive all argument upon this subject, and shall simply proceed to state the particulars of the changes which the Government think may reasonably and advantageously be introduced into the subsisting arrangements.

I. We propose to ask Parliament to enact that a new plan shall take effect from the commencement of the next financial year, and shall remain in force for 25 years certain.

II. The method of set-off by which the Bank gives credit on account of profits of issue and of stamp duty composition to the State, and deducts the amount so credited from its charge from the debt, was in conformity with the system under which the public revenue was managed and accounted for at the date of the subsisting arrangements. But in 1854 an Act was passed which provided for the payment into the Exchequer of the gross revenue of the State. Agreeably to the spirit of that Act, Her Majesty's Government are of opinion that the sum of 188,078*l* allowed by the Bank should no longer stand as a deduction from its charge against the public, but that the sum of 60,000*l*, being the composition for stamp duties, should be paid to the Department of Inland Revenue, and the sum of 128,078*l*, being the allowance out of profits of issue, should be paid to the Exchequer as part of the miscellaneous revenues of the country. The charge for the management of the debt would then stand as a separate and distinct charge, and would be defrayed under an Act for the purpose out of the Consolidated Fund.

III. It seems evident that the valuation of Terminable Annuities is by much too high. A public annuity granted for 99 years would be worth something more than 25 years' purchase at its inception; but its value would descend in a vanishing series to zero, and the mean value of it would probably lie between 12 and 15 years. Annuities granted for shorter terms would represent subjects for commercial dealing of proportionably narrower scope. And the comparatively limited nature of the market for these annuities would make it probable that they would be managed at an inferior cost in relation to their value. Under these circumstances, it is the opinion of Her Majesty's Government that all Terminable Annuities henceforward granted by Parliament should, for the purposes of Bank management, be valued as follows:—

If originally granted for more than 50 years, at 15 years' purchase.

If for any lesser term, at 10 years' purchase.

IV. Before I come to the rate of allowance to be made to the Bank for the management of the debt, I have to propose a somewhat different adjustment of the present graduated plan, with a

view to giving greater fixity to the arrangements now contemplated during the time for which they are to last.

The Bank now receives the greater part of its remuneration—namely, that on 600,000,000*l* of debt, at 340*l* per 1,000,000*l*, and only 136,000,000*l* at the lower rate of 300*l* per 1,000,000*l*. Now, the outlay of the Bank in connection with this branch of its business does not appear to vary greatly with the minor variations in the amount of the debt, whether upwards or downwards. For the bulk of the debt it must keep its premises and the bulk of the establishment.

We therefore propose, and we confidently anticipate the concurrence of the Bank in proposing, that the great bulk of the remuneration should be placed at the first 600,000,000*l* of the debt; or, more specifically, that the rate per 1,000,000*l* not exceeding 600,000,000*l*, instead of, as now, being but slightly greater than the rate above it, should be double that rate.

Thus, the effect of any changes that might be adopted by Parliament in the form of the public debt would become comparatively of small importance to the Bank as a trading establishment.

V. With respect to the rate of remuneration, we propose to introduce a Bill into Parliament which shall fix prospectively as the rate of remuneration the sum of 300*l* for the first 600,000,000*l* of the debt, and of 150*l* for the excess beyond 600,000,000*l*. The payment of 4,000*l* per annum, termed house-money, and the payment of 1,579*l* on account of South Sea Debt, to cease and determine.

The effect of this proposal will be to place the annual remuneration to the Bank on the present amount in round numbers at about 200,000*l* a year. The dormant provision of the present law under which the Bank would be entitled to a payment of 450*l* per million, if the debt under their management were reduced below 400,000,000*l*, is one which Her Majesty's Government see no reason to disturb.

To a proposal of this nature Her Majesty's Government are in hopes that Parliament would be induced to give the sanction of its authority; and, on the other hand, they trust that the authorities of the Bank will deem it one affording to them the just and adequate remuneration for the important services which they have performed, we believe, to the entire satisfaction of the public, under such regulations as are now in force regarding them.

In conclusion, I have to add that it will be eminently satisfactory to Her Majesty's Government, and will also be agreeable to the spirit in which the Bank of England adjusts itself to the demands of commerce and of monetary transactions, if you should be able to assure me of the intention of the Bank to afford increased facilities for business, such as would be supplied by a material contraction of the periods of shutting, if they cannot be dispensed with altogether; and also with respect to the payment of the dividends to such holders wherever the Bank may have branch establishments.—I have the the honour to be, Gentlemen, your very obedient and faithful servant, W. E. GLADSTONE.

To the Governor and Deputy-Governor of the Bank of England.

Bank of England, Feb. 6.

SIR,—We have the honour to acknowledge the receipt of your letter of the 31st ult., which we have submitted to the consideration of the Court of Directors, and they have resolved to recommend to the Court of Proprietors to accept the proposals of Her Majesty's Government, contained in the letter of the Chancellor of the Exchequer, dated the 31st of January, 1861, for regulating the remuneration to the Bank of England for the management of the National Debt for the period of 25 years.

As these proposals involve a very considerable reduction in what has always been regarded as only an adequate remuneration for the services performed and the risks incurred, the Court of Directors desire to express to Her Majesty's Government that they are induced to accede to this reduction mainly because the combined management of the National Debt and of the collateral departments of issue and banking enable them to exercise a very important economy in the labour charge and in the other expenses of bank administration.

The Directors will also be prepared to make arrangements for facilitating transfers in the public funds, by limiting the closing of the books to the shortest period possible; but for this purpose the authority of Parliament will be necessary; and in regard to the payment of dividends to the fundholder at places where the Bank has branches, the views of Her Majesty's Government shall be carried out to the utmost practicable extent.

We have the honour to be, Sir, your most obedient and humble servants, BONAMY DOBREE, Governor.
ALFRED LATHAM, Deputy-Governor.

To the Right Hon. the Chancellor of the Exchequer, Downing street.

OPENING OF PARLIAMENT.

THE QUEEN'S SPEECH.

THE following is a copy of the Queen's Speech, delivered at the opening of the Parliamentary Session on Tuesday:—

MY LORDS AND GENTLEMEN,

It is with great satisfaction that I meet you again in Parliament, and have recourse to your assistance and advice. My relations with Foreign Powers continue to be friendly and satisfactory; and I trust that the moderation of the Powers of Europe will prevent any interruption of the general peace. Events of great importance are taking place in Italy. Believing that the Italians ought to be left to settle their own affairs, I have not thought it right to exercise any active interference in those matters. Papers on this subject will be laid before you. I announced to you, at the close of the last Session of Parliament, that the atrocities which had then recently been committed in Syria had induced me to concur with the Emperor of Austria, the Emperor of the French, the Prince Regent of Prussia, and the Emperor of Russia, in entering into an engagement with the Sultan by which temporary military assistance was to be afforded to the Sultan for the purpose of establishing order in that part of his dominions. That assistance has been afforded by a body of French troops who have been sent to Syria as representing the Allied Powers. The Sultan has placed a considerable military force in Syria under the direction of an able officer; and I trust that tranquillity will soon be re-established in that province; and that the objects of the Convention will have been fully attained. I announced to you also, at the close of the last session of Parliament, that the pacific overtures which my Envoy in China had made to the Imperial Government at Peking, having led to no satisfactory result, my naval and military forces, and those of my ally, the Emperor of the French, were to advance towards the Northern Provinces of China, for the purpose of supporting the just demands of the Allied Powers, and that the Earl of Elgin had been sent to China as special Ambassador to treat with the Chinese Government. I am glad to inform you that the operations of the allied forces have been attended with complete success. After the capture of the forts at the mouth of the Peiho, and several engagements with the Chinese army, the allied forces became masters of the Imperial city of Peking; and the Earl of Elgin and Baron Gros, the Ambassador of the Emperor of the French, were enabled to obtain an honourable and satisfactory settlement of all the matters in dispute. Throughout these operations, and the negotiations which followed them, the Commanders and Ambassadors of the Allied Powers acted with the most friendly concert. Papers on this subject will be laid before you. The state of my Indian territories is progressively improving, and I trust that their financial condition will gradually partake of the general amendment. An insurrection of a portion of the natives of New Zealand has interrupted the peace of a part of that colony; but I hope that the measures which have been taken will speedily suppress these disturbances, and enable my Government to concert such arrangements as may prevent their recurrence. Serious differences have arisen among the States of the North American Union. It is impossible for me not to look with great concern upon any events which can effect the happiness and welfare of a people nearly allied to my subjects by descent, and closely connected with them by the most intimate and friendly relations. My heartfelt wish is that these differences may be susceptible of adjustment. The interest which I take in the well-being of the people of the United States cannot but be increased by the kind and cordial reception given by them to the Prince of Wales during his recent visit to the continent of America. I am glad to have this opportunity of expressing my warm appreciation of the loyalty and attachment to my person and throne manifested by my Canadian and other North American subjects on the occasion of the residence of the Prince of Wales among them. I have concluded with the Emperor of the French conventions supplementary to the Treaty of Commerce of the 23rd of January, 1860, and in furtherance of the objects of that treaty. I have also concluded with the King of Sardinia a convention for the reciprocal protection of copyright. These conventions will be laid before you.

GENTLEMEN OF THE HOUSE OF COMMONS,

I have directed the estimates for the ensuing year to be laid before you. They have been framed with a due regard to economy and to the efficiency of the several branches of the public service.

MY LORDS AND GENTLEMEN,

Measures will be laid before you for the consolidation of important parts of the criminal law; for the improvement of the law of bankruptcy and insolvency; for rendering more easy the transfer of land; for establishing a uniform system of rating in England and Wales; and for several other purposes of public usefulness. I confidently commit the great interests of my empire to your wisdom and care; and I fervently pray that the blessing of the Almighty may attend your councils, and may guide your deliberations to the attainment of the object of my constant solicitude—the welfare and happiness of my people.

Agriculture.

RECLAIMABLE LAND.

THE extent of land in the United Kingdom, now wild and almost waste, yet capable of being reclaimed, is far greater than is generally supposed. The area of England and Wales is 37,324,915 acres, of which it was estimated in 1854 that 15,250,763 acres were under rotations of crops, and ten millions of acres were permanent meadows and pastures, thus leaving upwards of twelve millions of acres unreclaimed. In Scotland, the area is 19,504,348 acres, the

quantity under rotation is 3,556,572 acres, and 1,500,000 acres of permanent pasture; leaving, therefore, more than fourteen millions of acres unreclaimed in Scotland. In Ireland, the land comprised, under rotations 5,860,089 acres, and permanent pasture 3,000,000 of acres, which, the area being 20,811,774 acres, gives about twelve millions of acres as the unreclaimed portions of Ireland. True, these wild lands consist to a large extent of mountains, some of which are irreclaimable, or only open to improvement by planting, but still an enormous area in all the three kingdoms is capable of being made available for agricultural and pastoral purposes. In a tract before us, called "The Resources of Reclaimable Land," by Mr James Sanderson, the author offers some data which enable us to approximate more closely to the actual quantities of reclaimable land. Thus, in five of the largest Highland counties, Argyll, Inverness, Perth, Sutherland, and Ross, with an aggregate total acreage of 9,844,253, the cultivated land is only 616,201. In Sutherland, Ross, and Perthshire there is much land capable of being brought under tillage; but in Argyll and Inverness, from the height and ruggedness of the hills and the narrow valleys, there are fewer opportunities for extending the existing cultivation. "In the counties of Sutherland and Ross there is a large breadth of reclaimable land. The soil of the former is of excellent quality, deep and strong, and in its present state produces the best natural grasses for sheep-grazing in Scotland; the cultivated area might be profitably quadrupled; and although in the opinion of some, distance from markets and the absence of roads are great barriers to the cultivation of Sutherlandshire, yet there are few of its straths and glens in which a system of green-cropping—viz., alternating grass and turnip crops—might not be profitably carried out. This method has been tried with great success in the upland districts of the counties of Selkirk and Roxburgh. In all districts, indeed, where altitude, climate, and want of access preclude cereal cultivation, although otherwise favourable for improvements, the cultivation of grasses and turnips might be adopted with great success." By this method, suitable summer as well as winter food is provided for either grazing or fattening flocks." We thus see how these remote lands may be made to aid in supplying one of our present urgent wants, *i.e.*, more grazing sheep. In Forfar and Aberdeen in the North, and in Roxburgh and Selkirk in the South of Scotland, hundreds of acres are yearly added to their arable areas. Yet, notwithstanding all existing improvements, Scotland yet contains two millions of acres which could be profitably reclaimed.

There is probably a larger reclaimable area in England than that estimated. The comparatively low altitudes and the better climate of English wastes are more favourable to their improvement than like conditions of Scotland. Yorkshire contains nearly four millions of acres, of which one-half is unreclaimed and in permanent pasture. These, however, can in no sense be used as convertible terms. In Cumberland and Westmoreland—containing together 1,486,705 acres—there is a comparatively small area under tillage. Gloucestershire contains nearly one million of acres, of which a large proportion is under grass. The writer, however, does not advocate the breaking up of rich old pastures, but he considers pasture land which is not worth more than 40s per acre will be more profitable if broken up. Even on large farms of the richest pasture, some portion of the land would be profitably cultivated. It is certain that most of the dairy farms of Gloucester, Wilts, and Berkshires would be improved by a portion of the land of each farm being broken up

In Wales, much of the mountain land is very similar to that which has been already reclaimed in Scotland. In Ireland, as we all know, the reclaimable area is very large.

The writer enters into the causes interfering with the reclamation of wastes, which would, when improved, add so largely to the proprietors' resources. He says:—"There are no doubt barriers to progress over which the landowners can exercise no control. The law of entail, although now considerably relaxed [*i.e.*, in Scotland], still operates injuriously on the extensive landowner. Prevented from distributing his estates among his children, he must save money for family purposes, which otherwise would have been employed in improving his property; and *thus it is that many large estates exhibit no traces of improvement throughout successive centuries.* The greatest barriers to cultivation, however, such as the absence of leases, restrictive covenants, &c., are raised by landlords themselves. The want of capital, too, is often advanced as an excuse for the non-improving landowner; but the facilities now afforded by the Enclosure Act and Lands Improvement Companies render that plea no longer valid. Considering, then, the readiness with which advances are made by these companies and their profitable results, it is surprising that any land fit for tillage should remain untilled." The want of proper homestead accommodation is amongst the great barriers to the progress of English agriculture. "Were landlords to erect suitable and commodious steadings, they would soon recover their outlay in the shape of improved farming. High farming is never associated with dilapidated and incommodious homesteads; on the contrary, these are generally a faithful type of the low state of agriculture in a district in which they are placed.....Inferior farm buildings are, therefore, destructive to high farming, and those landowners who retain them virtually debar their tenants from improving their estates."

As an instance of the advantage landowners may derive from reclaiming land, Mr Sanderson mentions a high-lying farm in Mid-Lothian which was purchased seven years ago for less than 7,000*l*, and would now sell for 18,000*l*. "This rise in value has been solely caused by bringing new land under tillage, *which was chiefly executed at the expense of the tenant.*"

This brings him to the question of reclamation of waste lands by tenants. The proper business of the farmer is cultivation, not reclamation. "It is the part of landowners to put their farms in a condition for reclaiming. It is their part to repair old and erect new steadings, make roads, effect enclosures, and much more. And were landed proprietors to carry out these improvements, grant leases, and secure enterprising tenants, I believe that the British farmers have skill enough and capital enough to effect all other improvements—although not strictly their province—and reclaim all the available land for cultivation in a few years." New land offers an advantage to the farmer in requiring a smaller quantity of manure for some years. "Hence," says Mr Sanderson, "I concur with the remark I have frequently heard made by a farmer, who as a tenant has probably reclaimed more land than any other either in England or Scotland, that he would give more rent per acre for land of a medium quality to reclaim and enclose at his own expense, than for regularly cropped land in poor condition though enclosed. Independently of outlay, unwearied labour and persevering industry are required on the part of the farmer to reclaim land.....There is an erroneous idea entertained by many that farmers who bring hill pastures under cultivation must change from sheep to cereal farming. On the contrary, the more land a farmer ploughs the greater number of sheep he is enabled to maintain; hence in every case that a farmer extends his cultivated area, he at the same time increases his flock."

After referring to the prejudices once general and still not uncommon amongst farmers, the writer says:—"It may be questioned whether the present rage for the mere teachings of science in agriculture is favourable to the improving of land? Previous to the last twenty years farmers were too practical, as they rejected the aid proffered by science, and refused to test by experiment the accuracy of her theories. There is a tendency now, however, to err in a different direction.....Science must be regarded only as an auxiliary to, not a substitute for practical farming. The mere practical agriculturist, although ignorant of the teachings of science, is often a successful cultivator of the soil, whereas the merely scientific farmer, ignorant of the practice of agriculture, invariably fails."

Some special cases of improving hill farms and the results are stated. These were in Selkirk and adjoining counties, and are let on nineteen or twenty-one years' leases to the tenants who have effected the reclamations.

On the question of what covenants should be required from the occupier of a farm, Mr Sanderson writes with much good sense. He says:—"Perhaps there is nothing more injurious to the progress of agriculture, or so detrimental to landowner and occupier, as restrictive covenants. On several estates farmers are induced to sign rules of husbandry, drawn out by parties wholly inexperienced in agriculture, which allow them no freedom of action, but make them merely machines in the hands of unskilful workmen. Such a practice carries with it its own refutation. It is a notorious fact that on many estates the same form of lease has existed for centuries." With tenants who utterly neglect the cultivation of their farms, landlords undoubtedly should have the power to interfere, and the natural remedy is the power of ejecting them, which every properly framed lease would give.

So covenants to prevent over-cropping during the last four years of the lease are reasonable, but it would be well "were the contracting parties to try a renewal of their contract some years previous to the expiration of the lease; it would tend to the mutual advantage of landlord and tenant, and prevent many differences between them from arising." But "the best security a landowner has against deterioration of property *is to secure good tenants.* The plan too frequently practised in the letting of land, by which landlords make rent, instead of enterprise and experience, the criterion for their selection of tenants, is a mistaken policy, and those landowners who adopt it virtually sacrifice what they profess to value." There is no property so much mismanaged as landed property, and there is none wherein such mismanagement prevents the development of so much individual and general benefit.

Literature.

SOCIAL ASPECTS OF THE ITALIAN REVOLUTION, in a Series of Letters from Florence, reprinted from the *Athenæum:* with a Sketch of Subsequent Events up to the Present Time. By THEODOSIA TROLLOPE. London: Chapman and Hall, 193 Piccadilly. 1861.

THE CAMPAIGN OF GARIBALDI IN THE TWO SICILIES: a Personal Narrative. By CHARLES STUART FORBES, Commander, R.N. Author of "Iceland: it Volcanoes, Geysers, and Glaciers." William Blackwood and Sons, Edinburgh and London. 1861.

THESE two series of letters written by English eye-witnesses of the late revolutions in Central and Southern Italy, may be studied together as describing the most contrasted phases of one great

movement. Mrs T. Adolphus Trollope's letters are a selection from those which have been already so well known to the readers of the *Athenæum* during the last two years. The present series commences with the opening of the Tuscan revolution on the 27th of April, 1859, and closes with the entry of Victor Emanuel into Florence in April, 1860. The letters are full of extremely interesting details, on a great variety of subjects, and contain overwhelming testimony to the unanimity of the popular sentiment in Tuscany for a free and united Italy. Among the most striking passages may be indicated the descriptions of the universal dismay caused by the news of the sack of Perugia, and again by the peace of Villafranca. Less exciting, but not less important, are the multitude of anecdotes illustrating the sound sense and generous self-devotedness with which all classes (except the priests and the *Codini*) worked for the one great national aim. One instance of this we must give, which Mrs Trollope narrates on the authority of an eye-witness. Soon after the flight of the Duke, a quarrel arose at Leghorn between part of the crews of an English and an American ship, then at anchor in the port; the crowd took part with the Americans, and the matter began to look serious. Now the *facchini*, or porters of Leghorn, had in the days of 1848 acquired an unenviable reputation for turbulence, but on the present occasion, taught by experience, a dozen of them,

Seeing the fray, rushed off to the American Consul, and my informant saw them with clasped hands, and some of them, "great stalwart fellows," *with tears in their eyes*, beseeching the Consul to write to the respective captains, or to go on board the vessels, if necessary, and entreat them to keep their men from landing, exclaiming, "At any other time it would matter little, but now at such a moment, when order must be kept at any cost, when everything depends on this—only don't let us have disturbances *now!*"

On another occasion, some weeks later, a Tuscan officer of the line, one of the very few infected with Austrian tendencies, had publicly uttered words of gross insult to the national cause at a *cafe* in Leghorn. A few *mauvais sujets* of the town had followed him out with the intention of dogging him into some out-of-the-way place, and inflicting summary chastisement upon him. But a few of these same broad-chested, heavy-fisted *facchini* got wind of the project, and for a whole afternoon they unwearedly followed about the offending officer and his pursuers in scattered groups, lest they should attract attention, till they had seen him late at night safe housed at his lodgings, for "there must be no disturbances *now*," they said.—(Pp. 94-5.)

Mrs Trollope gives an interesting account of the recitation, by the brothers Rossi, of some stirring scenes from Niccolini's "Arnold of Brescia," in the Niccolini Theatre, before an immense audience, including the venerable poet himself. We can well believe Mrs Trollope when she says:—

I believe that for a great many besides me who were present, there was a fantastic feeling of dreaminess and unreality spread over the whole scene, by the wonder that such words could be pronounced on any Italian stage, and received with tumultuous applause by an Italian audience, which lasted through a good portion of the performance.

Another sign of growing spiritual freedom is the rapid increase of the new Protestant "Italian Evangelical Church," in which "every one of the brethren has an equal right to offer up prayer or instruct the congregation, 'if the spirit give him utterance,'"—and which is now enabled to celebrate marriage unions "under the full protection of their country's laws, in defiance of the Church of Rome, which has hitherto declared all such marriages invalid and the offspring illegitimate."—(P. 141).

We must make room for the following account of "the solemn inauguration of the 'Scuola di Perfezionamento,' or higher school of instruction," at the Academy of the Fine Arts, in January 1860:—

Four of the Ministry, headed by Marchese Ridolfi, the Minister of Public Instruction, and accompanied by the whole body of Professors belonging to the new institution, first went to hear high mass at the adjacent church of San Mario—Savonarola's convent church—towards which, curiously enough, in these reforming days, the tide of popular favour is once more strongly setting.....After mass, the whole *cortege*, with the ministers and the venerable Marchese Gino Capponi, President of the new institution, at their head, repaired to the large and handsome hall, called the Sala del Buon Umore, which was, of course, draped and laurelled for the occasion, and crowded with the invited below, and with the uninvited in the spacious gallery above.

The ceremony opened by a brief but excellent address, read by the Marchese Ridolfi, pointing out the aim and purpose of the new institution, which is to form, as it were, a sequel and crown to University studies in Tuscany. In words which were not without a certain grave pathos, pronounced as they were at a time of such momentous crisis as this is, when the most carefully-poised mind may be excused for running wild after unstable and violent conclusions, he insisted on the primary necessity to the country of an enlarged system of popular education. He especially alluded to that crying sin and source of evil to Italy, the ignorance of her women, and mentioned the new Communal schools which are being everywhere established, the Lyceums, the improved University system, and finally, this Institution, as the most powerful means of regeneration and unification possessed by the rulers of Central Italy, backed up, as it must be, by the strong hand of her citizens, ready to maintain with their best blood, if need be, their right to their newly-won liberties.

Ridolfi's speech was warmly applauded, and followed by one far longer and more elaborate by Professor Amari, the Orientalist of European celebrity, who has returned to Italy to occupy a professor's chair in Florence, from a dreary seventeen years' exile beyond the Alps. It would require far too much space if I were to attempt giving any detailed account of this remarkable speech, which, besides the merits of wide historical knowledge, sound clear views, and shrewd deductions, had such a picturesque *cachet* of original genius about it, so spoke out the enthusiastic, manly, much-enduring nature of the man, that, quite contrary to the ruling custom of such public assemblies as this in Florence, he was several times broken in upon by the irrepressible applause of his audience, and hardly concluded a single period without arousing a loud murmur on every side of "Bene! benissimo! ben detto!" He traced the rise and progress of the Italian Universities from their first glimmer in the eleventh century, and the establishment in the twelfth of the University of Bologna, the first regularly organised institution of the kind in Europe. He admirably well described the sympathy which may be everywhere traced between the decadence of true enlightenment and that of social liberty, and the unwholesome mock fostering and real perversion of letters practised by the dissolute and gorgeous despots of the Medicean line. He shaped out, too, briefly and with masterful strokes, the hopeful future of the half liberated Peninsula if once united in a common bond of power and noble aspiration. But the passages which most of all were rewarded with tempestuous *vivas* were, one in the earlier part of the speech, in which he sketched the teaching and the martyrdom for freedom's sake of the noble reformer, Arnold of Brescia, betrayed to a miserable death by priestly vengeance; and another striking sentence of few words, towards the close, where he spoke of the later weakening and decadence of intellectual culture in Italy, gifted though she be by God with all that should make a nation pre-eminent, as having been mainly owing to "the narrow egotism, the greediness, and the *perfidy* of the Court of Rome."

.....The lamentable deficiency of female education alluded to, as I have said above, in Ridolfi's speech, has been Rome's safest hot-bed of ignorance and superstition in the past, and every improvement in this respect is wormwood to those whose interest it is to prolong the rule of these malignant influences over the people. Indeed, the education movement here is branching out into all the different forms of instruction, "which show the year is turned." Only last week the newly-modelled Academy of Fine Arts was opened by an assembly like that of Sunday, with a short address from Ridolfi, and an eloquent speech from Signor Giudici, Professor of Æsthetics to the Academy, who entered at length into the advantages and invigorating influences which may be expected to accrue to Art from the new system of "free masters," of which I have spoken in a former letter.

Be it remembered by English readers that all these formal "inaugurations," and set speeches, have a ten times stronger effect here among a people to whom all such things are new, or so far left behind in their past as to *seem* new, than they could possibly have in a country used to "say its say" politically and socially as best it likes. But all the heaving life which begins to manifest itself in every department, intellectual and artistic, is a curious and interesting proof, yet once again, if new proof were needed, of the indissoluble companionship between political and intellectual progress.—(Pp. 215-20.)

Very different from the scenes which Mrs Trollope chronicles within

"the fair white walls
Of the Etrurian Athens,"

are the stormy events which Captain Forbes describes in "the Campaign of Garibaldi in the Two Siciles." This volume also consists of letters descriptive of contemporaneous events. Captain Forbes (who had been stationed at Palermo in the "Bellerophon' in 1848), reached Palermo (from Genoa) soon after its occupancy by Garibaldi, in the middle of July, and though not bearing arms, accompanied the army until the battle of the Volturno on the 1st of October, when he was obliged to return to England. His accounts of Garibaldi's marches and battles are very clearly told, and are illustrated by good maps and plans. A large and beautiful map of the Two Sicilies, an excellent portrait of Garibaldi from a photograph by Coldesi, and a portrait of Francis II., which Captain Forbes declares to be a "speaking likeness," are valuable additions to the text. Francis's picture is very much what might be expected—suspicious and dogged. Of the Sicilians, Captain Forbes has little to say that is favourable, and of the degraded Neapolitans, still less; but he speaks highly of the manliness and patriotism of the Calabrians.

In the evening the troops halted at a small hamlet above the Cape whose white cliffs form the ancient Leucopetra. Nothing can exceed the wildness and beauty of the mountain spurs which, in this portion of Calabria, intersect the coast, with the Greek villages perched about on the inaccessible crags; nor could a country be found more adapted for guerilla warfare than those passes and positions, for every one of which would serve as a natural fortress; and it would puzzle a better army than Francisco's to turn Garibaldi out of the toe of the boot now that he is once established. The populations are frantic in their demonstrations of joy. All the men appear to be armed, and are joining. To understand many is impossible; they still preserve their Hellenic tongue.—(Pp. 152-3.)

Here [Melito], as elsewhere, Garibaldi had been enthusiastically received by the population, finding not only the National Guard numerous and well-armed, but the entire male population *fuore di casa* with some weapon or another; in fact, throughout Calabria, the call to arms was responded to in a manner unheard of in any other part of Southern Italy. The population is *manly and robust, wholly unlike the Neapolitans* of Naples proper, who are unfortunately too often accepted as the type of their countrymen. Moreover, the better classes are not the mean cigar-sucking, domino-playing race, which are the bane of this country, but boldly came forward to head their countrymen in their righteous struggle. Here, as in Lombardy against the Austrians, it would be a dishonour for a disposable man to remain at home. When their tried and worthy chief Stocco raised the flag, Morelli and other great proprietors worthily responded.....

Crossing the Mesima, we began to ascend the chain of hills which lead up to La Piana di Monteleone, which is strewed with villages whose names denote their Greek origin. Like most of the descendants from

Greek colonists in Southern Italy, they have preserved their language, and in some remote "paesis" their national costume. All are, however, Catholics.—(Pp. 183-186.)

In the evening we advanced a few miles to Curinga, a "paese" perched amid the mountains a little to the right of the high-road, which was strewn with accoutrements of the retreating army, now but a few miles in advance. Our ascent in the twilight to this quaint locality formed one of the most characteristic tableaux of the campaign. Winding up the heights, we came suddenly on the terraced streets of this primitive mountain home, brilliantly illuminated, and were enthusiastically received by the women and boys, the majority of the men being under arms near Maida. A beaming moon had just topped the pine-clad mountains, and served to set off the red petticoats and fantastic costumes to greater advantage; and, amid a torrent of kisses and evivas, their saviour made his entry—*il nostro secondo Jesu Christo*, being the constant ejaculation with these simple people. Indeed, I have been many times told in all sincerity by the peasants that he is the brother of the Redeemer.....Garibaldi sat up writing until two in the morning, and then started alone across the mountains to Maida, where he had ordered Stocco to meet him with his Calabrians, and thereby open the pass near the old battle-field to the Neapolitans. Sirtori, as Chief of the Staff, had to bear all the odium of this order, and it was attributed to his stupidity; but I am convinced in my own mind that Garibaldi's humanity was the key to the proceeding. He well knew that in the pass they must have been butchered as in shambles, for from the nature of the ground they could not have returned a shot; and, moreover, that the Calabrians would have accomplished it not only without remorse, but with pleasure, in revenge for years of oppression. Whether Garibaldi's extraordinary desire to save life will be appreciated by this soldiery, remains to be seen. To-morrow, at the latest, he will be on them with his own men.—(Pp. 194-6).

The following sketches of the leading men of Garibaldi's army are interesting:—

It is curious to observe how completely the men of the different divisions and brigades received the impressions of their chiefs. Around Garibaldi his trusty and familiar staff were all quiet, unassuming, earnest men, not to be seduced from the red shirt, which their divinity had rendered classical, for any fantastic uniforms with any amount of gold lace. They felt more honoured by the confidence of their chief than any rank or position the army afforded, and having no enthusiastic feeling for a soldier's life, as a life, are, like him, determined to retire to their homes when their country is free.

Eber, who is an accomplished Hungarian gentleman as well as a born soldier, attracts many of the best officers by his polished bearing, which is refreshing in a camp of this description.

Medici, a Lombard, rough and heavy, but a hard fighter, is followed by those who are indifferent to external qualities.

Cosenz, a Neapolitan, methodical and soldierlike, draws the numerous Piedmontese officers who have come to take service.

As for Bixio, the Genoese, he is feared, but at the same time respected, and is the Ney of the army.

The Hungarian Türr is beloved and esteemed by all, not only for his generous nature and unflinching pluck, which alone enables him to bear up against old wounds and failing health, but as the first soldier under Garibaldi.

Sirtori is an enigma, but holds a high position.—(Pp. 141-2.)

In spite of his (Garibaldi's) fifty-three years, he not only looks as young as any of them, but is by far the most active man in the army—solely, I believe, owing to his frugal habits; bread and water, fruit and smoke, forming his staple diet. If possible in bed by eight, he rises at two, but halts and sleeps for two or three hours in the mid-day to avoid the sun—that is, unless there is anything important to be done, when nothing seems to tire him.—(P. 194.)

Into the vexed sea of quarrels and rumours of quarrels which occupy so large a part of Captain Forbes's narrative, we will not enter. It must needs be that offences come, but it is not necessary that their memory be perpetuated. Both Mrs Trollope and Captain Forbes append to their letters a sketch of subsequent events, and in each of these supplements we have as much theory as narrative. She naturally looks at things from the Piedmontese point of view; he, not less naturally (though neither Mazzinian nor republican), adheres to the Garibaldian faith "*pur et simple*." We regret that each writer should have made a few comments on the idols of the opposite party which would have been better omitted, but we are glad to have, in these letters, English testimony to substantial *facts* touching both the aristocratic and the democratic movements, which may assist English readers to appreciate the many-sided reality which no single political party has yet adequately represented in all its complex ramifications. With respect to the style in which these volumes are written, we have to report that Captain Forbes's language is sometimes deficient in accuracy and finish, but is always clear as to meaning. Mrs Trollope frequently writes with force and pathos, and parts of her book are very touching, but her mirth is too often wanting in good taste, and abounds in disagreeable and ungraceful comparisons, which are the more jarring from one who has so keen an enjoyment of beauty, and so much power of communicating it to her readers.

The Cornhill Magazine for February. Smith and Elder.
Macmillan's Magazine for February. Macmillan.
The Temple Bar Magazine for February. 122 Fleet street.

Mr Trollope has always done more even than the editor to adorn and enrich the pages of the "Cornhill Magazine." In the present number he does more than usual. Not only does he put forth his most delicate humour and highest art in delineating the war of complimentary taunts between Mrs Grantly and Mrs Proudie and the chafings of Mr Sowerby under his social degradation, but he has published in the magazine a very spirited and able lecture on the Civil Service as a profession, which he delivered at the General Post Office on the 4th January. It is a lecture deserving the sincerest thanks of the service to which Mr Trollope belongs,—and which it will do much to place in its true colours before the public attention. Its best quality is its terse good sense, and high tone,—the mannerism of the humorist not being entirely suited to this style of composition. The "Cornhill" for this month also contains, besides the continuations of Mr Thackeray's and Mr Trollope's stories, some elegant verses,—an interesting comparison between the English and French steel-plated ships, the Warrior and La Gloire,—an amusing paper on "Fine English,"—and a little tolerable trash in the shape of a story called "Horace Saltoun." Mr Thackeray himself is rather intolerably self-repeating. We heartily adopt his own words, "don't pursue your snarling cynical remarks, but go on with your story." These "snarling cynical remarks" make up at least 50 per cent. of his new tale,—they are all old in form, manner, and almost in words, and they begin to bear a larger and larger proportion to the real artistic delineation. And even the old characters come back upon us; there is one very like Lord Steyne's with a dash of brutality reproduced in Lord Ringwood.

"Macmillan" for February has more than one paper of solid value. The best is Mr Ludlow's very thoughtful and able analysis of the net result of the Social Science volume on Trade Societies and Strikes. Thoughtful men must begin to admit that, in spite of the natural dislike to these organisations which their frequently ignorant and sometimes obstinate hostility to employers has engendered in the middle classes, they are simply *inevitable results* of the relations between capital and labour, and that the true aim of those who deplore and condemn their errors should be to teach them what is the abuse and what the true use of their powers, and not to waste time in endeavours to persuade them to dissolve their combinations. Indeed, while Friendly and Benefit Societies are not legally empowered to ensure their subscribers from destitution in the times in which they are out of work from *other* causes besides illness, Trade Societies which answer that purpose *must* continue, if only for that cause, to exist. With the spirit of some of Mr Ludlow's remarks we do not wholly concur. But the paper is one of conspicuous ability and interest. There are besides in the present number of "Macmillan" a very brief (but spirited) instalment of Mr Hughes' tale, "Tom Brown at Oxford,"—some quaint but rather striking verses, signed Christina G. Rossetti,—a continuation of Mr Henry Kingsley's animated story of "Ravenshoe,"—a short paper defending the London Poor Law Guardians against the abuse which has been recently lavished on them, by the Rev. Llewelyn Davies,—a sensible article on the New Zealand disturbances,—and a little tolerable trash in the shape of a paper about Lord George Bentinck, some reminiscences of American College Life, and other matters.

The "Temple Bar Magazine" continues to rely chiefly on the uncertain and somewhat coarse abilities of Mr G. A. Sala for its claims on popularity. There are in his tales points of approach to the class of talents for which Balzac has acquired a reputation in this country,—the same excessive and wearisome minuteness in cataloguing things, and the same kind of manner of looking at life. There is much unadorned trash in the "Temple Bar."

The Dublin University Magazine. February. No. 338. Hurst and Blackett.

The English Woman's Journal. Nos. 35 and 36. W. Kent and Co., Paternoster row.

The principal articles of the current number of the "Dublin University Magazine" are those upon our naval and military forces. The first, under the title of "Ships in Armour," gives a detail of the progress the French have made in furnishing their navy with iron-clad vessels; and enforces the need of continued exertion on our part in order to surpass, or even to overtake, our active allies in this new form of naval supremacy. The writer maintains the superiority of iron-clad vessels in spite of all drawbacks; but is doubtful as to the wisdom of constructing them in general upon such a scale as that of the Warrior or La Gloire, of which latter a lithograph is prefixed, showing its size and build. The second article is simply a summary of recent improvements in artillery, with remarks on their various advantages and defects. Politics occupy only one short article. We do not think the writer of "Prospective Politics" has enough either of the "master's hand" or "prophet's fire" to make his foresight into the coming year of much value. Of the literary articles, the best is "The Work-a-day World of France:" a most curious and instructive picture is drawn of the manufacturing communities of the Vosges. Another sensible and well-written article, calculated to remove ill-founded prejudices, is that upon the "Maori War." "Tennyson's Philosophy" might seem to require a few words of notice; but, although it contains much truth of observation, the range of thought is too narrow to make it a fitting exposition of the poet's philosophy. A short article on the need of a "direct trade between France and Ireland" is sensible and timely.

"The English Woman's Journal" opens the new year with two very good numbers. The ability and earnestness with which this periodical has always advocated the moral and social advancement

of woman has become of late more and more free from exaggeration, impracticability, and that assertion of one-sided views and so-called "rights" by which some of the earlier numbers were blemished. It is not hard to see how a journal, founded upon princiles altogether different from those of any ladies' newspaper already in being, in establishing itself, if not against public opinion, at any rate without any declared feeling in its favour, should assume a self-asserting and argumentative tone, little calculated to forward the views it had at heart, or its own real advancement. The good sense of its editors have recognised this error, and the wider area of practical utility that opens before them as their journal gains an established footing has already, and will doubtless still more withdraw their attention from fruitless discussions and vague theories.

One of the most marked and laudable features of the "English Woman's Journal" is, that it brings into notice many excellent but little known institutions and charities for the benefit of women, and also gives free play to the proposal and discussion of plans for future measures of practical utility, such as the additional fund for aged governesses, in connection with the older institution; the home for respectable and destitute women out of employment in Rose street, Soho square, and many others of a similar character.

The literature of the two numbers now before us is varied, well written, and now and then of considerable interest. The papers on "Insanity" contain much valuable statistical information; that on "Infant Mortality" deserves to be read attentively; while the more purely literary papers are written with much taste and intelligence.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

The Government has presented to the Senate and Legislative Body a report of enormous length on the "situation of the Empire," political, financial, and material. But notwithstanding its length, the document adds little to what is known already respecting the materials and financial situation; it is, in fact, nothing more than a summary of the returns and reports published in the course of last year, and it is incomplete and badly done. The commercial reforms accomplished in 1860, by which is meant not those effected by the English treaty, but the abolition or reduction of duties on certain raw materials and on certain articles of general consumption, caused, says the report, a loss to the Treasury of 90,000,000f, which was thus made up—14,000,000f on cotton, 7,000,000f on wool, 56,000,000f on sugar, 11,000,00Cf on coffee, 1,000,000f on cocoa, 1,000,000f on other articles. But the diminution was counterbalanced by the receipt of 99,298,507f thus made up: 26,020,507f of a sum destined for but not employed in the sinking fund, 9,666,000f from an increase of 25f the hectolitre in the duty on alcohol, 11,191,000f from an increase in the price of tobacco and snuff of from 8f to 10f the kilogramme (these articles are a Government monopoly), and the rest from the normal increase in the revenue—namely, 3,374,000f from direct taxes, 20,711,000f fro registration and stamp duties, 4,497,000f from salt, 5,781,000f from certain indirect taxes, 5,000,000f from forests, 5,529,000f from the Post Office, and 7,529,000f from various sources. With regard to the general budget of 1860, it is admitted that the war in China, the expedition to Syria, the increase of the army of Rome, and the annexation of Savoy and Nice, to France, caused "unforeseen expenses;" but it is alleged that they will be compensated, "at least in part," by the Chinese indemnity, &c. The confession, nevertheless, is made that "it is not possible for the present to fix with anything like exactitude the final result of the budget of 1860." But, then, we are told "the resources of the floating debt will suffice to meet a deficit," and we are likewise informed "that up to the present time it has not been necessary to have recourse to such resources in the same proportions as at other epochs; thus, some years back, the floating debt was 900,000,000f, and on the 1st January, 1860, it was 864,000,000f; but on the 1st January, 1861, it was only 750,000,000f, and Treasury bills are now less than 100,000,000f. Next, the report says, that the budget of 1861 had been fixed with a surplus of 658,812f, but that the treaty with England rendered necessary for the sake of French manufacturers reductions of duty on flax, oleaginous seeds, and some other raw materials, which occasioned a loss to the Treasury of about 5,000,000f; also that an increase in the consumption of sugar which had been counted on for augmentation of revenue had not taken place, owing to heavy rains having damaged the crop of beetroot, and consequently caused a falling off in the production of native sugar. But this deficit, it is said, will be made up by the increase in the selling price of tobacco. With regard to the budget of 1862—the figures of which, by the way, are not given—it is stated that some difficulty exists in estimating what sugar, tobacco, and especially the articles on which the duties have been modified by the English treaty, will produce. As to sugar, it is said that at one time the belief was entertained that, as was the case in England in the third year after the reduction of sugar duties, there would be an increase (that is in 1862) of 40 per cent. compared with 1857, but that, on account of the falling off in the production of beetroot in 1860, it can only be safely set down at 30 per cent. On the other hand, it is stated that the duties on the principal English merchandise which was formerly prohibited, or heavily taxed, will under the treaty probably be 10,000,000f in 1862 (4,000,000f more than in 1861); and after this statement this remark is made:—"It must be observed that the periods from which the principal English merchandise suchas yarn, and tissues of flax, wool, and cotton are to be admitted into France, are limited to six and three months in 1861, but that in 1862 they will be admitted during the whole year, and will necessarily occupy a larger place in consumption." The further observation is made:—"A year has already passed since the Emperor took the initiative of economic reform; and from the present moment it is satisfactory to be able to state that that reform has been accomplished without compromising the equilibrium of the budgets, and without having recourse to public credit, or to check the devolopment of great works of public utility." After stating that the sum of 45,000,000f, which was some time back ordered by law to be disbursed in 1862 in public works, has been provided in virtue of certain arrangements with the Caisse de la Dotation de l'Armée, the report enters into details respecting the taxes, the Customs, &c.; but they need not be repeated, as the same facts have already been mentioned in one form or another in the Paris Correspondence of the ECONOMIST.

Such is an analysis of what the French Government gravely puts forward as the financial situation in a grand report on the "State of the Empire." Anything more bald could not be conceived. The amounts of the budgets for the last, the present, and the coming years are not given; nothing is said about the increase which has taken place in the national debt; nothing as to whether a new loan is or is not necessary; nothing as to whether the wild expenditure in which the Government has for some years past indulged is to be continued; and nothing on numerous other matters which a Wilson or a Gladstone would certainly have considered worthy of notice in a "financial statement."

Some other points dwelt on in this report may be mentioned. It appears that new railway works last year, owing chiefly to the bad weather, made no great progress, and that only 123 miles of new lines were opened, but that nearly 456 additional will be brought into use this year, and more than that length next year. Long details are given respecting the measures which the Government has taken, or is about to take, to facilitate the supply of French coal to iron and other great works, and in connection with this matter these statistics are quoted:—In 1853 the number of coal-pits worked in France was 277, and the quantity of coal extracted was 59,379,854 quintals (the quintal is nearly 2 cwts), the value of it being 59,654,904f; in 1859 the number of pits worked was 292, the quantity extracted 74,825,718 quintals, and the value 94,979,163f. In 1853 the quantity of foreign coal imported was 35,305,300 quintals; and in 1859 it was 57,593,873. The total consumption of coal was, consequently, 94,224,053 quintals in 1853, and 138,636,584 in 1859. As to the iron-works, they produced in 1853, 11,110,973 quintals of different sorts of iron, of the value of 253,236,538f, and in 1859, 13,762,505 quintals, of the value of 290,658,789f. Moreover, the report says that various commercial reforms have been extended to Algeria, and that others are to be granted; also that the other colonies of France are to be relieved of the bonds in which their commerce has too long been kept,—that in particular they are to be allowed to import, under Customs duties not less favourable than those of the mother country, and to export where they please. On the subject of commercial treaties, the report, after noticing with satisfaction that with England, confirms what is already known as to others being in negotiation with the Zollverein and with Belgium, and states a fact not yet made public,—namely, that Holland has expressed a wish to conclude a treaty on terms similar to the English one, and that her wish has been readily acceded to. The report also says that the negotiations for a modification, in a liberal spirit, of the treaty with Turkey are on the eve of being concluded; and that *pourparlers* have been entered into on commercial affairs with the United States and other Governments of America.

M. Mirès has published in the newspapers the report presented to the shareholders of his Caisse Generale des Chemins de Fer in their recent meeting, and with which, as stated in my last, they expressed themselves satisfied. It treats at more or less length the different affairs in which he has engaged them,—the coal-pits of Portes, the iron-works of Marseilles, the Roman railways, the Spanish loan, the Ottoman loan, &c. The public have read with some curiosity what is said about the latter affair; but they have not found any details respecting its actual situation and future prospects. An admission that M. Mirès took up the loan after it had been abandoned by more than one banker,—a justification of his reasons for doing so—a statement of the terms on which he got it—an account of certain preliminary or incidental matters in connection with it—an affirmation that he offered a "legal participation" in it to great bankers, but that they would have nothing to do with it,—a complaint of the hostility he has had to encounter—and a reference to certain events of a painful character which occurred just after the issue of the loan was commenced,—such are the points which he brings prominently forward; and he is silent on others.

The Credit Industriel Bank has, by a recent Imperial decree, been authorised to receive deposits not exceeding 60,000,000f.

Reports are current that M. Forcade de la Roquette, who was lately appointed Minister of Finance, is likely to retire, and to be replaced by M. Fould. The latter is considered one of the ablest financiers of this country.

I hear said that the Bank of France has lent aid to one or two firms here which were endangered by the failures at Constantinople, and that some private bankers have assisted others.

The Bourse presents an improvement, but doubts are entertained that it will be lasting. The following are the quotations:—

The following is an account of the markets:—

FLOUR.—At *Paris*, business has been somewhat more active during the past week, and, in consequence, millers yesterday demanded from 66f to 68f the sack of 159 kilogs, but it was only at 1f lower that transactions could readily be entered into. The four marks were, for the present month 62f 25c to 65f 50c, and for March and April 65f 50c.

WHEAT.—At *Paris*, yesterday, holders demanded an advance of 75c to 1f, but purchasers were not willing to give it. Some sales were made at 36f to 36f 50c the sack of 120 kilogs. As to the provincial markets, 21 present a rise of 6c to 1f the hectolitre, 81 a fall of 12c to 1f 4c; 18 are reported firm, and 36 without variation.

COTTON.—Owing to the accounts from the United States, and to manufacturers having laid in stocks, business at *Havre* in the week ending Friday was not very active, the sales having been only 5,560 bales. Prices fell 1f for the very low and low New Orleans and Mobile, but all other qualities remained unchanged. Low New Orleans was consequently 98f the 50 kilogs, and very ordinary ditto 105f. The arrivals of the week were 26,049 bales. This week, the sales have not been numerous, but prices are firm.

SUGAR.—At *Havre*, in the week ending Friday, the sales consisted of 29 casks French West India at 50f the 50 kilogs duty paid; 3,600 bales Reunion, 52f duty paid; 2,400 casks Havana, 35f to 36f in bond; 29 ditto "gros grain," 38f. Some sales of damaged Havana and San Domingo were made by auction; 101 casks Havana good quality were also sold by auction at 36f to 38f. The arrivals were 3,264 casks Havana, 15,519 bales Reunion, and two smaller lots. This week, several sales have been made: Havana, 34f to 37f 50c in bond; San Domingo, 46f duty paid; French West India, 47f 75c to 48f; Reunion "gros grain," 51f. At *Nantes*, last week, 9,483 sacks Reunion were sold at prices varying from 48f 50c to 52f 75c the 50 kilogs. Nothing done this week. At *Bordeaux*, last week, 3,800 bales Reunion went at 51f to 52f 25c; a small lot of French West India at 47f 50c. This week, a lot of Reunion has been taken at 53f 50c, one of Mauritius at 52f 25c, and one of Santiago at 34f. At *Marseilles*, last week, there were some large sales of Reunion and Mauritius, part of the former at 52f 25c to 53f, part of the latter at 36f to 39f 25c; also some French West India at 37f 50c.

COFFEE.—The sales at *Havre*, in the week ending Friday, were 1,600 sacks Hayti Port-au-Prince, disposable, 77f to 79f the 50 kilogs in bond, the latter price for fine quality; 1,050 sacks ditto, for delivery, 76f 50c to 77f; 200 sacks Cape, disposable, 80f; 400 sacks Gonaives, disposable, 79f to 79f 50c; 380 sacks ditto, better quality, 81f 50c; 10,850 sacks Rio, not washed, disposable, 69f to 72f; 1,547 sacks ditto, for delivery, 68f 50c to 70c; 125 sacks Rio, washed, disposable, 88f; 400 ditto, ordinary, for delivery, 78f; 404 sacks Bahia, for delivery, 74f. Some small lots of damaged were also sold. The arrivals exceeded 10,300 sacks. This week, there have been several sales: Hayti, 77f 50c to 80f; Rio, 69f to 71f. Some lots of damaged Hayti and Santos were also sold. At *Bordeaux*, last week, the sales consisted of a small lot of Ceylon plantation, at 119f to 123f the 50 kilogs duty paid; 1,250 sacks Java, 112f 50c; 510 sacks Guayra, 85f in bond; 595 sacks Rio, washed, 85f to 85f 50c; 176 ditto, not washed, 75f to 76f. Nothing has been done this week. From *Nantes*, no transaction is reported. At *Marseilles*, a large lot of Mocha, for delivery, has been taken at 127f 50c.

INDIGO.—At *Havre*, last week, 90 cases Bengal, 3 Kurpah were sold; prices firm. The arrivals were 13 from Manilla. This week, 20 cases Bengal have been sold; prices not given. At *Bordeaux*, last week, 11, cases Kurpah and 7 Madras were sold at established rates. This week: 7 Bengal, 6 Java, and 3 Kurpah have been sold; prices not given.

WOOL.—The sales at *Havre* in the week ending Friday were 6 bales La Plata washed, 4f 30c the kilog; 6 bales Cashmere, 6f 25c to 6f 50c; 51 bales La Plata sheepskin unwashed, 1f 40c. The arrivals did not amount to 100 bales. This week, some Chili unwashed have been sold at 152f 50c the 100 kilogs; Monte Video, 190f.

TALLOW.—At *Havre*, in the week ending Friday, there were neither sales nor arrivals. This week, 100 casks Buenos Ayres have been disposed of at 68f. At *Paris*, yesterday, the 100 kilogs were 130f.

COTTON.

NEW YORK, January 22.

The following is a statement of the week's sales here and at the chief Southern ports, at latest telegraphic dates, with the closing prices f.o.b., with freight in sterling at current exchange:—

		Sales.	Closing.	Middling.	Freight.	F.o.b
New Orleans	Jan. 21	52000	⅛c lower	11⅜c	⅛d equal to	6.94d
Mobile	19	18000	⅛c —	10⅜c	⅛d —	6.49d
Charleston	18	3000	⅛c —	11c	9-16d —	6.46d
Savannah	18	7000	⅛c —	11c	⅛d —	6.58d
New York	22	9000	⅛c —	Upl. 12⅛c	⅛d —	6.71d
Total		89000 bales			Average	6.62d

There is now a decrease in receipts of 621,000 bales from last year, when the crop reached 4,675,000, and of 201,000 bales from 1858-9 (crop 3,851,000).

New York Market.—Business has been rather quiet in this market during the week. Buyers have shown little disposition to operate, and with a fair supply offering, and holders anxious to realise, prices have declined ⅛c. The demand has been partly for export and partly for the home trade. In transit cotton little has been done, and quotations are irregular. The week's sales amount to 9,000 bales, and at the close middling Upland is quoted 12⅛ to 12¼c.

The following is a statement of the movements of cotton for the last week, and since 1st September last, compared with the five preceding years:—

	Receipts. Week's Receipts. bales	Since 1st Sept. bales	Exports for the Week. To Great Britain. bales	To France. bales	To other For. Pts bales
1860-61	163000	1989000	121000	13000	16000
1859-60	158000	2610000	67000	24000	11600
1858-59	120000	2190000	40000	12000	15000
1857-58	69000	1290000	54000	15000	9000
1856-57	102000	1842000	52000	13000	13000
1855-56	84000	1817000	50000	15000	19000

	Exports since First September. To Great Britain. bales	To France. bales	To other For. Pts. bales	Total. bales	Stock. bales
1860-61	919000	221000	140000	1288000	607000
1859-60	1043000	278000	131000	1452000	1043000
1858-59	650000	279000	178000	1107000	870000
1857-58	437000	156000	107000	700000	577000
1856-57	415000	180000	125000	720000	802000
1855-56	637000	224000	168000	1029000	647000

Thus the receipts show a decrease of 621,000 bales from those of last year, and a decrease of 201,000 from 1858-9, and the exports exhibit the following results:—

	To G. Britain.	To France.	To other F.P.	Total.	Stock.
Compared with last year	Dec. 124000	Dec. 57000	Inc. 9000	Dec. 164000	Dec. 436000
Compared with 1858-9	Inc. 269000	Dec. 58000	Dec. 38000	Inc. 181000	Dec. 263000

Southern Markets by Telegraph.—A steady business was done in the Southern markets at the opening of the week, and in the absence of later news from Liverpool prices were maintained. The Edinburgh's accounts, however, received on 17th, being unfavourable, checked the demand, and with increased receipts, and factors anxious to sell, prices have declined considerably. The week's sales at New Orleans have been 52,000 bales, and at the close middling is quoted 11⅛c to 11⅛c. At Mobile, business has been checked by the resignation of the Collector of the Port and refusal to grant federal clearances. The week's business has been 18,000 bales, and the market closes quietly on the basis of 10⅜c for middling. The Atlantic markets have also been quiet, and prices are lower. Freights have had an upward tendency at New Orleans, the present rate being ¾ to ⅞d.

Receipts.—The receipts show a large increase this week, and exceed even those of the corresponding week in the two preceding years. At all ports the deliveries amount to 163,000 bales, against 158,000 last year, and 120,000 the year before, and the total decrease is reduced to 621,000 bales and 201,000 bales respectively. By telegraph a further reduction is indicated for next week—the deliveries at New Orleans and Mobile jointly being 119,000 bales, against 105,000 last year and 106,000 the year before. The decrease, has compared with 1858-9, has passed its maximum, and with the present rate of delivery will soon disappear entirely.

Exports.—The exports have also been on a liberal scale this week. The anxiety lately manifested to get cotton to sea, owing to an apprehension of difficulty arising out of the political agitation at the South, has resulted in the simultaneous clearing of a large number of ships, and thus the week's exports amount to 152,000 bales. Of this Great Britain will get 121,000 bales, and the total thither now amounts to 919,000 bales, against 1,043,000 last year and 650,000 in 1858-9. By telegraph for the succeeding week the exports to that quarter have been on a smaller scale from the Gulf ports, being only 53,000 bales. By mail the number of vessels now loading at the South for Great Britain is 109, against 132 last year. To France the total is 221,000 bales, against 278,000 and 279,000 in the two preceding years. By telegraph 31,000 bales were cleared from New Orleans and Mobile in the following week, and there are 30 vessels loading, against 54 last year. To other foreign ports the total is now 104,000 bales with only 28 vessels loading, against 71 last year.—*From Messrs Neill*

Bros. and Co.'s Circular, forwarded by Mr Ollerenshaw, of Manchester.

NEW YORK, Jan. 26.—The market was quiet on Wednesday, but more favourable European advices imparted increased buoyancy, and holders have been enabled to obtain full prices. The sales for the three days amount to 9,000 bales, including 2,500 in transit, closing very firm at our previously quoted rates. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	9¼	9¼	9¼	9⅝
Good ordinary	11	11	11	11⅛
Middling	12¼	12⅜	12¼	12⅜
Good middling	13	13⅛	13⅛	13⅜
Middling fair	13¼	13⅜	13⅜	14⅛

The arrivals have been from New Orleans, 389 bales; Georgia, 2,515; North Carolina, 479; Virginia, 1,237—total, 4,620. Total import since 1st inst., 47,638 bales; total import since 1st September, 234,041 bales. Export from 1st to 22nd January, 21,405 bales, against 15,240 in 1860.

In the early part of the past week there was some revival in the demand for cotton, and full prices were obtained. Since the arrival of the Cunard Mail Steamer the market has relapsed into dulness, and the amount of business has become more restricted. Holders have at the same time showed a disposition to concession, and prices have lost more than they had previously gained. Our quotations for middling American are slightly lower than those of this day week. Egyptian have been in daily request, but are not easily saleable. Brazil are without alteration. East India, like American, improved in the beginning of the week, but are now again slightly lower than a week ago. The sales to-day are 6,000 bales. The market is quiet. The reported export amounts to 11,170 bales, consisting of 4,890 American, 210 Brazil, and 6,070 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

During the whole of the week, there has been very little business transacted in goods, either for home use or export to the Continent. For China, however, the demand has somewhat improved, yet the stocks continue to accumulate. The iron trade has been heavy, and the quotations have continued to favour buyers. Coals have realised quite former terms.

MANCHESTER, Feb. 7.—The market has continued dull and drooping. Indian accounts to 11th ultimo, received here on Monday, prevented business for that quarter, but the considerable sales effected at the close of last week have relieved the majority of sellers for the present. Cop yarns have again fallen, and sales of considerable amount have been chiefly effected by making a sacrifice on what are still nominally the current rates. Several stoppages of looms have occurred, but little unanimity has been shown in furthering proceedings for working short time. The home trade houses complain greatly of the extraordinary amount of their customers' bills which they are obliged to renew. Several of our leading printers are working only three days per week.

COMPARATIVE STATEMENT OF THE COTTON TRADE

	Price Feb. 7, 1861	Price Feb. 1860	Price Feb. 1859	Price Feb. 1858	Price Feb. 1857	Price Feb. 1856

BRADFORD.—The dulness in the wool trade continues. Spinners buy only to meet immediate requirements. What transactions are effected are in favour of the buyer, but a considerable degree of firmness exists considering the limited business doing. In noils and shorts, so very few are making that they are taken into consumption as produced, at full prices. The dulness in the export trade for yarns is quite unprecedented, literally no trade doing. In home consumption there is no improvement. We have again to report an improved inquiry for pieces, but the sales effected have only been of a moderate extent.

LEICESTER.—There is a little more animation perceptible in the hosiery trade. Business is quiet in the districts adjacent, and the operatives are only partially employed. Wools are selling at late quotations, there not being much demand. Yarns are quiet.

NOTTINGHAM.—There continues to be a little more doing in some departments of the lace trade. There are some good orders in the market for muslins. Plain nets are rather more in request, but still the present amount of business transacting is much below an average for the time of the year. In a few weeks the trade will be more animated. There is a little improvement noticeable in the hosiery trade, more hands are being set on, some orders having been left by the home buyers. Stocks are low, and manufacturers continue working to order. Yarns remain stiff.

BELFAST.—Although a slight indication of improvement has been experienced in the market for bleached goods, the general tone of business is inactive; and, where an anxiety to realise is carried out, concessions must be made in favour of purchasers. A few shipments have been sent off to New York in course of the week, these principally to finish outstanding contracts. Compared, however, with the state of the export trade last year, or even that of January, 1858, the past month has been most unsatisfactory. In the continental trade there is little doing in white linens, and the total extent of sales for the home market since the commencement falls far short of the average of any similar period for the last five years.

HUDDERSFIELD.—Woollen and Bedford cords have sold steadily, and stocks on hand have been considerably reduced. Black and mixture doeskins and other plain goods are slow of sale, and manufacturers engaged in this department have, for the most part, extensive stocks. Regular market goods in mixtures, crapes, and twists are not yet much called for, but fancy coatings in similar patterns have sold somewhat more freely of late.

LEEDS.—For ordinary goods there was no inquiry, and the demand for spring goods was limited; only a few parcels of meltons and other light fabrics changed hands. Rates are unchanged.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, Nos. 1, 2, and 3 melters, made with Lord Ward's thick coal warm air, 4*l*; Old Windmill End Mine forge pig iron, made with Lord Ward's thick coal, 3*l* 12s 6d; best native hydrate pigs, 3*l* 10s to 4*l*; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 10s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 7s 6d to 3*l* 10s; Barrow hæmatites, 3*l* 7s 6d to 3*l* 10s; Workington hæmatites, 3*l* 7s 6d to 3*l* 8s 9d; Kirkless Hall hæmatites, 3*l* 5s to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. Favourite Shropshire and Forest of Dean brands, 4*l* 5s delivered; Northern hæmatites, from 3*l* 5s to 3*l* 10s, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Jan. 22.—Flour tends downwards, sales 9,000 barrels State and Western, at a decline of 5c; superfine State, 5.16 dols to 5.25 dols; extra ditto, 5.40 dols to 5.50 dols; round hoop Ohio, 5.70 dols to 5.80 dols; extra Western, 5.40 dols to 5.70 dols: Southern steady, sales 3,000 barrels; mixed to good, 5.80 dols to 6.10 dols; fancy and extra, 6.15 dols to 7.50 dols: Canada drooping, sales 300 barrels; extra, 5.45 dols to 7.25 dols. Wheat tends downward, sales 50,000 bushels; Chicago spring, 1.20 dol; Milwaukee Club, 1.28 dol to 1.29 dol; red winter Western, 1.33 dol to 1.37 dol; white Michigan, very handsome, 1.65 dol; amber Wisconsin 1.30 dol. Corn tends downwards, sales 42,000 bushels; mixed Western, 68½c to 71c; choice white Southern, 71c to 78c; new yellow Southern, 65c to 68c; small lots, 70c to 73c.

NEW YORK, JAN. 26.—The dulness and depression heretofore noticed in our markets for State and Western flour still continues, and prices have further declined 15c to 20c per barrel, with only a limited home and and export inquiry. Canadian flour has been quite dull, and prices are lower. For Southern flour there has been a moderate inquiry for export and home use, without material changes in prices, though the market leaves off in favour of the buyer. Notwithstanding wheat has further declined 3c to 5c per bushel, buyers have exhibited no disposition to operate in excess of their pressing requirements, and the market has ruled quiet. In corn there has been a fair though not very active business done, in part for export, but at lower prices. The receipts have been to a moderate extent, but, the market being well supplied, buyers have had the advantage. The three days' sales aggregate 148,000 bushels.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

An ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 6th day of February, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,488,315	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	9.744,970
		Silver Bullion	1,268,345
	25,488.315		25,488,315

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	8,444,776
Rest	3,485,795	Other Securities	19,934.408
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4 186,479	Notes	5,609,080
Other Deposits	11,927,130	Gold and Silver Coin	819,521
Seven Day and other Bills	655,381		
	34,807,785		34,807,785

Dated the 7th February, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,534,616	Securities	28,301,184
Public Deposits	4,186,479	Coin and Bullion	11,832,836
Private Deposits	11,927,130		
	36,648,225		40,134,020

The balance of Assets above Liabilities being 3,485,795*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£84,272
An INCREASE of Public Deposits of	605,032
A DECREASE of Other Deposits of	559,909
A DECREASE of Government Securities of	2,654
A DECREASE of Other Securities of	236,748
An INCREASE of Bullion of	215,220
An INCREASE of Rest of	114,957
An INCREASE of Reserve of	321,445

The present Bank return, although presenting no material alterations, is favourable. There has been a decrease of 236,748*l* in the other securities; an increase in the bullion of 215,220*l*, and in the reserve of 321,445*l*.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
	£	£	£	£	£
Circulation, including bank post bills	20,381,557	20,451.539	21,412,098	22,104,875	20,534,616

Price of Consols	96⅞	96½	95⅝	94½	92¼
Average price of wheat	38s 1d	46s 9d	40s 10d	43s 8d	55s 6d
Exchange on Paris (shrt)	24 95 25·25	25 10 15	25 7½ 12½	25 7½ 12½	25 20 30
— Amsterdam ditto	11 15½ 15⅝	11 14	11 15½ 15⅝	11 13 13½	11 16 17
— Hamburg (3months)	13 6 6⅛	13 5½ 5⅝	13 6	13 5 5⅛	13 7 7⅛

In 1858, the Bank of England rate of discount had just been lowered from 3½ to 3 per cent. Gold was flowing in rapidly. News had been received of the capture of Canton by escalade by the English and French, as well as of the continued successes of Sir Colin Campbell in Oude. Bitter debates were going on in Parliament upon the Conspiracy Bill, and a painful impression had been produced by the tone of the French press.

In 1859, the semi-official journals of Paris were fulfilling their mission of familiarising the public mind with the idea of coming war. The Emperor's speech at the opening of the Legislative Assembly had failed to calm apprehension. The subscription to Messrs Rothschild's Austrian loan of 6,000,000*l* had been closed, and the extent of the response had been very limited.

In 1860, a great pressure existed for money in Australia, and the Government of Victoria forwarded 3,000,000*l* 6 per Cent. Debentures to be sold in this country, in order that the proceeds might be applied to the construction of railways. The other securities held by the Bank of England had risen to 21,061,216*l*.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,473,969*l*; in 1858, a deficiency of 2,316,941*l*; in 1859, a deficiency of 2,027,823*l*; and in 1860, a deficiency of 6,759,530*l*. In 1861, the deficiency is 8,007,278*l*.

DISCOUNT AND MONEY MARKET.—There has been an active demand for discount during the week both at the Bank of England and in Lombard street, and the rate of 7 per cent. has been fully maintained.

The exchange from New York is improving, the last quotation being 106½; so that not only has the drain of gold ceased, but the best-informed American houses anticipate that it will return to this country. The money market in Paris is so much improved (the rate of discount being not more than 5 per cent.), that some anticipate a lowering of the rate of discount by the Bank of France. That establishment is certainly improving. In Hamburg the rate has fallen to 2½ per cent. In Amsterdam the rate is only 3.

Notwithstanding these favourable features, which all tend to give confidence, the demand for money, especially in the Stock Exchange, has been very great. There has been, to be sure, a large demand for silver for the East, and the Bank of England has sold about 350,000*l*, which has to be paid for to-day and to-morrow; and the provision for the Indian loan, the deposit on which being only 2 per cent., or 60,000*l*, could not, in the opinion of the moneyed world, account for the extraordinary demand which sprang up in the Stock Exchange yesterday, and especially to-day, where 8 per cent. was freely given on Government securities, and so scarce was money that Consols were actually sold at 91½ for money, the price for the account being at the time 92⅛ to 4.

When, however, the amount of biddings for the Indian loan transpired, the cause of this extraordinary demand for money was at once explained, for it appears that the amount of stock bid for, although the loan was only for 3,000,000*l*, *amounted to about* 13,000,000*l*., and that 600,000*l* was at the minimum fixed by the Indian Council—viz., 98½, and 5,835,600*l*, at prices varying from 98⅝ to 99¼, and upwards of 6,000,000*l* under 98½. Now, as these bids were *bonâ fide*, and accompanied with a deposit, it is perfectly clear the public had been making provision to pay on 13,000,000*l*, instead of 3,000,000*l*, consequently the whole enigma of the demand for money is solved, for even 2 per cent. on 13,000,000*l* amounts to 260,000*l*. But as 16 per cent. more would have to be paid within a week, it is clear that provision had been made for 18 per cent. on 13,000,000*l*, or 2,340,000*l* at least; and as many who bid intended, doubtless, to pay up the amount in full, it is perfectly clear that an amount of money has been provided for, varying something between two millions and thirteen.

The enigma, therefore, of a large demand for money in the face of circumstances which pointed to an easier money market is, to a great extent, solved; the pressure on the Stock Exchange is explained; and we have no doubt, in the course of a few days, we shall see much greater ease in the money market.

ENGLISH FUNDS.—The settlement of the Consol account which took place yesterday has gone off very well, but it is evident that large amounts of stock have been given on in order to provide for the India loan; the rate at which the great bulk of stock was carried over from account to account was 5 per cent.

As, however, the stock was carried over and not sold, it is evident the public have bought largely, and we should not be surprised to see a marked improvement in the funds, and positively a scarcity of stock whenever it suits the Bank and the bankers, who have been the large borrowers on stock, to repay the loans they have made and take back the stock. The amount of biddings for the Indian loan show that a large amount of capital awaits investment. Consols for money have fluctuated between 91½ and 92, and to-day leave off 91¼ ⅞ for money, and 92¼ ⅜ for the March account.

When the biddings for the Indian loan became known, the price of the 5 per cent. stock rose from 99¼ to 100¾, and the new loan to 101½, and the greatest excitement prevailed in the market. The amount of the biddings for the new loan must be a subject of great congratulation to the Indian

Government, as it evinces by facts and figures which are more eloquent than words, that there is a returning confidence on the part of the public in Indian securities, and it is fair to presume that that portion of the bidders who did not bid high enough, will turn their attention to the debentures of the Indian Railways, which not only possess the guarantee of the Indian Government, but have the option of being converted into stock.

Exchequer Bills are 5 discount to par, and it is stated that the Chancellor of the Exchequer has been converting some of the Savings Bank stock into Exchequer Bills, an operation by no means unlikely, considering the large amount of Exchequer Bills which fall due in March.

FOREIGN FUNDS.—The market for foreign funds has been remarkably steady during the week. Mexican Bonds have fluctuated between 23¾ and 23, and close 23¼ to ½. French funds this afternoon close 68.50. There is no particular feature in any other stock. It is stated that the draft of the new treaty for the regulation of the future commerce of Turkey has arrived for the approbation of the English and French Governments.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day :—

RAILWAYS.—The railway market has been very heavy, as will be seen by the following quotations, and that, generally speaking, railways have fallen in consequence of disappointment in the dividends.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day :—

BULLION.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes :—

Gold.—There has been very little doing during the past week, and the shipments to America have materially declined, having been only 13,338*l* per Africa, and 3,800*l* per Kangaroo; these amounts make up a total of 2,161,800*l* sent to New York since 28th November last. The Indus took 18,068*l* to India on the 4th instant, and the Tyne has brought 2,693*l* from the Brazils.

Silver.—The silver brought by the Tasmanian has been sold at 61¼d per ounce standard, and a considerable amount is likely to be sent to Bombay by the steamer leaving Southampton on the 12th inst. The Indus took 97,550*l* to India and China on the 4th inst.

Mexican Dollars.—The dollars per Tasmania have not yet been sold, we can, therefore, only quote the last price of 60¼d per ounce, with a quiet market.

Exchange on India remains as before, for 60 days' sight Bank bills on Bombay and Calcutta—viz. 2s to 2s 0⅛d. Bills with documents, 1s 11⅜d to 1s 11½d. Bank drafts on Madras, 60 days' sight, 1s 11¾d to 2s.

India Government Loan Notes are very quiet, and without change. Prices are nominal, at 99½ to 100½ for 5½ per Cents., and 93½ to 94 for 5 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doublooons, 77s 3d per oz. Silver—Bar silver, 5s 1¼d per oz std; bar silver, containing 5 grs gold, 5s 1½d per oz std; fine cake silver, 5s 5⅛d per oz; Mexican dollars, 5s 0½d per oz, last price; Spanish dollars (Carolus), 6s 6d per oz; Five franc pieces, 4s 11⅝d per oz.

The Stratheden has arrived from Melbourne, with 196,016*l* in gold.

FAILURES.—A meeting of creditors of Messrs Francis Ede, Son, and Co., Levant merchants, who stopped on the 19th ult., has been held, when the following statement, showing the position of the firm on that day, was read by Mr Coleman, the accountant :—

STATEMENT OF ASSETS AND LIABILITIES.

DR.			£ s d
To creditors on open accounts			11,244 11 3
To creditors on bills payable.....	£442,403 0 9

Estimated surplus from the separate estates of the partners, say	5,640 14 8		
Subject to a charge in respect of any deficiency that may arise upon a claim in the firm for 5,000*l*.			

Mr Coleman explained that the debts on open accounts were contracted in the ordinary course of trading. Of the 318,913*l* of bills payable, expected to be paid by parties on whose account they were accepted, 224,600*l* are for Messrs Black and Co, Ede's correspondents at Constantinople, and from the latest information, it is fully believed, will be provided for by that firm. The remainder represent houses who have already suspended or are expected to do so. A careful examination of this paper has been made by persons well acquainted with Smyrna and Constantinople, and they consider that the sum at which it stands in the present account leaves more than ample margin for adverse contingencies. The creditors partially secured are brokers holding produce against advances. The 21,803*l* bills receivable estimated to rank on the estate represent liabilities on account of firms who have publicly stopped—viz., Bello, Brothers, C. W. Ede and Co, Navone, Pappa, L. Rodocanachi, Schilizzi (of Liverpool), Schilizzi and Vuros, E. Vitalis and S. P. Zizinias, of whom C. W. Ede and Co. and L. Rodocanachi, who appear for about half the whole

sum, expect to pay in full. Of the remaining bills receivable, over 103,000*l* have run off since the stoppage, and the rest are of the highest class. The foreign bills are of like character. The total liabilities at the time of the suspension were 941,305*l*. In addition to the 57,840*l* assets, 107,492*l* will be due from debtors, supposing their draughts to continue to rank upon this estate. With reference to the advance made by Messrs Black and Co., in conjunction with Messrs Ede, to the Turkish Government, it was mentioned that the transaction took place last May, and that the original amount was 182,000*l*, for which bills were drawn on Messrs Ede, in that month and June, of about 181,000*l*. If the arrangement had been carried out on the original basis, this account would now be reduced to 117,000*l*, but it stands instead at 183,000*l*. It appears that a second agreement was entered into with Messrs Black by the Government, by which the latter were enabled to divert to their temporary financial necessities the resources which should have been sent to England according to the terms of the first proposition. No discussion took place, and a resolution to wind up under a deed of inspectorship was adopted.

At a meeting of creditors of Messrs Edward Wackerbarth and Co., sugar refiners, who suspended last month, the balance sheet, prepared by Mr C. F. Kemp, the accountant, showed liabilities expected to rank upon the estate 26,440*l*, with assets estimated to produce 21,688*l* net. It appears that the house has been long in existence, and that Mr Wackerbarth brought in at different times a capital of about 17,000*l*. Up to 1854 the trading was profitable, but the business subsequently has been carried on at considerable loss, which, with the rather heavy drawings of the partners, has caused the disappearance of the whole of the capital, and more than 4,000*l* besides. After some discussion, it was resolved to wind up under a deed of inspectorship.

A telegram from Havana, via the United States, announces the stoppage of Messrs G. Sthamer and Co., merchants and sugar exporters, with large liabilities, some of which will have to be sustained in Manchester, London, and Hamburg. They are believed, however, to be so divided that the amount will not be particularly heavy in any individual instance, the total in London ranging, perhaps, between 50,000*l* and 70,000*l*. Mr Sthamer has transacted an extensive business and enjoyed good standing, but is said to have locked up his means in bank shares and other speculative investments. The firm have an agent at Manchester.

The suspension has been notified of Messrs Ledgard and Sons, of the Poole Bank. The bank was established in 1821, and was entitled to issue notes to the extent of 11,856*l*. The total amount of its liabilities has not transpired.

The failure of Messrs Nickoll and North has caused that of Messrs W. Tozer and Son, oil and lead merchants, of Bishopsgate street, but their liabilities are understood to be of small amount.

Explanations in Parliament relative to the Indian Loan of 3,000,000*l*.—Mr Crawford asked the Secretary of State for India whether the necessity for raising a loan of 3,000,000*l* in London, for the service of the Government of India, was owing to circumstances connected only with railway receipts and expenditure; or whether it arose from the falling off of the available sources of income or increase of expenditure in India.—Sir C. Wood, in reply, explained that large funds had to be provided in England for the service of India, and, on the other hand, the main portion of the means required for railroads in India required large remittances to India, which were paid into, and drawn from, the home Treasury. The sum expected to be paid in England was 7,000,000*l*, and 2,500,000*l* had been expected from India on account of Indian expenditure at home; but the home expenditure on account of India in this country had exceeded the estimate, while the railroad payments had fallen short, and the Indian Government had remitted 1,250,000*l* less than had been calculated upon. The whole amount was 2,750,000*l* short of what he had expected, and he had, therefore, found it necessary to exercise the power given by Parliament last Session. As to the bulk of the expenditure in India, he was happy to say that there was no necessity for borrowing a single shilling. The expenditure had been very considerably reduced since he had last addressed the House upon this subject. The military expenditure would be reduced in the course of the year 3,300,000*l*, following a reduction last year of 3,500,000*l*, making a total reduction in the course of two years of 6,800,000*l*; and next year, 1861-2, if no unforeseen circumstances arose, the income and expenditure would be almost balanced.

The London and County Bank.—At the half-yearly meeting of the London and County Bank, Mr W. Nicol, M.P., presiding, the report recommending a dividend of 6 per cent. for the past six months, making 11 per cent. for 1860, free of income tax, was adopted unanimously. 15,000*l* was also carried to the reserve, which now stands at 125,000*l*. The progress of the business has been satisfactory, the amount due to customers showing an increase compared with the previous year of 557,000*l*. The augmentation, however, was not so large in the second half of the year as in the first, owing to the unfavourable harvest, the farmers not having been able to increase their balances, but rather requiring assistance, which the bank have readily afforded. The gross profit in the past six months is larger than on any previous occasion, and no losses of any importance have been sustained, or are anticipated. The cash in hand is rather higher than last half-year from exceptional circumstances. The cash of the bank at call with the discount houses is less, the difference of 337,000*l* being more profitably employed in discounting commercial bills. The investments in Government securities show an augmentation of 101,000*l*. There is an increase in the expenditure, owing chiefly to income tax. Notice has been given of an appeal to the House of Lords from the decision lately given in the Irish courts in favour of the claim of the bank upon certain estates belonging to the late John Sadleir. The Directors have no reason to anticipate an adverse result, but have increased the reserve so as to be prepared for any contingency. In the year 1860, 2,694 new accounts were opened, making the present total 27,186. The new branch at Shoreditch, founded after the failure of Davies and Co., the Shoreditch bankers, is going on well. Owing to the assistance rendered on that occasion to Davies's customers, a large number have transferred their accounts to the London and County, and many new ones from the neighbourhood have been opened. The Islington branch is also proceeding favourably. Since the 1st of January 45,000*l* has been received from Ireland, and the greater part of the property is now sold. The Westminster property is receiving considerable improvements and the rental is increasing. The auditors reported that they have personally examined the securities and the balance at the bank, and that, in their opinion, the checks adopted at the branches are as good as can be devised. The report and accounts will be found in another column.

Miscellaneous.—A special general court of proprietors of the Bank of England was held yesterday, the Governor, Mr Bonamy Dobree, in the chair, for the purpose of considering a proposal from the Chancellor of the Exchequer to modify the terms for the management by the Bank of the public debt. It appears that the allowance at present paid under the Act of 1808 is 340*l* annually per million up to 600 millions, and 300*l* per million beyond that limit, terminable annuities being reckoned at 25 years' purchase. These terms it is intended to reduce to 300*l* in the first instance, and 150*l* in the second, with a stipulation that annuities of originally more than 50 years to run shall be reckoned at 15 years' purchase, and those for a less term at 10 years, and that the payment of 4,000*l* per annum, termed "house-money," and the 1,579*l* on account of South Sea debt, shall be discontinued. By this change the allowance to the Bank, which, under the present arrangement, is 244,883*l*, will be reduced by 50,021*l*. It is, however, provided that the new plan shall remain in force for 25 years certain. In the discussion that took place the chief point relied upon was the desirableness of effecting an arrangement with the officers of the Crown not liable to be suddenly changed, and this advantage the new scheme was held to possess, at it is to remain undisturbed for 25 years. In answer to questions, it was mentioned that the present proposal has nothing to do with the Bank Charter Act of 1844, and merely involves the alteration of the clause in the Act of 1808 vesting the management of the debt in the Bank, by which the remuneration of the Bank is fixed. With reference to a suggestion

of the Chancellor of the Exchequer, it was announced that increased facilities will be afforded to the public in the transfer of stock and the payment of dividends, and also in lessening the time for keeping the Bank books shut for the transfer of stock prior to payingthe dividends. A resolution acceding to the terms specified, which was moved by Mr Prescott, and seconded by Alderman Salomons, M.P., was agreed to unanimously. The attendance was numerous and influential. The sum hitherto received by the Bank from Government for the management of the national debt for the years 1860-61 has been—

	£	s	d
On 600,000,000*l* at 340*l* per 1,000,000*l*	204,000	0	0
On 136,278,362*l* at 300*l* per 1,000,000*l*	40,883	10	2

The Directors of the Bank of Turkey have notified that the delay in the commencement of the operations arises only from the necessity of waiting the withdrawal of the paper money, which was one of the measures to be effected by the loan of M. Mirès; that they have received most powerful support from the leading bankers at Constantinople, and that their views as to the value of the concession they hold from the Turkish Government are unchanged.

In the report recently presented to the shareholders of the Caisse Générale des Chemins de Fer by the managing committee, M. Mirès details at length the proceedings connected with the issue of the late Turkish loan, and concludes with the statement that, although the profit will be less than had been originally estimated, a fair return may still be looked for.

According to the New York advices, the total of gold received from this side had reached 2,166,000*l*, leaving 915,000*l* yet to arrive. Of the amount received, however, about 1,000,000*l* or 1,200,000*l* had not yet passed into circulation, owing to the delay at the Mint.

It is understood that Messrs Baring Brothers and Co. will take immediate steps for carrying out the exchange of each 500*l* Buenos Ayres 6 per Cent. bonds for five new bonds of 100*l* each. Certificates will probably be issued, representing the new 100*l* bonds, pending the formalities connected with the signature of the latter by the proper authorities at Buenos Ayres.

The advices from Rio de Janeiro state that the home Six per Cent. stock (into which the holders of Brazilian railways have the option of converting their shares) was steadily maintained at par, ex dividend.

A telegram from Vienna reports some diminution of the distrust prevalent in that city, and a consequent fall of 2 per cent. in the rate of exchange.

A meeting of the Electric and International Telegraph Company has been held, the Hon. R. Grimston in the chair, when the report was adopted, and a dividend declared for the past half-year of 3½ per cent., making a total of 7 per cent. for 1860. The renewal fund has been raised to 35,717*l*, and a balance of undivided profit of 11,782*l* is carried forward.

At the annual meeting of the City of London Brewery Company (Calvert's), Alderman Sir James Duke, M.P., in the chair, a dividend was declared on the ordinary and preference stocks at the rate of 6 per cent. per annum out of the available balance of 18,633*l*. It was also resolved to appropriate 1,704*l* to the reserve, and 250*l* to the manager, leaving 504*l* to be carried forward. The report stated that considerable difficulties have been contended with during the past year, especially from the increased expenditure consequent on the advance in malt and hops. No loss of connection has been experienced of any importance, while several new customers have been obtained. The brewery, buildings, machinery, and plant have been kept in a constant state of efficiency. The gross profits during the eleven months the Company has been in existence have been at the rate of nearly 50,000*l* a year.

The Select Committee of share and bondholders of the Grand Trunk Railway of Canada have issued their first report. The Committee have taken a considerable amount of evidence, but consider that until the report of the three Commissioners appointed by the Canadian Government to investigate the position of the undertaking, which is expected in a few weeks, shall have been received, it would be premature to send from this country any second commission of inquiry. Meanwhile the Committee feel that the proper course for the share and bondholders will be to present a petition to the Canadian Legislature, which will assemble about the end of the present month, for relief generally, leaving it to the wisdom of the members of the Assembly to determine the manner in which it may best be given. A petition in that sense, which will lie at the offices of the Company, has accordingly been prepared, and is accompanied by an able statement of reasons in support of its prayer.

Advices from Paris mention that the fact of the Emperor of Russia having vetoed the arrangement for an exchange of gold and silver between the Bank of France and the Imperial Bank of St Petersburg remains unexplained, and that it is still attributed to political feeling.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 424 per mark, and the short exchange on London is 13.5½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, rather more than 3-10ths per cent. dearer in London than in Hamburg.

Imports of the week ..... 247,004 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The show of English wheat at Mark lane, to-day, was again very moderate, and chiefly in poor condition. Good and fine samples moved off briskly, at very full prices; but inferior kinds were inactive. Foreign wheat was firm, at full currencies. All other produce moved off freely, at fully Monday's quotations. The imports from abroad are 39,430 quarters of wheat, 21,800 barley, 37 oats, 300 sacks and 23,720 barrels of flour. At Liverpool, to-day, the trade generally has been steady, at full currencies.

Advices from New York state that much less business was doing in breadstuffs for export purposes, and that prices were rather drooping.

"Our corn market has been quiet," write Messrs Briggs and Co., of Alexandria, "and quotations are in general lower, but supplies of all descriptions of breadstuffs, excepting Indian corn, are very small. The following are the sales since our last, with present prices free on board:—Wheat—Saide, 4,290 qrs, 37s to 37s 8d; Beheireh, 375 qrs, 36s to 37s: beans—Saide, 2,810 qrs, 29s 3d to 29s 10d; Beheireh, 70 qrs, 28s 6d to 29s: Indian corn, 7,380 qrs, 26s 6d to 27s 4d; barley, 620 qrs, 22s 6d; lentils, 125 qrs, 29s. Freights exhibit some tendency towards improvement, and may be quoted at 4s 6d to 4s 9d per quarter for beans to the United Kingdom for orders, but with very little doing. To a direct port 3s 6d to 4s, nominal. Ballasts of grain to Liverpool by steamer, 6s 6d per quarter; by sailing vessel, 3s to 3s 6d. Exchange on London at three months' date, 95½ piastres per £; France, 5f 29c to 5f 30c per dollar of 20 T. P.

This has been again a quiet week in the Liverpool cotton market, the continued large arrivals tending very much to check operations. The total sales of the week amount to 49,000 bales, and include 34,000 bales to spinners, 4,000 bales on speculation, and 11,000 bales for export. Quotations are generally not lower than Friday last, although here and there sales have been effected upon easier terms. To-day the market closes quiet, with sales of 6,000 bales.

"The movement of cotton to the seaboard," write Messrs Neill and Co., of New York, "is now progressing on a pretty free scale. The weekly receipts are in excess of last year, both by mail and telegram, and unless again interrupted, will continue large for some time. The natural effect of high prices in drawing the crop to market should occasion little surprise; for, with nearly half the yield still in their hands, planters must be anxious to realise at the present remunerative rates. The season is now wearing on, and even if prices should decline again, there would be less disposition to hold back than heretofore, as the present crop needs to be got out of the way to prepare for the next. The political agitation at the South is also an additional stimulus for planters realising. Large receipts during February and March are, therefore, quite probable, and they may prove the heaviest months of the season. The decrease as compared with last year is already checked, and if the four million estimate prove correct, we shall from this out receive almost as much cotton as last year. The decrease as compared with 1858-9 has passed its maximum and will rapidly disappear. The course of our markets has been subject to violent fluctuations lately. The excitement lately advised on this side has been followed by another reaction. Dull news from Liverpool, large receipts at the ports, and a more pacific tone in politics have caused buyers to pause, and prices have yielded ½ to ⅝c at all points."

We have received the following cotton report from Messrs Wallace and Co., of Bombay. It is dated Jan. 11:—

Prices have fluctuated a good deal during the month, partly consequent on the advices from England and partly owing to the changes in the freight market. Dhollera was worth on the 13th ultimo 122 rs per candy, on the 20th 125 rs, on the 28th 123½ rs, and on 4th instant 119 rs to 120 rs. Compta changed hands on the 13th at 112 rs, on the 19th at 114 rs, on the 27th at 108 rs to 110 rs, and on 4th instant at 107 rs. The quality of the recent arrivals of Dhollera is not so good as before, but that of Compta is keeping pretty regular. Our receipts of all descriptions of staple during December aggregate 45,000 candies, against 42,000 during the corresponding month of 1859, and 26,000 in that of 1858. The following are present quotations for old staple:—Surat, Broach, and Jumbooseer, 116 rs to 118 rs; Dhollera, Gogo, and Bhownuggur, 117 rs to 121 rs; Oomrawuttee, 110 rs to 112 rs; Khandeish, 98 rs to 102 rs; Compta, 108 rs to 110 rs; ginned Dharwar, 130 rs to 131 rs per candy of 784 lbs. We reckon the purchases since 10th ultimo at 40,000 candies, and of these about 13,000 candies are of new to arrive; nearly all the contracts for Oomrawuttee for delivery before 30th April have been at 130 rs. The few transactions in new Broach have been at about 140 rs. The advices received from the Oomrawuttee, Surat, Broach, Jumbooseer, Gogo, and Bhownuggur districts regarding the new crop are very favourable; in Cutch and Kattiawar it is anticipated that there will not be much above half an average one. As to Compta and Dharwar sorts, we have no very specific accounts as yet.

The public sales of tea held this week have gone off steadily, and very full prices have been realised for all qualities. In the private market, a fair average business is doing, at late rates. The supply on offer is moderately good.

Good and fine qualities of raw sugar have sold freely, at full prices; but low and damp parcels have, in some instances, ruled the turn lower. Refined goods still continue to move off heavily, on former terms. We have advices from the Havana to the 20th

ult. Sugar was dull and nominal, and the stock on hand was only 17,500 boxes.

Plantation coffee has sold somewhat briskly, at very full prices. Other descriptions, however, have changed hands slowly, at late currencies. The duty on the export of coffee from Rio has been advanced from 9 to 11 per cent.

The annexed statistics, in reference to sugar and coffee, are furnished by Messrs Trueman and Rouse :—

IMPORTS and STOCKS of SUGAR and COFFEE at the PRINCIPAL EUROPEAN PORTS, for the Twelve Months ending 31st December, 1859 and 1860.

Total	186,440	190,990	53,200	46,010

A few transactions have taken place in cocoa on former terms ; but the demand for rice, notwithstanding the improvement in the sale for wheat, has been somewhat restricted, on former terms.

Messrs Witherby and Son have published the following statement of the clearances of currants and raisins in London during the past six years :—

CURRANTS.	tons.	RAISINS.	tons.
1855	5,335	1855	7,790
1856	6,320	1856	7,690
1857	7,000	1857	5,510
1858	11,520	1858	7,970
1859	14,625	1859	10,110
1860	19,590	1860	9,395

The spirit market may be considered steady, but we have no improvement to notice iu the quotations.

Fruit has continued to move off slowly, on former terms.

Saltpetre has changed hands slowly, at barely late currencies.

"The transactions in leather in January," observe Messrs Powell and Co., "have been much larger than for some months previously, and as the supplies have been greatly retarded by the long and severe frost, the stocks of many articles are reduced. The high rate of interest and the stringency of the money market have, however, no doubt acted as a check to the demand, and prices have not generally improved ; on the contrary, for those goods which have been the least in request the tendency has been downwards. In raw goods very little change has occurred. The imports are limited, excepting only of East India kips, which are excessive."

Wool, hemp, flax, &c., have commanded very little attention. Metals have ruled heavy, and Scotch pig iron has sold at 49s 3d cash, mixed numbers.

COMPARATIVE STATEMENT of HEMP and FLAX on hand in London, on the 1st of February, 1860 and 1861, Dealers' Stocks included.

Messrs Churchill and Sim have issued the following statement of the stock of timber at the public docks on 1st February :—

	1861.	1860.	1859.
Foreign deals pieces	1,912,000	1,530,000	1,546,000
Battens, boards, and ends	1,007,000	881,000	581,000
Fir timber loads	77,000	64,200	38,800
Colonial pine deals & battens pieces	1,169,000	736,000	1,093,000
Spruce ditto	1,023,000	1,056,000	833,000
Pine timber loads	12,000	10,100	10,700
United States pitch pine timber	1,600	3,100	2,700
East Indian teake	1,600	5,400	14,700

The oil market has continued very inactive, and linseed oil has fallen to 28*s* per cwt on the spot. Turpentine has been somewhat drooping.

Tallow has commanded less attention. To-day, however, P. Y. C., on the spot, has sold at 60s ; February to March, 60s ; March, 60s 3d ; April to June, 58s 6d ; July to September, 58s ; October to December, 56s 6d to 57s per cwt. Town tallow is 58s 3d net cash.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Only moderate supplies of home-grown wheat have been on offer both here and in the various local markets held this week, and the general quality of the samples have been very middling. Good and useful parcels have moved off freely, and, in some instances, prices have had an upward tendency ; but low and damp qualities have sold slowly, on former terms. There has been a fair amount of business doing in nearly all descriptions of foreign wheat, at very full prices. Fine barley has sold steadily ; other kinds slowly, at late rates. *Malt* has realised former currencies ; but the demand has been much restricted. Oats, beans, and peas have commanded previous rates, and there has been a steady business doing in flour, both English and foreign, at full quotations.

Throughout the Continent, wheat has met a dull inquiry, yet very little change has taken place in prices. Spring corn has been more active, at extreme rates. In the United States, both wheat and flour have become less active, at barely stationary prices.

We extract the following, dated Odessa, January 17, from a circular forwarded by Messrs Pietroni and Draper:—"In comparing the exports of grain and seed during 1860 with those of 1859, the result is greatly in favour of the latter year :—

	Exports, 1859. chetwerts.	Exports, 1860. chetwerts.	Decrease, 1860. chetwerts.	Increase, 1860. chetwerts.
Wheat	1,412,525	1,155,991	256,534	...
Maize	402,655	270,376	132,279	...
Rye	389,280	149,982	239,298	...
Barley	482,481	225,106	257,375	...
Oats	612,580	304,541	308,039	...
Flour	16,027	45,874	...	29,847
Linseed	189,281	276,397	...	87,116
Rapeseed	16,615	20,435	...	3,820
	3,521,444	2,448,702	1,193,525	120,783

The deficit is about 1,000,000 chetwerts, notwithstanding which, however, the merchants of Odessa must have realised more money in 1860 than in 1859 ; for whereas in that year the bulk of our shipments entailed loss, in 1860 the result was generally profitable. The yield of the corn harvest of 1860 was very satisfactory, both in quantity and quality, and if the supplies received during the autumn did not respond to our expectations, it was solely owing to the rainy season having set in so early as to render communication with the interior impracticable. A very small proportion of the new crop has consequently yet reached us, and it will not be before May or June, 1861, that we can expect such supplies as will render it possible to have a large stock in the market."

The Scotch markets have ruled firm for wheat, barley, and oats, at very full prices. Other produce has changed hands slowly.

In Ireland, holders of produce, generally, have been firm in their demands, and the quotations have been well supported.

At Mark lane, to-day, the show of English wheat was very moderate. Good dry samples commanded a steady sale at very full prices, otherwise the demand ruled heavy in the extreme, and the quotations were quite nominal. Owing to the large import, sales progressed slowly in foreign wheat at Monday's currency. Barley, notwithstanding that the arrival is on an extensive scale, ruled firm, and prices were well supported. Malt, however, continues much depressed. Oats, beans, and peas moved off steadily at full currencies ; but the flour trade was slow in consequence of the large influx of American barrels.

Mr Ed. Rainford thus reports the state of the floating trade :—The arrivals off coast for orders reported up to last night are 54,

consisting of 26 cargoes of wheat, 15 maize, 9 barley, and 4 miscellaneous, viz. :—Wheat, 4 from Taganrog, 2 Sulina, 2 Varna, 1 Bourgas, 3 Berdianski, 5 Galatz, 2 Alexandria, 1 Venice, 1 Ibraila, 2 Odessa, 2 New York, 1 Constantinople; maize, 3 Constantinople, 1 Sulina, 2 Ibraila, 6 New York, 1 Galatz, 1 Mazagan, 1 Odessa; barley, 2 Ibraila, 2 Constantinople, 1 Alexandria, 2 Sulina, 1 Odessa, 1 Varna; oats, 1 Odessa; beans, 1 Mazagan, 1 Alexandria; locust beans, 1 Cyprus. Of these, about one-sixth had previously changed owners. The demand for cargoes afloat continues animated, especially for wheat, and a very large business has been done since this day week.

The London averages announced this week are:—

	qrs	s	d
Wheat	2040	at 53	11
Barley	2587	43	10
Oats	2742	22	4

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has not shown any further material change this week, and the demand is principally confined to the actual wants of the consumers. At the public sales on Tuesday, Mauritius sold more freely, at slightly lower rates for all but the finest qualities, and native brown Madras was also cheaper. Transactions in West India during the three days reached 950 casks, including the public sales. 645 casks only partly sold: Barbadoes, 40s to 43s; grainy Demerara and Berbice, 38s 6d to 43s 6d; brown, 36s 6d to 38s per cwt. The deliveries last week showed some improvement, being 4,200 tons, but the landings were 4,500 tons, and the stock has increased to 49,500 tons.

Mauritius.—At the sales on Tuesday, 18,750 bags were nearly all sold, low middling descriptions at easier rates; crystallised at a slight advance: soft brown, 32s to 36s; low grey to middling yellow, 36s 6d to 39s; grainy sorts, 37s to 42s 6d; fine white, 50s to 50s 6d; middling to fine crystallised, 41s to 45s per cwt. A few parcels have also changed hands by private contract.

Madras.—3,150 bags principally found buyers at moderate prices: native, 31s to 35s 6d; date yellow, 32s to 32s 6d per cwt.

Foreign.—1,170 bags China and 490 mats Siam were bought in above the market value. Of 1,230 baskets Java, imported from America, a small portion only sold: brown, 33s 6d to 36s 6d; soft grey to good ditto, 37s to 39s. 288 casks Porto Rico sold at easier rates: low brown to middling heavy yellow, 35s 6d to 39s 6d. Of 3,178 boxes Havana, about half sold: brown to fine yellow, 36s to 42s 6d; strong Derosne and florettes, 43s 6d to 46s 6d; fine white, 50s to 51s; grainy ditto bought in at 50s to 51s; grainy grey and yellow at 39s to 41s 6d. 2,500 bags clayed Manilla have sold privately at 35s, and 1,500 boxes Havana at the above quotations; also, 4,300 bags brown Pernambuco chiefly at 34s per cwt.

Refined.—The home market is still inactive, but not generally lower, owing to the continued limited stocks. Dutch crushed has been firm.

MOLASSES.—60 puns Barbadoes have sold at 19s to 20s per cwt.

RUM.—The market is very steady, although rather quiet, and holders are firm. Good to fine Demerara has sold at 1s 11d to 2s, about 200 casks Bengal at 1s 8d, and some Mauritius at 1s 8½d per proof gallon.

COCOA.—The sales of West India have gone off without spirit, and 247 bags Trinidad only partly sold at previous rates, ranging from 62s to 74s for low grey to good red. 91 bags Grenada realised 59s 6d to 61s; 1,232 bags Bahia were bought in at 55s 6d to 59s, and afterwards partly sold at 56s to 57s per cwt.

COFFEE.—There has been a good demand at full prices, 1,295 casks 835 barrels and bags plantation Ceylon, *in the public sales*, finding ready buyers: fine ordinary, 64s to 65s 6d; fine fine ordinary to good, 66s to 76s 6d. 529 bags 7 casks native: good even, 64s; triage and blacks, 25s to 35s. 1,130 bags Java kind: ordinary to good palish, 63s to 66s. 160 cases common palish Neilgherry, 63s to 65s. A few lots Jamaica sold from 63s to 65s per cwt for fine fine ordinary. The stock at this port is 6,300 tons (not including a portion of the recent Ceylon arrivals), against 7,150 tons last year.

TEA.—The public sales have comprised 45,000 packages. These commenced yesterday, when 6,208 packages sold without material variation in prices. Tayshsan congou went ½d per lb dearer than by private contract.

RICE.—Only moderate transactions have occurred, and at prices occasionally in favour of the buyers, including low white Bengal, at 11s 6d; old Necrancie Arracan, 10s 9d to 10s 10½d; Bassein, 10s 9d to 11s; old ditto, 10s 3d per cwt. No further sales of floating cargoes are reported.

SAGO.—A few lots common dull bold grain were disposed of at 14s to 14s 6d per cwt, being much lower than any of the previous rates.

SAGO FLOUR.—200 bags were taken in at 17s 6d per cwt.

SPICES.—There has not been any material change in prices at the sales this week, which contained moderate supplies. Pimento sold with less spirit, owing to the recent arrival of 4,000 bags. 1,000 bags, by auction, went at 2¾d to 3d for ordinary to good middling. 2,070 bags Singapore black pepper about three-fourths sold: very common dusty to good, 3¾d to 4d. 135 bags *middling* Singapore white pepper realised 5¾d to 5¾d; 22 cases small to good mixed brown nutmegs, 1s 1d to 1s 7d; and 9 cases ordinary to good reddish mace, 10d to 1s. 14 casks Amboyna cloves were taken in at 5¼d per lb. Of 200 boxes cassia lignea, the bulk was taken in at 92s, and 96s for second and first piles respectively. 130 barrels Jamaica ginger partly sold at rather lower rates, from 60s to 84s per cwt.

SALTPETRE.—This article has been almost neglected, and Bengal can only be sold upon much lower terms.

COCHINEAL.—The market is firmer, and 102 bags Teneriffe grain found buyers at 1d to 2d recovery on last week's rates: silver, 2s 8d to 2s 10d; black, 3s 1d to 3s 3d per lb. Other kinds have been firmer.

SHELLAC.—A few parcels have been sold, at 20s to 30s per cwt decline.

DYESTUFFS.—Good to fine Bengal safflower meets with partial inquiries at former rates, but other kinds are inactive. A few lots low and ordinary, offered this week, went at 3*l* 5s to 3*l* 15s. Gambier is firmer, with a few transactions at 17s to 17s 6d. Good Cutch cannot be obtained under 25s per cwt, which was paid for one lot this week.

IVORY.—The public sales this week have gone off at a general decline of 2*l* to 4*l* per cwt.

HEMP.—Small sales have been made in Manilla at previous rates. Russian is quiet. Jute continues firm, and desirable qualities have commanded 10s to 20s advance. On Wednesday, 3,510 bales by auction sold from 14*l* to 23*l* 5s per ton for low to fine.

METALS.—The market remains dull. Iron has not recovered from the late depression. The last sales made in Scotch pig were at 48s 9d per ton. Spelter is firmer, with some transactions reported at 18*l* 7s 6d to 18*l* 10s on the spot, and 19*l* per cwt is now the quotation for spring shipment. Copper remains dull. Foreign tin is firmer. Banca has sold at 137s; Straits are worth 121s to 123s per cwt.

LINSEED.—There have been large arrivals this week, but considerable sales made, importers accepting rather lower rates: Calcutta, 54s Bombay, 57s. Numerous cargoes off the coast have sold: Alexandria, 51s 6d; Black Sea and Azoff, 52s to 52s 6d, or 53s per quarter delivered in the United Kingdom.

OILS.—Forced sales of rape have unsettled the market. Foreign refined is quoted 40s to 41s; brown, 36s 6d. Linseed meets with steady buyers, closing at 28s 3d on the spot. Cocoa-nut is dull, and rather lower: Cochin, 53s to 53s 6d; Ceylon, 51s 6d to 52s. Common kinds of palm offer upon easier terms; fine is steady, at 46s 6d to 47s per cwt. Only limited sales have been made in olive: Gallipoli, 62*l*; other kinds, from 54*l* to 59*l*. Fish oils are dull; sperm, 104*l* to 105*l*. Fine Southern, in second hands, sold at 39*l* per tun.

TURPENTINE.—American spirits, 31s 6d to 32s. Rough has sold at 9s 1½d per cwt.

HIDES.—The export demand for East India having revived, 185,000 hides, offered by auction yesterday, sold at full prices in most cases.

TALLOW.—The trade continue to make small purchases of foreign, but yesterday speculative operations occurred in Y.C. for delivery to March at 59s to 60s, Y.C.; on the spot is quoted 60s; April to June, 58s; and October to December, 56s per cwt.

PARTICULARS OF TALLOW.—Monday, February 4.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The sales went off steadily to-day at previous rates. 1,454 casks West India have sold for the week. 9,553 bags Mauritius, 3,000 bags Bengal, and several parcels West India, by auction, chiefly sold.

COFFEE.—264 casks plantation Ceylon brought full prices. 197 bales Alexandria Mocha part sold at 90s per cwt.

TEA.—7,160 packages sold in the sales to-day. Scented capers went cheaper. 17,900 packages remain for Monday.

RICE.—1,000 bags of Bassein have sold at 11s per cwt.

SPICES.—645 bags pimento went ½d cheaper, from 2¾d to 3d per lb.

SALTPETRE.—1,105 bags Bombay, refraction 43¼ to 29, sold at 33s to 34s. 612 bags Bengal, refraction 12 to 6, were bought in at 37s to 39s per cwt.

CUTCH part sold at 24s per cwt.

GAMBIER was bought in at 17s 6d.

SAFFLOWER.—96 bales sold steadily at 2*l* 15s to 4*l* 7s 6d per cwt.

COCHINEAL steady.

RUBBER.—A few lots of E. I. sold at 1s 4d to 1s 5d per lb.

SHELLAC.—Good orange sold at 9*l* 12s 6d to 9*l* 15s; native, 7*l* 17s 6d to 8*l* 2s 6d; common Siam 7*l* 2s 6d; garnet, 8*l* 10s per cwt.

OIL.—The parcels of cocoa-nut and palm offered by auction were chiefly bought in, and 18 tuns colonial sperm sold at 105*l* per tun.

TALLOW.—Town unchanged. 398 pipes and casks 270 boxes South American, by auction, part sold at 55s 6d to 59s 3d. 82 casks 144 cases E. I. realised 52s 6d to 56s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues neglected. Treacle remains firm. Nothing doing in Dutch crushed; prices quite nominal; selling at 32s 6d in barrels for V.O. and B. & H. No. 1, f.o.b. in Holland.

DRY FRUIT.—With the exception of a slightly easier quotation for low island currants our prices are maintained. The highest prices have, in fact, been paid this week for small parcels of fine Gulf, with which description we are barely supplied. Raisins are dull of sale. In one instance a parcel of Chesme barrels was sold at auction at 31s to 32s; but it appears there are not more sellers at such low rates. Fine Eleme raisins at present rates are worthy of attention. Figs are still lower, and a large trade doing.

COLONIAL WOOL.—No change to report in the wool market.

FLAX.—Market quiet, but little doing.

HEMP.—During the week we have had rather more inquiry; prices unaltered.

COTTON.—Sales of cotton wool from Friday, 1st Feb., to Thursday, 7th, inclusive:—1,500 bales Surat at 5$\frac{5}{8}$d to 5$\frac{3}{4}$d for fair to fully fair Dhollera; 4$\frac{3}{4}$d to 5$\frac{1}{4}$d for very middling to fair Oomrawattee; 5$\frac{1}{8}$d for fully fair Mangarole; 350 bales Tinnivelly, 5$\frac{1}{8}$d to 5$\frac{5}{8}$d for middling to fair. The market opened with a good demand, and extreme, and in some cases, rather higher prices were obtained; but within the last few days there has been less disposition to purchase. As holders however remain firm, quotations are nominally the same as last week.

TOBACCO.—The market has been very quiet during the past week. Prices remain unchanged.

METALS.—The metal market continues quite inanimate. Copper is neglected, but prices are unchanged. Tin is maintained at last week's rates by a small demand for Straits. Spelter has been done in to a small extent only. Lead keeps steady. Tin plates much depressed.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	60	3
Fat by ditto	3	1½
Yellow Russian	61	9
Melted stuff	42	0
Rough ditto	25	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market not quite so brisk, owing mostly to the great quantities of cheap fish. The shippers still talk of higher prices, but cannot get on with them.

Fine butter now getting very scarce. Short supply of Friesland, price 130s to 134s. We have likewise to remark with great pleasure the arrivals of butter from America, some parcels being exceedingly fine, and made readily 112s to 116s.

METROPOLITAN CATTLE MARKET.

MONDAY, Feb. 4.—The total *imports* of foreign stock into London, last week, amounted to 514 head. In the corresponding period in 1860, we received 1,434; in 1859, 2,010; in 1858, 680; in 1857, 1,257; in 1856, 938; and in 1855, 789 head.

There was only a moderate supply of foreign stock on offer here, to-day. On the whole the demand for it ruled steady, at full quotations. The arrivals of beasts fresh up from our own grazing districts were seasonably good, and in fair average condition. Although the attendance of buyers was rather on the increase, the demand for nearly all breeds ruled inactive, at Thursday's decline in the quotations. A few very superior Scots and crosses realised 5s, but the general top figure for beef was 4s 10d per 8 lbs. From the eastern districts we received 1,300 Scots, &c.; from the north, 700 Shorthorns; from other parts of England, 800 various breeds; and from Scotland, 170 Scots and crosses. There was only a moderate supply of sheep in the pens, but the quality of most breeds was tolerably good. The mutton trade ruled steady, and last week's currency was well supported. The best old Downs realised 6s per 8 lbs. Calves, the show of which was limited, moved off freely at Thursday's improvememt in value. The best veal was worth 5s 8d per 8 lbs.

SUPPLIES.

	Feb. 6, 1860.	Feb. 4, 1861.
Beasts	3930	3890
Sheep	18760	16080
Calves	128	86
Pigs	280	350

THURSDAY, Feb. 7.—Although the supply of beasts here to-day was by no means extensive, the demand for all kinds ruled very inactive at Monday's currency. Sheep—the show of which was rather on the increase—moved off steadily at full quotations, the best of old Downs having sold at 6s per 8 lbs. Calves were quite as dear as on Monday, with a good demand. The best veal was worth 5s 8d per 8 lbs. We have to report an improved sale for pigs at extreme rates; but milch cows were very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	0	3	4	Prime Southdown sheep	5	10	6	0
Second quality ditto	3	6	4	0	Large coarse calves	4	8	5	2

Second quality ditto	4	2	4	6	Suckling calves.....each	20	0	23	0
Prime coarse-woolled do.	4	10	5	8	Quarter old store pigs	23	0	30	0

Total supply—Beasts, 1,100; sheep and lambs, 4,100; calves, 130; pigs, 220.
Foreign supply—Beasts, 320; sheep, 850; calves, 82.

HOP MARKET.

BOROUGH, Monday, Feb. 4.—Our market is very heavy, but prices remain nominally the same as last week. Mid and East Kents, 100s, 160s, 240s; Weald of Kents, 60s, 140s, 200s; Sussex, 60s, 120s, 160s; Yearlings, 100s, 147s, 190s.

FRIDAY, Sept 8.—The market continues firm, at late prices.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Feb. 4.—During the past week the arrivals both coastwise and by rail have been large, and have caused a further reduction in prices: the following are this day's quotations:—Yorkshire Flukes, 150s to 160s; Lincolnshire Regents, 110s to 120s; Dunbar red soil ditto, 150s to 160s; North Berwick ditto, 120s to 125s; Perth, Forfar, and Fife ditto, 105s to 115s; ditto, ditto, ditto Reds and Rocks, 105s to 110s; American reds, 90s; French whites, 60s to 90s; Belgian ditto, 60s to 80s; Dutch ditto, 60s to 80s per ton.

WATERSIDE, Thursday, Feb. 7.—The arrivals of potatoes continue seasonably large at this market coastwise and by rail, and the supply on hand now is considerably in excess of the demand, and prices, consequently, are on the decline. The present rates are as follow:—York Flukes, 120s to 140s; Scotch Regents, 110s to 120s; ditto Cups, 100s to 110s; ditto Rocks, 100s to 110s; Dunbars, 140s to 160s per ton.

HAY MARKETS.—THURSDAY,

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 10s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 18s per load. A slow sale.

CUMBERLAND.—Meadow hay, 2*l* 5s to 5*l* 8s; clover, 3*l* 5s to 5*l* 15s; and straw, 1*l* 10s to 2*l* 0s per load. A fair demand.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 5s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 18s per load. Supply good, and trade dull.

COAL MARKET.

FRIDAY, Feb. 8.—Walls End Hetton 21s 3d—Walls End Haswell, 21s 3d—Walls End South Hetton 21s 3d—Walls End Hartlepool 20s 9d—Walls End Kelloe 20s 3d—Walls End Gosforth 19s—Walls End Harton 19s—Walls End Killingworth, East 17s—Byron 20s—Powell's Duffryn Steam 21s—Carr's Original Hartley 17s—Bebside Hartley 17s—Davidson's Hartley 17s—Howard's Hartley 17s—West Hartley 17.—Ships at market, 77.

LIVERPOOL MARKETS.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 8.—Fair attendance at to-day's market, with a moderate business. Wheat at extreme rate of Tuesday. Flour in more inquiry; prices unchanged. Indian corn fair sale, at 37s 9d to 38s for mixed; 39s 6d for Galatz. Beans 6d dearer; good inquiry. Oats and oatmeal dull sale.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 8.—There is a fair inquiry for all current descriptions of foreign, but buyers continue to purchase with great reserve and for the supply of pressing wants only, and the transactions are, therefore, of no great extent.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 8.—The market for manufactured iron continues to be characterised by great inactivity, and the limited business transacted has been, if anything, in favour of buyers. In Scotch pig iron there has been little change throughout the past week, and not much doing. Copper and lead appear quite neglected, and the market for tin-plate still declines.

The Gazette.

TUESDAY, Feb. 5.

BANKRUPTS.

J. Brooksbank, King street, Clerkenwell, brush board cutter.
J. Alcock, Fuller street, Bethnal green, printers' joiner.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 26th of January amounted to 469,635*l*, and for the corresponding week of last year to 455,520*l*, showing an increase of 14,115*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 200,962*l*, and for the corresponding week of 1860 to 201,059*l*, showing a decrease of 97*l*.

LONDON AND SOUTH-WESTERN.—The directors of this company have resolved to recommend to the proprietors, at the general meeting on the 14th inst., that the dividend for the half-year ending the 31st of December, 1860, be at the rate of 5*l* 5s per cent. per annum on the ordinary capital of the company.

GREAT SOUTHERN AND WESTERN.—The dividend recommended by the directors of the Great Southern and Western of Ireland Railway Company, is at the usual rate of 5 per cent. per annum.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Feb. 4.—The railway market was rather firm at the opening, but towards the close receded with the funds. In several stocks a decline of ¼ to ⅜ per cent. took place, especially London and North-Western, Midland, South-Western, South-Eastern, Caledonian, and Sheffield. Grand Trunk and Great Western of Canada were dull at 23 to ½ and 11½ to ½. In foreign descriptions, Dutch-Rhenish shares and Victor Emanuel obligations improved. South Austrian and Lombardo-Venetian were also firmer at 1 dis. A sudden fall took place in Thames and Mersey Marine Insurance shares to 1⅛ to ¼ pm., on a report that the general profits to be shown at the forthcoming meeting will be less satisfactory than had been anticipated.

TUESDAY, Feb. 5.—The railway market to-day was dull, the high value of money tending to check business, and the dividends hitherto announced being less favourable than had been expected. The principal movement was a heavy fall in Great Western, from which, however, there was a slight recovery after official hours. The lowest point touched was 70¾, and the final quotation 71½ to ¾. Midland, Lancashire and Yorkshire, South-Eastern, Great Northern, North British, and Caledonian also receded. In the colonial market, Indian guaranteed stocks were rather dull. Grand Trunk of Canada likewise declined to 22¾ to 23¼, while Great Western shares improved to 11⅜ to ½. Foreign descriptions were heavy, and Lombardo-Venetian, Bahia, and Dutch Rhenish show a reduction. In American railway securities a renewed fall took place in Illinois Central and New York and Erie shares, the last prices being respectively 28 to 27½ dis., and 29¼ to 30¼. Mines were quiet, and occasionally lower. Joint stock banks were also less steady, except English, Scottish, and Australian Chartered, in which an advance occurred.

WEDNESDAY, Feb. 6.—In the railway market to-day the principal movement was a fall of 2 per cent. in Great Northern, on the announcement of the proposed dividend. Sheffield also receded 1½ per cent., and most of the other leading stocks ¼ to ¾, chiefly on sales on provincial account, Midland and Lancashire and Yorkshire being the heaviest. The market closed with rather an unsteady appearance. Caledonian and North British, however, have improved. No change of importance took place in the colonial market. Grand Trunk of Canada stock left off at 22¾ to 23¼; the ordinary bonds, 44 to 46; and the preference, 74 to 76. In foreign descriptions, Bahia and Dutch Rhenish were flat. After official hours South Austrian and Lombardo-Venetian recovered to 1½ to 1 dis. In American securities there was a further slight decline in Illinois Central and New York and Erie. Mines were steady, and in several cases showed an advance. Bank of Egypt shares were firmer, while English, Scottish, and Australian Chartered relapsed. Miscellaneous descriptions closed about the same as yesterday. Ocean Marine Insurance and Thames Mersey were better.

THURSDAY, Feb. 7.—The railway market showed extreme depression to-day, the dividends that continued to be announced occasioning further disappointment. There was another fall of more than 1 per cent. in Great Western, the last price being 69½ to ¾. Midland, Lancashire and Yorkshire, South-Eastern, Sheffield, and Eastern Counties also exhibited a decline. North-Eastern stock were slightly firmer. The market closed with an unfavourable appearance. In the colonial market, Grand Trunk of Canada stock receded to 22 to ½, while Great Western shares improved to 11⅜ to ½. Indian guaranteed descriptions were occasionally higher. Scarcely any transactions took place in foreign railways, and prices generally remained unchanged. South Austrian and Lombardo-Venetian were last quoted 1½ dis.

FRIDAY, Feb. 8.—The railway share market showed increased heaviness. A general reduction averaging about ½ per cent. took place in the heavier stocks. Lombardo-Venetian Railway shares were quoted 1½ to 1 dis. Foreign, Indian, and Canadian lines were very quiet. Mining shares continued inactive, but without leading to any change of importance in prices.

The Economist's Railway and Mining Share List.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, T.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

TRADE S&P MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark, and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either from the publisher, J. Allen, 20 Warwick-lane; or from the author's address, 17, Harley street, Cavendish-square, London.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.

DR LA'MERT ON THE CURE of Nervous and Physical Debility, resulting from pernicious habits or excess. With cases and engravings from life.

CONTENTS:—The Physiology of the Generative Organs—Puberty—Manhood—True and False Morality—Marriage, in its Moral and Physical Relations—Youthful Abuse—The Secret Cause of Nervous Debility, Impotence and Sterility—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences.

DR LA'MERT, M.D., L.S.A., &c., is the only legally qualified practitioner on the Medical Register who, for 20 years, has devoted his studies to the treatment of these disorders.

37 Bedford square, London.

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills"—TIMES.

Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.

London: J. Churchill, and to be had of all booksellers.

TO THE NERVOUS AND DEBILITATED.

Just published, the 125th thousand, with numerous plates, in a sealed envelope, price 1s, sold by all booksellers, or post paid, by the Author, for 12 stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE, with Plain Directions for Perfect Restoration to Health and Vigour. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London.

CONTENTS.

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.

CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.

CHAPTER III.—A Review of the Disqualifications of Marriage; whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate, or Infection.

CHAPTER IV.—Plan of Treatment, Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.

CHAPTERS V. and VI., on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous interesting cases, to which is added the Author's receipt of a preventive Lotion.

Mr CURTIS, author of the above Medical Treatise, may be consulted from 10 till 3, and 6 till 8. Sundays from 10 till 1.

Sold by J. Allen, 20 Warwick lane, Paternoster row, and Mann, 39 Cornhill, London.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton cresent, Tavistock square, London, W.C.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

CHEAPNESS.—Two hundred-weight of this Paint, with six gallons of Oil, covers as much surface as three hundred-weight of White Lead and twelve gallons of Oil. It is cheaper in the first instance, as well as desirable on every consideration.

ADULTERATIONS.—Prejudice is caused by some Paint Grinders selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Whether this is sold under the name of "Improved Zinc Paint," or is candidly sold as Number Two or Three qualities, no Painter can produce good work with it. He naturally condemns Zinc Paint altogether.

That Painters have never seen the best Zinc Paint is evident, or they would not use any other paint for their best work. To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

FORD'S EUREKA SHIRTS

are made with that rigid adherence to details in manufacturing, which alone can ensure a good and comfortable shirt. A box of six excellent shirts for 33s. Illustrated catalogues, mode of self-measurement, price list, &c., post free.

RICHARD FORD, 38 Poultry, London.

SALE OF LAMPS, CHANDELIERS AND GAS FITTINGS.

TUCKER and SON having purchased of Messrs Pearce and Son (of Ludgate hill) their entire stock of Lamps, Gas Chandeliers, &c., (on their relinquishing that branch of their business to devote exclusive attention to the China and Glass Trade) have distributed it among their three Show Rooms as under; and being goods of first-rate quality, and offered to the public at a reduction of one-third from their usual price, to insure their immediate realisation, they must command the attention of purchasers.

City Show Rooms, 36 King William street (4 doors from London Bridge); Central do., 190 Strand (opposite St Clement's church, and near Temple Bar).

TUCKER and SON—Established 43 years.

Manufactory, Essex Works, W.C.—November, 1860.

DUTY OFF MODERATOR LAMPS.

—J. Schlossmacher's celebrated Manufacture. Burner of every Lamp stamped J. S. The duty being now off, and J. S. being enabled by machinery to reduce the prices of his Lamps to the charges of other makers for their commonest qualities, the full benefit of both reductions is given to the public through his London Agents, TUCKER and SON, at their Establishments, as under:—

Central Show Rooms, 190 Strand (near Temple Bar): City Show Rooms, 36 King William street (4 doors from London Bridge). Established 43 years.

Engravings free by Post.

VOLUNTEER PIPE.—

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

KEATING'S COD LIVER OIL.

Just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

HEALTH AND HAPPINESS

for the NERVOUS and DEBILITATED.—The proprietors of the Birmingham Institute of Anatomy desire to make known an infallible means of self-cure for the nervous, debilitated, &c., and will forward the same gratuitously on receipt of a stamped directed envelope.—Address "To the Secretary, Institute of Anatomy, Birmingham."

Second Edition, price 2s 6d, post free for 30 stamps,

TOOTH-ACHE: ITS CAUSES,

and a New Painless Method of Cure (with as much certainty as water quenches thirst). Teeth cured by this Method will never ache again, and thus prevent the necessity of the painful operation of extraction. By THOMAS HOWARD, Surgeon Dentist to His Grace the Archbishop of Canterbury, 17 George street, Hanover square, London

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID MAGNESIA

has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

NO MORE PILLS OR ANY

other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurzer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies. ——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Ridlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athoi street, Perth.——Cure No. 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

HOLLOWAY'S OINTMENT AND

PILLS.—*Diptheria*, Sore-throat, Quinsey, Mumps, and similar complaints always abound in wet weather, and are most safely and effectively subdued by rubbing Holloway's Ointment at least twice a day upon the chest and glands of the throat. The Ointment penetrates the skin, reduces inflammation, and heals ulcerations. This treatment is sufficient for curing the most serious and complicated throat affections, provided Holloway's Pills are taken at the same time. When swallowing gives pain, the Ointment alone may be relied on, till improving symptoms admit of painless deglutition. In Asthma, Bronchitis, Pneumonia, Whooping-cough, the early stages of Consumption, Scarlatina and Measles, Holloway's preparations are not less valuable in mitigating their most troublesome features and in ultimately curing.

FREEDOM FROM COUGH IN TEN

MINUTES is insured by Dr LOCOCK'S PULMONIC WAFERS.—

From Mr John Williams, Chemist, Horsley heath, Tipton:—"The good effects of your Dr Locock's Pulmonic Wafers in cases of asthma, obstinate coughs, &c., are truly astonishing. I do not know of a single instance of failure. I can forword you a list of highly respectable and important testimonials."

Dr LOCOCK'S WAFERS give instant relief, and a rapid cure of asthma, coughs, and all disorders of the breath and lungs. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all Chemists.

FINE TEA CHEAPER.

STRACHAN & CO.'S justly celebrated DRAWING ROOM TEA is now reduced to 4s per lb. Guaranteed the Finest and Cheapest Tea in the United Kingdom.
26 Cornhill, London, E.C.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE's Two-Hole Black Pens, 46 King William street, London bridge."

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.
The Brewery, Burton-on-Trent, April 30, 1860.

JULLIEN FUND.
Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same ime afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchel — Mr W. Duncan Davison
Mr W. R. Sams — Mr Jules Benedict
Mr Thomas Chappell — Mr A. Blumenthal

HONORARY TREASURERS.

Mr John Mitchell, 33 Old Bond street
Mr T. Chappell, 50 New Bond street
Mr W. R. Sams, 1 St James's street

BANKERS

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.
THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

ARMY CONTRACTS.
Commissariat, South Camp, Aldershott, Feb. 1, 1861.

Tenders will be received at this office until noon on the 26th inst., from parties who may be willing to enter into Contracts for the SUPPLY of HOUSE COALS (Wall's-end), in such quantities as may be required, for one year, from 1st April, 1861, for the use of the Royal Military College, Sandhurst; also for the Supply of Gas Coals of the following descriptions for the same establishment during the above stated period: Whitworth's Wall's-end, Pelton Main, Boghead Cannel, Wigan Cannel, Southern Boghead, Derbyshire Cannel. Forms of tender and conditions of contract may be obtained on application at this office, where every information required on the subject will be afforded. The tenders for the house coals are to be separate and distinct from the gas coals.

ALFRED SALWEY, Deputy-Commissary-General.

ARMY CONTRACTS.

CROSSE AND BLACKWELL Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. and B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their Manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable oilmen, grocers, &c., and wholesale of Crosse and Blackwell, 21 Soho square, London.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Dr Lankester, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Sir Henry March, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Cod Liver Oil to be a very pure oil, not likely to create disgust, and a therapeutic agent of great value."

Dr Lawrance, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed"

Dr Stavely King, Physician to the Metropolitan Free Hospital.—"I have employed Dr de Jongh's Oil with great advantage in cases of mesenteric and pulmonary tubercle, and in the atrophic diseases of children."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE AGENTS,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

OVERLAND ROUTE.—COMMUNICATION by STEAM to INDIA, AUSTRALIA, &c., via Egypt.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney by the steamers leaving Southampton on the 20th of every month.—For further particulars apply at the Company's offices, 122 Leadenhall street, London, E. C., or Oriental place, Southampton.

NOTICE.—The Steamers call at Cork Harbour, on both outward and homeward passages, to land and receive Mails.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS, appointed by the Admiralty to sail between LIVERPOOL and NEW YORK direct, and between LIVERPOOL and BOSTON, the Boston ships only calling at HALIFAX to land and receive passengers and Her Majesty's mails. The following, or other vessels, are appointed to sail from Liverpool:—
*AUSTRALASIAN, for NEW YORK direct, Saturday, Feb. 16.
*Taking Passengers and Goods for Nassau and Havana, to be transferred at New York on board the R.M.S.S. Karnak.
NIAGARA, for BOSTON, Saturday, Feb. 23.
ARABIA, for NEW YORK direct, Saturday March 2.

Passage money, including steward's fee and provisions, but without wines or liquors, which can be obtained on board:—To Halifax and Boston, chief cabin, Twenty-two Pounds; second cabin, Sixteen Pounds. To New York, chief cabin, Twenty-six Pounds; second cabin, Eighteen Pounds. Freight to Halifax, Boston, and New York, £3 per ton and 5 per cent. primage. Small parcels, 5s each and upwards. These steam ships have accommodation for a limited number of second cabin passengers.

For passage or other information, apply to J. B. Foord, 52 Old Broad street, London; D. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. M'Iver, Queenstown; or D. and C. M'Iver, 8 Water street, Liverpool.

REPORT

Presented to the Shareholders of the London and County Bank, at the Half-yearly Meeting, 7th February, 1861.

William Nicol, Esq., M.P., in the Chair.

"Your Directors have the satisfaction to lay before the Proprietors of the Bank a statement of its affairs for the half year ending the 31st December last.

"From the Balance sheet placed before you, which has been duly audited, it will be apparent that the net profit of the Bank for the half-year, after the several deductions of expenses (including income tax), rebate, interest to customers, and making the required provision for bad and doubtful debts, amounts to £48,728 14s 11d, including the balance brought forward from the previous June of £8,708 19s 7d.

"From the above, the Directors recommend that a dividend be now declared of 6 per cent. for the last half-year, free of income tax, which, with 5 per cent. already paid, will make 11 per cent. for 1860. Your Directors propose a further addition of £15,000 to the Reserve Fund, and to place the remainder, £3,728 14s 11d, to the credit of profit and loss new account.

"In consequence of the lamented decease of James Andrew Durham, Esq., early in November last, your Directors have to announce that the vacancy thus occasioned has been filled by the election of Charles Salisbury Butler, Esq., M.P., to a seat at the Board.

"The Directors retiring by rotation are,—John William Burmester, Esq.; John Fleming, Esq.; and William Champion Jones, Esq.; all of whom are eligible for re-election, and offer themselves accordingly.

"The dividend will be payable on and after the 18th instant."

We, the undersigned, have examined the foregoing balance sheet, and have found the same to be correct.
(Signed) FRED. HARRISON, HENRY OVERTON } Auditors.
London and County Bank, 1st February, 1861.

The foregoing Report having been read by the Secretary, the following resolutions were proposed, and unanimously adopted:—

1. "That the report be received and adopted, and printed for the use of the shareholders."

2. "That a dividend of 6 per cent. be declared upon the capital stock of the company, for the half-year ending the 31st of December, 1860, clear of income tax, payable on and after Monday, the 18th of February instant; that the sum of £15,000 be added to the 'Reserve Fund;' and that the balance of £3,728 14s 11d, then remaining, be carried to profit and loss new account."

3. "That the thanks of this meeting be given to the Board of Directors for the able manner in which they have conducted the affairs of the Company."

4. "That the thanks of the meeting be presented to the auditors of the Company for the past year."

5. "That Frederick Harrison, Henry Overton, and John Wright, Esquires, be re-elected for the current year."

6. "That the thanks of this meeting be presented to William M'Kewan, Esq., the General Manager; W. J. Norfolk, Esq., the Chief Inspector; R. P. Nichols, Esq., the Secretary; the Branch Managers, and the other officers of the establishment, for the zeal and ability with which they have severally discharged their respective duties during the past year."

The election of three Directors having been proceeded with, the following gentlemen were unanimously re-elected:—John William Burmester, Esq., John Fleming, Esq., and William Champion Jones, Esq.

(Signed) WILLIAM NICOL, Chairman.

The chairman having quitted the chair, it was resolved, and carried unanimously,—

"That the cordial thanks of this meeting be presented to William Nicol, Esq., M.P., for his able and courteous conduct in the chair."

(Signed), W. C. JONES, Deputy Chairman.
Extracted from the minutes.
(Signed), R. P. NICHOLS, Secretary.

LONDON AND COUNTY BANKING

COMPANY.—NOTICE is hereby given, that a dividend on the Capital Stock of the Company of 6 per cent., for the half-year ending the 31st Dec., 1860, will be paid to the Proprietors, either at the chief (temporary) office, South Sea House, Threadneedle-street, or at any of the Company's branch banks, on and after Monday, the 18th inst.—By order of the Board,

W. McKEWAN, General Manager.

South Sea House, Threadneedle street,
Feb. 7th, 1861.

"A very valuable book."—CORNWALL GAZETTE.
"All who have invested, or who intend to invest in mines, should peruse this able work."—GLASGOW EXAMINER.
"Mr Murchison takes sound views upon the important subject of his book."—MORNING HERALD.

RAILWAY INTELLIGENCE.

A NEW EDITION of this Work (being No. XI.), will be issued on Tuesday, the 12th inst,, price Ten Shillings, Postage free.

The publication has been delayed beyond the usual period, in order, if possible, to include accurate details of important pending arrangements connected with the Canadian and Brazilian Railway Companies.

MIHILL SLAUGHTER,
Secretary Railways Department, Stock Exchange.
Feb. 7, 1861.

N.B. The Work will be published solely at the above Department, to which address subscriptions may now be forwarded.

LONDON, CHATHAM, AND DOVER RAILWAY.

The Directors of this Company are prepared to issue Debenture Bonds, for Three or Five years, bearing interest at the rate of Five per cent. per annum, payable half-yearly, to replace Bonds falling due. Application to be made to the undersigned.—By order.

G. F. HOLROYD, Secretary.

Offices, 3 Victoria street, Westminster, S.W.,
6th Feb. 1861.

LONDON, CHATHAM, AND DOVER RAILWAY COMPANY.

Notice is hereby given, that the Sixteenth Half-yearly General Meeting of the London, Chatham, and Dover Railway Company will be held at the Westminster Palace Hotel, Victoria street, Westminster, on Wednesday the 27th instant, at half past Two o'clock precisely.

The Transfer Books of the Company will be closed from the 10th to the 27th February, both inclusive.

Dated this 5th day of February, 1861.

By order, SONDES, Chairman.
G. F. HOLROYD, Secretary.

Offices, 3 Victoria street, Westminster.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par for the remainder (£990,000) of the sum of £1,500,000, required to complete the total amount which the Company has the power to borrow on Debentures not convertible into shares.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years, from the 15th December inst., transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice, the bonds will be paid off at the expiration of the first five years on presentation at the Bank of England.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.

No scrip receipt or bond will be issued for a less sum than £50.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's Walk,
New Broad street, London, Jan. 22, 1861.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are now prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest, upon notice being given by him twelve months previous to the expiry of the first term. Failing such notice, the Debentures will be paid off at the expiration of the first five years.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the limited amount, £194,000, which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into the Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, upon giving notice at any time before the Debenture becomes payable, of converting it into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London,
1st January, 1861.

CHIMNEY-PIECES, TOMBS

Just published, in octavo, with Portrait, price 14s,
AUTOBIOGRAPHY OF DR ALEXANDER CARLYLE, Minister of Inveresk. Containing Memorials of the Men and Events of his Time.

OPINIONS OF THE PRESS.

"This book contains by far the most vivid picture of Scottish life and manners that has been given to the public since the days of Sir Walter Scott. In bestowing upon it this high praise, we make no exception, not even in favour of Lord Cockburn's "Memorials"—the book which resembles it most, and which ranks next to it in interest. Indeed, even going beyond the range of our Scottish experience, we doubt whether there is anywhere to be found as trustworthy a record of the domestic, social, and intellectual life of a whole bygone generation, or an appreciation of the individual peculiarities of the persons by whom that generation was led, as shrewd and unprejudiced, as has been bequeathed to us by this active, high-spirited, claret-drinking, playgoing, and yet, withal, worthy and pious minister of the Kirk."—EDINBURGH REVIEW, Jan. 1861.

"Following no master, moulding himself on no model, the charm of these pages is their originality. They are not Boswellian, nor Johnsonian, nor Colley Cibberish, nor traceable to any source. Yet in their liveliness of description, sly touches of satire, and vigorous analysis of character, combined with the naturalness of incident and surprising variety of interest deduced from ordinary adventure, we are constantly reminded of 'Gil Blas.'"—BLACKWOOD'S MAGAZINE.

"We might quote from almost every page to the amusement of our readers, though to the questionable benefit of the publisher; but we prefer to recommend them to go themselves to the storehouse of entertainment and instruction provided for them in the autobiography of this fine old, enlightened, liberal-minded Scotch divine."—DAILY NEWS.

"This book overflows with pictures of life, character, and manners belonging to the past century. A more racy volume of memoirs was never given to the world—nor one more difficult to set forth—save by the true assertion, that there is scarcely a page which does not contain matter for extract, or which would not bear annotation. Every reader of the Scott novels (something like every one who can read English) must delight in Jupiter Carlyle's memoirs."—ATHENÆUM.

"A shrewd observer of men and manners, living during perhaps the most deeply-interesting period of our history, he was favoured by a happy combination of circumstances such as has seldom fallen to the lot of a single individual. Sufficiently an actor in the eventful scenes of the last century to be accepted as a reliable authority, yet sufficiently secluded from the world to have leisure for a philosophic survey of the events that were passing around him, he has bequeathed to us a picture of the times, which for breadth of colouring and vividness of detail can scarcely be surpassed.....We lay down this deeply-interesting volume with a sincere feeling of regret. For marvellous originality and fidelity of description it is unsurpassed in the language."—LITERARY GAZETTE.

"By the brief, graphic touches that abound in this volume, life is given back to the history of the last century; and its actors, known to us only through stately biographies, are translated from cold marble figures once more into breathing men."—EDINBURGH WITNESS.

"The most curious and amusing, if not also, in all respects, the most valuable contribution that has been made for many a day to the political, the ecclesiastical, but especially the social, history of Scotland."—SCOTSMAN.

"A book of surpassing interest, and one which excites in us that feeling of gratitude with which we would receive an unexpected gift of great usefulness and princely cost."—GLASGOW HERALD.

"One of the most valuable and entertaining works that has appeared respecting the men and manners of Scotland in the eighteenth century, and is written with so lively and graphic a pen that it cannot fail to become very popular in the country."—INVERNESS COURIER.

"The book is a perfect feast. No sooner has the reader entered upon it than he is hurried along with the fascination of a romance. The sketches of society are vivid and racy, and the author's delineations of character appear true to a line, while his descriptions of men and manners are given with a minuteness and fidelity worthy of the pen of Defoe."—DUNDEE COURIER.

"The book is one of the most remarkable which has appeared for a long time; and while it affords a great deal of matter suggestive of comment, it is pre-eminently a book to be possessed, and read through and through, and over and over again."—ABERDEEN JOURNAL.
William Blackwood and Sons, Edinburgh and London.

Author of "Text-Books of Geology."
William Blackwood and Sons, Edinburgh and London.

Now ready, a New Library Edition (being the Tenth) of
ALISON'S HISTORY OF EUROPE, from the Commencement of the French Revolution in 1789 to the Battle of Waterloo. In 14 Vols., demy octavo, with Portraits and a copious Index, price £10 10s.

In this Edition, which has been revised and corrected with the utmost diligence, care has been taken to interweave with the original text, the new facts which have been brought to light since the last edition was published. It is believed that the Work will be found in all respects brought up to the latest authentic information that has appeared, on the epoch of which it treats.

Copies of the crown octavo edition of the above History may be had, in 20 vols., price £6. Also, a People's edition in 12 vols, double columns, price £2 8s in cloth, and Index vol., price 3s.

EXTRACTS FROM REVIEWS OF THIS WORK.

"An extraordinary work, which has earned for itself a lasting place in the literature of the country, and within a few years found innumerable readers in every part of the globe. There is no book extant that treats so well of the period to the illustration of which Mr Alison's labours have been devoted. It exhibits great knowledge, patient research, indefatigable industry, and vast power."—TIMES, Sept. 7, 1850.

"There is much in Mr Alison's history of the French Revolution against which we intend to record our decided protest; and there are some parts of it which we shall feel compelled to notice with strong disapprobation. We, therefore, hasten to preface our less favourable remarks by freely acknowledging that the present work is, upon the whole, a valuable addition to European literature, that it is evidently compiled with the utmost care, and that its narration, so far as we can judge, is not perverted by the slightest partiality."—EDINBURGH REVIEW.

"After a full examination, we do not hesitate to say that this is the most complete and honest history of the French Revolution which has as yet appeared, either in England or France.'—NORTH AMERICAN REVIEW.

"We acknowledge with pleasure the force and fidelity of Mr Alison's work on the French Revolution. It is by far the ablest historical performance of the last century, exhibiting remarkable diligence without any loss of spirit, and doing impartial justice on higher principles than have yet been announced in history."—FOREIGN QUARTERLY REVIEW.

"Alison's 'History of Europe,' and the States connected with it, is one of the most important works which literature has produced. Years have elapsed since any historical work has created such an epoch as that of Alison: his sources of information and authorities are of the richest and most comprehensive description. Though his opinions are on the Conservative side, he allows every party to speak for itself, and unfolds with a master's hand how far institutions make nations great, and mighty, and prosperous."—FROM PREFACE OF THE GERMAN TRANSLATION BY D. LUDWIG MEYER.

"The work of Alison is indispensable to all who are forming collections on the history of Europe during the Revolution. It is the completion of them all."—FROM PREFACE OF THE FRENCH TRANSLATION BY M. PAQUIS.
William Blackwood and Sons, Edinburgh and London.

In Two Volumes, large octavo, with upwards of 600 Engravings, price £3, half-bound,
THE BOOK OF THE FARM.

TRIGONOMETRY. Part II., 2s 6d; KEY, 5s.

London: Longman, Green, Longman, and Roberts.

IMPROVED EDITION OF MANGNALL'S QUESTIONS.
Just published, a New Edition, in 12mo, price 4s 6d, cloth,

MANGNALL'S HISTORICAL AND MISCELLANEOUS QUESTIONS, for the use of Young Peopple; with a Selection of British and General Biography.

Now Edition of the only Genuine and Perfect Edition, as finally corrected by the Author; but remodelled throughout, enlarged, and improved.

"The most comprehensive book of instruction existing, and to be preferred to all the others, to which it has served as a model."—QUARTERLY REVIEW.

CRITICAL NOTICES OF THE NEW EDITION.

"This is a new edition of a very familiar and useful school-book, entirely remodelled, enlarged and improved, in order to embody the information derived in the progress of discovery in history and science; and the more satisfactorily to effect this, the whole typographical arrangement has been reconstructed. In this its new form we doubt not Mangnall's Questions will maintain the honourable place it has so long held among elementary works for the instruction of youth."—LEEDS INTELLIGENCER.

"To offer any encomium upon a work which for more than half a century has held a high place as a standard school-book would be superfluous. We will therefore content ourselves with observing that the present edition has been entirely reconstructed under the care of an editor on whose practical knowledge and experience implicit reliance was placed by the eminent house from which it has emanated; and that no pains or expense have been spared to secure for it a greater degree of public favour than it has ever hitherto enjoyed. The manner in which the improvements referred to have been carried out deserves the warmest commendation."—MIDLAND COUNTIES HERALD.

*** Messrs Longman and Co.'s Edition should be ordered.

MANUFACTURING PREMISES and TRADE for SALE.

TO BE DISPOSED OF,
in consequence of the advanced age of one Partner and the desire of the other to retire, a First-class and very Old-established Soap and Candle Manufacturing Business in the West of England. The Premises (which are Freehold) are intrinsically valuable for their situation and completeness, and the trade is of the very highest character and connection.—For further particulars and to treat, apply by letter to Mr Wm. Bartram, Accountant, St Leonard's chambers, Bristol.

SALE OF WINES AND SPIRITS IN CUSTOMS BOND.

THE BOARD OF INLAND REVENUE
hereby give notice, that the exemption from License Duties of persons selling Wines and Spirits in Customs Bond has been repealed by the 23 and 24 Vict., c. 113, s. 5, so far as regards the sale, at one time, of any less quantity than One Hundred Gallons, whether such Wines or Spirits are to remain in Bond, or to be delivered out for consumption, or for exportation, or for ships' stores; and any person selling Wines or Spirits in Bond in the above quantity, without having first obtained the proper Excise License, will incur the penalty of One Hundred Pounds.

THOS. DOBSON, Secretary.
Inland Revenue office, Somerset House, London, 14th February, 1861.

BOOKKEEPER.—WANTED,
in a Merchant's Office, a Clerk thoroughly competent to take entire charge of the books. Age not to exceed 26 or 27. References of the highest character will be required.—Apply, by letter, with full particulars, stating age, salary, &c., to John Ball, Esq., Messrs Quilter, Ball, Jay, and Co., 3 Moorgate street, E.C.

PARTNERSHIP.—
Wanted, a Partner, with a capital of £1,500 to £2,000, to join a gentleman in a Manufacturing business in London, which will produce a profit of £2,000 per annum, and is capable of great increase.—Principals or their solicitors may apply to Messrs Brady, Son, and Scott, Solicitors, 50 King William street, E.C.

TO BANKERS, MERCHANTS, AND OTHERS.—Wanted, by a Gentleman, aged 28, with ten years' banking experience, a situation either as bookkeeper or cashier, in London or other large town. Satisfactory references can be given, and the highest testimonials will be submitted.—Address R. W., Post Office, Shrewsbury.

TO SMALL CAPITALISTS.—
Wanted, a few Gentlemen to join a small Commercial Company (under the Limited Liability Act) in connection with New Zealand. The undertaking is an important one, and the profits are likely to be very large.—Address "New Zealand," care of Messrs Hancock and Sharp, 20 Tokenhouse yard, London, E.C.

TO MERCANTILE CLERKS WITH SMALL CAPITAL.—Wanted, one or two Gentlemen of considerable commercial experience, and of active and persevering habits, with about £500 to £1,000 each, to join in an important and highly lucrative commercial undertaking in New Zealand, in connection with respectable parties at home. They would be required to manage the business in the Colony, for which an arrangement would be made with them, independent of their share of the profits as Partners. This is a most excellent opportunity for young active men of business with small capital.—Address to "New Zealand," care of Messrs Hancock and Sharp, 20 Tokenhouse yard, London, E.C.

GERMAN ONLY SPOKEN.—
Gentlemen studying German, will find themselves master of it after a month's stay with a German Professor, residing near the Isle of Wight. German spoken by all in the house.—Address "Omega," Post Office, Lymington.

THE CITY TURKISH BATHS,
5 SOUTH STREET, FINSBURY.
Open daily, Sundays excepted.

The bath, in addition to being a great curative agent s the greatest physical luxury in the world.

THE TRUE TURKISH BATH.—
26 Queen square, Russell square.—The Faculty will find this spacious Establishment replete with every essential of decorum, comfort, and thorough efficiency. Admission, Half-a-Crown. Periodical Tickets proportionately moderate. Hours 7 a.m. to 10 p.m.

*** Open Saturday next, February 16th.—Ladies' Bath shortly.

TO BANKERS, RAILWAY AND OTHER COMPANIES.

BANK NOTES, BILLS OF EXCHANGE, LETTERS OF CREDIT, BONDS, CHEQUES, SHARES CERTIFICATES, &c.

HENRY BRADBURY, WILKINSON, AND CO.

devote their attention exclusively to the production of

BANK NOTES AND ALL DOCUMENTS OF SECURITY,

in which are combined all recent discoveries for the prevention of successful Forgery. A Specimen Book showing the character of work recommended will be submitted, upon application.

PRESIDENT—Charles Franks, Esq.

VICE-PRESIDENT—John B. Heath, Esq.

TRUSTEES.

Francis Hy. Mitchell, Esq. | Robert Hanbury, Esq.
Alfred Head, Esq. | Bonamy Dobree, Esq.

The London Life Association was established more than 50 years ago, on the principle of mutual assurance, the whole of the benefits being shared by the members assured. The surplus is ascertained each year, and appropriated solely to a reduction of the premiums, after seven yearly payments have been made.

If the present rate of reduction be maintained, persons now effecting assurances will be entitled, after seven years, to a reduction of 72½ per cent., whereby each £10 of annual premium will be reduced to £2 15s.

	£
This Society has paid in claims more than ...	4,000,000
And has policies now in force amounting to...	6,440,000
For the payment of which it possesses a capital exceeding.....	2,700,000
And a gross income from premiums and interest of more than.....	335,000

Assurances may be effected for any sum not exceeding £10,000 on the same life.

The Society has no agents and allows no commission.

EDWARD DOCKER, Secretary.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of *100* feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' *Bottoms*, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

Oak Bark for Sale; comprising about 1,614 tons of capital Timber Bark, all flawed in 1859, and got in good condition, well stacked and well protected from the weather, very desirably situated at Kenilworth, Dursley, Charfield, Craven Arms, Bromfield, and Kington, and within five minutes' walk of the respective Railway Stations at each of the above places, and thus exceedingly easy of transit.

MESSRS DRIVER HAVE BEEN

instructed to SELL, by AUCTION, at the Mart, Bartholomew lane, London, on Friday, Feb. 22, at Twelve for One precisely, in 30 Lots (unless the whole, or any portion thereof, should be previously disposed of by Private Contract, of which due notice will be given), about 1,614 Tons of capital TIMBER BARK, viz.:—

758 Tons at Kenilworth, in Warwickshire, in 15 lots.

126	—	Dursley, in Gloucestershire,	— 2 —
80	—	Charfield, in Gloucestershire,	— 1 —
357	—	Craven Arms, in Shropshire,	— 7 —
137	—	Bromfield, in Shropshire,	— 2 —
156	—	Kington, in Herefordshire,	— 3 —

The above Bark can be recommended to the attention of tanners and bark dealers. It is mostly of excellent quality, and some very superior, and, with very small exceptions, has been got in capital condition, and is the produce of oak timber felled in the spring of 1859, and which was notoriously a good season. All the bark is stacked and well thatched, and protected from the weather, and each rick is situated within five minutes' walk of the railway station at each place, and thus exceedingly well situated for transit, and arrangements can be made for thatching at a cheap rate. The bark may now be inspected, that at Kenilworth on application at the Tan-yard of Messrs Draper, at Kenilworth; that at Dursley, on application to Mr E. Gazard, timber merchant, Dursley; that at Charfield, on application to Mr Morton, Railway Inn, Charfield; that at Craven Arms, on application to Thomas Mayo, Railway Station, Craven Arms; that in Bromfield, on application to Richard Evans, Railway Station, Bromfield; that at Kington, on application to Thomas Parsons, Railway Station, Kington.—Catalogues and conditions of sale may be had from the above; of Messrs Boutcher, Mortimore, and Co., of Bermondsey, London; of Messrs Graves, Greenway, and Smith, bankers, Warwick; of Messrs Page and Welch, 118 Bishopsgate street, London; at the Auction Mart, London; and of Messrs Driver, surveyors, land agents, and auctioneers, 5 Whitehall, London. Samples of the bark may be seen at the Auction Mart, London, on the day of sale.

IMPERIAL TURKISH SIX PER CENT. LOAN of 1858.

—Notice is hereby given, that the Half-Yearly Dividend, due on the 1st of March next, on the outstanding Bonds of the above Loan, negotiated by Messrs Dent, Palmer, and Co., will be Paid at their counting house, No. 11 King's Arms yard, E.C., on that day or any subsequent day, except Saturday, between the hours of 11 and 3. The Coupons, with a list in numerical order, must be left for examination two clear days previously. Coupons are not received on Saturdays. Printed forms of the lists may be had on application.

Notice is also given, that the Bonds of the above Loan drawn (in December last) for redemption on 1st of March next, as advertised by the Turkish Ambassador, amounting to £53,000, will be paid off, at par, on that day, or any subsequent day (except Saturday), between the hours of 11 and 3, on presentation to Messrs Dent, Palmer, and Co., as above.

February 15, 1861.

BANK OF EGYPT.—

Notice is hereby given, that the Annual General Meeting of this Corporation will be held at the London Tavern, on Monday, the 25th day of February, at One o'clock, p.m., precisely, when the Directors will present a report and statement of accounts, as audited, for the half-year ending the 31st December.—By order of the Court, EDWARD CHESHIRE, Secretary.

26 Old Broad street, E.C., London, Feb. 8, 1861.

BANK OF AUSTRALASIA

(Incorporated by Royal Charter, 1835), No. 4 Threadneedle street, London.

Paid-up Capital £900,000, with power to increase to £1,200,000. Guaranteed Fund *£200,000*.

LETTERS of CREDIT (payable on demand) and BILLS of EXCHANGE are GRANTED on the undermentioned branch establishments, on favourable terms:—

Sydney	Geelong	Warrnambool
Maitland	Ballarat	Portland
Newcastle	*Sandhurst*	Hobart Town
Brisbane	Castlemaine	Launceston
Ipswich	Beechworth	Adelaide
Melbourne	Belfast, Port	
Williamstown	Fairy	

Bills drawn on Australia are also forwarded for collection.

Applications to be made at the office of the Corporation, No. 4 Threadneedle street, London.—By order of the Court, WILLIAM MILLIKEN, Secretary.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

Capital paid up, 500,000*l*.

LETTERS OF CREDIT ON THE BRANCHES are GRANTED on the most favourable terms. Bills on the Australian Colonies negotiated and sent for collection.—By order of the Court,

73 Cornhill, E.C. HENRY SOULES, Secretary.

SOUTH AUSTRALIAN BANKING

COMPANY.—Incorporated by Royal Charter, 1847.—Letters of Credit and Bills issued upon Adelaide, Port Adelaide, Gawler, and Robe. Approved Drafts negotiated and sent for collection.

Every description of Banking business conducted with Victoria and New South Wales, through the Company's Agents. WILLIAM PURDY, Manager.

54 Old Broad street, E.C.

CHARTERED MERCANTILE BANK

of INDIA, LONDON, and CHINA.

Capital £500,000, of 20,000 shares of £25 each paid up in full. Reserve fund £50,000.

HEAD OFFICE, 52 Threadneedle street.

Agencies and Branches at Bombay, Calcutta, Madras, Colombo, Singapore, Penang, Hong Kong, Shanghai, and Mauritius.

The Bank, at its Head office in London, grants Drafts on its various Agencies and Branches; issues Letters of Credit; purchases approved Bills on India, China, Ceylon, and Mauritius; undertakes the purchase and sale of Indian Government and other Securities, and the collection of Private and Mercantile Bills, at the ports and places at which its Agencies are established; receives Deposits at Interest for Fixed Periods, the terms of which may be ascertained on application; and transacts generally all Indian Banking business, including the receipt of Pay, Pensions, and Dividends on Stock of all kinds.

Office hours, 10 to 3; Saturdays, 10 to 2.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.

Paid-up capital, £1,260,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, rising and falling therewith. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.

Threadneedle street, London, March 23, 1860.

UNION BANK OF AUSTRALIA.

London Office, 38 Old Broad street.

The Directors of this Bank grant LETTERS of CREDIT and DRAFTS on its Branches as under, viz.:—

NEW SOUTH WALES.

Sydney | Orange
Bathurst | Goulbourn

QUEENSLAND.

Brisbane.

VICTORIA.

Melbourne | Ballarat | Portland
Geelong | Castlemaine

SOUTH AUSTRALIA.

Adelaide | Port Adelaide

TASMANIA.

Hobart Town | Launceston

NEW ZEALAND.

Auckland | Nelson | Lyttelton (Canterbury)
Wellington | Christchurch | Dunedin (Otago)
Napier (Hawke's Bay) | (Canterbury)

They likewise negotiate approved Bills on the Colonies, and send out Bills for collection, the terms for which may be obtained on application at the offices of the Bank.

N.B. Letters of Credit and Drafts may also be procured of Messrs Glyn and Co., 67 Lombard street.—By order of the Board, H. W. D SAUNDERS, Secretary.

BANK OF NEW SOUTH WALES

(Established 1817, Incorporated by Act of the Colonial Legislature in 1850, and confirmed by Her Majesty in Council), 37 Cannon street, City. Capital £750,000. Reserve Fund £205,000.

The Board of Directors GRANT LETTERS of CREDIT, payable on demand, and BILLS of EXCHANGE, at 30 days' sight, on the undermentioned Establishments of the Corporation, at the rate of £101 for every £100 sterling paid here.

NEW SOUTH WALES.

Sydney	Bathurst	Toowoomba
Maitland	Albury	Rocky River
Newcastle	Mudgee	Deniliquin
Brisbane	Tamworth	Adelong
Ipswich	Kiandra	Windsor

VICTORIA.

Melbourne	Ballarat	Ararat
Geelong	Sandhurst	Tarrangower
Kyneton	Beechworth	Wangaratta
Castlemaine	Chiltern	Inglewood

And also on the Commercial Bank of Van Diemen's Land at Hobart Town and Launceston.

The Directors also negotiate approved Bills of Exchange, and send them for collection, drawn on any of the Australian colonies and New Zealand.

The Royal Bank of Scotland, Stuckey's Banking Company, the Manchester and Liverpool District Bank, the North and South Wales Bank, and the National Bank in Ireland are authorised to grant credits on this Bank at the several establishments in Australia, and will negotiate bills drawn on the Australian colonies.—By order of the London Board,

JOHN CURRIE, Secretary.

The Political Economist.

The Editor of the ECONOMIST *intends to publish a Supplement half-yearly, giving* IN A COMPACT FORM *the Balance Sheets and Directors' Reports of* ALL *the Joint Stock Banks in the United Kingdom, as far as the same are made public, with some account of the most important Meetings of Shareholders.*

THE RISE IN THE BANK RATE OF DISCOUNT.

On Thursday the Bank of England raised its rate to 8 per cent.—a step which has excited much surprise and drawn forth some severe criticisms. The general reason which has no doubt influenced the Directors is not so much the increase in the demand for accommodation at the Bank, though the Other Securities have increased by 794,988*l* in the week; for this is properly ascribed in great measure to temporary causes. It is rather the reappearance of the drain of bullion from this country which has been temporarily, but only temporarily, checked by the high rate already adopted, taken in connection with the circumstances which show that the causes of that drain are still in operation The bullion reserve is diminished this week by 261,504*l*. The particular form which the drain is now assuming is that of a demand for silver for India. The amount of the silver exported in the last six weeks to India and China is 1,521,901*l*, the whole export of silver in the previous six months having been only 3,703,903*l*,—so that there is reason to fear that the drain in that direction is likely to spring again into its old proportions. This turn against us is said to be due to the "wild orders" for cotton from Bombay, and very probably this may be the case. But it matters not in the least to what cause a drain is due,—nor of course whether it be a drain of silver or gold,—so long as it continues and seems likely to continue. The special form it takes bears on the question only so far as it indicates a more or less temporary cause Yesterday it was a demand of gold for the United States,—now it is one of silver for India. The greater the number of possible or probable causes for a turn of the exchanges unfavourable to England, the more needful is the caution which the Bank Directors have shown in adopting the only remedy which can arrest its continuance,—because, when there are many such causes, even if one cause ceases to operate, some of the others may again become active.

In the present instance it cannot be denied that there is evidence of a steady *tendency* to a renewal of the drain. For more than 12 months it has gone on steadily, and only been arrested for very short intervals.

	£
On 15th February, 1860, the bullion and coin in the Bank of England was	15,105,287
On 13th February, 1861	11,571,352
Decrease	3,533,955

But it is said that for the fortnight ending with the 6th instant a recovery took place in the Bank's stock of bullion, and it is argued that even if that recovery has been lost (which it has almost entirely), we are no worse off than we were when the high rate of 7 per cent. was first fixed. This is erroneous reasoning. We are worse off, if, after trying a remedy believed to be sufficient and more than sufficient, we find that its effect is inadequate; and this we do know, if the *tendency* is to lose instead of to gain bullion in spite of the 7 per cent. rate. The absolute stock of bullion may not be less; but we have the evidence that it will shortly be less instead of more, unless a still more stringent rate be adopted. In short, we have it proved that the current is *against* instead of *for* us, in spite of the high rate of 7 per cent. And it seems, therefore, only reasonable to try at once the effect of a still higher rate.

Nor is the argument that the rate on the Continent is in most places much lower than in London of any value, if we find practically, as we have found, that the difference in the rate is not sufficient to pay a profit on importation thence. The test is simply the *fact* whether in spite of the lower rate at Hamburg, Amsterdam, and elsewhere, bullion is sent thence to London. If not,—and this, we need not say, has not been the case,—it is no consolation to the Bank of England to know that exportations cannot profitably be made from London to Hamburg, Amsterdam, and so forth. The bullion is going away from us to India, and we want to replace it. Until our rate of discount either tempts hither enough to supply its place, or prevents its going out at all, it is not high *enough*.

The only question for the Bank to consider is whether or not the causes which produced the gradual drain of the last year have yet been arrested, and the evidence is clear that they have not. The United States have sent us largely increased quantities of grain, and have taken less than usual of our manufactures in return. There has been a large expenditure in China. Besides this, our merchants are increasing their investments in the China trade on the strength of the new treaty. In India there is a considerable demand for capital on account of the new railways, as well as a suddenly increased demand for cotton. All these causes tend to make floating capital dear, and most of them directly to turn the exchanges against us. When there is added to these general considerations the fact that bullion is taken from the Bank, instead of being brought there, there is enough to justify the caution of the Directors, though certainly not enough to justify panic.

It has been said in some quarters that the demand is for silver, not for gold, and that this does not disturb the exchanges in the same way as a demand for gold. The remark is obviously puerile. If silver is wanted for export, it can only be got by buying it. And wherever it is obtained, either in England or France, the tendency must equally be to diminish the bullion reserve. If the silver is bought in France, gold will be sent to buy it with. And if gold is sent, it will be obtained by discounts or by presenting notes at the Bank of England.

It is said that "the stock of bullion now held is nearly a "million in excess of the average of the entire year 1856, "when the average rate of discount was 5¾." But this is a loose kind of comparison worth very little. The greatest loss of bullion in 1856 occurred between June 28th, when the bullion stood at 13,073,758*l*, and when the rate was 4½, and November 8th, when it had sunk to 9,530,152*l*, after which it was raised to 7 per cent,—being a loss in nineteen weeks of about 3,500,000*l*. If we go back for the same period, that is nineteen weeks from the present date, we shall find that—

	£
On 3d October, 1860, the coin and bullion was	15,869,088
On 13th February, 1861	11,571,332
	4,297,756

showing a decrease in the same time of 4,297,756*l*. And we must remember that at the time of the crisis of 1857 the Bank was reproached for not meeting a drain of bullion by stronger measures in an *earlier* stage. This is exactly what it is now doing. And not only is the loss of bullion in the same period greater now than in 1856, but it appears to be due to a variety of far more steadily operating causes. For at least the last 16 months there has been a steady tendency to a rise in the value of money,—which is not due to one cause alone but many,—causes which may be described as an increase of general trade *in the face* of a bad harvest, a large war expenditure, political uneasiness both in Europe and America, and a large outlay on public works in the East. With all these considerations before them, we are disposed to think that the Bank Directors have exercised no undue caution, though there is no feature about the new Bank return to give the smallest ground for panic.

THE ESSENTIAL ELEMENT IN BANKRUPTCY REFORM.

THE new Bill introduced by the Attorney-General for the reform of the Court of Bankruptcy is far less complicated than the Bill of last year. In bulk, also, it is less alarming than that of last session, but this is only because it does less. The Bill of last session was a consolidation Bill—a code repealing all past Acts, and providing, or at least endeavouring to provide, for all future cases. The Bill of *this* session is only an amending Bill: it aims at introducing some important amendments into the Law of Bankruptcy, but it does not attempt to sum it up or codify it. Perhaps, considering the crowded pressure of last year and the ample leisure of this, it would have been as well if Sir R. Bethell had not attempted so much then, and if he had attempted to give us a full consolidation now. But we are too well aware of the labour which reforms like this entail, and too thankful for them to dwell on criticisms of pure form. We are afraid that the inevitable complexity of Bankruptcy Law, augmented as it has been by the fluctuating and inconsistent character of our legislation upon it, rather confuses men of business, and tends to divert their attention from the simple point in which they are mainly interested.

The question of questions in bankruptcy is this:—When a trader fails, how is his property to be got at most easily and most effectually? It is in this and in this only that men of business are especially interested. The degree of the bankrupt's culpability, the explanation of his failure, the nature of his past trading, are to the creditors exceedingly secondary matters. The question in which they are really concerned is, "how they can get their money?"

The real answer is, that they must get it themselves. They must see to it and manage it. The bankrupt's estate is in a certain sense no one's estate. The bankrupt, its former owner, has ceased to have any interest in it. His faults or his misfortunes have deprived him of whatever he had before, whether it were much or little. Necessarily, therefore, *he* ceases to take an interest in it. He can no longer be relied on for attending to it. He will not have the money which is to be realised, and naturally, therefore, he will take very little pains or trouble in realising it. When bankruptcy proceedings were in their infancy, and when our experience of them was small, it was hoped that the Court of Bankruptcy would get the money, although the bankrupt himself did nothing. An elaborate administrative organisation exists, which supposes that the Court will occupy itself laboriously and anxiously in getting the money. There are two great functionaries, the trade assignee and the official assignee, as well as many messengers and miscellaneous subordinates, who are supposed in theory to be the executive agents in realising the assets. But in practice the trade assignee does nothing, and the official assignee does nothing satisfactorily. Very little is got in, and that at a great charge. The expense of realisation is on an average 33 per cent. of the amount realised: where the 33 per cent. goes is a difficult question, but it vanishes somehow or other.

Sir R. Bethell has applied corrective expedients which he hopes will materially diminish this preposterous outlay. And we sincerely hope that they may have some such effect. But no alteration or innovation can ever make the Court of Bankruptcy a good collector of money. It is not *in the nature of a court.* There is a want of motive power. The officials of it, we do not doubt, perform their duties well and carefully. But they cannot be expected to be very active. They cannot be expected to be ever on the alert—to be constantly and eagerly on the watch for the best opportunities—to be as watchful of other people's interests as men of business ordinarily are of their own. The spirit of routine pervades official establishments necessarily and inevitably. A court of justice is well adapted for its proper function; it can *decide* anything, but it can *do* nothing. An administrative suit in Chancery is a harassing accumulation of tedious delays, and the executive efficiency of the Bankruptcy Court is almost equally contemptible.

The only remaining expedient—as neither the bankrupt nor the Bankruptcy Court are to be trusted—is that the creditors should act themselves. It is their money which is to be realised; they, therefore, should see after it, and try to find it. The difficulty is, that they have not time. They are for the most part occupied men, with regular occupations, stated employments, a daily business of their own. They are not ready to leave—they would be fools to leave—the steady gains by which they live to search after the precarious trifles of a bankrupt's estate. They are ordinarily aware of this: even if they begin to attend to an estate with interest and energy, they soon weary of it. They find that it is difficult, laborious, unprofitable, and distracting. They find that it takes away their attention from what is much better worth attending to. A very unpleasant mass of difficulties are sure to encumber the very threshold of the subject. Just before his failure the bankrupt is sure to have made a mass of engagements—to have been engaged in many abortive schemes—to have made a hundred hasty promises which he hoped would tend to extricate him, but which have in real truth only aggravated his difficulties. Each of these give rise to a multitude of consequences, half legal and half financial, which only an experienced mind can effectually deal with, and which seem hopelessly "bothering" even to practised men of business who have never made bad debts before, and whose attention has been engrossed by the ordinary transactions of prosperous trade. The result is, that the creditors do not attend to a bankrupt's estate, though they know that they ought to attend to it, and that they will derive nothing from it except they do.

The only mode which experience shows to be practically effective for winding up a difficult estate, is to appoint a professional agent for that express purpose. Such men, under the name of accountants, are becoming a profession. They generally start in life with no capital, but with considerable natural intelligence and a sound mercantile education. They have their way to make in the world, and the industrious efficiency which necessity best produces. It is worth these men's while to attend to the details and difficulties of a bankrupt's estate, for they are to have a specific remuneration for so doing. They have the skill to do so effectually, for it is their profession—the time to do so, for it is their life. They ought not indeed to be implicitly trusted: the larger creditors should inquire how the estate is going on; should never cease to watch, and should, when necessary, control it. But, subject to such superintendence, the administration of a bankrupt's estate should be entirely in the hands of these professional *liquidators;* for they are the only persons who are fit for it—the only persons who can be adequately paid for looking after it—the only persons who *will* attend to it.

Sir R. Bethell has given us a well-contrived machinery for managing "estates" in this satisfactory manner. By carefully drawn clauses, which we copy below, he allows *three-fourths* of the creditors in value to do what they like with the estate. He enables a like majority to stay proceedings and wind up the estate out of Court by deed of arrangement as they think fit, and to go before the Court of Bankruptcy without any great expense or great delay for the adjudication of any special question of law which may impede the administration of the estate and may require authoritative settlement. If these provisions of Sir R. Bethell's Bills become law, we do no not despair of seeing "estates" wound up in a fairly satisfactory manner, whenever the principal creditors will give a fair amount of attention to them; and if this should be the result we shall be satisfied; for, though we would not depreciate the other parts of bankruptcy legislation, we think they are undeniably very secondary to this in practical importance. The following are among the most important provisions of the Bill:—

105. Every debtor petitioning against himself shall file in Court, together with his petition, a full, true, and accurate statement of his debts and liabilities of every kind, and of the names and residences of his creditors, and of the causes of his inability to meet his engagements, and such statement shall be in such form as general orders shall direct, and shall be verified by the oath of the petitioner.

120. In case at such meeting [the meeting held after adjudication of bankruptcy] or at any other meeting of creditors any proposal shall be made by or on behalf of the bankrupt which it shall appear to the major part in value of the creditors' then present ought to be accepted, or if it shall appear to the majority in value of the creditors present at any meeting to be desirable on any ground to resolve, and such majority shall resolve, that no further proceedings be taken in bankruptcy, the meeting shall be adjourned for *fourteen* days, in order that notice of such resolution may be given to every creditor by the official or creditors assignee, which shall be done accordingly; and if at such adjourned meeting *three-fourths* in value of the creditors present shall so resolve, the proceedings in bankruptcy shall be suspended, and the estate and effects of the bankrupt shall be wound up and administered in such manner as such majority shall direct.

As to change from Bankruptcy to Arrangement:—

191. At the first meeting of creditors held after adjudication in manner herein provided, or at any meeting to be called for the purpose, and of which ten days notice shall have been given in the *London Gazette*, *three-fourths* in value of the creditors present or represented at such meeting may resolve that the estate ought to be wound up under a deed of arrangement, composition, or otherwise, and that an application shall be made to the Court to stay proceedings in the bankruptcy for a period not exceeding *two* months.

192. The registrar shall report such resolution to the Court within *four* days from the date of such resolution, and the bankrupt, or any creditor nominated in that behalf by the meeting, may then apply to the Court that the proceedings in bankruptcy may be stayed in the terms of such resolution, and the Court, after hearing the bankrupt, and such creditors as may desire to be heard for or against the resolution, and if it shall find that the resolution was duly carried, and that its terms are reasonable, and calculated to benefit the general body of the creditors under the estate, shall confirm the same, and make order accordingly, and in such order shall give such directions as to the interim management of the estate as it shall deem expedient.

193. If the proceedings in bankruptcy be stayed as herein provided, the bankrupt, or any creditor nominated in that behalf by the meeting aforesaid, may, at any time within the period during which the proceedings are so stayed, produce to the Court a deed of arrangement, signed or on behalf of *three-fourths* in value of all the creditors of the bankrupt; and the Court may consider the same, and may examine on oath the bankrupt and any of the creditors who may desire to be heard in support of or in opposition to the deed, and may make such other inquiry as it may think necessary; and if the Court shall be satisfied that the deed has been duly entered into and executed, and that its terms are reasonable and calculated to benefit the general body of the creditors under the estate, it shall by order make a declaration of the complete execution of the deed, and shall direct the same to be registered with the chief registrar, and shall also, if he thinks fit, annul the bankruptcy; and such deed shall thereafter be as binding in all respects on any creditor who has not executed the deed as if he had executed it, provided such deed be registered with the chief registrar in the manner directed by the order.

Sections 194 and 195 give the Court power to entertain applications on behalf of any party interested, to summon and examine needful witnesses, and to resolve the questions proposed, and to enforce all its orders as if the estate were still in Court.

FRANCE AND THE SLAVE TRADE.

Our readers probably remember well the strong language in which theEmperor of the French in November, 1858, disavowed any wish to foster the Slave Trade by the importation of so-called free labourers from Eastern Africa to Bourbon and Réunion. "As to the principle," he said, "of "the engagement of the negroes, my ideas are far from "being settled. If, in truth, labourers recruited on the "African coast are not allowed the exercise of their free will, "and if this enrolment is only the Slave Trade in disguise, I will have it on no terms; for it is not I who will "anywhere protect enterprises contrary to progress, to "humanity, and to civilisation." The commission which the Emperor in this letter intrusted to his "dear cousin" was to ascertain the truth of this statement, and to prohibit this engagement of "free" labour in future, if it should be found to be practically slave labour. We are told by Count Walewski, that as a consequence of this commission, instructions which were issued early in January, 1859, "have for- "mally interdicted for the future the enterprises of this "nature formerly permitted on the East Coast of Africa."*

This interdiction was the result of the commission,—but what was the result of the interdiction? Besides an apparently unbroken continuation of the French system of immigration, the French Consul at Zanzibar has since, as we are told by our Consul there, taken a Spanish vessel engaged in the Slave Trade under the protection of France.** As late as the 4th November, 1859,—a period much later than would be necessary for the new orders of January to reach the East Coast of Africa,—we find our cruisers reporting French vessels with African *engagés* (as the slaves are called) off the coast of Mozambique. But we have got more specific proof of the insincerity of the French Government than even this. On Sept. 8th, 1859, our *Chargé d'Affaires* at Rio Janeiro reported to the Admiral on the station that a French vessel named the *Splendide* was fitting out for the reception of 800 Africans whom she was to take on board off the Congo coast. She had slave decks, and was taking in a large supply of water and farinha. On September 20th, the English Admiral, Sir Stephen Lushington, reports that he had communicated privately with Rear-Admiral de Chabannes, the Commander-in-chief of the French naval forces on this station, "who informed me that the particulars were "correct and perfectly legal, as it was the intention of his "Government to obtain free African labour and not "slaves." Three months later, under the date December 30th, 1859, our Consul at Martinique reports that the *Splendide*, belonging to the firm of Régis and Co., of Marseilles —the famous slave contractors—and the *Tigre* have arrived at Martinique with negro immigrants. "The former vessel "has come from Loango, the latter from Gabon. The total "number of Africans landed from both vessels is stated to "be 846, but the number embarked in Africa I am not yet "acquainted with." Possibly, in some connection with this "legal" intention of the French Government to obtain "free" African labour for Martinique at Gaboon, and in any case at the same date,—both these adventures having happened at the very end of the year 1859, the year in the first month of which the Emperor had disavowed and prohibited the trade, —is the transaction to which the following curious correspondence, lucid enough in its drift, however obscure in its wording, alludes:—

Consul Hutchinson to Lord J. Russell.—(Received Jan. 11, 1860).
Fernando Po, November 28, 1859.

My Lord,—I have the honour to transmit herewith copy of a communication which I received a few days ago from Gaboon, and the original whereof I am forwarding, as requested, to the Governor of Cape Coast Castle.

It is needless for me to point out to Her Majesty's Government the evil results that must inevitably flow from the new phase of French voluntary emigration, if reparation be not made in the present case, and any like occurrence in future be not obviated.—I have, &c., (Signed) Thos. J. Hutchinson.

Letter addressed to Consul Hutchinson by some Natives of the Gold Coast.
Gaboon, October 20, 1859.

Sir,—We beg leave to acquaint honour a few lines concerning our present state: that we are people which belongs to Cape Coast,

* *Note Verbale* of Count Walewski's in the Correspondence concerning the Slave Trade (Class B), just submitted to Parliament, p. 53.
** Despatch No. 75 (Class B).

and we carried our goods to some place called Assime in order to sell, and when we reached there in the midnight the Frenchmen came and cutchs we and shipped we on their man-of-war and carried we to the Goree, but nobody knows not our going, and when we reached there they never let we close the men of letters, and now they brought we to the Gabcon: we all amounted 75; 20 died out of 75; but we hope you to try the best as you can and write the Governor of Cape Coast Castle about our sorrowful case, so that we can get leave to go to our mother-land and you shall be highly oblige.—We remain, &c.,

(Signed) TAWEAH.

ARWELL.
&c. &c. &c.

It is not necessary to repeat, what has been so often said, that the engagement of "free" labour in Africa is simply an impossibility. Once let the chiefs know that free labour is wanted and will be paid for, and they will bring slaves in numbers to the coast for the most trifling reward. This the Emperor ascertained from his "dear cousin," and in consequence professed to prohibit the trade,—though in the face of that prohibition we have Admiral de Chabannes asserting that the whole traffic in "free" African labour is perfectly legal,—and Lord John Russell stating with a charity which does his heart more credit than his head, that "Her "Majesty's Government cannot doubt that these proceedings "have taken place contrary to the decree of the Imperial "Government, and they feel confident that steps will be "taken by the Imperial Government to put an end to these "transactions." This is blind faith indeed. France wishes to combine the credit of disowning the Slave Trade with the profit of keeping it up.

THE POST OFFICE SAVINGS BANKS.

THERE can be no doubt but that the Post Office Savings Banks which Mr Gladstone is proposing to establish will be beneficial, *if* any National Savings Banks whatever are beneficial. We speak thus hypothetically, because, in opposition to the practice of this country and of other civilised countries, we are inclined to think that it would have been well if Government had let the money of its poorer subjects entirely alone. We are inclined to think that it would have been better to have allowed Private Savings Banks to have grown up gradually,—as from the energy of the associative principle in this country they undoubtedly would have grown up —and to have encountered the inevitable frauds which for a time the ignorance and helplessness of the poorer classes would have encouraged. After a little while, we think the working classes would learn to be as shrewd about their money as other people; and we regret that the Government, by proposing to take their money, should have relieved them from the educating responsibility of finding natural as well as safe investments for it. But if we disregard this fundamental difficulty—and the practice of Governments abroad as well as at home is undeniably to disregard it—we see no objection to the proposal which Mr Gladstone has just made. If any National Savings Banks can be good, this one is very good.

The existing Savings Banks labour under no less than three essential and irremovable defects. First they profess —at least they are understood—to give a Government guarantee for all money deposited with them, and yet in practice they do not give it. This defect does not arise from any legal mistake or confusion. Nothing can be clearer than the law on this subject,—nothing is better understood among financiers and economists; but nothing is worse understood by the class of persons who have their money in Savings Banks. The law is that the Government is only responsible for whatever sums it actually receives. The Commissioners of the National Debt in London regularly receive from the country Savings Banks certain remittances, and for these the State is responsible. But besides the sum remitted, there is a sum unremitted. When a depositor in a rural district pays his money to the Savings Bank of that locality, he never knows that it will reach London at all. He has no means of ascertaining whether it is ever paid to the Commissioners of the National Debt at all. As we all know, in the vast majority of cases it would be idle to dream of explaining to the poor depositors who the Commissioners are, or what they have to do with the matter. If by any peculiarly forcible illustration the conception could for a moment be pushed into their minds, it would not stay there; the habits of their lives and the ordinary course of their habitual ideas would not enable them to bear it in mind. They always believe that the Government—or the Queen, as they are more likely to say—is responsible for all they pay to the local agent; and whenever there have been defalcations, the sufferers have always attributed very bad faith to the Government. No defect can be greater than this. If the Government interfere with the money of the poor, it should be to give them *bonâ fide* security: if the Government practically permit it to be thought that they give the poor such security, it is natural that the latter will complain if that security turns out to be unreal.

From this defect Mr Gladstone's proposal is entirely exempt. The money paid to the depositor will be paid to the money-order department of the Post Office. It will be paid to the agent of the Government, and in consequence the Government will be liable for it. There will be no perplexing and ambiguous interval. The State will be responsible for all that the poor pay, and will become responsible from the moment that they pay it. The rate given by the Government to the trustees of the old Savings Banks is 3*l* 5s, whereas under the new system the Government is only to give 2*l* 10s, which it is certain that they can agree to pay with no serious risk of loss.

It may at first sight appear as if this last excellence in the new plan would secure its speedy failure. It might be thought that the poor would not go to the Post Office for the lower rate when they can go to the Savings Bank for the higher. And, in part, this was intended to be so. The object of the proposal is not to extinguish the present Savings Banks, but to aid them, and to give an efficient supplement to them. But it is also to be borne in mind that the different rate of interest between the two plans is not nearly so great as might be conjectured from the explanation we have just given. The poor do not get 3*l* 5s on their deposits. That is the rate which the Government pays to the trustees of the Savings Banks, but the trustees are forbidden to pay to the depositors more than 2d per cent. a day, or 3*l* 0s 10d a year. Out of the interest given by the Government all the expenses must be paid, and these appear on the average to be about 7s per cent. or rather more. In practice, most Savings Banks do not allow to the depositors the 3*l* 0s 10d per cent. which is permitted by law, and they could not prudently afford to do so. Although, therefore, the interest to be paid to the poor under the new plan is less than that paid to them under the old system, it is not so much less as might be at first supposed from a comparison of the two rates which the Government pays and is to pay on the two plans respectively.

The second defect of the present Savings Banks is, that they are least likely to exist where they are most wanted. If it is advisable that the State should receive the money of the poor, it is *most* advisable that it should do so in places where there are fewer other persons to take care of it—in the "uncared for parishes." Yet it is precisely here that we very rarely find a Savings Bank. There are no local trustees to start or to administer one. The ordinary Savings Bank system presupposes a certain local philanthropy and good sense which in the worst districts do not exist. "It is quite obvious," says Mr Sikes, a very intelligent writer, to whose arguments and explanations the plan now proposed is under very great obligations, "that a working man will be much discouraged from saving "if he has to walk many miles to reach the bank where he "may deposit his small store, and still more if the bank "should only be open for an hour or two in a week, at a "time when it may not be convenient for him to attend. "The number of money-order offices is 2,360, and they are "constantly on the increase. The practical effect of the "two systems may in some degree be inferred from the "slow increase of the number of deposits in Savings Banks, "and the extraordinarily rapid increase in the amounts re- "mitted through the money-order offices. Within the "twelve years the receipts of the Savings Banks only in- "creased 7½ per cent., while the money-orders increased 90 "per cent. in number, and 79 per cent. in amount."

The present plan will tend to remove the inherent stigma

of the old Savings Bank system. It will not confine the Government aid to those places in which there is already some local energy and intelligence—to those places where that aid is least required.

Lastly, the plan of Mr Gladstone is not exposed to the most popular objection to our old system of Savings Banks—the high rate of interest which they pay. It is well known that the nation have incurred a very large loss by paying for the money of the poor a higher rate of interest than they can make on it. The Commissioners of the National Debt have always invested the moneys received by them in the public funds, and the income so derived has almost always been insufficient. Sir A. Spearman, the highest official authority, states that, "Taking the average price of Government securities for each year since 1817, the only years in which the prices appear to have been such as to produce a rate of interest equal to that paid were 1847 and 1848." In every other year there has been a heavy loss.

THE INDIGO PLANTERS AND THE GOVERNMENT OF BENGAL.

In an exceedingly able and exceedingly unfair pamphlet* which has recently been published in this country, the case of the indigo planters against the Bengal Government has been strongly stated. As we have in the main uniformly defended the Bengal bureaucracy against the planters, some examination of this document seems to be required at our hands. This work will, no doubt, be extensively read, for the subject is sufficiently attractive to the popular mind,—the ruin of an enterprising body of Englishmen by cold-blooded officials who are afraid that their misgovernment will be criticised and exposed. The style in which the thing is done is no less attractive: it is slashing and vigorous. The reader is not fatigued with having to weigh facts on one side against facts on another; for the facts are all on one side, and any others are pleasantly kept out of sight. If documents or evidence are quoted, just the part is given which tells for the writer's case, and the rest dropped. There is hardly a page in which we could not point out some gross misstatement or exaggeration.

The writer, knowing how distasteful Indian political controversies of this kind are to the mass of English readers, has doubtless thought himself secure from exposure. He may rest assured, however, that although there may be one hundred readers of his pamphlet for one who reads the long official reports on this question,—truth will out in the end. The public have a shrewd instinct of the obliquity of vision to which violent self-interest is liable,—whether it be the rights of the West India slaveholders, corn-law protected landlords, or of Bengal indigo planters that are in question.

The writer's statement of his case is briefly as follows:—From the earliest days of Anglo-Indian history, the Indian bureaucracy have been bitterly hostile to the independent settler or planter. When no longer able to keep him out of India altogether, they did their best to make his residence there as disagreeable and unprofitable as possible. The civil servants, forming a close aristocracy, could not bear to have their authority questioned by vulgar persons who criticised their administration in the most disrespectful manner and lampooned them in the newspapers. When, therefore, in 1859 a little disagreement arose between the planters and the native tenantry on the subject of indigo cultivation, in a certain district of Lower Bengal, the magistrate, Mr Eden, at once jumped at the opportunity of exciting the minds of the people against the planters. He issued notices that they need not keep their engagements with the planters to grow indigo, and that the Government would protect them in their resistance. The Lieutenant-Governor of Bengal, Mr J. P. Grant, expressed his approval of Mr Eden's proceedings, and a violent excitement among the agricultural population of Lower Bengal was the result. They everywhere refused to sow indigo any more, repudiated their engagements, and threatened to burn the factories, if the planters attempted to compel them to sow. Thereupon the Legislative Council passed a temporary Act obliging all ryots who had taken advances to sow indigo during the current season to keep their engagements on pain of fine and imprisonment; and a Commission was appointed to inquire into the system of indigo cultivation, and the cause of the outbreak. The Act, however, was neutralised by the unwarrantable interference of Mr Grant with the course of justice, by his removing magistrates who would not carry out his interpretation of the Act, and by his remitting the penalties imposed by them upon the defaulting ryots. On the other hand, the President of the Indigo Commission, being a civil servant, drew up the report in such a way as to satisfy his own class prejudices, but not the requirements of truth. The Lieutenant-Governor has turned a deaf ear to all the representations of the planters, and a trade worth two millions a year is on the point of ruin.

It must be obvious that there are questions involved in this controversy of far greater importance than the mere question of the system of indigo cultivation. The real questions at issue are the fitness of the present administrators of India for the duty of government; the principles on which legislation and the administration of justice in India are to be conducted; and the respective rights of English settlers and the native tenantry where their interests come into conflict. We have, therefore, considered it our duty to read through the whole of the reports, evidence, and correspondence on this subject which have reached this country, and we will now endeavour to show the conclusions to be derived from an impartial weighing of the evidence on both sides.

In the first place, nothing can be more false than to say that until within two years from this time "nothing in India "was so comfortable as the relations" between the planters and the ryots. The disagreement between the two classes has been a constant embarrassment to Government for the last fifty years. So long ago as 1810 the attention of the Governor-General was called to the oppression of the planters in doing the very things they are now charged with; viz., "in obliging the ryots to receive advances and adopting "improper means to make them cultivate indigo." The eminent missionary, Dr Duff, says that more than twenty years ago when he first came to India he heard of secret murmuring and discontent among the ryots on this subject. The evidence of the Rev. Mr Long and the Rev. Mr Cuthbert is still stronger both as to the intensity and duration of the animosity. The evidence for this state of things is overwhelming. We know how few of the crimes really committed ever reach the courts in India, but in the last five years 54 cases arising from indigo disputes have come up for trial in one district alone. For many years the offences were of a heinous kind, such as affrays attended with wounding and homicide,—the burning and plunder of villages, &c.;—but of late years, the planters seem almost to have confined themselves to locking up recusant tenants or carrying off their cattle. From first to last for fifty years the story has always been the same:—that on one side that the planters forced the cultivation of a crop which the ryots found unprofitable, and on the other that the ryots were always evading the engagements they entered into to grow it.

The planters finding that they could not get the tenantry and small proprietors to enter into these engagements so long as they were under their native zemindars, determined to buy the manorial rights of the latter. This they did (they themselves confess before the Commission) at enormous cost, merely for the purpose of exercising the great and illegal powers which the zemindars in this part of Bengal have always exercised over an abject and spiritless population. The planters, from being mere manufacturers, became zemindars or landlords,—and from that time the ryots had but to obey, and to enter into engagements to grow this crop on any terms the planters liked to impose. Before the native zemindars parted with their manorial rights, they could always claim their protection, but now they have no chance of escape.

With the development of the export trade and the demand for labour created by the construction of railways, the price of labour and all agricultural produce, such as rice, hemp, &c, rose enormously. What, then, must have been the feelings

* Brahmins and Pariahs. An Appeal by the Indigo Manufacturers of Bengal to the British Government, Parliament, and People, for Protection against the Lieutenant-Governor of Bengal; setting forth the proceedings by which this high officer has interfered with the free course of justice, has destroyed capital and trade of British settlers in India, and has created the present disastrous condition of incendiarism and insurrection now spreading in the rural districts of Bengal. *London*: James Ridgway, 169 Piccadilly, W. 1861.

of the native tenantry in their hand-to-mouth poverty when they found themselves in a great measure deprived of the golden prospect this state of things opened to them? Here was a chance of their being at last able to redeem themselves from debt and misery but for the necessity of cultivating their best land with a crop which was a dead loss, instead of with crops which would have brought them enormous gains.

Such was the state of things when, in 1859, some ryots applied to Mr Eden, the magistrate of the Baraset district, for protection against a planter who was going to sow their lands with indigo. This was not the first complaint of the kind he had received. He therefore passed the following order:—"Since the ryots can sow in their lands whatever "crop they like, no one can, without their consent and by "violence, sow any other crop," and he ordered the police to see that "no one was to interfere with their lands." The question of the propriety of this order came before the Government in this shape, viz.:—Whether on an *ex parte* allegation by a planter that the ryots were under advances to him to grow indigo on their land, he was to have the right of entering on their lands himself and sowing it, and to be protected by the police in so doing? Mr Eden's order was upheld by the Lieutenant-Governor on the ground that it would be impossible for the police in every such case to know or to decide whether the ryot was under advances or not; and because to allow such a system was to allow the planter to sow what lands he chose,—selecting perhaps the ryot's best land for the very crop by which he would lose instead of gain. Besides, "in the supposed case," said Mr Grant, "the "indigo planter is the party conceiving himself wronged. "It is for him, therefore, not to judge his own case, and to "execute by his own peons his own judgment in his own "favour, but to sue the ryot in the civil court."

These orders led to the greatest excitement throughout the indigo districts of Lower Bengal. The peasant-proprietors, who form the bulk of the agricultural population, at last became aware that they had rights of their own and were not serfs. They had until then supposed that they had no power to refuse to enter into agreements to sow indigo for the planters. They everywhere declared their intention of refusing to sow any more, and in some few instances they threatened the planters with violence if they attempted to coerce them. We have omitted to mention one other point of importance. For many years great complaint was made of the mode in which the zemindars abused the law, by which they could oblige defaulting tenants to attend personally at their rent offices,—the ryots being dragged there and locked up, and perhaps beaten, until they paid not only their rent, but illegal demands of various kinds in excess. By a recent Act, zemindars have been left to the remedy of distraint, and this power of compelling personal attendance abrogated. This change in the law, also much inveighed against by our pamphleteer, tended still more to give the ryots a new feeling that they had some rights in the eye of the law, and to create some sense of independence.

To protect the interest of the planters from sudden ruin, to give them time to adjust their arrangements to the altered state of things thus brought about, and to quell the violent excitement which thus naturally and inevitably arose, Mr J. P. Grant recommended the passing of a temporary Act to oblige all ryots who had actually received cash advances to cultivate indigo during the current season to do so, under pain of fine and imprisonment. It was at the same time provided that a Commission should at once be appointed to inquire into the whole system of indigo cultivation, with a view to a careful consideration of the grievances of all parties. The charges made against Mr Grant, of undue interference with the administration of this Act so as to deprive the planters of all the benefit it was supposed to convey, we have already noticed in an article of the 22nd December. They are repeated in this pamphlet, though their refutation has been most complete. Mr Grant, as he shows, did not attempt to give any interpretation of the Act himself, and, therefore, did not remove magistrates for not following his interpretation. He simply directed the Commissioners, to whom the magistrates are subordinate, to watch the proceedings carefully, and to see that no injustice was done in the rapid decision of an enormous number of cases of a kind altogether new, and amidst intense excitement, clamour, and misrepresentation. Mr Grant, in his reply to these charges, mentions a number of striking cases showing how absolutely necessary it was for the Commissioners to watch the decisions; for it must be remembered that the Government had to find, at short notice, an extra number of officers for the purpose of deciding these suits, and many of them were, therefore, young and inexperienced.

The main point in dispute, however, between the planters and the Indian Government at the present moment is the proper remedy for their grievances. What they demand is a permanent Coercion Law, to make it a criminal offence, summarily punishable by a magistrate, to break an engagement to sow indigo. This has been demanded over and over again for many years past, and has been discussed in India and at home,—the proposal being condemned by every statesman who has considered the matter. The main ground of the refusal is, that it would be a gross injustice to pass a special law, solely in favour of the planter, to compel the ryots to keep engagements which it is certain are never freely entered into. The planters have confessed before the Commission that indigo can only be grown at a loss under existing rates;—that they could not make it pay to grow it themselves;—and that so unwilling were the ryots to grow it, that they have been obliged everywhere at enormous expense to buy the manorial rights which would give them the power to coerce the ryots into these engagements. Rice crops and other produce are grown under advances for native merchants, but *they* require no special law to protect them. Even for indigo, no special law of the kind is required in Madras, or in the North-West Provinces, or in Behar, or anywhere except in a few districts of Lower Bengal, because everywhere else a proper price is given, and an equitable system of cultivation pursued. What these different systems are which are successfully pursued by the planters in all other parts of India, we have shown in our issue of the 1st December. In no other part of India is there any dislike to the cultivation, simply because it is profitable, because accounts are annually adjusted, the cultivation is not forced,—and the ryots are not overwhelmed with irredeemable debt, and tormented with oppression. In fact, it is only *one-fifth* of the indigo trade even of the Bengal Presidency which is in any danger, after deducting what is grown on lands unfit for the cultivation and by planters themselves on their own lands.

Moreover, we defy the Government, either in India or in England, to assist the planters with a coercion act in this matter. The feeling on the subject is becoming most dangerous, even among these timid and oppressed Bengalees. With reference to a recent tour in the interior, Mr Grant writes, "From dawn to dark, as I steamed along these two "rivers for some 60 or 70 miles, both banks were literally "lined with crowds of villagers, claiming justice in this "matter." The missionaries all declare them to be in a most dangerous state of mind; and one of the popular ballads runs as follows:—

> The enemy of the soil is indigo,
> The enemy of labour is idleness,
> So the enemy of caste is Padre Hill.

One of the ablest and most lucid State papers we have ever seen, is a minute by Mr Grant, which has just reached this country, consisting of a review of the Report of the Indigo Commission. In the conclusion of this paper he shows that, by the improvements of the judiciary and the police now in course of being effected, by the new Civil Courts with their prompt and effective procedure for the decision of such cases as indigo contracts, and, lastly, by a law (now under consideration) for the cheap and easy registration of such contracts, all legitimate protection will be given to both the parties concerned in this controversy.

ONE ADVANTAGE OF IRELAND OVER ENGLAND.

THE shocking outbreak of the convicts at Chatham this week reminds us very forcibly that Ireland is in one respect a more favoured country than England. We have fairly set on foot in that island the best system of discipline for criminals known in Europe, and it is not only fairly set on foot, but fairly doing its work of rapidly thinning the criminal profession. The experiment has been tried, the Irish may think, *in corpore vili*, because England was afraid to adopt so new and bold a treatment

of crime till she had seen its results in some other country. Whether that is so or not, Ireland has reaped all the advantages of being thus thrust into the van to test the danger of philanthropic reforms. There is not only no danger, but there is much immunity from dangers which lagging England still prefers to incur, and to the extent and reality of which the scene of last Monday testifies strikingly enough. The trial has now gone on for five full years, and at the end of it we find the change in Ireland more marked and decisive than the most sanguine could have hoped. Why do we hesitate to apply the fruit of our experience to England and Wales?

We refer of course to the treatment of convicts in "Government prisons" in Ireland, now managed by a Board of Directors under the very able headship of Captain Crofton. The result of that experiment is remarkable. Of course the only criminals subjected to treatment in the Government prisons are those of the more hardened class, those whose punishment is penal servitude. But as these are the very class of criminals who form and rule the society of professional criminals, success in treating them is really success in striking at the root of the evil of habitual crime. The following table, taken from an able pamphlet of Captain Crofton's, just published,* on the subject of the "Immunity of Habitual Criminals" under the English system, exhibits the result of the present Irish system, the practical working of which commenced in 1855. It will be observed that, notwithstanding the discharge of 5,560 convicts during the six years,—discharges which would under the old system have fed anew the sources of the criminal population,—the number of convictions has steadily diminished. 1,462 of the (5,560) discharges, or more than 25 per cent, have been discharges on licence liable to be revoked, and the conditions of the licence have been strictly enforced under a constant police surveillance; but only 7 per cent. (89 in all in the six years) have been actually revoked.

IRISH CONVICT PRISONS.

	In Custody 1st Jan.	Convicted.	Discharged.
1854	3,933	710	658
1855	3,427	518	820
1856	3,209	389	1,107
1857	2,614	426	910
1858	2,277	358	946
1859	1,773	322	595
1860	1,631	331	524
1861	1,492	...	...

From this it would certainly appear that convict-crimes in Ireland are steadily diminishing,—a condition of things which really means that the "habitual criminals" there are being steadily thinned under the present system. Let us see how the English or old system of treating this class of criminals has succeeded during the last few years:—

ENGLISH CONVICT PRISONS.

	Under Custody at Beginning of Year.
1857	7,001
1858	7,748
1859	7,628

in which there is a considerable increase instead of decrease,—due, no doubt, in some measure to the increase in the number of sentences of penal servitude, caused by the Act of 1857, which legalised the substitution of short sentences of penal servitude for punishments which would formerly have been inflicted in the county prisons,—but still showing a result very different from that of the Irish system, on which the same Act had the same effect. And the condition of the English convicts is as unsatisfactory as their number. If they were properly "individualised," as the Irish Directors express it, and their *various* cases treated *in conformity* with their conduct,—if a gradual improvement in their condition, and the restriction of a strictly watched and limited liberty were held out before them as an incentive to improvement,—we should not hear of such scenes as that of Monday last.

Again, if we compare the total number of convictions after trial, including the lighter punishments as well as the sentences of penal servitude, in England and Wales with those of Ireland during the last five years, we shall see the relative change still more strikingly exemplified; and though it will be scarcely fair to refer this exclusively to the method pursued in the treatment of the comparatively small class of offenders who are sent to the Government prisons, yet no doubt these habitual and hardened offenders are in England, and were recently in Ireland, the great *feeders* of the criminal profession, and the means adopted in Ireland to reclaim them have diminished crime far beyond the ratio of their own number to that of the criminal recruits:—

CRIMINALS CONVICTED AFTER TRIAL (excluding Summary Convictions).

	England and Wales.	Ireland.
1854	23,047	7,051
1855	19,971	5,220
1856	14,734	4,024
1857	15,307	3,925
1858	13,246	3,350
1859	12,470	2,735

Here we see the serious crime in both countries considerably diminished, but the relative diminution of the Irish crime is far greater than that of the English, while that of the less serious crimes summarily dealt with has also, we believe, been more rapid in Ireland than England. The great improvement in the state of Ireland (which has been relatively far greater than that of England) may have something to do with this great change,—but the great success of the licence system there under the severe tests to which it has been subjected, is a phenomenon that can only be referred to one cause,—the system pursued by the Directors of the Irish Convict Prisons.

And, indeed, that system is in itself so obviously recommended by all the principles of common sense, that it is a disgrace to English statesmanship that no step has yet been made to introduce it into this country. We cannot too often impress upon our English legislators that the first and most essential step in penal jurisprudence is to determine the proper test and proper treatment of *professional* crime. Even in Ireland—though when once this class of habitual criminals are fairly lodged in the convict prisons they are successfully disciplined—the law does not yet give any sufficient aid in getting hold of them *as a class*, and only submits the most daring of their leaders to the treatment adopted by the Directors of the Convict Prisons. Captain Crofton very wisely urges that more comprehensive measures should in this respect be adopted. We ought to adopt at once the most efficient means for identifying old offenders, as these are of course the *professional* offenders, by carefully registering the offences and describing by photograph and otherwise the persons of criminals. Whenever a prisoner has been recommitted a given number of times to the borough or county prisons for comparatively slight offences, any subsequent conviction should subject him, simply as a result of the evidence of lawless *habits* thus given, to a short sentence of penal servitude,—three years, with a conditional liberation after the expiration of two years and a half, being the shortest of such sentences. And no offender who has been previously sentenced to penal servitude and who can be proved to be still addicted to criminal courses, should for any future offence, though taken singly it be a slight one, be recommitted to the county or borough prisons for short periods, but should be at once condemned as a "habitual offender", to at least seven years' penal servitude—the shortest sentence affording any chance of breaking through his formed habits of crime. This sentence would, according to the Irish system, involve a certain imprisonment in a convict prison for four years;—in case of good conduct he might then be removed to the Intermediate Prisons, where he is allowed some conditional liberty under strict rules, and begins to learn to earn an honest livelihood. Hence, if he conducts himself well, he may at the end of a year and three months, that is, a year and nine months before the expiration of his sentence, be liberated conditionally during good behaviour, his abode being reported to the police and his conduct regularly watched, and his licence withdrawn if it is not satisfactory. Thus before the expiration of his sentence the criminal has passed through two stages of probationary liberty, and during the period most trying for his newly-formed habits of honesty has been sustained in them by checks for which he himself is frequently very thankful.

Can any one show reason against the adoption of this very simple and reasonable system, which, though only partially adopted in Ireland, has yet been crowned with such marked success? All sane reasoners on these subjects will see at once the moral absurdity as well as the imprudence of not recog

* The Immunity of Habitual Criminals, with a Proposition for reducing their Number by Means of Longer Sentences of Penal Servitude, Intermediate Convict Prisons, Conditional Liberation, and Police Supervision. By Captain Walter Crofton, C.B., Chairman of the Directors of Convict Prisons in Ireland. Bell and Daldy.

nising habitually and systematically—for partially and unsystematically it is already recognised by our law,—the repetition of slight criminal acts as in itself constituting proof of a criminal state of mind and of habits of life dangerous to the community and in themselves demanding distinct penal discipline. We should never have such a concentrated mass of hardened crime in any one convict prison as there is now at Chatham, if evidence of professional habits of crime subjected the criminal to a long course of reformatory discipline at an *earlier stage* in his career. This principle once admitted, no one who knows anything of the Irish penal discipline will deny that it presents more hope of solid reformation, and has given more substantial proofs of success, than any other penal system as yet adopted in Europe.

Agriculture.

BRITISH AGRICULTURE.

PAST, PRESENT, AND FUTURE.

An elaborate essay was read at the London Farmers' Club on the 5th of February, by Mr Alderman Mechi, on the Past, Present, and Future of British Agriculture, which affords several useful hints and called forth remarks of a practical character on some of the deeper questions affecting English agriculture. In some respects Mr Mechi is well fitted for the task he undertook. With considerable originality—perhaps he is too easily attracted by a novelty—he combines courage to overlook or disregard much of the prejudice and conventional tone of thought by which so many pure-bred farmers and their landlords are weighed down. And he has sufficient knowledge of practical husbandry to test the theories of improvement he propounds. He is, however, somewhat of an enthusiast, and wants that which is the best of all tests—the necessity of making a living by the business of husbandry. It is as an observer then, and a shrewd one on the whole, that we regard Mr Mechi's essays on agriculture as possessing most interest. With that part of his lecture which relates to the past of British agriculture—commencing as it does with the period of the Roman conquest—we shall not trouble the reader. With the present, we shall be content with a reference to two cases cited by Mr Mechi, as offering illustrations of what can be done in the way of agricultural improvement in contrast with the ordinary condition of land in this country. A Norfolk farmer, who had farmed 1,200 acres of poor and light land for 25 years, stated that he had during that period expended 70,000*l* in oil cake and 50,000*l* in artificial manure, and by so doing he had farmed with profit to himself, and that the farm, now become a most fertile one, gives a good rental to the proprietor. And what had the landlord done? "He had," says Mr Mechi, "given hope and security to his tenant by a long and by a renewed lease." And truly this simple act was sufficient, though it is just the act which landowners are commonly so unwilling to perform. But whoever the landlord may be—for his name is not stated—he has proved himself alive to his duties and his interest by the fact that he has erected a farm-house and homestead on another of his farms for the use of the tenant, who is the son of the first mentioned farmer, at the cost of 4,000*l*. If one-half of the land of England was in the hands of such tenants and such landlords, it would be difficult to estimate the increase of agricultural produce in this country.

Another instance mentioned is that of a merchant, who, having realised a fortune in Australia, has bought an estate of 4,000 acres for 140,000*l*. The property had been much neglected, and was low rented, not more than 20s per acre. The soil is a stiff but rich clay, chiefly in grass, wholly undrained, and lying on the banks of the Thames. The new owner is draining all his land, removing some fences, straightening others, erecting buildings, improving roads, and deepening cultivation on the arable lands by means of steam power, at an expense altogether of 50,000*l*. The increase of roots and stock as the result of these improvements is immense, and the rental has been doubled. Surely the investment in improvements has proved a good one for the purchaser. And these works have all been performed in three years.

Then as to the future of English husbandry. Mr Mechi lays great and just stress on the use of steam power as the means of deeply cultivating the soil. For most of the other purposes of agriculture to which steam power is applicable, its importance has been established. As a means of improving land, Mr Mechi looks to "great associated companies," who "will expend enormous sums in the purchase and reconstruction of estates, making them subservient to the great object of an economical use of steam power for almost every farming operation.....When estates and farmeries have been so improved by public companies, farmers will be found willing to pay a doubled or a tripled rental, provided they see that such increased rent only represents a fair interest on the necessary improvements; and such estates, or portions of them, would readily find purchasers. We all know that farmers like to hold under public bodies (such as charities, &c.), because *their tenure is more secure*, and they are more free from personal or political interference or caprice, than when holding under a single individual." This points to a most important means of improvement which by and by will be possible. Confessedly the land as now owned cannot be largely improved by the proprietors, and companies for buying, improving, and reselling estates would certainly prove as profitable to the shareholders as it would be beneficial to the community. At present, the state of the law of real property presents obstacles to the formation of such companies, and they would be regarded with great jealousy by the landed interest. It will be a great point gained to render land easily and cheaply transferable, for there are many capitalists in this country who, like the Australian merchant mentioned by Mr Mechi, would buy and improve landed property if it could be rendered available by being easily and promptly disposed of, should the owner desire to do so. Leases he also regards as indispensable to the future progress of English agriculture. Labour, too, must be secured to the farmer by enabling him to offer decent accommodation to his workmen in the way of dwellings, and to compete with the manufacturers in the wages offered to workmen. This cannot be done under the existing system.

The farmer, too, must have better houses than the greater part of the farm-houses of England. The man who employs a capital of from 5,000*l* to 10,000*l* in the cultivation of the soil, will not consent to be housed less favourably than a merchant or a trader.

Here we have indications of views larger than are entertained by the generality of farmers, but still they are corroborated by the narrower and more immediate details to which farmers usually apply their minds. Mr Bradshaw (Guildford), in commenting on Mr Mechi's lecture, said,—"As to the future, he was not inclined to hold out a gloomy picture to the tillers of the soil; but, on the contrary, a cheerful one. Let them look at the progress which agriculture has made in the last fifteen years, and ask themselves why it should not make a similar progress in the next fifteen." He found far more practical intelligence amongst farmers than existed fifteen years ago; and he looked forward to vast improvement from the employment of steam. Lord Berners thought an alteration of the law of settlement most important to the welfare of the labouring classes. He was also convinced by what he had witnessed during the past autumn, "that on account of the various other changes which had taken place, it was necessary to make a change in the rotation of cropping. He now said, that, instead of its being desirable in all cases to adhere to the four-course system, and grow wheat alternately with other crops, there were certain districts where it would be better not to grow wheat at all, and where oats and barley might advantageously be substituted for wheat." In short, the farmer had best be left to the dictates of his own interest in the matter of cropping. Such was Mr Owen's interpretation of Lord Berners' remark. "He was glad to hear Lord Berners say, in effect, that a departure from the old four-course system was desirable in order that farmers might have wider scope for improvement, and he trusted that other landlords would be found following his example.....One of the most important questions for the farmer in reference to the future was what his farm was best adapted for, whether for stock or for corn, and he hoped that landlords would give their tenants opportunities of farming in the manner which was most beneficial to them." How strongly do these observations of the practical farmer tell of the fact that the English farmer has not yet attained that first great requisite to successful cultivation of his farm,—*i.e.*, freedom of action.

Mr Shackel (Berks) complained that there is a scarcity of labour, and that the county charges—apart from poor rates—of his district were increasing. Over these, he observed, the farmer cannot exercise the slightest control. He looked to steam cultivation to supply the deficiency of labour. "It was no use for farmers to sit still and wish for improvement; they must endeavour to bring every available improvement into practical operation."

Mr Nockolds (Essex) urged the necessity for improving cottages, and "to this he would add, that homesteads must be better adapted to modern requirements, and there must be proper facilities for sheltering machinery—there was great need of improvement in that respect. Even the great model homesteads were no longer applicable to the future of agriculture."

Mr Sanderson said, "That the area of land under good farming at the present day bore a very small proportion to the area under bad farming. There was still a very wide field for agricultural progress. It must be admitted, however, that there were very powerful barriers to improvement. Let the transfer of land be simplified, and long leases granted, so that farmers might be unfettered, and British agriculture would receive an impetus hitherto unknown. The system of yearly tenancy was detrimental to the landowner, stifled the energy of the tenant, and locked up the resources of the soil; and the future of British agriculture depended very much indeed on the substitution of leases." This is entirely true. Yet the Chairman, Mr Skelton,—presiding over a farmers' club,—intimated that leases would not be necessary, because the late Mr Pusey had considered the husbandry of Lincolnshire without leases, superior to that of the lease-protected farmers of East Lothian. So tenaciously do the cobwebs of usage and prejudice cling to the agricultural mind, and impede in no slight degree the natural progress of agriculture.

Literature.

CALENDAR OF STATE PAPERS, FOREIGN SERIES, OF THE REIGN OF EDWARD VI., 1547—1553, preserved in the State Paper Department of Her Majesty's Public Record Office. Edited by WILLIAM B. TURNBULL, Esq., of Lincoln's inn, Barrister-at-Law, Correspondant du Comité Impérial des travaux Historiques et des Sociétés Savants de France, &c., &c. Longmans. 1861.

THE circumstances, to which we had occasion lately to refer, attending the resignation by Mr Turnbull of his office in the Record Department under the superintendence of the Master of the Rolls, give to the volume before us more than usual interest. Here we possess—notwithstanding the efforts of the pious societies who have combined to assail Mr Turnbull—an index by that gentleman of the diplomatic correspondence of the English Government during the reign of the Protestant Prince, Edward VI. Here are the materials, then, and now is the time, for those advocates of religious equality in the eyes of the law, who have been among the foremost in their imputations on the honour of a Roman Catholic gentleman, to illustrate their argument by examples of his falsification of the records intrusted to his inspection. Is there no champion of Protestantism zealous enough to encounter a little trouble and give up a little time to hunt out documents which this philo-Jesuit has of course suppressed, and detect those false representations which he has given of the contents of others? Until such an investigation has been made, and attended with substantial results, we shall continue to believe that we have in the volume before us one of the most faithfully and conscientiously, as we undoubtedly have one of the most ably, edited of the volumes which Sir John Romilly has been the means of supplying as aids to the historical student. Nothing is more striking than the contrast afforded by the system of indexing pursued by Mr Turnbull, and that which was thought satisfactory formerly. It is just the difference between the work of an editor who approaches a document in crass ignorance of all its illustrative surroundings, and of one who finds in it an opportunity of displaying his own intelligent acquaintance with the subject-matter with which it is concerned. This conversance with his subject-matter is as unobtrusively displayed as it is effectually felt in every sentence of the summaries of despatches. Correctness of nomenclature and some regard to the inferior knowledge of others on such points—the interpretation of obscure or imperfect allusions—and an intelligent and orderly chronological arrangement, are among its most valuable results. The absence of the indefinite article before the names of persons casually mentioned, and a few words of introduction to their personality in a foot-note, bear frequent testimony to the competence of the editor for his work; while the absence of superfluous verbiage from these foot-notes proves that he is not desirous of exhibiting more learning than is properly called for by the occasion, and has in these matters the least common of all virtues among antiquarians—that of self-restraint in the copiousness of their outpourings.

Mr Turnbull has, however, redeemed his summaries of the contents of documents from the dulness of a dry catalogue of subject-matter, by introducing very skilfully, and without apparent intrusion, some of the more characteristic phrases and even passages of the document itself, thus making his book readable to the general public as well as useful to the special student.

In an introduction to the volume he also supplies us with a clear and condensed account of the general character of the contents of the documents which are afterwards noticed in detail. Here, if anywhere, we should expect his theological bias to betray itself; but we doubt if the most sharp-sighted critic would have been able to detect from this introduction alone on which side of the great religious controversy the editor had ranged himself. The only and pardonable touch of partiality which we have been able to discover is a national and not a religious one. One thing, he writes, the English ambassador soon discovered, and then follows in small capitals "The Scottish spirit was not broken by defeat."

During the reign of Edward VI. the position of England was, from the more advanced Protestantism of the Government, an isolated one among European countries. The active and leading part which Henry VIII. had taken in the affairs of the Continent was necessarily exchanged for a reserved and watchful neutrality. But this very circumstance, and the precarious character of foreign relations, rendered it all the more incumbent on English statesmen to keep a sleepless eye on the politics and peculiarities of foreign courts. "We should form," writes Mr Turnbull, "a very imperfect and, therefore a very erroneous conception of our history during the reign of Edward the Sixth, did we suppose that because the policy of the Government was domestic, the governing body was indifferent to what was passing abroad. We must have the knowledge of a fact, before we can decide that the fact is unimportant. The ruling body in England did not advisedly and deliberately cast aside foreign politics; this was brought about gradually, and was the result of accidental circumstances rather than the logical development of a preconceived theory. But be that as it may, thus much is certain, that throughout the whole of this reign there is no lack of foreign correspondence; correspondence, too, of the most precious quality. It embodies information which bears the evidence of having been obtained at much cost and sifted with much jealousy, which was moulded into its present form with much skill, and transmitted homewards with much secrecy. The accredited ambassador and the unaccredited spy plied his task with unabated address, according to his several opportunity. The result of all this lavish outlay and keen observation lies before us in the following pages. We are admitted for the first time since these despatches were written, into the secret history of nearly every court of Europe. We are told of events as they occurred from day to day by men who either were witnesses of what they report, or obtained it from trustworthy sources. And marvellously full of interest is the picture which is here presented to our view." "It will be found," he continues, "that the interest which the collection possesses groups itself more especially round two figures, which stand prominently forward, Henry the Second, King of France, and Charles the Fifth, Emperor of Germany. Upon both the one and the other England looked with suspicion not unmingled with fear. She was aware that neither of these individuals loved, and that each might injure her. Each had his own special ground of dissatisfaction. With Henry there was the old quarrel of nationalities; France against England. With Charles there was the new quarrel of creeds; Catholicity against Protestantism. Was it possible for England to stand against this hostility? Should she fight, or temporise, or yield? Should she return to Rome, or make common cause with the Protestants of Germany against Rome? These are questions which the nation must now solve, and for the solution of which Europe waited in anxious expectation. And the value of the following series of letters lies in this, that they enable us to give a consistent and precise answer to these questions."

The death of Francis of France following so closely on that of his friend and ally Henry VIII., threw the affairs of France into quite different hands, and these were decidedly hostile to England. The new King himself was avowedly of that disposition. His all-potent mistress, Diana of Poictiers, added to the ill feeling, and the rising power of the House of Guise enlisted itself strongly against the heretic kingdom. The national feeling in France was appealed to, and it carried away before it all minor differences of party and religious creed. Boulogne was besieged by the French, and after a feeble attempt to arrest the arms of France by negotiation, the Earl of Warwick entered into a treaty with the French for its sale. In Germany the power of Charles V. was on the wane, and a confused and somewhat anarchic state of things seemed growing up, out of which the twin Empires of Spain and the Hapsburgs were to be gradually evolved. The notices of the state of Italy in many of the letters in this series will be read with especial interest at the present crisis of Italian affairs. As may be supposed, the Protestant ambassadors are not very particular as to the language employed in their scornful accounts of the religious proceedings in Catholic countries, but we think the following account of the preliminaries to an Ecclesiastical Council is without parallel in such documents. "As touching the General Council," writes Sir Richard Morysine to Cecil, from Augsburg (May 12, 1551), "it is begun thus: A few Italian Bishops were there, and invited the Holy Ghost to a mass, which done, he had leave to go whither he would. Wise men say the Holy Ghost knew they meant either no Council, or one to oppugn the truth and establish wickedness and error, and therefore he came no more to mass than he meaneth to be at their Council. It had been much to have brought him to mass, that never was at none since he was the Holy Ghost, more to have made him wait upon Bishops that send him away ere he be come to them." Sir Richard was indeed a humorist, and many are the quaint sayings interspersed through the graver details of his despatches. In another despatch he speculates on the results of the double-dealing of "the Bishop that trotteth up and down from French to Imperials, from Imperials to French, who hath gain for his God, and loss for his greatest evil,"—and observes that "the Turk's navy seems to him to have the Jews' Messias for their lodesman, so is still a-coming and never cometh." His humour is sometimes of a curiously dry kind. Thus he "sends an Italian letter, which tells wonders of great companies of wolves about Pistoja and Florence; a like company of wolves was seen in Italy in 1525, when the French King was taken at Pavia. Has often heard that Francisco Sforza, Duke of Milan, offered a reward of four crowns for every wolf brought to him: he found the cost so heavy, that he gradually reduced the price to a testoon, and then they brought him no more wolves, and he gave them no more money." It was very hard that such a man should be reported to and by the Emperor as "an apostle, a preacher, a doctor, and I know not what," merely because he read Bernard Ochine's "Prediches" and sometimes "Machiavel" to his household. But the correspondence is full of similar amusing touches of character—which read as well now as when their humour was fresh in the sixteenth century. Money, or rather the want of it, is a fertile cause for the exercise of plaintive, sarcastic, and grumbling wit. Thus the Ambassador Sir John Masone writes, "The treasurer maketh none other answer, but that he hath no money. I would to God I could be excused with the like answer to my steward here!"

The ambassadors are as shrewd as they are witty in their remarks. Thus Sir Richard reports, "'Here is within these two

days much noise of seven millions of gold come, if God will, from Peru into Spain. Two millions are for the Emperor's part, the other five millions are to be parted among a great sort of venturers, such as could, what chance soever had happened, have lost no more than others do gain that bide no adventure at all. This massy treasure hath been too long a-coming, to come now so quickly. Princes are not wont to trust the seas so long with so much gold; much less merchants are to be entreated to leave such sums these many months out of their hands, not only without any usury, but with a continual hazard of the principal.' If the gold were come, men think the Prince would make more haste homeward."

With one specimen of the *historical* contributions of value which the volume contains, we heartily recommend its further acquaintance to our readers. The Emperor is remonstrating with Dr Wotton against the treatment which the Princess Mary receives on account of her adherence to Roman Catholic opinions.

The Emperor continued, "Ought not it suffice you that ye spill your own souls, but that ye have a mind to force others to lose theirs too? My cousin, the Princess, is evil handled among you; her servants plucked from her, and she still cried upon to leave mass, to forsake her religion, in which her mother, her grandmother, and all our family have lived and died." Said to his Majesty that when he left England she was honourably entertained in her own house, with such about her as she herself best liked, and thought she must be so still, since not hearing to the contrary he was driven to think there is no change. "Yes, by St Mary saith he, of late they handle her evil, and therefore say you hardly to them, I will not suffer her to be evil handled by them. I will not suffer it. Is it not enough that mine aunt, her mother, was evil entreated by the King that dead is, but my cousin must be worse ordered by councillors now? I had rather she died a thousand deaths, than that she should forsake her faith and mine. The King's Majesty is too young to skill of such matters." Professing that it became him not to dispute with his Majesty, yet was forced somewhat to answer him, said he knew the King's Majesty was young in years, but yet, the Lord be praised for his gifts poured upon him, as able to give an account of his faith as is any Prince in Christendom being of thrice his years; and as for the Lady Mary, though she had a king to her father, hath a king to her brother, and is akin to the Emperor; yet in England there is but one king, and the king has but one law to rule all his subjects by. The Lady Mary being no king, must content herself to be a subject. "A gentle law, I tell you, said he, that is made, the King's Majesty being no" .....(*illegible*). Wotton appears then to have sought permission for Chamberlain to have the English service in his own house, without access of strangers. "English service in Flanders! quoth he; speak not of it. I will suffer none to use any doctrine or service in Flanders that is not allowed of the Church."....Said, that "if his cousin the Lady Mary might not have her masses, he would provide for her a remedy, and in case his Ambassador were restrained from serving of God, he had already given him order if the restraint come to-day that he should tomorrow depart."

The English Council are as haughty and as intolerant in their reply as the Emperor himself. They write to Dr Wotton and Sir Richard Morysine that they

Think it very strange that the Emperor, notwithstanding the repeated contradictions and testimony to the contrary by the Lord Treasurer and Lord Paget, should persist in maintaining the permanency of the grant to the Lady Mary for the use of her religion. Such grant his Majesty had allowed for a time only, upon the hope that by this forbearing his sister might be reduced to that order of her own good disposition which was universally received of the whole realm. But now of late his Majesty sees, that this long sufferance of her and her family to do manifestly against the laws and common order of the realm, not only not works in her that obedient conformity that his Majesty wished and looked for, but also has of long time been, and yet is, a great occasion of much strife and contention, and a very ill example of disobedience to the rest of the realm. Therefore his Majesty will no longer suffer such, and has sent for the officers of the Lady Mary's house to give them in commandment to see the laws from henceforth sufficiently executed in her house accordingly. And if any chaplain of hers, or any other whatsoever, shall presume after this warning to use the mass, or any other ceremony or service contrary to the laws, they must look to feel the punishment of the laws according to justice. His Majesty also considers the Emperor's demand for his Ambassador in England to use the mass, and his denial to suffer his Majesty's Ambassador within his dominions to use the communion, too much unequal and unreasonable; and therefore doubts not the Emperor will otherwise consider the matter.

THE NORTH BRITISH REVIEW. No. LXVII. February. T. and T. Clark.

NEITHER in choice of subjects, nor in treatment of them, is this number of the "North British Review" as good as last quarter's. Solid and instructive, but heavy and by no means brilliant disquisition is the staple of its contents; anything like originality of thought or felicity of style we in vain look for in its pages. "Modern Necromancy" is a timely topic, but it is here somewhat feebly and superficially handled, the article dealing nearly exclusively with a couple of American books, one of which is Mr Dale Owen's, and reducing the phenomena there recorded and all others of the same class to one of two heads, "coincidence" and "mental hallucination." For an instance of the unsatisfactoriness of the former explanation, we refer to the "Murder near Wadebridge" (page 134). The best written paper in the number is one on "Shelley and his Recent Biographers." The extracts from Shelley's early novels are amusing, but the article, as the writer seems towards the end to admit, is written with a bias *in malam partem*. Much more might have been made of such a subject as the English and Foreign Political Press than has here been done. The writer is certainly wrong in pointing to the *Journal des Débats* as the only example of the highest class of newspaper in France. The Paris *Presse*, in independence of tone, in political sagacity, and in literary ability, is at least the equal of the *Débats* in its best days. The paper just named (together with the *Revue des Deux Mondes*), the *Times*, and the *Allgemeine Zeitung* are selected as the representatives of French, English, and German journalism respectively. Among many merits justly attributed to the great English newspaper is one we should hardly have expected to find—"its disbelief in the materiality of the age." A pro-sabbatical review of Dr Hessey's Bampton lecture on Sunday; a favourable estimate of the foreign policy of the present Government; and a short, and slight, and somewhat affected notice of some minor poets, American and English,—are the more readable articles in the number. We are sorry to see so small an amount of the "North British" element in the first specimens of the new series of this generally able quarterly; we believe the proprietors would consult their own interest by seeking to develop rather than to obliterate the distinctive peculiarities of this review.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

M. Casimir Perier, son of the famous minister of King Louis Philippe, has just published a pamphlet on "The Finances of the Empire," which is exciting some attention. After showing that the sum required to pay the interest on the National Debt now exceeds 315,000,000f, and is consequently very nearly double what it was in the latter part of King Louis Philippe's reign, and after giving details respecting the floating debt, he proceeds to express the opinion that the budget of the present year which was presented to the Legislative Body in equilibrium, and on the figures of which "much might be said," will, in reality, result in a deficit and will necessitate a loan:—

"The unforeseen," he says, "plays a greater part than ever in our affairs, but leaving aside the unforeseen, it is too evident that a deficit is even now inevitable, as a consequence of the modification of the Customs tariffs, of the war in China, and the expedition in Syria; and it can only be temporarily provided for by the augmentation of the floating debt, and afterwards by loans or new taxes."

The Government in its recent report on the "situation" of the Empire and on some previous occasions, laid stress on the fact that the amount of the floating debt has latterly not been so large as it was. On this subject, M. Perier remarks:—

"The fact that the issue of Treasury bills has been notably reduced has been dwelt on. But is not the reduction owing to the circumstance that a *demand has been made elsewhere*, for example on the deposits of the Credit Foncier, for the resources ordinarily obtained by means of Treasury bills? In that case the sole result obtained will have been to replace a debt payable at the end of a term, for one on account current, that is exigible at short notice."

What follows is worthy the attention of those persons who study the financial situation of the country:—

"From 1852 to 1855 the budgets were closed with large deficits. The equilibrium or the surpluses of those of following years were more apparent than real; the equilibrium or the surplus having only been attained by resources essentially extraordinary.

"It becomes every day more difficult to understand how any one could think of regarding the budget of 1861 as a budget in equilibrium. This budget takes from the sinking fund 137,000,000f, demands 25,000,000f from the new tax on alcohols, retains 40,000,000f of the *double décime*, &c.; and without these extraordinary resources, by means of which receipts and expenses are balanced, at least temporarily the deficit would be 200,000,000f.....

"And since the presentation of the budget of 1861 took place, miscalculations in the estimates of the effects to be produced by the modifications in the tariffs have rendered necessary an augmentation in taxes of nearly 30,000,000f in the article of tobacco. The war in China, the expenses of which will probably not be integrally paid by the Chinese; the expedition to Syria; the increase in the effective strength of the army of occupation in Italy; the

increase in military preparations; and the charges arising from the annexation of Nice and Savoy,—these things coming to augment the deficit, *it will be impossible to abstain from having recourse very soon to new taxes or a new loan, perhaps to both simultaneously.* And if a loan be raised, it will coincide with the issue of bonds for the execution of railway works, or perhaps cause the adjournment of it."

M. Perier next shows the great increase which has taken place in the *ordinary* budgets under the Empire. In 1852, the *ordinary* budget was 1,456,000,000f, and the budget of 1861 is estimated at 1,808,000,000f. This is an increase of 352,000,000f in eight years, "and yet," he says, "the 1,808,000,000f set down will certainly be greatly below the definitive figure. Under Louis Philippe, from 1831 to 1847, a period of seventeen years, the budget only increased 233,000,000f. Moreover, in the seven years from 1852 to 1859 only 508,000,000f were disbursed in extraordinary public works, whereas in the last seven years of Louis Philippe 958,000,000f were spent in such works.

Further on, M. Perier notes that, *in addition* to the loans of 1854, 1855, and 1859, raised for war, 100,000,000f have been borrowed from the Bank; 135,000,000f belonging to the Caisse de la Dotation de l'Armée have been consolidated in rentes: about 80,000,000f belonging to the same Caisse have been taken; more than 200,000,000f have been paid by the Railway Companies; and, besides, the Government has accepted most onerous obligations,—the payment of a subvention of 250,000,000f for railway works, 50,000,000f for the improvements of Paris, 40,000,000f to be lent to manufacturers for the purchase of new machinery, large sums for buying up canals, the guarantee of interest to certain extensions and embranchments of railways, &c., &c. On the whole, he regards the situation of the finances as one of exceeding gravity; and he shows at some length that from the peculiar constitution which the Empire has imposed on France, and from the manner in which it is worked, the Legislative Body, which is supposed to represent the people, possesses no control whatever over the public expenditure.

It is noticed with pleasure by that large portion of the community interested in railways that, notwithstanding the uneasiness occasioned by the political situation, the gross receipts of nearly all the lines present a marked increase over those of last year. Thus, in the first four weeks of this year compared with the same period of last, the Lyons line increased 1,222,798f, the Orleans 618,467f, the Southern 556,380f, the Eastern 204,786f, and the Western 60,133f. The Northern, on the contrary, presents a diminution of 184,761f.

Some uneasiness prevails here among all houses, and they are numerous, engaged in the Levant trade with regard to the state of things at Constantinople; but they have, I hear, come to a general understanding to assist each other in the case of pressure. A few days back, the important firm of Gomidos, Panos, and Co. was inconvenienced by the non-arrival (from I believe pure accident) of a large sum in specie which had been despatched from Constantinople; but it received every aid from its *confrères* and even from the Bank of France. Some interest has been created by the fact that M. Mirès will shortly have to provide for drafts to a great amount—according to some authorities not less than 7,000,000f—from Constantinople; but it is stated that he will be able to do so in consequence of an arrangement he has made with the Credit Industriel Bank.

The Spanish Mercantile and Industrial Society announces that it will reimburse 125f per share to its shareholders, thereby reducing the sum paid up to 250f. It does this, it says, on account of the prosperous state of its affairs; but the proceeding is unusual.

The Director-General of the Board of Customs, in a circular to the officials of his department, states that in compliance with the demand of the English Government, the natural and manufactured productions of Jersey and Guernsey are to be admitted into France on the same terms as the British articles specified in the commercial treaty, "but subject to the condition that the Legislature of the islands shall take the engagement not to increase the customs or octroi duties now imposed on French productions." He adds that articles from Jersey and Guernsey must, like those from Great Britain, be accompanied with certificates of origin.

It may be remembered that some months since a company was formed at Lyons under the name of "Compagnie du Magasin General des Soies," the object of which was to introduce the warrant system into the silk trade. A few days back a meeting of the shareholders was held, and a report on the operations of the Company was presented by M. Arles Dufour, one of the directors. This document admitted that the Company had not been successful during the last six months, owing to the bad crops of silk, the abundance of money and the facility of obtaining credit, and to the prejudice which exists against borrowing money on warrants; but it said that the losses sustained were only 6,483f, interest on paid-up capital not being included, and it insisted that there was no reason for disquietude as regards the future.

The railway bridge over the Rhine is now nearly completed. It will place the Eastern Railway of France in uninterrupted communication with the German lines.

An Imperial decree sanctions various modifications in the bye-laws of the Parisian Gas Company.

The Chamber of Commerce of Havre objects to having the commercial *régime* of the colonies modified for the present, from the fear, it says, of disturbing vested interests; but the colonies themselves call for a change.

The Bourse in the latter part of last week was firm, but this week it has been less so, and to-day there has been a decline of 30c on yesterday's quotations, which is rather large. This decline has been chiefly caused by the news from London. The following are the quotations:—

The following is an account of the markets:—

FLOUR at *Paris*, yesterday, was 66f to 69f the sack of 159 kilogs—a rise of 1f on last week's quotations for the higher qualities. Four marks also rose, the present month being at 67f 25c to 67f 50c; the month of February, 67f 25c; March and April, 67f 50c.

WHEAT.—At *Paris*, yesterday, business was active and prices rose, the quotation being from 36f to 38f 50c the sack of 120 kilogs. Of the provincial markets, as many as 108 present a rise of 9c to 1f 25c the hectolitre, 18 a fall of 19c to 67c, 22 are reported as firm, and 20 without variation.

COTTON.—At *Havre*, in the week ending Friday, the sales were 11,017 bales, and the arrivals 29,432. On fixing the closing prices on that day, the brokers placed "very low" sorts 1f lower, but left all other qualities unchanged. This week, scarcely any business has been done and prices are nominal: yesterday not more than 9 bales were sold, which is an extraordinary circumstance.

SUGAR.—Owing to a decline in prices at *Havre*, in the week ending Friday, a certain degree of animation prevailed: 21 casks French West India disposable went at 48f the 50 kilogs duty paid; 103 ditto for delivery, 47f 75c; 2,200 bales Reunion "gros grain," 51f; 6,000 sacks Havana, 34f to 34f 50c; 26 casks ditto white, 37f 50c; and a quantity of San Domingo, 46f. The arrivals were 1,494 bags of San Domingo, and 1,064 sacks of other sorts. This week, Havana has been at 34f; only a small quantity sold. Other sorts not quoted. At *Nantes*, last week, no sales were made. This week, a lot of Reunion "gros grain" has been taken at 57f 50c. At *Bordeaux*, last week, nearly 1,000 bales went at 47f 50c to 53f 20c; upwards of 8,000 Mauritius at 51f 50c to 52f 50c; a small lot of French West India at 47f, and one of Santiago at 34f. Nothing done this week. At *Marseilles*, last week, nothing important was done.

COFFEE.—Business at *Havre*, in the week ending Friday, was active, and prices were firm. About 1,000 sacks Hayti Port-au-Prince, disposable, went at 78f to 79f the 50 kilogs in bond (the latter quotation for fine quality); 3,100 sacks, for delivery, 77f 50c; 500 sacks Cape, for delivery, 80f; 980 sacks Rio, not washed, disposable, 70f; 1,300 sacks ditto, for delivery, 69f to 71f; and 260 sacks Rio, washed, disposable, 78f. Nearly 2,000 sacks of different sorts of damaged were also sold by auction. The arrivals exceeded 4,700 sacks. This week, there have been numerous sales. Hayti, 77f 50c to 80f; ditto Cape, 81f; ditto Gonaives, 82f; Rio, for delivery, 71f to 75f. At *Nantes*, last week, no business was done. This week, a lot of Reunion "feve pointue" has been sold at 126f. At *Bordeaux*, last week, a small lot of Ceylon plantation went at 117f to 121f 50c; 209 sacks Rio, washed, 86f 50c to 89f; 200 ditto, not washed, 73f 50c to 74f. This week, some Rio, washed, has been sold at 87f; ditto, not washed, 74f. At *Marseilles*, last week, some lots of Mocha went at 110f to 111f; and some San Domingo at 80f.

INDIGO.—At *Havre*, in the week ending Friday, 47 cases Bengal and 8 of Guatemala were sold: prices firm. There were no arrivals. This week, 11 cases Bengal have been sold at 10f, which is 70c premium. At *Bordeaux*, last week, 17 cases Java, 3 Kurpah, and 17 Bengal were sold: prices not stated. Nothing done this week.

WOOL.—At *Havre*, in the week ending Friday, 11 bales Monte Video, unwashed, went at 1f 90c the kilog; 33 bales Buenos Ayres, at prices kept secret; 354 bales Chili, unwashed, 1f 52½c; 42 bales sheepskin La Plata, unwashed, 1f 25c to 1f 45c, and 13 ditto, 1f 7½c. The arrivals were 82 bales from England. This week, Buenos Ayres *pelades* has been at 1f 85c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg., first quality, were 103f the hectolitre; Montpellier of 89 deg., 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c; and beetroot, first quality, 105f.

BRUSSELS, Feb. 12.

The negotiations with France for the conclusion of a commercial treaty are going on very satisfactorily. Some little difficulty has however, it appears, arisen about the excise duty on wine, which the French Government wishes to see reduced, but which the Belgian Government is unwilling to touch, because it in some degree replaces the octroi duties lately abolished; but no doubt is entertained that an arrangement will soon be come to.

The past week has been one of extreme inactivity in the cotton market. The trade continue to work down their recently heavy stock; and other buyers are, for the moment, acting in concert with them, in narrowing their operations. A few holders have met the limited demand at irregular rates, varying from ⅛d to ¾d per lb below those of last week. We have reduced our quotations accordingly. Egyptian are freely offered, and may be bought on easier terms. Brazil also have been sold at a slight decline. East India are heavy, and selling at a reduction of ⅛d to ¼d per lb. The sales to-day are limited, say 3,000 bales; the market feeling the effect of the rise to 8 per cent. in the Bank rate. The reported export amounts to 8,720 bales, consisting of 5,400 American, 70 Brazil, and 3,250 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand this week from the manufacturing districts are very unfavourable. Both for home use and export very little business has been transacted in goods, and prices have had a drooping tendency. The iron trade still continues heavy, but there has been an improved inquiry for coals.

MANCHESTER, Feb. 14.—The market has continued dull and depressed, without distinctive feature, but awaiting the resolution of the masters and operatives of the Blackburn district with respect to a reduction of wages or stoppage of looms. To-day the results of proceedings in that neighbourhood have been announced, and seem to involve the immediate stoppage of 50,000 looms in Blackburn and Accrington, with the probable stoppage of 20,000 or 30,000 in adjoining localities. Such an immense reduction taking place at once in the weaving of cloths would have had a great effect in our market but for the counteracting influence of the Bank rate, combined with the continuously dispiriting news from the East. As it is, we close with lower prices for yarns (how much lower it is impossible to say for want of transactions), and a dull feeling in cloths, but without any very great change in value. 8 lb 4 oz shirtings, however, are again lower.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—There has been a rather improved demand for wool, and more sales have been made. But while we report this much of improvement, the business done is exceedingly limited. Skin wools are now long enough offering at prices which will have an influence upon other wool. The demand for yarns both for export and home consumption is still without change. The spinners are acting with equal caution. Their stocks are very low, and they produce into stock as little as possible.

ROCHDALE.—The local wool trade has been flat, though numerous small parcels have been taken during the past week for pressing requirements. Skin wools are cheaper than they were a month back, but brokes are firmly upheld.

HUDDERSFIELD.—The weather having set in again cold has helped a few sales in winter goods. There is also a little doing in spring and summer patterns, but the amount of business altogether is much below what is usually done at this season. The business doing in wools is at present very trifling, but the stocks on hand are low, which assists dealers in maintaining nearly the usual prices.

LEICESTER.—The hosiery trade remains rather quiet, and there is barely an average amount of business doing. Goods are made with caution, and for the most part limited to the demand. In the adjacent hosiery districts machinery is by no means fully employed. Stocks are kept as low as possible. The wool market is rather unsteady, and there is not much demand for material. No important change in yarns.

NOTTINGHAM.—There is very little more demand for any description of lace this week. The few buyers (both home and continental) who are in the market are purchasing in limited quantities. There continues to be rather more doing in the hosiery trade, the hands are being better employed, and manufacturers are more sanguine as to the future.

BELFAST.—Brown markets—The transactions of the present week have been rather more extensive in amount, without any change in prices for the class of goods which still hold a place in the more active demand. In the higher branches of the damask trade there has not been any general depression. The lessened inquiry for yarns from manufacturers, and the small business doing in the export trade, continue to give extreme flatness to the sale of warps and wefts. The export trade has not improved.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, made with Lord Ward's thick coal warm air, 4*l*; old Windmill End Mine forge pig iron, made with Lord Ward's thick coal, 3*l* 12*s* 6d; best native hydrate pigs, 3*l* 10*s* to 4*l*; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 10*s*; good mine pigs, with a modicum of flue cinder, 2*l* 10*s* to 2*l* 15*s*; mine pigs, deteriorated by cinder, 2*l* 7*s* 6d to 2*l* 12*s* 6d; Cleator Moor hæmatites, 3*l* 7*s* 6d to 3*l* 10*s*; Barrow hæmatites, 3*l* 7*s* 6d to 3*l* 10*s*; Workington hæmatites, 3*l* 7*s* 6d to 3*l* 8*s* 9d; Kirkless Hall hæmatites, 3*l* 5*s* to 3*l* 7*s* 6d; grey forge cinder pig iron, 2*l* 5*s* to 2*l* 10*s*; white forge cinder pigs, 2*l* 2*s* to 2*l* 7*s* 6d, ordinary melters, Nos. 1, 2, and 3, 2*l* 12*s* 6d to 2*l* 17*s* 6d; superior makes of mine melting iron, 3*l* 2*s* 6d to 3*l* 15*s*, according to make and quality.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 13th day of February, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,226,005	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	9,902,643
		Silver Bullion	848,362
	25,226,005		25,226,005

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	8,444,776
Rest	3,499,168	Other Securities	20,728,396
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	4,700,293	Notes	5,535,845
Other Deposits	12,161,148	Gold and Silver Coin	820,327
Seven Day and other Bills	615,735		
	35,529,344		35,529,344

Dated the 14th February, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,305,895	Securities	29,095,172
Public Deposits	4,700,293	Coin and Bullion	11,571,332
Private Deposits	12,161,148		
	37,167,336		40,666,504

The balance of Assets above Liabilities being 3,499,168*l*, as stated in the above account, under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£228,721
An INCREASE of Public Deposits of	518,814
An INCREASE of Other Deposits of	234,018
No change in the amount of Government Securities.	
An INCREASE of Other Securities of	794,988
A DECREASE of Bullion of	261,504
An INCREASE of Rest of	13,373
A DECREASE of Reserve of	72,429

The present Bank return is not so unfavourable as we might perhaps have expected from the step which the Bank has taken. There is an increase in the Other Securities of 794,988*l*, which is no doubt an unfavourable feature, but the anxiety to subscribe to the Indian loan may partly explain it. The Bank reserve shows a decrease of only 72,429*l*, and the bullion of 261,504*l*. And no doubt the renewal of a drain to the East in the face of so high a rate of discount as 7 per cent. has been the main ground on which the Bank has taken this measure of precaution.

Subjoined is our usual weekly table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,039,615	£ 26,586,378	£ 21,289,293	£ 21,724,100	£ 20,305,895
Public deposits	7,164,484	4,556,976	7,620,255	6,836,256	4,700,293
Other deposits	9,423,679	15,783,228	14,538,898	14,289,756	12,161,148
Government securities	14,145,696	9,857,599	10,696,147	10,171,190	8,444,776
Other securities	11,888,361	17,634,873	16,442,466	21,084,139	20,728,396
Reserve of notes & coin	9,563,176	12,102,266	13,732,809	8,589,142	6,356,172
Coin and bullion	14,473,501	17,331,131	19,747,154	15,105,287	11,571,332
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	8 p. c.
Price of Consols	96½	97¼	95⅝	95⅝	92¼
Average price of wheat	37s 8d	45s 8d	40s 11d	43s 6d	54s 0d
Exchange on Paris (shrt)	25 0 5	25 7¼ 10	25 7½ 15½	25 10 15	25 30 40
— Amsterdam ditto	11 15¼ 16	11 14	11 15 16	11 13 14	11 17 18
— Hamburg (3months)	13 6¼ 6¾	13 5 5½	13 6 6½	13 5¼ 5½	13 8¼ 8¾

In 1851, money was in great demand in consequence of loans for Continental Powers being anticipated. The rate however, was not more than 2¾ to 3 per cent.

In 1858, the French Government was still apparently under the influence of the panic with which it was seized upon the occasion of Orsini's attempt upon the Emperor's life. The sternest measures of repression were enforced, except as regards the tone of the French press and army towards England. The position of the Bank of England was becoming daily stronger. The rate of discount had been reduced to 3 per cent.

In 1859, it had been announced that the requirements of the Indian Government would be satisfied with a loan of 7,000,000 sterling. The rate of discount for the best bills was only 2 to 2¼ per cent. France, Sardinia, and Austria were busily arming.

In 1860, considerable agitation and discussion were going on relative to the penny taxes and bonding charges Mr Gladstone was about to inflict on trade. The Stock Exchange had formed a Committee for obtaining the repeal of Sir John Barnard's Act. The money market was becoming easier, the best bills being discounted at 3¾ to 4 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,464,682*l*; in 1858, a deficiency of 1,851,635*l*; in 1859, a deficiency of 1,903,568*l*; and in 1860, a deficiency of 6,794,383*l*. In 1861, the deficiency is 8,567,248*l*.

DISCOUNT AND MONEY MARKET.—We never remember any action on the part of the Bank of England which caused the moneyed and commercial world more surprise than the raising the rate of discount from 7 to 8 per cent. On the surface there appeared but little reason for this movement. The exchange from New York has risen to a rate which renders the transmission from this country unprofitable. The rate of money in the various capitals of Europe is considerably lower than in England. The following are the rates in—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	7	4½ 5
Amsterdam	3	3
Berlin	3	2¾
Hamburg	...	2
Frankfort	...	1½
New York	6	...

On Wednesday the discount houses and bankers were better supplied with money than for some time past. The Bank of France were, it is confidently affirmed, on the point of lowering their rate to 6 per cent., and the following return would seem to justify that expectation:—

RETURN OF THE BANK OF FRANCE.

	£
INCREASE.	
Cash in hand	1,710,000
DECREASE.	
Bills discounted, not yet due	5,444,000
Advances	690,000
Treasury balance	720,000
Bank notes	1,720,000
Current account	368,000

The Bank of Belgium have lowered their rate from 5 per cent. to 4. Everything, therefore, on the surface appeared rather in favour of lowering the rate of discount than raising it, the more especially as gold for the last two days has gone into the Bank to the extent of 150,000*l*.

It is true that an active demand for discount has existed at the Bank of England, and the distrust and uncertainty which has prevailed lately relative to houses connected with the Levant trade has caused a greater amount of bills to be taken to the Bank of England for discount, and preparing for the instalment on the Indian loan amounting to 555,000*l*, besides what may have been paid up in full, may, and no doubt has, added to the demand for money. But, as this money has to be paid into the Bank of England, it could not have had anything to do with the raising of the Bank rate. Another cause may also have been in operation to have caused a pressure, and that is the collection of money to pay the railway dividends, which amounts to nearly six millions; but still, until they are paid, they would probably remain as bankers' balances in the Bank of England. The feeling in the City was decidedly unfavourable to this step; and at a meeting to-day of the banks and discount houses, they came to a unanimous resolution not to raise the rate they allow either on deposits or money at call.

Of course the proceeding of the Bank has raised the rate of discount in Lombard street from 7 to 8 per cent., and from the feeling of uneasiness which it has created, the demand for discount at the Bank of England to-day has been very great.

The rate of money on the Stock Exchange to-day has been from 7 to 7½ per cent. No doubt the payment on the Indian loan has increased the demand.

ENGLISH FUNDS.—The English funds were buoyant up to Wednesday, the price being 92⅜ ½ for the account, when large sales took place, and it was rumoured the Bank Directors would raise the rate of discount at their meeting on Thursday—which being confirmed, the price fell to 91½ ⅝ for money, and 91⅞ 2 for the account. To-day the market is firmer, the last price being 91¾ for money, and 92⅛ for

the account. Exchequer Bills are 5 dis., having been par, which, considering they pay only $2\frac{3}{8}$ interest, gives rise to the idea that the Chancellor of the Exchequer will raise the rate of interest to a price that will float them above par.

FOREIGN FUNDS.—With the exception of a rise in Mexican Bonds, and a heaviness in Turkish Bonds, notwithstanding the announcement of the dividend being paid in due course in March, very little alteration has taken place in foreign funds. The last price of French funds this afternoon is 68.

Subjoined is our usual list of the highest and lowest prices of Consols every day, and the closing prices of the principal English and foreign stocks last Friday and this day :—

	Consols Money		Account.		Exchequer Bills.

RAILWAYS.—The settlement of the railway account went off in a satisfactory manner; but prices have been heavy in consequence of the rise in the Bank rate of discount, and the apprehended falling off in trade in the manufacturing districts.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day :—

	Railways. Closing prices last Friday.	Closing prices this day.
Bristol and Exeter	98 100	99 101
Caledonian	96⅛ 7⅛	97⅛ 8⅛

BULLION.—We subjoin Messrs Pixley, Abell, and Langley's circular, which gives an account of the bullion transactions of the week, and also those in India Government loan notes :—

Gold.—The Strathdon, with 196,000*l*, has arrived from Australia. There is not much demand for gold bars for exportation; and, with the exception of 35,000*l* taken for Spain, the balance of the above amount is likely to go into the Bank, about 90,000*l* having already been sent in. The Ethiope has brought about 9,000*l* from the Coast of Africa. The Oneida has taken 1,270*l* to the Brazils; the Massilia 21,900*l* to Bombay and 2,000*l* to Alexandria; the America 34,566*l*, and the Edinburgh 44,000*l*, to New York. These two last sums make over 3,250,000*l* sent to America since the 28th of November last. The following ships have sailed for England with gold from Australia :—The Hebe, with 29,000*l*; the Moravian, with 9,600*l*; the Lincolnshire, with 52,000*l*; the Thames, with 68,000*l*; the Ydale, with 23,000*l*; the Monarch, with 89,000*l*; and the Ocean Chief, with 91,000*l*; making a total now at sea of 556,000*l*.

Silver.—Our market has been very quiet, and there being but little demand for the Calcutta and China mail, the price remains at 61¼d per oz standard.

Mexican Dollars.—The dollars brought by the Tasmanian have been sold at 4s 11⅛d per ounce, being a decline of ⅛d per ounce.

India Government Loan Notes have taken a decidedly favourable turn since this day week, owing to the satisfactory nature of the applications for the late sterling loan of 3,000,000*l*.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, refinable, 77s 11d per oz std; Spanish doubloons, 77s 3d per oz. Silver—Bar silver, 5s 1¼d per oz std; bar silver, containing 5 grs gold, 5s 1½d per oz std; fine cake silver, 5s 5⅞d per oz; Mexican dollars, 4s 11⅛d per oz; Spanish dollars (Carolus), 6s 6d per oz, last price; five-franc pieces, 4s 11⅛d per oz.

FAILURES.—An adjourned meeting of creditors of Mr Henry Bateman, timber merchant, who suspended in December last, has been held to receive counsel's opinion whether Mr Browning, his partner in the white wood business, was also a general partner, and, consequently, whether the two estates—the red wood, which Mr Bateman had conducted singly, and white wood—were to be merged into one. The Attorney-General on the one part, and Sir Hugh Cairns on the other, have pronounced that no such general partnership exists, and that the two estates ought, therefore, to be wound up separately. It also appears that proceedings have already been instituted which will probably bring this point to an issue. A second action has likewise been brought against Mr. Bateman under the Bills of Exchange Act, to which there is, practically, no defence. In order, therefore, to protect the interests of the general body of creditors and to insure a proper liquidation on account of the several conflicting claims, it will be necessary for Mr Bateman to go into the *Gazette*. A declaration of insolvency was consequently signed, and the estate will be wound up in the Bankruptcy Court, no imputation, however, being thereby cast on Mr Bateman's conduct. The balance sheet of the red wood trading shows about 7s in the pound, and the white wood 16s 6d; but the creditors of the latter will eventually be paid in full.

A meeting of creditors of Messrs Henry Smith and Son, railway contractors, of Springhill Works, Birmingham, who stopped about three weeks since, has taken place. The balance sheet, prepared by Messrs Quilter, Ball, Jay, and Co., accountants, showed amount due to creditors 18,876*l*, with available assets of 15,429*l*, consisting of good debts, stock, premises, plant, &c. There are also claims on the Buenos Ayres Railway Company, and from the Amsterdam Crystal Palace contract, about which there is some dispute, besides a number of Buenos Ayres shares, amounting to about 15,000*l* in all, which it is hoped will realise sufficient to pay the creditors ultimately 20s in the pound. It was resolved to wind up under inspection.

The suspension of Mr Marco Adutt, a respectable merchant in the Levant trade, owing to losses from the stoppage of a firm at Vienna, has been announced. The liabilities are believed to be small.

The suspension which has been announced of Messrs Gomidos, Panos, and Co., Greek merchants, of Paris, is believed to be only temporary. They are the agents of a wealthy Armenian house at Constantinople, and remittances will probably come by the next steamer, which will enable them to resume.

In a recent letter from Constantinople it was stated that a firm named Psichari and Calvocoressi had suspended. This was an error. The title should have been Psiachi and Calvocoressi.

The stoppage has been announced of Messrs O'Halloran, of 2 New Broad street, coffee growers. They are also connected with the oil and linseed trades. The house has occupied a respectable position. It is hoped that the liabilities will not exceed 20,000*l*. The assets are said to show a surplus, but they consist of produce and estates, both situate in Ceylon. The books have been placed in the hands of Mr. Kemp, the accountant.

A meeting of the creditors of Messrs P. C. Salvago and Co., merchants, has been held, when it was resolved that in order to realise the assets belonging to the firm at Constantinople, Berdianski, and Taganrog, Mr Salvago be authorised to proceed to those places at once, and that he there place himself at the disposal of such parties appointed for the purpose by Mr A. R. Petrocochius, Mr J. Ayelasta, and Mr E.

Mavrogordato, and that the three latter gentlemen, or any two of them, be a committee for the purpose of assisting the liquidation of the estate, and that they be requested to convene a meeting of the creditors when they shall think it necessary, and that in the meantime Messrs Coleman, Turquand, and Co. (the accountants to the estate) be instructed to take measures under the direction of the committee for realising such assets as are outstanding in this country. The liabilities are returned at 42,659*l*, and assets 29,871*l*.

There has also been a meeting of the creditors of Mr S. P. Zizinias, merchant, when it was stated that the liabilities were 66,036*l* 1s 10d, and the assets 10,254*l* 7s 6d.

MISCELLANEOUS.—The following order respecting investments by the Court of Chancery, under the Act passed last Session, 23d and 24th Victoria, cap. 38, has been posted in the Stock Exchange:—

Cash under the control of the Court may be invested in Bank Stock, East India Stock, Exchequer Bills, 2*l* 10s per Cent. Annuities, and upon mortgage of freehold and copyhold estates respectively in England and Wales, as well as in Consolidated Three per Cent. Annuities, Reduced and New.

Every petition for the purpose of the conversion of any Three per Cent. Bank Annuities into any other of the stocks, funds, or securities hereintofore mentioned shall be served upon the trustees, if any, of such Bank Three per Cent. Annuities, and upon such persons, if any, as the Court shall think fit.

CAMPBELL, C.
JOHN ROMILLY, M.R.
J. L. KNIGHT BRUCE, L.J.
G. J. TURNER, L.J.
R. T. KINDERSLEY, V.C.
JOHN STUART, V.C.
W. P. WOOD, V.C.

The above order of the Court of Chancery regarding the investment of trust funds is simply, it is presumed, in formal compliance with the Act passed last Session, authorising the employment of such funds in a wider range of securities than has hitherto been permitted, an Act which, from the extent to which it was carried, was regarded by prudent persons with much regret. Among the new investments allowed is Bank Stock, and on what principle it is difficult to hazard an opinion.

The following statement relative to the amount due today on the New Indian loan will be found interesting. It will be seen that the net sum due is just half a million. Payments in advance will, no doubt, soon commence, notwithstanding the high value of money. Some 200,000*l* of surplus deposits on the tenders for the loan were released on Wednesday:—

	£	s	d
3,000,000*l* at the various prices accepted, produces in cash	2,961,655	18	4
Deduct 80*l* per cent. to be paid on 2nd, 3rd, and 4th instalments	2,400,000	0	0
Leaves	561,655	18	4
Less 2*l* per cent. deposit paid on handing in tenders	60,000	0	0
